Norwalk, CA 90650

From: LAUSD OEHS
333 S. Beaudry Avenue
21st Floor
Los Angeles, CA 90017

Project Title:

Palms Elementary School – New Parking Lot

Project Location – Specific:

The Palms Elementary School New Parking Lot Project (Project) will be located on the 3.53-acres Palms Elementary School (Palms ES) campus. Palms ES is located at 3520 Motor Ave, Los Angeles, CA 90034. It is bound by Tabor Street to the south, Vinton Avenue to the east, Palms Boulevard to the north, and Motor Avenue to the west. The Project will occur near the Concession Building (Bldg. ID 58126).

Project Location – City:

Los Angeles

Project Location – County:

Los Angeles

Description of Nature, Purpose, and Beneficiaries of Project:

This Project removes approximately 9,702 square feet of existing asphalt pavement which will be replaced with new asphalt paving, and approximately 41 square feet of concrete pavement will be replaced with new concrete paving. This Project will be implemented per all District Standards and Specifications, as well as all applicable local, State regulations, and/or federal facilities requirements.

The Project will be implemented pursuant to all applicable State, federal, and local regulations and all applicable LAUSD specifications, standards, and/or guidelines, including those in compliance with the California Environmental Quality Act (CEQA) and the updated Standard Conditions of Approval for District Construction, Upgrade, and Improvements Projects as adopted by the Board of Education in February 2019 (SC).¹ LAUSD's SCs, design guidelines, and best management practices are designed to be incorporated into the Project design in order to avoid or limit potential adverse impacts

¹ LAUSD OEHS, "Standard Conditions of Approval for District Construction, Upgrade, and Improvements Projects," Adopted by the Board of Education in February 2019.

associated with the District's projects. The beneficiaries of the Project include Palms ES students, faculty, staff, families, school supporters, and the community at large who may request access to the facilities and grounds of the Campus pursuant to the Civic Center Act (CA Ed. Code Sections 38130 - 38139).

Should the Project be altered from the improvements that are described above, LAUSD's Office of Environmental Health & Safety (OEHS) must be notified immediately to ensure that these activities are conducted in compliance with the required standards.

Name of Public Agency Approving the Project:

Los Angeles Unified School District

Name of Person or Agency Carrying Out Project:

Los Angeles Unified School District

Exempt Status: (check one below)

- Ministerial [Public Resources Code (PRC) Section 21080(b)(1); CEQA Guidelines Section 15268²]:
- Declared Emergency [PRC Section 21080(b)(3); CEQA Guidelines Section 15269(a)]:
- Emergency Project [PRC Section 21080(b)(4); CEQA Guidelines Section 15269(b)(c)]:
- Categorical Exemption (PRC Section 21084; CEQA Guidelines Sections 15300 -15333):
 - *CEQA Guidelines Section 15301 – Existing Facilities*
 - *CEQA Guidelines Section 15302 – Replacement or Reconstruction*
 - *CEQA Guidelines Section 15304 – Minor Alterations to Land*
- Statutory Exemption:

Reasons why Project is exempt:

Section 15301 - Existing Facilities

Class 1 consists of the operation, repair, maintenance, permitting, leasing, licensing, or minor alteration of existing public or private structures, facilities, mechanical equipment, or topographical features involving negligible or no expansion of use beyond that existing at the time of the lead agency's determination.

The Project removes approximately 9,702 square feet of existing asphalt pavement which will be replaced with new asphalt paving, and approximately 41 square feet of concrete pavement will be replaced with new concrete paving. This project does not represent an expansion of use. Therefore, the Project fulfills the requirements of CEQA Guidelines Section 15301.

Section 15302 - Replacement or Reconstruction

Class 2 consists of replacing or reconstructing existing structures and facilities where the new structure will be located on the same site as the structure replaced and will have substantially the same purpose and capacity as the structure replaced.

As previously noted, the Project removes approximately 9,702 square feet of existing asphalt pavement which will be replaced with new asphalt paving, and approximately 41 square feet of concrete pavement will be replaced with new concrete paving.

² CEQA Guidelines can be found at California Code of Regulations Title 14, Chapter 3, Section 15000 – Section 15387

The Project will not result in an increase or alteration of the current use, function, or capacity of the existing campus. Therefore, the Project fulfills the requirements of CEQA Guidelines Section 15302.

Section 15304 – Minor Alterations to Land

Class 4 consists of minor public or private alterations in the condition of land, water, and/or vegetation which do not involve removal of healthy, mature, scenic trees except for forestry or agricultural purposes.

The Project will remove approximately 9,702 square feet of existing asphalt pavement which will be replaced with new asphalt paving, and approximately 41 square feet of concrete pavement will be replaced with new concrete paving. These changes are considered minor alterations to the existing Campus. The Project will not remove healthy, mature, scenic trees. Therefore, the Project fulfills the requirements of CEQA Guidelines Section 15304.

