Subject: RE: LAUSD Roosevelt HS, 265642

Hi Jeff/John,

The following were noted for the samples received last weekend:

1603732

- 2-voa vials for trip blank were received, but is not indicated on the CoC. **These samples were mistakenly not included on the CoC. Please analyze the trip blank for TPH-G and VOCs using EPA Methods 8015 and 8260B, respectively.**

1603730

- 3-voa vials for trip blank were received, but is not indicated on the CoC. **These samples were mistakenly not included on the CoC. Please analyze the trip blank for TPH-G and VOCs using EPA Methods 8015 and 8260B, respectively.**
- No sample received for FILL1-2.0-2.5 @840, but received 2-4oz jar labeled FILL 2- 2.0-2.5 @840. **The jars are labeled incorrectly; the two 4-oz jars that were collected at 8:40 a.m. should be labeled FILL 1-2.0-2.5 @ 840**
- Please provide sampler's name **The sampler's name is Ross Surrency.**

Please advise. Attached are copies of the CoC received.

Thank you,

Carmen Aguila

Advanced Technology Laboratories is a full-service environmental lab providing organic and inorganic analyses of soil, water, wastewater, storm water and hazardous waste samples. ATL is accredited by the State of California, NELAP and State of Oregon (Air) and holds various SBE, DBE and MBE certificates and a USDA soil permit. ATL takes pride in providing our customers with quick turnaround time, excellent customer service and defensible data while offering very competitive rates. *Advanced Technology Labs - Your Partner for Quality Environmental Testing*

Subject: LAUSD Roosevelt High School - Clarification for FILL 1 and FILL 2 Sample Analyses

Rachelle,

Please note the following changes for the FILL 1 and FILL 2 samples submitted on October 22, 2016. The chain of custody record incorrectly specified the analyses for the FILL samples. The corrections requested are shown below.

- **FILL 1-5.0-5.5** to be analyzed for TPH-gas (EPA 8015B) and VOCs (EPA 8260B)
- **FILL 2-10.0-10.5** to be analyzed for TPH-gas (EPA 8015B) and VOCs (EPA 8260B)

Remaining analyses are to be composite samples from the FILL 1 and FILL 2 sample locations as follows:

- **Composite 1:** composite FILL 1-2.0-2.5, FILL 1-5.0-5.5, and FILL 1-10-10.5 and analyze for TPH carbon chain (EPA 8015), SVOCs (EPA 8270C), PCBs (EPA 8082), OCPs (EPA 8081), and CAM Metals (EPA 6010/7000)
- **Composite 2:** composite FILL 2-2.0-2.5, FILL 2-5.0-5.5, FILL 2-10-10.5, and FILL 2-13.4-14.0 and analyze for TPH carbon chain (EPA 8015), SVOCs (EPA 8270C), PCBs (EPA 8082), OCPs (EPA 8081), and CAM Metals (EPA 6010/7000)

Please call me to discuss if you have any questions.

Jeff

Re: ATL Work Order Number : 1603732
Client Reference : Roosevelt HS, 265642

Enclosed are the results for sample(s) received on October 22, 2016 by Advanced Technology Laboratories. The sample(s) are tested for the parameters as indicated on the enclosed chain of custody in accordance with applicable laboratory certifications. The laboratory results contained in this report specifically pertains to the sample(s) submitted.

Thank you for the opportunity to serve the needs of your company. If you have any questions, please feel free to contact me or your Project Manager.

Sincerely,

A handwritten signature in black ink, appearing to read "E Rodriguez", is positioned above the printed name.

CASE NARRATIVE

All volatile analyses were performed using 5035 preservation requirements. Any high level dilutions were performed on a preserved methanol sample unless otherwise noted.

Results were J-flagged. "J" is used to flag those results that are between the PQL (Practical Quantitation Limit) and the calculated MDL (Method Detection Limit). Results that are "J" flagged are estimated values since it becomes difficult to accurately quantitate the analyte near the MDL.

