EXECUTIVE SUMMARY

WorleyParsons performed a Phase I Environmental Site Assessment (ESA) of the Colfax Elementary School, located at 11724 Addison Street, Los Angeles, California (the Site). The Site consists of an approximately 8.1-acre charter elementary school and kindergarten and is located within Los Angeles County assessor's parcel number (APN) 2355-013-900 at Latitude N34°09'37.21" and Longitude W118°23'19.92". The Site is bounded to the north by single-family dwellings across Addison Street, to the east by single-family dwellings across Colfax Avenue, to the south by single-family dwellings across Huston Street, and to the west by single-family dwellings across Morella Avenue.

ON-SITE FINDINGS

The Site was an arboretum from at least 1928 to 1940 and included a single-family dwelling in the center of the Site. A Grant Deed, dated July 28, 1949, and recorded on September 28, 1949, indicates that the Los Angeles City School District of Los Angeles County, now known as the Los Angeles Unified School District (LAUSD), took ownership of the Site from A. F. Schiffman. Permits issued for construction and certificates of occupancy indicate that the Site was incorporated as a school in approximately 1951. Throughout the years, various construction activities at the Site added and removed various structures, added parking lots and paved areas.

The Site is currently developed with 10 single-story classroom buildings, two single-story restroom buildings, one single-story library building, one single story office building, one two-story assembly/cafeteria building, six intermodal container used to store maintenance supplies, art supplies, earthquake emergency supplies, classroom supplies, and school fair supplies and an animal sanctuary. A paved staff parking area is located in the northern portion of the Site along Addison Street. An additional parking area is located in the eastern portion of the Site on Colfax Avenue. A paved playground area is located in the mid portion of the Site. Three fenced-in concrete padded electrical transformers are located on-Site; one in the eastern portion of Site south of Classroom 26 and two adjacent to the south of the girls restroom near Classroom 12. An electrical room is located near the boy's restroom and Classroom 20. An electrical box and a sprinkler electrical control box are located in the southeastern portion of the Site. A landscaped play area is located in the mid-western portion of the Site. No evidence of releases or spills of hazardous materials or petroleum products was identified at the Site as part of this investigation.

Additionally, no evidence of underground storage tanks (USTs), aboveground storage tanks (ASTs), pits, ponds, lagoons, or hazardous material/petroleum products use, storage or disposal was observed at the Site during the Site reconnaissance inspection, with the exception of three 5-gallon portable gasoline containers, two of which were full at the time of the Site reconnaissance, stored in the art supply intermodal container. Additionally, no evidence of dumping, landfilling, distressed vegetation, or other evidence suggesting the possible release of hazardous substances and/or petroleum products was observed during the Site reconnaissance inspection.

OFF-SITE FINDINGS

From at least 1928 until 1938 the Site was bordered to the north by farms across Addison Street, to the east by farms and single-family dwellings across Colfax Avenue, to the south by single-family residential dwellings across Huston Street, and to the west by an arboretum. In 1938 the arboretum bordering the Site to the west was developed as single-family residential dwellings across Morella Avenue. In 1940 the farms present north of the Site across Addison Street were developed into single-family residential dwellings. In 1952 the remainder of the farms adjacent to the Site were developed into single-family residential dwellings as well as a church to the northeast of the Site on the northeast corner of Addison Street and Colfax Avenue.

The Site is currently bordered to the north by single-family dwellings across Addison Street, to the east by single-family dwellings across Colfax Avenue, to the south by single-family dwellings across Huston Street, and to the west by single-family dwellings across Morella Avenue. Faith Presbyterian Church is located to the northeast of the Site across from the intersection of Addison Street and Colfax Avenue. No evidence of hazardous material and/or petroleum product releases was observed on these properties during the reconnaissance inspection.

Federal, State, and local regulatory database lists were reviewed for cases including, but not limited to, USTs, ASTs, hazardous waste sites, hazardous waste generators, Brownfield sites, hazardous material/petroleum product release sites, abandoned sites, and sites with deed restrictions and/or institutional controls within the specified radii of standards established by the American Society of Testing and Materials (ASTM). The Colfax Elementary School, was identified in the RCRA-LGQ, FINDS, HAZNET, FTTS, and HIST FTTS databases for generation of various hazardous wastes, including lead-based paint, asbestos and PCB wastes generated during the renovation of Site buildings.

OPINION OF ON-SITE FINDINGS

Based on the age of the existing Site buildings, it is possible that lead-based paint (LBP) has been applied to the exterior finishes of the buildings. As such, it is possible that LBP residue is present in soils around the perimeters of the existing and former buildings. It is possible that organochlorinated pesticides (OCP) in the form of termiticides have been applied around the foundations of these Site buildings or in the areas that were previously used for horticulture/agriculture. Additionally, there is the potential presence of arsenic underneath pavement that may have been applied as an herbicide. Based on the age of the existing Site buildings, it is possible that asbestos-containing materials (ACM) are present in building materials. It is WorleyParsons' opinion that the potential presence of LBP residue, OCPs, and arsenic in soil and ACM in the Site building materials constitute recognized environmental conditions (RECs).

Based on the findings of this investigation, no other RECs, historic RECs (HRECs), controlled RECs (CRECs) or de minimus conditions have been identified at the Site.

OPINION OF OFF-SITE FINDINGS

An environmental database report prepared by Environmental Data Resources, Inc. (EDR) was reviewed for local, state, and federal listings for properties within the Site vicinity. Regulatory database lists were reviewed for cases pertaining to leaking USTs and ASTs, hazardous waste sites, and abandoned sites within the specified radii of standards established by the ASTM. Based on the status of these facilities, their distance from the Site, and the reported groundwater flow direction, these sites are not considered RECs.

EXISTING SCHOOL SITES CHECKLIST

An LAUSD Office of Environmental Health Services (OEHS) Existing School Sites checklist was completed as part of this Phase I ESA in accordance with California Department of Education (CDE) requirements. Based on the findings of this investigation, no affirmative answers to the checklist were made with the exception of the following:

 The Site is located within a dam inundation area. However, the Project is not expected to create a new or exacerbate an existing significant safety hazard to students from flooding or dam inundation.

CONCLUSIONS AND RECOMMENDATIONS

WorleyParsons has performed a Phase I ESA of the Site in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and requirements set forth by the LAUSD and the California Department of Education (CDE). Any exceptions to or deletions from this practice are described in Section 13 of this report. This assessment has revealed no evidence of RECs in connection with the Site with the exception of the following:

- a) Potential presence of LBP residue in shallow soils around the drip lines of the existing and former buildings at the Site.
- b) Potential presence of OCP in shallow soils around the foundations of the existing and former buildings and in areas of former horticulture/agriculture at the Site.
- c) Potential presence of arsenic in shallow soils under pavement.
- d) Potential presence of ACM in the Site building materials.

WorleyParsons recommends completion of a site investigation within the boundary of the planned development area that includes collection of soil samples for the evaluation of LBP, OCP, and arsenic and if present, a human health risk assessment to determine if the levels pose a risk to future Site occupants. WorleyParsons recommends completion of a hazardous Material Property Condition Survey to identify and quantify all hazardous materials present at the Site including asbestos, lead-based-paint, mold, PCBs, mercury, tritium, radium, and/or other hazardous materials, in order that work

plans and specifications may be developed for the safe abatement by a licensed and qualified contractor(s) prior to removal/renovation of any Site buildings.

1. INTRODUCTION

This report presents the results of a Phase I Environmental Site Assessment (Phase I ESA) performed by WorleyParsons for the Los Angeles Unified School District (LAUSD) for the Colfax Elementary School (hereinafter referred to as the "Site"). The Site consists of approximately 8.1-acres and is located at 11724 Addison Street in Los Angeles, California (Figures 1 and 2). The Site is located within Los Angeles County assessor's parcel number (APN) 2355-013-900 at Latitude N34°09'37.21" and Longitude W118°23'19.92". The Site is bounded to the north by single-family dwellings across Addison Street, to the east by single-family dwellings across Colfax Avenue, to the south by single-family dwellings across Huston Street, and to the west by single-family dwellings across Morella Avenue. It is WorleyParsons' understanding that the LAUSD plans to add new and improve existing classroom buildings at the Site (hereinafter referred to as "the Project").

1.1 Objective and Purpose

The purpose of this Phase I ESA was to assist in the evaluation of Site-specific safety factors that may be caused or exacerbated by the Project and the potential impact of these safety factors on students at Site. The objective of the Phase I ESA is to identify recognized environmental conditions (RECs) in order to assist in the evaluation of historical land use at the Site, assess for potential environmental impacts on- and off-site, and determine the degree to which any potential environmental impacts may affect on-site occupants, off-site individuals, and the environment. The Phase I ESA was also intended to assist in determining whether further action is needed to characterize and/or mitigate environmental impacts identified during the Phase I ESA.

According to American Society for Testing and Materials (ASTM) Standard Practice E1527-13, the term REC means the presence or likely presence of hazardous substances and/or petroleum products on or near a property under conditions that indicate an existing release, a past release or the material threat of a release into structures on the property or into the ground, groundwater or surface water of the property. WorleyParsons understands that the purpose of this Phase I ESA is to perform due diligence with respect to RECs at the Site in accordance with good commercial and customary practice for conducting an environmental site assessment of a property.

1.2 Scope of Services

The Phase I ESA was performed in general accordance with the American Society for Testing and Materials (ASTM) Designation E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process and WorleyParsons proposal dated August 24, 2015.

The Phase I ESA scope of work included the following tasks:

- a) Contacted the appropriate city, county, and regional agencies regarding records for the Site;
- Reviewed selected government database lists; b)
- Reviewed documents as provided by the LAUSD; c)
- d) Performed a fire insurance map search and review;
- Performed a city directory search and review; e)
- f) Performed a building permits search and review;
- g) Performed a property tax search and review;
- Performed a search and review of available current land title records for environmental cleanup h) liens and other activity and use limitations, such as engineering controls and institutional controls;
- Performed an aerial photograph search and review; i)
- Performed a historical topographic map search and review; j)
- k) Completed the OEHS Existing School Sites checklist; and
- I) Prepared and submitted this Phase I ESA report to the client.

The scope of work for this Phase I ESA did not include collection of environmental samples such as air, soil and groundwater, building materials/finishes suspected of containing asbestos or lead-based paint, or equipment suspected of containing polychlorinated biphenyls (PCBs) or mercury. The scope of work did not include an assessment of the presence of sensitive or endangered species and/or wildlife habitats. This Phase I ESA also did not include an assessment of the environmental compliance status of the Site or a health-based risk assessment.