Section 15300.2 Exceptions

Section 15300.2 of the CEQA Guidelines, Exceptions, provides conditions under which categorical exemptions are inapplicable. Review of this Project indicates that it would not violate any of the exceptions, as described below.

1. *The project will occur in certain specified sensitive environments or locations;*

The Project will occur on an existing Campus that is located within an urban setting.³ The surrounding uses are residential and commercial. The Campus has not been designated as a biologically sensitive site or location and does not contain sensitive resources or habitat that will be impacted by the Project. The nearest significant ecological area (SEA) is Ballona Wetlands SEA, which is located approximately 3.2 miles southwest of the Campus.⁴ The nearest critical habitat is designated as such for the Western snowy plover and is located approximately 5.5 miles southwest of the Campus.⁵ As such, the Project will not impact sensitive environments or locations.

2. *Cumulative impacts will be considerable because successive projects of the same type will occur at the same place over time;*

The Project will not be expected to result in significant cumulative environmental impacts. As an active school campus, it is anticipated that projects such as routine maintenance activities or upgrades will occur on the Campus in the future. However, there are currently no known successive projects of the same type or scale planned for the Campus. As it stands, the Project is not expected to result in significant impacts. Therefore, no cumulative impacts will result from the Project and successive projects of the same type occurring at the same place over time.

3. *There is a reasonable possibility that the activity will have a significant effect on the environment due to unusual circumstances;*

There are no known unusual circumstances that will have a significant effect on the environment. The removal of trees is not anticipated as part of the proposed scope of work. However, should the Project be altered to include

³ City of Los Angeles. ZIMAS. Available at: <http://zimas.lacity.org/>. Accessed August 2021.

⁴ Los Angeles County Department of Regional Planning, http://gis.planning.lacounty.gov/GIS-NET3_Public/Viewer.html, accessed August 2021.

⁵ United States Fish and Wildlife Service Critical Habitat Portal, <https://ecos.fws.gov/ccp/report/table/critical-habitat.html> accessed August 2021.

the removal of trees, then LAUSD's Office of Environmental Health & Safety (OEHS) must be notified immediately. District policy requires consultation with an arborist to determine if the trees are a protected native species. Additionally, written approval from the school principal will be required before any trees can be removed. If vegetation removal is scheduled to occur between February 1 and August 31, a nesting bird survey would be performed prior to removal activities, per standard condition (SC) of approval SC-BIO-3 of the Program EIR.⁶ Compliance with District specifications will ensure that there is not a reasonable possibility that the Project will have a significant effect on the environment due to unforeseen circumstances.

There will be about 217 cubic yards of soil exported, as a result of this Project. Consideration must be given to the management of excavated soils and/or to the earthwork activities involving more than 50 cubic yards of soil for the Project. If construction or earthmoving activities require import or export of soils and materials, OEHS must be notified to provide oversight to ensure that the import and/or export of soils are conducted in compliance with the requirements of District Specification Section 01 4524.⁷ Since earthwork activities involve the disturbance or more than 50 cubic yards, OEHS directed the completion of sampling and analysis of underlying soils which provides guidance to ensure compliance with South Coast Air Quality Management District (SCAQMD) Rule 1466. Any variances for compliance with Specification Section 01 4524 and SCAQMD Rule 1466 must be approved by OEHS. Furthermore, as set forth in LAUSD's Standard Conditions of Approval (SC) SC-CUL-13, SC-CUL-15, SC-CUL-18, and SC-CUL-19⁸ construction activities must be stopped immediately and OEHS notified upon discovery of subsurface features, such as buried resources (i.e., paleontological resources, archaeological resources), tanks or seepage pits or stained/odoriferous soils. Construction and demolition waste shall be recycled to the maximum extent feasible per SC-USS-1 of the Program EIR.⁹ Therefore, the Project will not have a significant effect on the environment due to unusual circumstances.

4. *The Project may result in damage to scenic resources, including but not limited to trees, historic buildings, rock outcroppings, or similar resources within a highway officially designated as a scenic highway;*

The closest designated scenic highway to the Project is Topanga Canyon Boulevard, located approximately 10.17 miles northwest of Palms ES.¹⁰ This is a sufficient distance from this resource to be outside of the view shed, so the Project will not impact the characteristics that contribute to its scenic eligibility. Therefore, the Project will not result in damage to scenic resources or similar resources within a highway officially designated as a State scenic highway.

5. *The Project is located on a site which is included on any list compiled pursuant to Section 65962.5 of the Government Code; or*

The Project will occur on an existing school campus that is not included on any list compiled pursuant to Section 65962.5 of the Government Code.¹¹ Therefore, the Project will have no impacts related to being located on a hazardous waste site.

6. *The Project may cause a substantial adverse change in the significance of a historic resource.*

The Campus is over 45-years old, meeting the age criterion for consideration as an historic resource under CEQA guidelines. The District surveys however found that Palms ES is ineligible for listing in the California Register of Historical Resources as a historic district.¹²
