### ***Lowman CTC Mission Statement***

Lowman CTC is dedicated to providing rigorous vocational training and instructional programs for students ages 18-22, with moderate-to-severe disabilities that are on the alternate curriculum. Our purpose is to maximize each student's potential, leading to successful outcomes in adult life. The program is designed to maximize student independence, development of vocational abilities, leading to employment, preparation for adult life, and to train students to access adult support services for individuals with disabilities.

***Preparing Students for Adult Life***

## Program Highlights

Charles Leroy Lowman Career and Transition Center provides instruction to students ages 18-22, with moderate to severe disabilities, who are currently on the Alternate Curriculum. Students are provided with independent living skills and social skills instruction, as well as vocational training through a variety of occupational strands, to assist with ensuring that students are prepared and qualified to enter the world of work. Our program also maximizes integration opportunities within the community by providing students with independent travel training skills through Community Based Instructional activities, which creates a greater sense of independence for our students with disabilities.

## Student Outcomes

We partner with parents to support them on their mission to prepare each child for a successful future. Equipping the next generation to be self-sufficient and independent is the greatest gift we can give both students and their families. As each student progresses, they gain deep personal satisfaction and self-respect derived from being a contributing member of society.

### *Vision Statement*

***By providing rigorous vocational training and instructional programs for our students, we aim to empower each student to reach their full potential and develop their unique abilities to become work ready and maximally independent.***

## Parents

As a parent of an adult with special needs, you are committed to providing them with the best growth opportunities possible. We can help you achieve this goal. Our program works cooperatively with LAUSD's District Office of Transition Services (D.O.T.S.), the Department of Rehabilitation, and the L.A. County Regional Center to provide our students with access to an array of support services

## Employers

Businesses that hire individuals with disabilities report a reduction in employee turnover, an increase in employee loyalty, and an increase in morale and productivity of other employees. A 2007 study by DePaul University found that employees with disabilities were just as dependable and productive as employees without disabilities, and had nearly identical job performance ratings.