1.3 Significant Assumptions

WorleyParsons assumes that the purpose of this Phase I ESA is to provide all appropriate inquiry into the previous ownership and use of the Site consistent with good commercial and customary practice in an effort to minimize liability. WorleyParsons also assumes that the information provided by the LAUSD, regulatory database provider, regulatory agencies, and other 3rd parties is true and reliable.

2. SITE DESCRIPTION

The Site consists of an approximately 8.1-acre elementary school and kindergarten. The Site is bounded to the north by single-family dwellings across Addison Street, to the east by single-family dwellings across Colfax Avenue, to the south by single-family dwellings across Huston Street, and to the west by single-family dwellings across Morella Avenue.

The location of the Site is shown on Figures 1 and 2 and is identified as APN 2355-013-900 by the Los Angeles County Assessor's office. The findings of a reconnaissance inspection of the Site are contained in Section 5.

2.1 Description of On-site Buildings, Structures, and Other Features

The Site is currently occupied by ten single-story classroom buildings, two single-story restroom buildings, one single-story library building, one single story office building, a two-story assembly/cafeteria building, an intermodal container used to store maintenance supplies, an intermodal container used to store earthquake emergency supplies, an intermodal container used to store earthquake emergency supplies, an intermodal container used to store classroom supplies, and two intermodal containers used to store school fair supplies. A paved parking area is located in the northern portion of the Site along Addison Street. An additional parking area is located on the eastern portion of the Site on Colfax Avenue. A paved playground area is located in the mid portion of the Site. A landscaped play area is located in the mid-western portion of the Site.

2.2 Description of Current Site Use and Operations

The approximately 8.1-acres Site is currently in use as a charter kindergarten and elementary school. Additional details regarding the Site are contained in Section 5 of this report.

2.3 Description of Past Site Use and Operations

Since at least 1928 to 1940, the Site was used as an arboretum with a single-family dwelling located in the center portion of the Site.

2.4 Description of Site Vicinity and Current Uses of Adjoining Properties

The immediate Site vicinity consists of residential and institutional properties. The Site is bounded to the north by single-family dwellings across Addison Street, to the east by single-family dwellings across Colfax Avenue, to the south by single-family dwellings across Huston Street, and to the west by single-

family dwellings across Morella Avenue. Faith Presbyterian Church is located to the northeast of the Site across from the intersection of Addison Street and Colfax Avenue.

3. USER-PROVIDED INFORMATION

3.1 Title Records

No title records were provided by the LAUSD as part of this Phase I ESA.

3.2 Environmental Liens or Activity and Use Limitations

No information regarding environmental liens or activity and use limitations were provided by LAUSD as part of this Phase I ESA.

WorleyParsons ordered an environmental liens and Activity and Use Limitation (AULs) report for the Site from EDR. The findings of this report indicate that no environmental liens or AULs were found for the Site.

3.3 Specialized Knowledge

The Site is currently in use as a charter kindergarten and elementary school. No other specialized knowledge regarding the Site was provided by the LAUSD as part of this Phase I ESA.

3.4 Commonly Known or Reasonably Ascertainable Information

The Site was an arboretum prior to the construction of the Colfax Elementary School in 1950. No other additional commonly known or reasonably ascertainable information was provided by the LAUSD as part of this Phase I ESA.

3.5 Valuation Reduction for Environmental Issues

No estimated valuation reduction related to known environmental issues associated with the Site was provided by LAUSD as part of this Phase I ESA.

3.6 Owner, Manager, and Occupant Information

Based on information provided by the LAUSD and obtained during research of the Site, the Site is currently owned and operated by the LAUSD as part of the Colfax Elementary School. Interviews regarding the current and historic use of the Site were conducted by Mr. Michael Huma, of WorleyParsons, on Wednesday, September 23, 2015, with Mr. Andrew Fowler, Project Manager for the LAUSD and Mr. Rodrigo Ricon, the Colfax Elementary School Plant Manager. The findings of these interviews are discussed in Section 5. LAUSD provided a plan from AC Martin Architects for a

classroom addition project for the Site. The project boundaries for the classroom addition are shown on Figure 2.

3.7 Reason for Performing Phase I ESA

The purpose of this Phase I ESA was to identify RECs in order to assist in the evaluation of historical land use at the Site, assess for potential environmental impacts on- and off-site, and determine the degree to which any potential environmental impacts may affect on-site occupants, off-site individuals, and the environment. The Phase I ESA was conducted to meet school modification construction and existing school expansion requirements set forth by the California Department of Education, as well as assist in determining whether further action is needed to characterize and/or mitigate environmental impacts identified during the Phase I ESA.

4. RECORDS REVIEW

4.1 Environmental Setting

4.1.1 Regional Physiographic Setting

The Site is located in the southeastern San Fernando Valley area approximately 1.5 miles north of the Santa Monica Mountains in the regional Transverse Ranges Geomorphic Province of Southern California. The province is characterized by elongated northwest-trending mountain ridges separated by straight-sided sediment floored valleys. To the south of this province is the Peninsular Ranges Geomorphic Province which extends southward into San Diego County and Baja California and consists of generally northerly- and northwesterly-trending mountain ranges and associated valleys (California Department of Water Resources [DWR], 1961).

Topographic Setting

According to the United States Geological Survey (USGS) Topographic Map, Van Nuys, California Quadrangle, the Site is approximately 633 feet above mean sea level. The topography in the Site vicinity slopes toward the southeast (EDR, 2015b).

Nearest Surface Water Body

The nearest surface water bodies to the Site are the Tujunga Wash and the Los Angeles River, approximately 0.64 and 0.87 mile, respectively, south-southwest of the Site.

4.1.2 Nearest Ecological Interest

Based on the information provided by the California Environmental Resources Evaluation System (CERES) database, the Information Center for the Environment Mapping Database (ICEMAPS), and the County of Los Angeles, Department of Regional Planning interactive GIS mapping application < http://planning.lacounty.gov/gis/interactive>, the closest area of significant ecological interest is the State Water Resources Control Board Riverine Waterbody (Los Angeles River) area approximately 0.87 mile south-southwest of the Site.

4.1.3 Geology

Regional Geology

The Site is located within the eastern portion San Fernando Valley, an east-trending structural trough within the Transverse Ranges Geomorphic Province of Southern California. The San Fernando Valley is bounded by the Santa Susana Mountains on the northwest, the San Gabriel Mountains on the northeast, the Simi Hills on the west, and the Santa Monica Mountains on the south. The mountains that bound it to the north and south are actively deforming anticlinal ranges bounded on their south sides by thrust faults. The northwest to west-northwest trending fault zones separate large elongated blocks that stand at different structural elevations. These elongate blocks have been divided into the central block, northeastern block, northwestern block and the southwestern block. The Site lies within the central block with its major structural feature being a doubly plunging syncline (Yerkes et al., 1965). As these ranges have risen and been deformed, the San Fernando Valley has subsided and filled with sediment.

The eastern portion of the San Fernando Valley, has received sediment from Pacoima and Tujunga washes. These washes are associated with large river systems that have their sources in the steep, rugged San Gabriel Mountains, which are comprised of crystalline bedrock. The rivers have deposited a broad alluvial fan composed of gravels, sands, sandy silts, and clays that blankets most of the area (DWR, 1961).

Local Geology

Soils in the Site vicinity consist of interbedded layers of unconsolidated and poorly sorted sand, silty sand, sandy silt and silty clay from the surface to 71 feet below ground surface (bgs) and are classified as Quaternary alluvium deposited in the Cenozoic Era (Delta, 2010). These sediments were likely deposited on an alluvial plain associated with the Tujunga Wash and the Los Angeles River.

Eight exploration boreholes were drilled at the Site in 1949 for a foundation investigation prior to construction of the Colfax Elementary School and indicated surface deposits of sand containing some gravel and cobbles and lenses of silty loam. Two boreholes to depths of 17.5 and 7 feet did not extend through the sand. In the remaining boreholes, the sand varied from 7 to 19.5 feet in depth. Below these surface sands, lenticular deposits of sandy loam, silty loam, loam, and sand extended to a depth of 25 feet bgs. Groundwater was not encountered in the exploration boreholes (Dames & Moore, 1949).

4.1.4 Location of Nearest Oil and Gas Fields

Based on the California Department of Conservation, Division of Oil, Gas, and Geothermal Resources (DOGGR) Map W1-2, the Site is not located within an oil and gas field (DOGGR, 2004). The closest oil and gas field is the Salt Lake Oil Field, located approximately 5.62 miles to the south of the Site (DOGGR, 2010).

4.1.5 Location of Nearest Exploratory and Production Oil and Gas Wells

Based on the DOGGR oil and gas well map W1-2, the closest current or historic plugged and abandoned oil and/or gas well to the Site is the plugged and abandoned oil well, Conoco Inc. "Hollywood Freeway" 1, located approximately 0.54-mile north-northeast of the Site (DOGGR, 2004).

4.1.6 Potential for Methane and Hydrogen Sulfide

Methane and hydrogen sulfide are gases associated with the decay of organic matter. In the natural environment, these gases form in localities such as old marine rocks (including oil-bearing strata), peat bogs, marshes and swamps. Anthropogenic sources of these gases may include landfills, waste pools, and the refinement of petroleum products.

Based on the information provided by the City of Los Angeles NavigateLA Web site and information provided by the City of Los Angeles Building and Safety (LADBS) and the City's Public Works Departments, the Site does not lie within a City of Los Angeles designated methane zone.