Notes and Definitions

S10	Surrogate recovery was outside of laboratory acceptance limit due to possible matrix interference.
R	RPD value outside acceptance criteria. Calculation is based on raw values.
M2	Matrix spike recovery outside of acceptance limit due to possible matrix interference. The analytical batch was validated by the laboratory control sample.
M1	Matrix spike recovery outside of acceptance limit. The analytical batch was validated by the laboratory control sample.
L4	Laboratory Control Sample outside of control limit but within Marginal Exceedance (ME) limit.
J	Analyte detected below the Practical Quantitation Limit but above or equal to the Method Detection Limit. Result is an estimated concentration.
B	Analyte detected in the associated method blank.
ND	Analyte is not detected at or above the Practical Quantitation Limit (PQL). When client requests quantitation against MDL, analyte is not detected at or above the Method Detection Limit (MDL)
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
NR	Not Reported
RPD	Relative Percent Difference
CA2	CA-ELAP (CDPH)
OR1	OR-NELAP (OSPHL)
TX1	TX-NELAP (TCEQ)

Notes:

- (1) The reported MDL and PQL are based on prep ratio variation and analytical dilution.
- (2) The suffix [2C] of specific analytes signifies that the reported result is taken from the instrument's second column.
- (3) Results are wet unless otherwise specified.

Hi Jeff/John,

The following were noted for the samples received last weekend:

1603732

- 2-voa vials for trip blank were received, but is not indicated on the CoC. **These samples were mistakenly not included on the CoC. Please analyze the trip blank for TPH-G and VOCs using EPA Methods 8015 and 8260B, respectively.**

1603730

- 3-voa vials for trip blank were received, but is not indicated on the CoC. **These samples were mistakenly not included on the CoC. Please analyze the trip blank for TPH-G and VOCs using EPA Methods 8015 and 8260B, respectively.**
- No sample received for FILL1-2.0-2.5 @840, but received 2-4oz jar labeled FILL 2- 2.0-2.5 @840. **The jars are labeled incorrectly; the two 4-oz jars that were collected at 8:40 a.m. should be labeled FILL 1-2.0-2.5 @ 840**
- Please provide sampler's name **The sampler's name is Ross Surrency.**

Please advise. Attached are copies of the CoC received.

Thank you,

Carmen Aguila

Advanced Technology Laboratories is a full-service environmental lab providing organic and inorganic analyses of soil, water, wastewater, storm water and hazardous waste samples. ATL is accredited by the State of California, NELAP and State of Oregon (Air) and holds various SBE, DBE and MBE certificates and a USDA soil permit. ATL takes pride in providing our customers with quick turnaround time, excellent customer service and defensible data while offering very competitive rates. *Advanced Technology Labs - Your Partner for Quality Environmental Testing*

Subject: LAUSD Roosevelt High School - Additional Analyses (Duplicate Samples at Clarifier and Hoists)

Rachelle,

For the soil samples collected from the clarifier and hoist locations on October 22, 2016, please perform the additional analyses specified below.

Duplicate Samples

Please pull an aliquot from the sample listed below and perform the duplicate analysis for TPH carbon chain (EPA 8015), VOCs (EPA 8260B), SVOCs (EPA 8270C), and metals (EPA 6010/7000):

- Sample CL1-2-5.0-5.5

Please pull an aliquot from the samples listed below and perform the duplicate analyses for TPH carbon chain (EPA 8015), PCBs (EPA 8082), and metals (EPA 6010/7000):

- Sample HL1-2-9.5-10
- Sample HL3-1-5.0-5.5
- Sample HL4-2-5.0-5.5

Please call me if you have any questions or need further clarification.

Thanks,

Jeff

Enclosed are the results for sample(s) received on October 22, 2016 by Advanced Technology Laboratories. The sample(s) are tested for the parameters as indicated on the enclosed chain of custody in accordance with applicable laboratory certifications. The laboratory results contained in this report specifically pertains to the sample(s) submitted.

Thank you for the opportunity to serve the needs of your company. If you have any questions, please feel free to contact me or your Project Manager.

Sincerely,

A handwritten signature in black ink, appearing to read "E Rodriguez", is written over a light blue horizontal line.

Eddie Rodriguez
Laboratory Director

The cover letter and the case narrative are an integral part of this analytical report and its absence renders the report invalid. Test results contained within this data package meet the requirements of applicable state-specific certification programs. The report cannot be reproduced without written permission from the client and Advanced Technology Laboratories.

CASE NARRATIVE

Results were J-flagged. "J" is used to flag those results that are between the PQL (Practical Quantitation Limit) and the calculated MDL (Method Detection Limit). Results that are "J" flagged are estimated values since it becomes difficult to accurately quantitate the analyte near the MDL.

