

The Safety Valet Program enhances the safety of all students who travel to school by walking, bicycling, or by vehicle. The Valet Program creates a special drop-off zone where volunteers assist students from vehicles. Drivers do not need to park or get out of their vehicles to be certain that their students are arriving at school safely! This eliminates many traffic challenges caused by people trying to drop-off students and helps make the school zone safer for all!

Launch a School Safety Valet Program

OEHS is your one-stop shop to help you establish a Safety Valet Program at your school:

- **Contact OEHS:** OEHS will review the implementation process with you and coordinate a site visit to confirm the valet drop-off locations and appropriate street signage.
- **Recruit Volunteers:** The effectiveness of your safety valet program is dependent on a strong core of volunteers. At least 5 are recommended on a day-to-day basis.
- **Purchase the Safety Valet Kit:** Order the kit through the District General Stores Catalog for \$599.99, which includes vests, cones, and a cart. See [Safety Kit Flyer](#) for detailed information.
- **Coordinate Volunteer Training:** OEHS will coordinate volunteer training with Los Angeles School Police or Law enforcement once volunteers are secured.

Your school is ready for a safety valet! Make it a success by advertising to your school community.