4.1.7 Nearest Special Study Zone (Alquist-Priolo Act)

Based on a review of the Special Studies Zone Maps provided by the California Department of Conservation Division of Mines and Geology (DMG), the Site is not located within a special study zone. The nearest special study zone that is regulated under the Alquist-Priolo Earthquake Fault Zoning Act (Public Resources Code 2621, Division 2, Chapter 7.5) is in the vicinity of the Hollywood Fault zone, located approximately 4.66 miles south-southeast of the Site. The Hollywood Fault is located within the central portion of the Santa Monica-Hollywood-Raymond Fault system, which is collectively part of a greater than 200-km long west-trending system of oblique, reverse and left-lateral faults that separate the Transverse Ranges Geomorphic Province of California on the north from the Peninsular Ranges Geomorphic Province on the south (Dolan et al., 1997)

4.1.8 Potential for Liquefaction and Landslides

Liquefaction Potential

Based on Section 1, Liquefaction Evaluation Report, of the 1997 DMG Seismic Hazard Zone Report for the Van Nuys 7.5-Minute Quadrangle, four main younger Quaternary soil inventory types were identified in the Van Nuys Quadrangle along with the susceptibility of each unit to liquefaction. These younger Quaternary soil inventory types included very old Pleistocene alluvium consisting of dense to very dense silt and clay deposits in an area of deep groundwater (low susceptible to liquefaction), old Pleistocene alluvium consisting of loose to moderately dense silt and silty sand (high susceptible to liquefaction in areas where groundwater is shallower than 40 feet), young Holocene alluvium consisting of sand with silty sand, silt and gravel (high susceptible to liquefaction in areas where groundwater is shallower than 40 feet), and artificial fill consisting of engineered fill for dams, freeways, and waste landfills (low susceptible to liquefaction as engineering fill is generally too thin to affect liquefaction susceptibility and waste landfills are located in an area of deep groundwater).

The potential for liquefaction at the Site, based on the Seismic Zone Hazard Map for the Van Nuys Quadrangle (1998), the DMG report, and by applying State Mining and Geology Board criteria (see DMG report) for liquefaction zoning, is generally low because groundwater is deeper than 40 feet bgs (DMG, 1997 and State of California Seismic Hazard Zones map, Van Nuys Quadrangle, 1998).

Landslide Potential

Based on Section 2, Earthquake-Induced Landslide Evaluation Report, of the 1997 DMG report and on information provided by the State Seismic Hazard Zones map for the Van Nuys (1997), the Site is not located within an earthquake-induced landslide potential zone (DMG, 1997 and State of California Seismic Hazard Zones map, Van Nuys Quadrangle, 1999).

4.1.9 Potential for Flooding

The Site is not located within a 100 or 500-year flood zone as described by Federal Emergency Management Agency (FEMA) (EDR, 2015a).

4.1.10 Hydrogeology

Regional Hydrogeology

The Site lies within the San Fernando Valley Groundwater Basin, a regional basin encompassing 112,000 acres with the Upper Los Angeles River area. The water-bearing sediments consist of the lower Pleistocene Saugus Formation, Pleistocene and Holocene age alluvium. The groundwater in the basin is mainly unconfined with some confinement within the Saugus Formation in the western part of

the basin and in the Sylmar and Eagle Rock areas (California State Water Rights Board [CSWRB], 1962). Groundwater flows generally from the edges of the basin toward the middle of the basin, then beneath the Los Angeles River Narrows into the Central Subbasin of the Coastal Plain of the Los Angeles Basin. Flow velocity ranges from about 5 feet per year in the western part of the basin to 1,300 feet per year beneath the Los Angeles River Narrows (Upper Los Angeles River Area Watermaster [ULARAW], 1999).

Local Hydrogeology

Records of groundwater conditions in the general vicinity were reviewed at the Los Angeles Department of Public Works, Hydrogeologic Records Division, to obtain groundwater depth near the Site. The nearest water well to the Site is Observation Well 3831J, located approximately 840 feet north of the Site. Groundwater in the well was measured at approximately 133.70 feet bgs on December 3, 2009.

Groundwater was measured at Unocal Site 5261, located at 4654 Laurel Canyon Boulevard and approximately 0.44 mile southwest of the Site, in well MW-6 on July 15, 2011 at depth of 54.29 feet bgs. Groundwater flow direction at this facility was measured to be in the east-southeast direction at 0.01 feet/feet (SAIC, 2011).

Nearest Groundwater Production Wells

There is one groundwater observation well, 3831J, located approximately 840 feet north of the Site and no groundwater production wells located within a 0.25 mile radius of the Site (EDR, 2015a and LACDPW, 2015).

4.2 Standard and Additional Environmental Record Sources

WorleyParsons contracted with EDR to research the available databases containing valuable environmental regulatory database information. EDR researched each database for sites located within the minimum standard search radius, as identified by ASTM 1527-15. Details of sites found in the databases are included in the EDR report (see Appendix 2). Please note that the distance and direction of sites listed within the EDR search radius, as related to the Site, are based on the EDR report and Google Earth. Additionally, direction of gradient of each site listed in the radius report with respect to the Site is based on the expected shallow groundwater flow direction to the east-southeast.

4.3 Historic Use Information

4.3.1 Regulatory Agency Information

Regional Water Quality Control Board, Los Angeles Region

WorleyParsons contacted the Regional Water Quality Control Board, Los Angeles Region (RWQCB), to determine whether files exist for the Site based on the existing or historic Site addresses. See Appendix 4 for copies of agency correspondence. No files were found for the Site address.

California Environmental Protection Agency, Department of Toxic Substances Control

WorleyParsons contacted the California Environmental Protection Agency, Department of Toxic Substances Control (DTSC), in Chatsworth, California, to determine whether files exist for the Site. See Appendix 4 for agency correspondence. No files were found for the Site address.

Los Angeles County Fire Department, DHS Health Hazardous Materials Unit

WorleyParsons contacted the Los Angeles County Fire Department, Health Hazardous Materials Unit, which includes the Los Angeles County Public Health Investigation Unit (PHI), to determine whether files exist for the Site. See Appendix 4 for agency correspondence. No files were found for the Site address.

City of Los Angeles Fire Department, Fire Prevention – Underground Tank Unit

WorleyParsons contacted the City of Los Angeles Fire Department, Fire Prevention – Underground Tank Unit (LAFD-UST) to determine whether files exist for the Site. See Appendix 4 for agency correspondence. No files were found for the Site address.

City of Los Angeles Fire Department, Hazardous Materials Unit

WorleyParsons contacted the City of Los Angeles Fire Department, Hazardous Materials Unit (LAFD-Hazmat) to determine whether files exist for the Site. See Appendix 4 for a copy of agency correspondence. As of the publication date of this report, a response has not been received from this agency.

City of Los Angeles, Department of Building and Safety

WorleyParsons contacted the City of Los Angeles Department of Building and Safety (LADBS) to determine whether files exist for the Site. The LABDS reported that one geotechnical report, one foundation investigation letter, 12 new construction building permit files, 12 certificates of occupancy files, one closed miscellaneous file, and one event permit file exist for the Site.

A report entitled, Report of Foundation Investigation, Proposed Colfax Avenue School, Colfax Avenue and Addison Street, Los Angeles, California for the Los Angeles City Board of Education and letter entitled, Variation in Ground Water Elevation, Foundation Investigation, Proposed Colfax Avenue School, Los Angeles, California for the Los Angeles City Board of Education, dated December 29, 1949 and January 16, 1950, respectively were reviewed. The details of the geotechnical report are

summarized above in Section 4.1.3. The letter indicated that large variations in groundwater occur in the Site vicintity and if water levels are to rise to or above a level of 618 feet bgs differential settlements of impermissible amounts may occur for structures heavier than those contemplated (Dames & Moore, 1950).

Permits were issued on May 12, 1950 for the construction of an administration building, a cafeteria, classroom buildings, restroom buildings and a kindergarten building.

Certificates of occupancy were issued to the owner of the Site, the Los Angeles City School District, on July 20, 1951, March 25, 1953, and August 23, 1955 for the various buildings constructed.

A temporary special events permit was issued on May 31, 2011 for the installation of two tents and two stages.

City of Los Angeles Sanitation District, Industrial Waste Management Division

WorleyParsons contacted the City of Los Angeles Department of Public Works, Industrial Waste Management Division (LAPW-IWMD), to determine whether files exist for the Site. See Appendix 4 for a copy of agency correspondence. No files were found for the Site address.

Office of the State Fire Marshal, Pipeline Division

As part of this Phase I ESA, WorleyParsons requested records for the Site vicinity from the Pipeline Division of the State Fire Marshal's Office. The Office of the State Marshal indicated that there are no pipelines jurisdictional to the State Fire Marshal in the area of the Site. The Office of the State Marshal also recommends use of the National Pipeline Mapping System (NPMS) as a resource tool (State Fire Marshal's Office, 2015).

The NPMS is a dataset containing locations of and information about gas transmission and hazardous liquid pipelines and Liquefied Natural Gas (LNG) plants which are under the jurisdiction of the Pipeline and Hazardous Materials Safety Administration (PHMSA). The NPMS also contain voluntarily submitted breakout tank data. The data is used by PHMSA for emergency response, pipeline inspections, regulatory management and compliance, and analysis purposes. It is used by government officials, pipeline operators, and the general public for a variety of tasks including emergency response, smart growth planning, critical infrastructure protection, and environmental protection.

According to the NPMS database, no hazardous liquid pipelines are located within one mile of the Site (NPMS, 2015).

4.3.2 Fire Insurance Map Search and Review

WorleyParsons requested that EDR conduct a historical Sanborn Fire Insurance Maps search for the Site and immediate vicinity (EDR, 2015c). Maps of the Site and vicinity from 1950, 1955, 1956, 1958, 1960, 1961, 1966 and 1969 were identified and reviewed. A summary of WorleyParsons' review of these maps is included below. Copies of these maps are contained in Appendix 3.

1950

On-site

The northern portion of the Site is occupied by 10 buildings including classrooms, an administration building and a lunch room. The remainder of the Site consists of an open lot. The Site is bounded to the north by Addison, to the east by Colfax, to the south by Huston, and to the west by Morella.

Off-site

The Site is bordered to the north by single-family dwellings across Addison Street, to the east by single-family dwellings across Colfax Avenue, to the south by single-family dwellings across Huston Street, and to the west by single-family dwellings across Morella Avenue. A church is located to the northeast of the Site on the northeast corner of Addison and Colfax.

1955

On-site

The northern portion of the Site is occupied by 15 buildings, which now includes additional classrooms and an auditorium and cafeteria. The remainder of the Site appears similar to the previous map.

Off-site

Additional development has occurred at the church to the northeast of the Site. The remaining surrounding properties appear similar to the previous map.

1956

On-site

The Site appears similar to the previous map.

Off-site

Additional development has occurred at the church to the northeast of the Site. The remaining surrounding properties appear similar to the previous map.

1958

On-site

The northern portion of the Site is occupied by 13 buildings, two classroom buildings observed on the 1956 map have been removed. The remainder of the Site appears similar to the previous map.

Off-site

The surrounding properties appear similar to the previous map.

1960

The Site and surrounding properties appear similar to the previous map.