Notes and Definitions

S4	Surrogate was diluted out.
S12	Surrogate recovery outside in-house established limit but within method default criteria.
S1	Surrogate recovery was above laboratory acceptance limit. No target analyte was detected in the sample.
R	RPD value outside acceptance criteria. Calculation is based on raw values.
M1	Matrix spike recovery outside of acceptance limit. The analytical batch was validated by the laboratory control sample.
J	Analyte detected below the Practical Quantitation Limit but above or equal to the Method Detection Limit. Result is an estimated concentration.
B	Analyte detected in the associated method blank.
ND	Analyte is not detected at or above the Practical Quantitation Limit (PQL). When client requests quantitation against MDL, analyte is not detected at or above the Method Detection Limit (MDL)
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
NR	Not Reported
RPD	Relative Percent Difference
CA2	CA-ELAP (CDPH)
OR1	OR-NELAP (OSPHL)
TX1	TX-NELAP (TCEQ)

Notes:

- (1) The reported MDL and PQL are based on prep ratio variation and analytical dilution.
- (2) The suffix [2C] of specific analytes signifies that the reported result is taken from the instrument's second column.
- (3) Results are wet unless otherwise specified.

Subject: LAUSD Roosevelt High School - Additional Analyses (Duplicate Samples at Clarifier and Hoists)

Rachelle,

For the soil samples collected from the clarifier and hoist locations on October 22, 2016, please perform the additional analyses specified below.

Duplicate Samples

Please pull an aliquot from the sample listed below and perform the duplicate analysis for TPH carbon chain (EPA 8015), VOCs (EPA 8260B), SVOCs (EPA 8270C), and metals (EPA 6010/7000):

- Sample CL1-2-5.0-5.5

Please pull an aliquot from the samples listed below and perform the duplicate analyses for TPH carbon chain (EPA 8015), PCBs (EPA 8082), and metals (EPA 6010/7000):

- Sample HL1-2-9.5-10
- Sample HL3-1-5.0-5.5
- Sample HL4-2-5.0-5.5

Please call me if you have any questions or need further clarification.

Thanks,

Jeff

Re: ATL Work Order Number : 1603734

Client Reference : LAUSD-ROOSEVELT HS, 265642-0000/TA02

Enclosed are the results for sample(s) received on October 23, 2016 by Advanced Technology Laboratories. The sample(s) are tested for the parameters as indicated on the enclosed chain of custody in accordance with applicable laboratory certifications. The laboratory results contained in this report specifically pertains to the sample(s) submitted.

Thank you for the opportunity to serve the needs of your company. If you have any questions, please feel free to contact me or your Project Manager.

Sincerely,

A handwritten signature in black ink, appearing to read "E Rodriguez", is written over a light blue horizontal line.

Eddie Rodriguez
Laboratory Director

The cover letter and the case narrative are an integral part of this analytical report and its absence renders the report invalid. Test results contained within this data package meet the requirements of applicable state-specific certification programs. The report cannot be reproduced without written permission from the client and Advanced Technology Laboratories.

CASE NARRATIVE

Results were J-flagged. "J" is used to flag those results that are between the PQL (Practical Quantitation Limit) and the calculated MDL (Method Detection Limit). Results that are "J" flagged are estimated values since it becomes difficult to accurately quantitate the analyte near the MDL.

Notes and Definitions

R	RPD value outside acceptance criteria. Calculation is based on raw values.
M1	Matrix spike recovery outside of acceptance limit. The analytical batch was validated by the laboratory control sample.
J	Analyte detected below the Practical Quantitation Limit but above or equal to the Method Detection Limit. Result is an estimated concentration.
ND	Analyte is not detected at or above the Practical Quantitation Limit (PQL). When client requests quantitation against MDL, analyte is not detected at or above the Method Detection Limit (MDL)
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
NR	Not Reported
RPD	Relative Percent Difference
CA2	CA-ELAP (CDPH)
OR1	OR-NELAP (OSPHL)
TX1	TX-NELAP (TCEQ)

Notes:

- (1) The reported MDL and PQL are based on prep ratio variation and analytical dilution.
- (2) The suffix [2C] of specific analytes signifies that the reported result is taken from the instrument's second column.
- (3) Results are wet unless otherwise specified.

Subject: RE: LAUSD Roosevelt High School - Additional Analyses (Duplicate Samples at 2.5 feet)

Rachelle,

For the requested analysis of soil samples collected at 2.5 feet (outlined in email chain below), please pull an aliquot from the following samples to be used as duplicate samples and perform the analyses for Arsenic and Lead (EPA Method 6010B).