1961

On-site

The northern portion of the Site is occupied by 12 buildings, one classroom building observed on the 1960 map has been removed. The remainder of the Site appears similar to the previous map.

Off-site

The surrounding properties appear similar to the previous map.

1966

On-site

The northern portion of the Site is occupied by 14 buildings, two additional classrooms have constructed. The remainder of the Site appears similar to the previous map.

Off-site

Additional development has occurred at the church to the northeast of the Site. The remaining surrounding properties appear similar to the previous map.

1969

The Site and surrounding properties appear similar to the previous map.

4.3.3 City Directory Search and Review

WorleyParsons contracted with EDR to research available historical and current city directories based on the Site address. A copy of the complete EDR City Directory Abstract is included in Appendix 3. The following information on Site use and/or occupants was identified (EDR, 2015d).

11724 Addison Street, Valley Village, CA 91607

• 1956, 1962, 1970, 1980, 1985, 2001, 2008, 2013: Colfax Ave Elementary School

4.3.4 Historic Aerial Photograph Search and Review

WorleyParsons contracted with EDR to research available historic aerial photographs of the Site and vicinity. Copies of the aerial photographs are included in Appendix 3 and the Site is outlined. The information below was obtained from the aerial photographs (EDR, 2015e).

1928, Scale 1"= 500'

On-site

The Site is occupied by an arboretum with rows of trees visible.

Off-site

Farms and vacant land are visible to the north of the Site. A school is visible north of what is now Magnolia Boulevard. Farms, single-family dwellings, and vacant land are visible east and south of the Site. An arboretum is visible to the west of the Site. A wash is visible to the east of the Site in the location of the current State Highway 170.

LOS ANGELES UNIFED SCHOOL DISTRICT - OFFICE OF ENVIRONMENTAL HEALTH & SAFETY PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT COLFAX ELEMENTARY SCHOOL, 11724 ADDISON STREET, LOS ANGELES, CALIFORNIA 91607

1938, Scale 1" = 500'

On-site

The Site is occupied by an arboretum. A single family dwelling is visible in the center of the Site.

Off-site

The surrounding properties appear similar to the previous map with the exception of a number of farms now developed into single-family dwellings.

1940, Scale 1"= 500'

On-site

No apparent changes from the 1938 photograph.

Off-site

Additional single-family dwellings have been developed in the surrounding area. A school has been developed at the southeast corner of what is now Sarah Street and Colfax Avenue.

1952, Scale 1"= 500"

On-site

Colfax Elementary School, with 10 buildings, is visible on-Site. A small parking lot is visible 0n the north end of the Site. Numerous trees from the arboretum remain on-Site. The southeastern and southwestern portion of the arboretum has been cleared.

Off-site

Buildings have been constructed northeast of the Site, on the northeast corner of what is now Addison Street and Colfax Avenue. Numerous multi-tenant residential buildings and a few commercial buildings have been developed in the surrounding area.

LOS ANGELES UNIFED SCHOOL DISTRICT – OFFICE OF ENVIRONMENTAL HEALTH & SAFETY PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT COLFAX ELEMENTARY SCHOOL, 11724 ADDISON STREET, LOS ANGELES, CALIFORNIA 91607

1954, Scale 1"= 500'

On-site

Additional buildings have been constructed on-Site. The remainder of the Site appears similar to the previous photograph.

Off-site

Additional multi-tenant residential and commercial buildings have been constructed in the surrounding area.

1964, Scale 1"= 500'

On-site

A few buildings have been removed from mid-eastern portion of the Site. The remainder of the Site appears similar to the previous photograph.

Off-site

Additional multi-tenant residential and commercial buildings have been constructed in the surrounding area. State Highway 170 is under construction further east of the Site. State Highway 101 has been constructed further south of the Site.

1972, Scale 1"= 500'

On-site

Additional small buildings have been constructed on the mid-eastern portion of the Site. A large parking lot is now visible in the eastern portion of the Site. The remainder of the Site appears similar to the previous photograph.

Off-site

Additional commercial buildings have been constructed in the surrounding area. Construction of State Highway 170 is complete further east of the Site. The remainder of the surrounding properties appear similar to the previous photograph.

1977, Scale 1"= 500'

On-site

Small buildings have been removed from the mid-eastern portion of the Site. Two new buildings have been constructed on the southeastern portion of the Site. The remainder of the Site appears similar to the previous photograph.

Off-site

The surrounding properties appear similar to the previous photograph.

1981, Scale 1"= 500'

On-site

Five new buildings have been constructed on the eastern portion of the Site. The remainder of the Site appears similar to the previous photograph.

Off-site

The surrounding properties appear similar to the previous photograph.

1989, Scale 1"= 500'

On-site

Numerous buildings have been removed from the eastern and southeastern portions of the Site. The remainder of the Site appears similar to the previous photograph.

Off-site

The surrounding properties appear similar to the previous photograph.

1994, Scale 1"= 500'

On-site

A new building has been constructed on the eastern portion of the Site. The remainder of the Site appears similar to the previous photograph.

Off-site

The surrounding properties appear similar to the previous photograph.

2002 and 2005, Scale 1"= 500'

On-site

Additional structures are now visible in the eastern portion of the Site. The majority of the mid- to southern portion of the Site appears to have been paved. The remainder of the Site appears similar to the previous photograph.

Off-site

The surrounding properties appear similar to the previous photograph.

2009, 2010 and 2012, Scale 1"= 500'

On-site

The Site appears similar to the previous photograph.

Off-site

Additional commercial development is visible in the surrounding area.

4.3.5 Historic Topographic Maps

WorleyParsons contracted with EDR to research available historic topographic maps that include the Site and vicinity. Copies of the historic topographic maps from 1896 through 1972 are included in Appendix 3. The following is a summary of information obtained from the historic topographic maps (EDR, 2015f).

1896 Santa Monica Quadrangle, 15' Series

No obvious development is depicted on the Site or neighboring properties on this map based on the scale of the map.

1900 Los Angeles Quadrangle, 15' Series

No obvious development is depicted on the Site or neighboring properties on this map based on the scale of the map.

1901 Southern CA Sheet 1 Quadrangle, 60' Series

No obvious development is depicted on the Site or neighboring properties on this map based on the scale of the map.

1902 Santa Monica Quadrangle, 15' Series

No obvious development is depicted on the Site or neighboring properties on this map based on the scale of the map.

1920 Santa Monica Quadrangle, 15' Series

On-site

No obvious development is depicted on the Site on this map based on the scale of the map.

Off-site

Minor development is depicted in the surrounding area of Site.

1926 Burbank Quadrangle, 6' Series

On-site

No development is depicted on the Site on this map.

Off-site

Minor development is depicted in the surrounding area of Site.

1941 Burbank Quadrangle, 6' Series

On-site

No development is depicted on the Site on this map.

Off-site

Minor development is depicted in the surrounding area of Site.

1953 Van Nuys Quadrangle, 7.5' Series

On-site

Colfax Elementary School with approximately 8 buildings is present in the north portion of the Site.

Off-site

Residential development is depicted in the surrounding area of the Site. North Hollywood High School is visible north of the Site, north of Magnolia Boulevard. A church is visible to the northeast of the Site. North Hollywood Park has been created east of the Site. North Hollywood Junior High School is visible south-southeast of the Site. Republic Studio is visible south to the Site, south of Moorpark Street. A wash is visible east of the Site in the present day location of State Highway 170. A channel is present east of the Site at the Tujunga Wash.

1966 Van Nuys Quadrangle, 7.5' Series

On-site

Additional buildings are present in the north portion of the Site.

Off-site

State Highway 170 and an aqueduct have been constructed east of the Site. Additional roads have been constructed in the surrounding area. Grant High School has been constructed northwest of the Site, west of the Tujunga Wash. The remainder of the surrounding properties appear similar to the previous map.

1972 Van Nuys Quadrangle (Photorevised from 1966), 7.5' Series

On-site

The Site appears similar to the previous map.

Off-site

The surrounding properties appear similar to the previous map.

4.3.6 Environmental Data Resources Building Permit Report

WorleyParsons contracted with EDR to research available building department records for indications of environmental conditions. A copy of the EDR Building Permit Report is included in Appendix 3. The following is a summary of information obtained from the EDR Building Permit Report (EDR, 2015g).

EDR searched the City of Los Angeles, Department of Building and Safety, in Valley Village, California, from 1988 to 2015 and the San Bernardino County, Land Use, Building and Safety, in Fontana, California, from 2002 to 2015, and determined that no records exist.

4.3.7 Environmental Data Resources LienSearch™ Report

WorleyParsons contracted with EDR to search for available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls. A copy of the EDR LienSearchTM Report is included in Appendix 3. The following is a summary of information obtained from the EDR Building Permit Report (EDR, 2015h).

One Grant Deed, dated July 28, 1949, and recorded on September 28, 1949, was received from A. F. Schiffman and vested to Los Angeles City School District of Los Angeles County. The legal description states "All that certain piece or parcel of land being Lot 1 of Tract No. 14573, filed 12/07/1950 in Book 397, Page 4, situate and lying in the County of Los Angeles, State of California." The current legal owner is the Los Angeles City School District of Los Angeles County, now known as the LAUSD.

No environmental liens were found for the Site. No other Activity and Use Limitations (AULs) were found for the Site.

4.4 Historical Use of Adjoining Properties

Based on the information obtained for Section 4.3, Historic Use Information, the properties adjacent to the Site have consisted of arboretums, farms, and single-family dwellings from at least 1928 until 1the present. A church was constructed to the northeast of the Site in 1952 on the northeast corner of Addison Street and Colfax Avenue.

5. SITE RECONNAISSANCE

On September 23, 2015, a reconnaissance inspection of the Site was conducted by Mr. Michael Huma of WorleyParsons. Mr. Huma was escorted by Mr. Rodrigo Ricon, Plant Manager of the Colfax Elementary School and accompanied by Mr. Andrew Fowler, Project Manager/Consultant of the LAUSD OEHS. The purpose of the Site reconnaissance was to inspect the Site, its current operations and observe the neighboring properties for evidence of the use and/or the release of hazardous materials or petroleum products that may impact the Site in accordance with ASTM Standard Practice 1527-13 (ASTM, 2013).

5.1 Methodology and Limiting Conditions

The entire Site was visually inspected and observations of the adjacent properties were made from the Site's boundaries and/or public streets and sidewalks. WorleyParsons' personnel were allowed access to a classroom, the plant manager's office, and intermodal containers storing various supplies at the Site. Photographs documenting Site conditions at the time of the reconnaissance inspection were taken and are included in Appendix 1.

5.2 General Site Setting

The Site consists of the approximately 8.1-acre Colfax Elementary School, located at 11724 Addison Street in Los Angeles, California. The Site contains ten singe-story classroom buildings, two single-story restroom buildings, one single-story library building, one single story office building, one two-story assembly/cafeteria building and six intermodal containers. The Site is bounded to the north by single-family dwellings across Addison Street, to the east by single-family dwellings across Colfax Avenue, to the south by single-family dwellings across Huston Street, and to the west by single-family dwellings across Morella Avenue. Faith Presbyterian Church is located to the northeast of the Site on the northeast corner of Addison Street and Colfax Avenue.

5.3 Exterior Observations

Site: The Site contains classroom buildings, restrooms buildings, a library building, an office building, an assembly/cafeteria building, an intermodal container used to store maintenance supplies, an intermodal container used to store earthquake emergency supplies, an intermodal container used to store classroom supplies, and two intermodal containers used to support school fair supplies. A garden is located in the western portion of the Site along the property boundary. A small enclosed animal sanctuary with one pig, two sheep, chickens, ducks, rabbits, and guinea pigs is located in the southern portion of the Site along the property boundary. A paved staff parking area is located in the northern portion of the Site along Addison Street. An additional parking area is located in the eastern portion of the Site along Colfax Avenue. A

paved playground area is located in the mid portion of the Site. Three fenced-in concrete padded electrical transformers are located on-Site; one in the eastern portion of Site south of Classroom 26 and two adjacent to the south of the girls restroom near Classroom 12. An electrical room is located near the boy's restroom and Classroom 20. An electrical box and a sprinkler electrical control box are located in the southeastern portion of the Site. A landscaped play area is located in the mid-western portion of the Site. Solid waste is stored in three waste bins and recyclable waste is stored in two waste bins in a fenced area in the eastern portion of the Site and are all serviced of by Republic Services. Natural gas service lines for the Site buildings enter the Site from the adjacent Addison Street and Colfax Avenue.

No evidence of the use, storage or release of hazardous materials or petroleum products was observed in the exterior areas of the Site.

Surrounding Properties: The Site is surrounded by single family residential properties with the exception of a church property located to the northeast of the Site. No evidence of the use, storage or release of hazardous materials or petroleum products was observed on the surrounding properties.

5.4 Interior Observations

The interior of the classrooms at the Site contained books, desks, and other teaching aids typical of an elementary school. Non-hazardous materials are stored in an intermodal container adjacent to the Plant Manager's office and Classroom 12. Materials stored consist of twelve 7-pound containers of Uni-Kleen concentrated cleaner with pine oil, nine 1-gallon containers of steam shampoo, eight 2-liter containers of Quick Fill Compact 310 (concentrated floor cleaner), eleven 2-liter containers of Quick Fill Compact 905 (cleaner), six 5-gallon containers of Super Polymer 85 (floor finish), eight 1-gallon containers of Floor Stripper, one -1-gallon container of HD-CH II Industrial Cleaner, and two 1-gallon containers of Neutral Floor Cleaner and Spray Buffing Solution. Three 5-gallon portable gasoline containers used for lawn maintenance, two of which were full at the time of the Site reconnaissance, and a flammable locker containing four 2.6-fluid ounce containers of engine oil, three 1-quart containers of multi-purpose oil, and two 1-quart containers of multi-purpose paint are stored in the art supply intermodal container.

No other evidence of the use, storage or release of hazardous materials or petroleum products was observed in the interior areas of the Site.

6. INTERVIEWS

6.1 Interview with Site Owner's Representatives

On September 23, 2015, WorleyParsons interviewed Mr. Rodrigo Ricon, Plant Manager, of the Colfax Elementary School and Mr. Andrew Fowler, the LAUSD OEHS Project Manager for the Site regarding the current and historic use of the Site. Mr. Ricon has been associated with the Site since 2012. During this time, Mr. Rico and Mr. Fowler indicated that the Site has been used as a school and to the best of their knowledge has always been in use as a school since 1952. Mr. Ricon reported, to the best of his knowledge, that no hazardous materials or associated wastes are stored at the Site. Additionally, to the best of their knowledge, no releases of such materials have occurred at the Site. Details regarding the interviews with Mr. Ricon and Mr. Fowler are contained in Appendix 5.

7. ON-SITE ISSUES

The following conditions and practices were observed during the Site reconnaissance conducted on Wednesday, September 23, 2015.

7.1 Hazardous Material Handling (Including Inventory of All Chemicals Observed)

No hazardous material handling and no chemicals were observed on-Site during the Site reconnaissance with the exception of the small quantities of gasoline, paint, oil and janitorial supplies noted in Section 5. The Colfax Elementary School is registered as a large quantity hazardous waste generator for lead and asbestos abatement work previously conducted at the Site.

7.1.1 Current Hazardous Material Handling Practices

Hazardous material handling practices on-Site are comprised of the use of standard janitorial supplies for classroom and restroom cleaning as needed. Three 5-gallon portable gasoline containers used for lawn maintenance, two of which were full at the time of the Site reconnaissance, are stored in the art supply intermodal container.

7.1.2 Past Hazardous Material Handling Practices

According to Mr. Ricon, the Plant Manager for the Colfax Elementary School, hazardous materials have not been stored or handled on the Site with the exception of standard janitorial supplies and three 5-gallon portable gasoline containers.

7.1.3 Current and Past On-site Underground Storage Tanks (USTs)

Based on the data obtained for the Site, no evidence was found regarding current and/or past USTs on-site.

7.1.4 Current and Past On-site Aboveground Storage Tanks (ASTs)

Based on the data obtained for the Site, no evidence was found regarding current and/or past ASTs on-site.

7.2 Solid and Hazardous Waste Handling Practices

No solid and hazardous material handling practices were observed on-Site during the Site reconnaissance.

7.2.1 Waste Handling and Storage

Solid waste is stored in three waste bins and recyclable waste is stored in two waste bins in a fenced area in the eastern portion of the Site.

7.2.2 On-site Disposal

Solid and recyclable waste disposal is performed by Republic Services.

7.2.3 Visible Signs of Releases and Spills

No visible signs of releases or spills were observed on-Site during the Site reconnaissance. According to Mr. Ricon, no hazardous materials or petroleum product releases have occurred at the Site.

7.2.4 Potential Future Environmental Liabilities to District from Past Waste Disposal Practices

Based on the data obtained as part of this investigation, no evidence of potential future environmental liabilities to the LAUSD from past waste disposal practices was identified.

7.3 Subsurface Impacts to On- and/or Off-site Soil

No evidence of subsurface impacts to on- or off-Site soil were observed on-Site during the Site reconnaissance.

7.3.1 Use of Imported Fill Material

The use of fill material in the construction of the Site is likely, although positive proof of the use of fill or its source has not been identified from the data obtained to date.

7.3.2 Previous Site Assessments

A civil engineering consultant, Dames & Moore, conducted a foundation investigation on December 29, 1949 and January 16, 1950 in advance of construction of the school buildings. The investigation included the advancement of soil boreholes to a maximum depth of 25 feet bgs. Groundwater was not encountered in the exploration boreholes; however, Dames & Moore indicated that large variations in groundwater occur in the Site area and if water levels are to rise to or above a level of 618 feet bgs differential settlements of impermissible amounts may occur for structures heavier than those contemplated (Dames & Moore, 1949, 1950).

No other previous assessment reports were identified for the Site.

7.4 Subsurface Impacts to On- and/or Off-site Groundwater

Based on the data obtained as part of this investigation, no information has been found to suggest subsurface impacts to on- and/or off-site soil or groundwater has occurred.

7.4.1 Source for Site Water Supply

Potable water is supplied to the Site by the Los Angeles Department of Water and Power.

7.4.2 Site Drainage and Stormwater Issues

No site drainage and stormwater issues were identified on-Site during the Site reconnaissance.

7.5 Site Permits

According to the LADBS, a temporary special events permit was issued on May 31, 2011 for the installation of two tents and two stages. Permits associated with the development of the Site as a school in the 1950s were reviewed at the LADBS and are discussed in Section 4.3

7.5.1 Site Permits on File with Environmental Regulatory Agencies

Current Permits

No current permits for the Site were found on file with regulatory agencies.

Historical Permits

No historical permits for the Site were found on file with regulatory agencies.

Noncompliance and Permit Violations

No information has been found to date regarding noncompliance or permit violations for the Site.

7.5.2 Site Listings with Regulatory Agencies

Based on the data obtained, the Site address (11724 Addison Street, Colfax Elementary School) is listed in the following regulatory databases:

RCRA-LQG. The Site is listed as a large quantity hazardous waste generator for the generation
of lead wastes associated with lead-based paint abatement activities conducted at the Site.
According to the EDR report, no violations associated with the generation of this waste have
been reported.

- HAZNET and FINDS. The Site is listed in the HAZNET and FINDS database for generation of 0.83 tons of polychlorinated biphenyls (PCBs) and material containing PCBs; 0.114 tons of other organic solids; 29.558 tons of other inorganic solids; 94.4 tons of asbestos containing waste; 0.55 tons of laboratory waste chemicals.
- **FTTS and HIST FTTS**. The Site is listed in the FTTS and HIST FTTS database. An inspection was conducted in April 12, 2004 for lead, according to Section 402, and a violation was noted.

According to Mr. Ricon, these materials are not stored on the Site. Additionally, based on the Site reconnaissance inspection, no evidence of the storage or release of such materials was observed at the Site.

7.6 Asbestos-containing Materials (ACM)

Based on the estimated age of the on-site buildings, there is a potential for asbestos-containing materials (ACM) to be present. However, sampling and analysis of suspect ACM was not included in the Phase I ESA scope of work.

7.6.1 Suspected ACM Sampling and Sampling Results

Sampling of suspect ACM was not included in the scope of work for this Phase I ESA.

7.7 Lead-based Paint (LBP)

Based on the estimated age of the on-site buildings, there is a potential for lead-based paint (LBP) to be present. However, sampling and analysis of suspect LBP was not included in the Phase I ESA scope of work.

7.7.1 Suspected LBP Sampling and Sampling Results

Sampling of suspect LBP was not included in the scope of work for this Phase I ESA.

7.8 Polychlorinated Biphenyl (PCB)-containing Equipment

Three electrical transformers were observed on-Site during the Site reconnaissance. All three transformers are pad-mounted dry-type manufactured by Siemens USA.

7.9 Radon

The United States Environmental Protection Agency (USEPA) and the USGS have evaluated the radon potential in the United States and have included Los Angeles County in Zone 2, or moderate radon potential (from 2 to 4 picoCuries per liter). Current information on radon in California is available

at

http://www.conservation.ca.gov/cgs/minerals/hazardous_minerals/radon/Documents/sr182map.pdf and http://www.epa.gov/radon/states/california.html.

Radon gas testing was not included in the scope of work for this Phase I ESA. However, according to the Radon Potential Zone Map for Southern Los Angeles County, California, the Site is in an area for Low Potential for Indoor Radon Levels above 4.0 picoCuries per liter (California Department of Conservation, California Geological Survey, 2005).

7.10 Odors Noticed Indoors

No odors were noticed indoors on-Site during the Site reconnaissance.

7.11 California Department of Education (CDE) Existing Schools Issues

An LAUSD OEHS Existing School Sites checklist was completed as part of this Phase I ESA in accordance with California Department of Education (CDE) requirements. A summary of the checklist is provided in the sections below. A copy of the checklist is contained in Appendix 6.

7.11.1 Proximity to Power Lines/Electromagnetic Fields

Pursuant to CCR, Title 5, Section 14010(c), the property line for a new school site shall be the following minimum distances from the edge of a high-voltage power line easement: 100 feet for 50–133 kV lines; 150 feet for 220–230 kV lines; and 350 feet for 500–550 kV lines. Based on the Site reconnaissance, no high-voltage power transmission lines were observed within the vicinity of the Site. Additionally, WorleyParsons contacted Southern California Edison (SCE) for information regarding the presence of easements for aboveground or underground power lines of 50 kilovolts or greater within 100 feet of the Site. According to SCE and the following website http://www.gosolarcalifornia.ca.gov/utilities/, the utility provider for the Site area is the Los Angeles Department of Water and Power. WorleyParsons contacted the Los Angeles Department of Water and Power by telephone and described the nature of the call, however, as of the date of this report no information has been received by WorleyParsons from the Los Angeles Department of Water and Power regarding high-voltage power transmission lines in the Site area. During the Site reconnaissance inspection, no 50–133 kV lines, 220–230 kV lines, or 500–550 kV lines were observed within 100, 150, or 350 feet of the Site, respectively.

7.11.2 Railroads

Based on aerial photographs and topographic maps, no railroad lines are located within 1,500 feet of the Site. Based on this, the Project is not expected to create a new or exacerbate an existing significant safety hazard to students from railroads within 1,500 feet of the Site.

7.11.3 Traffic Noise

The Site is located within a residential area. No major highways or freeways are located adjacent to the Site. Based on this, the Project is not expected to create a new or exacerbate an existing significant safety hazard to students from adjacent roads or freeways that will adversely affect the educational program.

7.11.4 Faults

Based on a review of the Special Studies Zone Maps provided by the California Department of Conservation Division of Mines and Geology (DMG), the Site is not located within a special study zone. Based on this, the Project is not expected to create a new or exacerbate an existing significant safety hazard to students from an active earthquake fault or fault trace which may be onsite.

7.11.5 Flood or Inundation Area

According to EDR, the Site is not located with either a 100-year or 500-year flood zone (EDR 2015a). According to the County of Los Angeles, the Site is located within a dam inundation area (County of Los Angeles, 2014). However, the Project is not expected to create a new or exacerbate an existing significant safety hazard to students from flooding or dam inundation.

7.11.6 Pipelines and Aboveground Storage Tanks (ASTs)

According to the EDR Overview Map (EDR, 2015a), a natural gas pipeline traverses the center of the Site in a north-south direction. However, during a supplemental Site visit on October 26, 2015, this reported pipeline was verified as a dedicated gas service line for the Site buildings that enters the Site from the adjacent Addison Street. A second gas service line for the Site buildings enters the Site from the adjacent Colfax Avenue.

The California State Fire Marshal (CSFM) was contacted to determine the ownership of any fuel or crude oil pipelines on or near the Site within 1,500 feet of the proposed school site. Based on the response received from the CSFM (facsimile dated September 11, 2015), no pipelines in their jurisdiction are located within 1,500 feet of the Site.

During the Site reconnaissance inspection, no ASTs were observed on the surrounding properties or in the Site vicinity. Additionally, according to the EDR report, no facilities with registered ASTs are located within 0.5-mile of the Site. Based on this, the Project is not expected to create a new or exacerbate an existing significant safety hazard to students from nearby above-ground water or fuel storage tanks.

7.11.7 Liquefaction and Landslides

The potential for liquefaction at the Site, based on the Seismic Zone Hazard Map for the Van Nuys Quadrangle (1998), the DMG report, and by applying State Mining and Geology Board criteria (see DMG report) for liquefaction zoning, is generally low because groundwater is deeper than 40 feet bgs (DMG, 1997 and State of California Seismic Hazard Zones map, Van Nuys Quadrangle, 1998).

Based on Section 2, Earthquake-Induced Landslide Evaluation Report, of the 1997 DMG report and on information provided by the State Seismic Hazard Zones map for the Van Nuys (1997), the Site is not located within an earthquake-induced landslide potential zone (DMG, 1997 and State of California Seismic Hazard Zones map, Van Nuys Quadrangle, 1999).

Based on this, the Project is not expected to create a new or exacerbate an existing significant safety hazard to students from liquefaction or landslides.

7.11.8 Traffic and Pedestrian Safety

The site is located within a residential neighborhood and is not located adjacent to any major arterial streets. Based on this, the Project is not expected to create a new or exacerbate an existing significant safety hazard to students from an adjacent major arterial street.

7.11.9 Compatible Zoning

The Project involves construction of new and renovation of existing classroom buildings at the Site and is not expected to affect existing zoning for the Site and vicinity. Based on this, the Project is not expected to create a new or exacerbate an existing significant safety hazard to students from the zoning surrounding the Site.

7.11.10 Light, Wind and Air Pollution

The Project involves construction of new and renovation of existing classroom buildings at the Site. Based on this, the Project is not expected to create a new or exacerbate an existing significant safety hazard to students from light, wind or air pollution.

7.11.11 Easements

According to EDR, a natural gas pipeline easement traverses the center of the Site in a north-south direction. This pipeline is discussed in Section 7.11.6 above. Based on this, the Project may create a new or exacerbate an existing significant safety hazard to students, which may restrict access or building placement.

7.11.12 Border Zone Property

Pursuant to CCR, Title 5, Section 14010(t), a school site shall not be located on or within 2,000 feet from a significant disposal of hazardous waste. Based on information obtained from an EDR research of available environmental databases in the vicinity of the Site, WorleyParsons obtained the following information related to hazardous substance release or disposal sites:

- ENVIROSTOR Database DTSC: no Federal or State National Priority List sites found within the 2,000 feet of the Site.
- USEPA: no current or former hazardous or solid waste disposal properties found within 2,000 feet of the Site.
- SWF/LF California Department of Resources Recovery and Recycling; no landfills were listed within 2,000 feet of the Site.
- WMUDS/SWAT database State Water Resources Control Board (SWRCB): no sites were listed within 2,000 feet of the Site.

Based on this, the Project is not expected to create a new or exacerbate an existing significant safety hazard to students from a significant disposal of hazardous waste within 2,000 ft. of the Site.

7.11.13 Cellular Phone Towers

According to www.CellReception.com, a database that maps towers registered with the Federal Communications Commission (FCC), no cellular phone towers are located within one mile of the Site.

7.11.14 Air Pollution

The closest major roadways to the Site are State Highways 101 and 170, located approximately 0.34 miles south and 0.38 miles east of the Site, respectively. No railroad lines are located within 500 feet of the Site. Based on this, the Project is not expected to create a new or exacerbate an existing significant safety hazard to students from a major transportation corridor.

The Site is located within a residential neighborhood. The Project involves construction of new and renovation of existing classroom buildings at the Site. Based on this, the Project is not expected to create a new or exacerbate an existing significant safety hazard to students from a major stationary source of emissions within 500 feet of the Site.

7.11.15 Methane Zone

Based on the information provided by the City of Los Angeles NavigateLA Web site and information provided by the City of Los Angeles Building and Safety (LADBS) and the City's Public Works Departments, the Site does not lie within a City of Los Angeles designated methane zone. Per the

California Department of Conservation, Division of Oil, Gas and Geothermal Resources, the Site is not located within a designated oil field. Based on this, the Project is not expected to create a new or exacerbate an existing significant safety hazard to students from a known methane zone or oil field.

7.11.16 Oil Wells

Based on the DOGGR oil and gas well wildcat map W1-2, there are no current or historic plugged and abandoned oil and/or gas well on the Site. The closest to the Site is the plugged and abandoned oil well, Conoco's. "Hollywood Freeway" 1, located approximately 0.54-mile north-northeast of the Site (DOGGR, 2004). Based on this, the Project is not expected to create a new or exacerbate an existing significant safety hazard to students from an on-site oil well.

7.11.17 Airports

The closest airport to the Site is the Bob Hope Burbank Airport, located approximately 2.63 miles northnortheast of the Site. Based on this, the Project is not expected to create a new or exacerbate an existing significant safety hazard to students from an airport within two nautical miles of the Site.

7.12 Surrounding Land Uses

Based on documents reviewed, the land surrounding the Site consists of residential properties.

7.13 Easements

Based on information obtained during this assessment, no easements were identified at the Site.

8. FINDINGS

8.1 General Findings

The Site is consists of the approximately 8.1-acre Colfax Elementary School located at 11724 Addison Street in Los Angeles, California. The Site contains school buildings, intermodal containers for storage of school and maintenance supplies and an animal sanctuary. No evidence of the storage or release of hazardous materials were reported at the Site or observed during the Site reconnaissance inspection with the exception of small quantities of janitorial supplies, three 5-gallon portable gasoline containers, two of which were full at the time of the Site reconnaissance, and a few small containers of oil stored in the art supply intermodal container. The Colfax Elementary School is identified as a large quantity hazardous waste generator; as a results of past school renovation activities, which included the abatement of asbestos, lead-based paint and PCB-containing equipment. According to Mr. Rodrigo Ricon, the Site Plant Manager, these wastes are not and have not been stored at the Site.

Historically, the Site was an arboretum from at least 1928 to 1940 and included a residential dwelling. A Grant Deed, dated July 28, 1949, and recorded on September 28, 1949, indicates that the Los Angeles City School District of Los Angeles County, now known as the LAUSD, took ownership of the Site from A. F. Schiffman. Permits issued for construction and certificates of occupancy indicate that the Site was incorporated as a school in approximately 1951. Throughout the years, various construction activities occurred at the Site which added and removed various structures and parking areas.

The Site is currently bordered to the north, south, east and west by residential properties beyond Addison and Hudson Streets and Colfax and Morella Avenues, respectively. A church property is located adjacent to the northeast of the Site.

8.2 SCHOOL SITE SELECTION CHECKLIST

An LAUSD OEHS Existing School Sites checklist was completed as part of this Phase I ESA in accordance with California Department of Education (CDE) requirements. Based on the findings of this investigation, no affirmative answers to the checklist were made with the exception of the following:

 The Site is located within a dam inundation area. However, the Project is not expected to create a new or exacerbate an existing significant safety hazard to students from flooding or dam inundation.

8.3 Known or Suspect Recognized Environmental Conditions

It is WorleyParsons' opinion that RECs exist at the Site. These RECs include the potential presence of LBP residue, OCP, and arsenic in soils at the Site and ACM in the Site building materials. Based on

the age of the existing Site buildings, it is possible that lead-based paint (LBP) has been applied to the exterior finishes of the buildings. As such, it is possible that LBP residue is present in soils around the perimeters of the existing and former buildings. It is possible that organochlorinated pesticides (OCP) in the form of termiticides have been applied around the foundations of these Site buildings or in the areas that were previously used for horticulture/agriculture. Additionally, there is the potential presence of arsenic underneath pavement that may have been applied as an herbicide. Based on the age of the existing Site buildings, it is possible that asbestos-containing materials (ACM) are present in building materials.

9. CONCLUSIONS

WorleyParsons has performed a Phase I ESA of the Site in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and requirements set forth by the LAUSD and the CDE. Any exceptions to or deletions from this practice are described in Section 13 of this report. This assessment has revealed no evidence of RECs in connection with the Site with the exception of the following:

- Potential presence of LBP residue in shallow soils around the drip lines of the existing and a) former buildings at the Site.
- b) Potential presence of OCP in shallow soils around the foundations of the existing and former buildings at the Site and in areas of former horticulture/agriculture at the Site.
- Potential presence of arsenic in shallow soils under pavement at the Site. c)
- d) Potential presence of ACM in Site building materials.

10. RECOMMENDATIONS

WorleyParsons recommends completion of a site investigation within the boundary of the planned development area that includes collection of soil samples for the evaluation of LBP, OCP, and arsenic and if present, a human health risk assessment to determine if the levels pose a risk to future Site occupants. WorleyParsons recommends completion of a hazardous Material Property Condition Survey to identify and quantify all hazardous materials present at the Site including asbestos, lead-based-paint, mold, PCBs, mercury, tritium, radium, and/or other hazardous materials, in order that work plans and specifications may be developed for the safe abatement by a licensed and qualified contractor(s) prior to removal/renovation of any Site buildings.

12. ADDITIONAL SERVICES

No additional services outside the proposed scope of work in WorleyParsons' proposal, dated August 24, 2015 were conducted as part of this Phase I ESA.

13. DISCLAIMER

The information presented in this document was compiled and interpreted exclusively for the purposes stated in Section 1 of the document. WorleyParsons provided this report for the Los Angeles Unified School District solely for the purpose noted above.

WorleyParsons has exercised reasonable skill, care, and diligence to assess the information acquired during the preparation of this report, but makes no guarantees or warranties as to the accuracy or completeness of this information. The information contained in this report is based upon, and limited by, the circumstances and conditions acknowledged herein, and upon information available at the time of its preparation. The information provided by others is believed to be accurate but cannot be guaranteed.

WorleyParsons does not accept any responsibility for the use of this report for any purpose other than that stated in Section 1 and does not accept responsibility to any third party for the use in whole or in part of the contents of this report. Any alternative use, including that by a third party, or any reliance on, or decisions based on this document, is the responsibility of the alternative user or third party.

No part of this publication may be reproduced, stored in a retrieval system, or transmitted, in any form or by any means, electronic, mechanical, photocopying, recording, or otherwise, without the prior permission of WorleyParsons.

Any questions concerning the information or its interpretation should be directed to M. Huma or R. Beck.

13.1 Limitations and Exceptions

Site-specific activities performed by WorleyParsons and information collected regarding these activities is summarized in the following sections. The findings of this Phase I ESA are presented in Section 8. Conclusions drawn and recommendations made by WorleyParsons, based on the information collected as part of the Phase I ESA, are presented in Sections 9 and 10, respectively. This Phase I ESA was conducted in a manner consistent with that level of care and skill ordinarily exercised by members of the profession currently practicing in the same locality under similar conditions.

The observations and conclusions presented in this report are professional opinions based on the scope of activities, work schedule, and information obtained through the Phase I ESA described herein. Opinions presented herein apply to site conditions existing at the time of our study and cannot necessarily be taken to apply to site conditions or changes that we are not aware of or have not had the opportunity to evaluate. It must be recognized that conclusions drawn from these data are limited to the amount, type, distribution, and integrity of the information collected at the time of the investigation, as well as the methods utilized to collect and evaluate the data, and that a full and complete determination of environmental risks cannot be made. Although WorleyParsons has taken

steps to obtain true copies of information available from third parties, we make no representation or warranty with respect to the accuracy or completeness of this information.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 05/04/2015 has revealed that there are 4 ENVIROSTOR sites within approximately 1.125 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, and dated 06/15/2015 has revealed that there is 1 UST site within approximately 0.375 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 3 SWEEPS UST sites within approximately 0.375 miles of the target property.

Other Ascertainable Records

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the HAZNET list, as provided by EDR, and dated 12/31/2013 has revealed that there are 2 HAZNET sites within approximately 0.125 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 8 EDR US Hist Auto Stat sites within approximately 0.375 miles of the target property.

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there is 1 EDR US Hist Cleaners site within approximately 0.375 miles of the target property.

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Document Type: Site Screening
Completed Date: 11/18/1992

Comments: The site is proposed to develop as North Hollywood Superior Court.

The subsurface contamination at the site is greater than 10-13 feet. The contamination ia mainly from oil spilled hydrocarbon. The site is contaminates with light solvents, xylenes and toluenes, lead and PCBs. One above ground tank is on the property. The site consists of ten lots which include office buildings, restaurants, auto repair shops, auto body shops, and residential places. Some of the business

activities at the site is still opeational. LA County is the lead.

Therefore, NFA for the Department

NO SITES FOUND

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995 Date Data Arrived at EDR: 07/03/1995 Date Made Active in Reports: 08/07/1995

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR US Hist Cleaners: EDR Exclusive Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Version Date: 2012

Northeast Map: 5630791 BURBANK, CA

Version Date: 2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General East

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

VAN NUYS

YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

 MAP ID Not Reported
 LOCATION FROM TP
 GENERAL DIRECTION GROUNDWATER FLOW

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

GEOLOGIC AGE IDENTIFICATION

Era: Cenozoic Category: Stratifed Sequence

System: Quaternary Series: Quaternary

Code: Q (decoded above as Era, System & Series)

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

Soil Layer Information							
	Boui	ndary		Classif	ication		
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: loam

clay silt loam loamy sand sandy loam fine sand clay loam

gravelly - sandy loam

coarse sand gravelly - sand

sand

Surficial Soil Types: loam

clay silt loam loamy sand sandy loam fine sand clay loam

gravelly - sandy loam coarse sand

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

The EDR Aerial Photo Decade Package

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by WorleyParsons were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

ASTM and EPA Requirements

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquires (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

EXECUTIVE SUMMARY: SEARCH DOCUMENTATION

A search of building department records was conducted by Environmental Data Resources, Inc (EDR) on behalf of WorleyParsons on Aug 31, 2015.

TARGET PROPERTY

11724 Addison Street Valley Village, CA 91607

SEARCH METHODS

EDR searches available lists for both the Target Property and Surrounding Properties.

RESEARCH SUMMARY

Building permits identified: YES

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

GLOSSARY

General Building Department concepts

- ICC: The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections): This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- Jurisdiction: This is the geographic area representing the properties over which a Permitting Authority has
 responsibility.
- GC: General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- Journeymen: Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- HVAC (Mechanical, Heating & Air companies): HVAC = Heating, Ventilation, and Air Conditioning.
- ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release): Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other commons reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- "Pull" a permit: To obtain and pay for a building permit.
- CBO: Chief Building Official
- Planning Department: The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- Zoning Department: The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- Zoning District: A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- PIN (TMS, GIS ID, Parcel#): Property Identification Number and Tax Map System number.
- State Card (Business license): A license card issued to a contractor to conduct business.
- Building Inspector (Inspector): The inspector is a building department employee that inspects building construction for compliance to codes.
- C.O.: Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

GLOSSARY

Permit Content Definitions

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use(s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

Sample Building Permit Data

Date: Nov 09, 2000 Permit Type: Bldg -

New Permit Number: 101000000405 Status: Valuation: \$1,000,000.00 Contractor Company: OWNER-BUILDER

Contractor Name:

Description: New one store retail (SAV-ON) with drive-thru pharmacy. Certificate of Occupancy.

The EDR Environmental LienSearch™

The EDR Environmental LienSearch Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- · access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.

Please contact EDR at 1-800-352-0050 with any questions or comments.

The EDR Property Tax Map Report

EDR Property Tax Map Report

Environmental Data Resources, Inc.'s EDR Property Tax Map Report is designed to assist environmental professionals in evaluating potential environmental conditions on a target property by understanding property boundaries and other characteristics. The report includes a search of available property tax maps, which include information on boundaries for the target property and neighboring properties, addresses, parcel identification numbers, as well as other data typically used in property location and identification.

Thank you for your business.

Please contact EDR at 1-800-352-0050 with any questions or comments.

COUNTY OF LOS ANGELES DEPARTMENT OF PUBLIC WORKS 900 SOUTH FREMONT AVENUE ALHAMBRA, CA 91803-1331

ANNOUNCEMENT WEBPAGE FOR ONLINE FILE REVIEW

In order to improve access to public information with respect to public records for the Industrial Waste, Hazardous Materials Underground Storage Tank, and Stormwater Certification programs, the County of Los Angeles Department of Public Works, Environmental Programs Division has produced a website which allows the public to search for specific addresses to determine if any records exist. This webpage provides those documents that are in electronic format to be viewed and downloaded, enables the public, public agencies, and businesses better access to information, and assists those performing inquiries concerning environmental site assessments. Public Works encourages you to utilize the webpage for online file review.

County of Los Angeles Department of Public Works
Environmental Programs Division
Webpage for Online File Review
Go To: www.ladpw.org/epd/cleanla/OpenFileReview.aspx

-01-

Go To: www.CleanLA.com.
Click on the link; Online File Review- UST/IW/SW

PLEASE NOTE: All documents have not been digitized and uploaded to this webpage. Our office is continuing to work hard to provide you easy online access for all related files. If additional information is needed, hard copy files may be available at our Public Counter. Please contact our public counter at:

Environmental Programs Division Public Counter, 900 South Fremont Avenue Alhambra, CA 91803-1331 Annex Building, 3rd floor (626) 458-3517 Monday through Thursday, 7 a.m. to 5:00 p.m.

Department of Toxic Substances Control

Edmund G. Brown Jr.
Governor

Barbara A. Lee, Oirector 9211 Oakdale Avenue Chatsworth, California 91311

September 15, 2015

Mr. Michael Huma Advisian Michael.Huma@Advisian.com

11724 Addison Street, Los Angeles, CA 91607; APN: 2355-013-900 PR3-091515-04

Dear Mr. Huma:

We have received your Public Records Act Request for records from the Department of Toxic Substances Control.

After a thorough review of our files we have found that no such records exist at this office pertaining to the site/facility referenced above.

We would like to inform you about EnviroStor, a database that provides information and documents on over 5,000 DTSC cleanup sites. EnviroStor can be accessed at: http://www.envirostor.dtsc.ca.gov/public. Also, a computer is available in the Central Files of each DTSC Regional Office for use by community members to view EnviroStor.

If you have any questions, would like further information regarding your request or would like an appointment to visit Chatsworth's Central Files, please contact me at (818) 717-6521.

Sincerely,

Vivien Tutaan/cs

Regional Records Coordinator

APPENDIX 5 INTERVIEW DOCUMENTATION

Phase I ESA Key Site Contact Questionnaire

- 1. Name and title of interview subject.
- Mr. Rodrigo Ricon, Plant Manager, Colfax Elementary School.
- Mr. Andrew Fowler, LAUSD OEHS, Project Manager
- 2. How long have they been associated (worked at) the Site?

3 years (i.e. since 2012).

3. What is the Site currently used for and for how long has it been in its current use?

The Site is currently used as a kindergarten and elementary school and to Mr. Ricon's best knowledge; the Site has always been used as a school.

4. Are any hazardous materials and/or petroleum products used at the Site? If so, what are they used for and where are they stored?

Common janitorial supplies are used to clean the classroom building and associated restrooms. Mr. Ricon indicated that gasoline-powered mowers and leaf blowers are used to maintain the landscaping at the Site; gasoline is stored in three 5-gallon portable gasoline containers, two of which were full at the time of the Site reconnaissance, in the art supply intermodal container at the Site. No evidence of spills or stains was observed at this location.

5. Are you aware of any releases of hazardous materials or petroleum products at the Site?

Neither Mr. Ricon nor Mr. Fowler was aware of any releases at the Site.

6. Are hazardous wastes generated at the Site? If so, where are they stored? How often and by who are they disposed?

According to Mr. Ricon, no hazardous wastes are stored at the Site with the exception of gasoline in three 5-gallon portable gasoline containers in the art supply intermodal container.

7. Before its current use, do you know what the Site was used for?

Mr. Fowler indicated that the Site's use prior to it being used as a school was for an arboretum.

8. Have you ever noticed pools of unidentified liquids or staining on the ground at the Site?

No evidence of pools, unidentified liquids, or staining was observed on the ground at the Site.

- 9. Are you aware of the presence of any wells at the Site?
- Mr. Ricon and Mr. Fowler reported no knowledge of any wells at the Site.
- 10. Are you aware of the existence of the following documents related to the Site?
 - a. Any previously conducted environmental site assessment or audit reports.

None per Mr. Ricon and Mr. Fowler.

 Any environmental permits (solid waste disposal, hazardous waste disposal, wastewater treatment/disposal, NPDES).

None per Mr. Ricon and Mr. Fowler.

c. Any registrations or plans for USTs, ASTs, wastewater clarifiers/treatment systems or septic systems.

None per Mr. Ricon and Mr. Fowler.

- d. Any spill control and countermeasure plans.
- Mr. Ricon indicated that spill control and countermeasure plans are stored in the supply intermodal container next to the Plant Manager's office and comprise of absorbent pads and solidifiers/powders for small gasoline spills.
- e. Any geologic, geotechnical or hydrogeologic reports.

None per Mr. Ricon and Mr. Fowler.

f. Any notices or correspondence from any government agencies regarding past or current violations of environmental regulations.

None per Mr. Ricon and Mr. Fowler.

g. Any environmental liens against the Site.

None per Mr. Ricon and Mr. Fowler.

h. Any hazardous waste generator reports.

None per Mr. Ricon and Mr. Fowler.

i. Any risk assessment reports.

None per Mr. Ricon and Mr. Fowler.

j. Any deed or land use restrictions or limitations for the Site related to environmental conditions.

None per Mr. Ricon and Mr. Fowler.

k. Any pending, current or past litigation or administrative action related to hazardous materials or petroleum products at the Site.

None per Mr. Ricon and Mr. Fowler.

8. Are you aware of any current or previous environmental issues/problems on the neighboring properties?

None per Mr. Ricon and Mr. Fowler.

APPENDIX 6

OEHS PRELIMINARY ENVIRONMENTAL SCREENING OF CANDIDATE SCHOOL SITES CHECKLIST

Preliminary Environmental Screening of Proposed Project at Existing School Site

Project: LAUSD Colfax Elementary School Phase I ESA

Selection Criteria	Yes	No	Comments
Powerlines/Electromagnetic Fields [CCR, Title 5, 14010(c)]			
Will the project create any new significant safety hazards or exacerbate any existing safety hazards students from 50-133 kV powerlines/electromagnetic fields within 100 feet of the site		X	
Will the project create any new significant safety hazards or exacerbate any existing safety hazards students from 220-230 kV powerlines/electromagnetic fields within 150 feet of the site		X	
Will the project create any new significant safety hazards or exacerbate any existing safety hazards students from 500-550 kV powerlines/electromagnetic fields within 350 feet of the site		X	
Railroads [CCR, Title 5, 14010(d)]			
Will the project create any new significant safety hazards or exacerbate any existing safety hazards students from railroads within 1,500 feet of the site		X	
<u>Traffic Noise</u> [CCR, Title 5, 14010(e)]		r	
Will the project create any new significant safety hazards or exacerbate any existing safety hazards to students from adjacent roads or freeways that will adversely affect the educational program?		X	
Faults [CCR, Title 5, 14010(f)]			
Will the project create any new significant safety hazards or exacerbate any existing safety hazards students from an active earthquake fault or fault trace which may be onsite		X	
Flood or Inundation Area [CCR, Title 5, 14010(g)]			
Will the project create any new significant safety hazards or exacerbate any existing safety hazards students from flooding or dam inundation		X	
Pipelines and Above Ground Tanks [CCR, Title 5, 14010(h)]			
Will the project create any new significant safety hazards or exacerbate any existing safety hazards tudents from nearby above-ground water or fuel storage tanks		X	
Will the project create any new significant safety hazards or exacerbate any existing safety hazards to students from above-ground or underground pipelines located within 1,500 feet of the site?		X	
<u>Liquefaction and Landslides</u> [CCR, Title 5, 14010(i)]			
Will the project create any new significant safety hazards or exacerbate any existing safety hazards students from liquefaction or landslides		X	
Traffic and Pedestrian Safety [CCR, Title 5, 14010(1)]			
Will the project create any new significant safety hazards or exacerbate any existing safety hazards students from an adjacent major arterial street		X	

Preliminary Environmental Screening of Proposed Project at Existing School Site

Project: LAUSD Colfax Elementary School Phase I ESA

Selection Criteria	Yes	No	Comments
Compatible Zoning			
[CCR, Title 5, 14010(m)]			
Will the project create any new significant safety hazards or exacerbate any existing safety hazards		X	
students from the zoning surrounding the site			
Light, Wind, Air Pollution			
[CCR, Title 5, 14010(q)]			
Will the project create any new significant safety hazards or exacerbate any existing safety hazards		X	
students from light, wind or air pollution'			
Easements [CCR, Title 5, 14010(r)]			
[CCK, Title 3, 14010(1)]	T T	T	Based on the EDR Overview Map,
			a natural gas pipeline is located in
Will the project create any new significant safety hazards or exacerbate any existing safety hazards to	X		the center of the Site traversing
students from easements on or adjacent to the site which may restrict access or building placement?	Λ		through it in a north-south
			direction.
Border Zone Property			
[CCR, Title 5, 14010(t)]			
Will the project create any new significant safety hazards or exacerbate any existing safety hazards		X 7	
students from a significant disposal of hazardous waste within 2,000 ft. of the sit		X	
Cellular Phone Towers			
[LAUSD Board Resolution]		T	
Will the project create any new significant safety hazards or exacerbate any existing safety hazards		X	
students from a cellular phone tower on or adjacent to the site Air Pollution		L	
[LAUSD Board Resolution]			
Will the project create any new significant safety hazards or exacerbate any existing safety hazards		X 7	
students from a major transportation corridor (freeway, major rail line) within 500 feet		X	
Will the project create any new significant safety hazards or exacerbate any existing safety hazards		X	
students from a major stationary source of emissions within 500 fee			
Is the school on the Priority List of Schools Most at Risk from Air Pollution?		X	
Will the project create any new significant safety hazards or exacerbate any existing safety hazards		X	
students from a high-risk facility previously identified by OEHS Methane Zone			1
internante Zone			
Will the project create any new significant safety hazards or exacerbate any existing safety hazards		37	
students from a known methane zone or oil field		X	
Oil Wells			
William to the state of the sta		1	
Will the project create any new significant safety hazards or exacerbate any existing safety hazards		X	
students from an onsite oil well' Airports			
<u>. m por co</u>			
Will the project create any new significant safety hazards or exacerbate any existing safety hazards		v	
students from an airport within two nautical miles of the site		X