Samples collected on October 8, 2016 (21 samples at 2.5 feet)

- Sample D-9-2.5
- Sample G-13-2.5

Samples collected on October 9, 2016 (41 samples at 2.5 feet)

- Sample E-14-2.5
- Sample B-13-2.5
- Sample D-14-2.5
- Sample K-16-2.5

Samples collected on October 15, 2016 (26 samples at 2.5 feet)

- Sample H-5-2.5
- Sample D-12-2.5
- Sample MB-2-2.5

Samples collected on October 16, 2016 (41 samples at 2.5 feet)

- Sample AA653-3-2.5
- Sample UB-5-2.5
- Sample Q-4-2.5
- Sample AUD-8-2.5

Samples collected on October 22, 2016 (46 samples at 2.5 feet)

- Sample W-15-2.5
- Sample Y-12-2.5
- Sample Y-9-2.5
- Sample AA923-2-2.5
- Sample AA828-6-2.5

Samples collected on October 23, 2016 (39 samples at 2.5 feet)

- Sample AA651/683-2-2.5
- Sample AA955-2-2.5
- Sample AA831-4-2.5
- Sample C-8-2.5

Please call me if you have any questions or need further clarification.

Thanks,

Jeff

Subject: LAUSD Roosevelt High School - Additional Analyses (Samples at 2.5 feet)

Rachelle,

Please analyze all soil samples collected at 2.5 feet (currently on hold) for Arsenic and Lead.

This applies to all locations where soil samples were collected at 0.5 feet (samples analyzed already) and 2.5 feet.

This does not apply to the following samples collected on October 22 – CL1-1, CL1-2, HL1-1, HL1-2, HL2-1, HL2-2, HL3-1, HL3-2, HL4-1, HL4-2, FILL 1, and FILL 2.

Please call me with any questions or clarifications.

Jeff

Subject: LAUSD Roosevelt High School - Additional Analyses (Duplicate Samples at 0.5 feet)

Rachelle,

For the soil samples collected at 0.5 feet on October 22/23, 2016, please pull an aliquot from the following samples to be used as duplicate samples and perform the analyses for Arsenic and Lead (EPA Method 6010B).

Samples collected on October 22, 2016 (46 samples at 0.5 feet)

- Sample W-14-0.5
- Sample X-17-0.5
- Sample Y-8-0.5
- Sample AA923-1-0.5
- Sample AA828-5-0.5

Samples collected on October 23, 2016 (39 samples at 0.5 feet)

- Sample AA651/683-3-0.5
- Sample AA955-3-0.5
- Sample AA831-3-0.5
- Sample D-8-0.5

Please call me if you have any questions or need further clarification.

Thanks,

Jeff

Re: ATL Work Order Number : 1603734

Client Reference : LAUSD-ROOSEVELT HS, 265642-0000/TA02

Enclosed are the results for sample(s) received on October 23, 2016 by Advanced Technology Laboratories. The sample(s) are tested for the parameters as indicated on the enclosed chain of custody in accordance with applicable laboratory certifications. The laboratory results contained in this report specifically pertains to the sample(s) submitted.

Thank you for the opportunity to serve the needs of your company. If you have any questions, please feel free to contact me or your Project Manager.

Sincerely,

A handwritten signature in black ink, appearing to read "E Rodriguez", is written over a light blue horizontal line.

Eddie Rodriguez
Laboratory Director

The cover letter and the case narrative are an integral part of this analytical report and its absence renders the report invalid. Test results contained within this data package meet the requirements of applicable state-specific certification programs. The report cannot be reproduced without written permission from the client and Advanced Technology Laboratories.

SUMMARY OF SAMPLES

Sample ID	Laboratory ID	Matrix	Date Sampled	Date Received
B-6-2.5	1603734-30	Soil	10/23/16 12:15	10/23/16 16:50

CASE NARRATIVE

Results were J-flagged. "J" is used to flag those results that are between the PQL (Practical Quantitation Limit) and the calculated MDL (Method Detection Limit). Results that are "J" flagged are estimated values since it becomes difficult to accurately quantitate the analyte near the MDL.

Project Number : LAUSD-ROOSEVELT HS, 265642-0000.

Report To : John Nordenstam

Reported : 01/11/2017

Notes and Definitions

ND	Analyte is not detected at or above the Practical Quantitation Limit (PQL). When client requests quantitation against MDL, analyte is not detected at or above the Method Detection Limit (MDL)
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
NR	Not Reported
RPD	Relative Percent Difference
CA2	CA-ELAP (CDPH)
OR1	OR-NELAP (OSPHL)
TX1	TX-NELAP (TCEQ)

Notes:

- (1) The reported MDL and PQL are based on prep ratio variation and analytical dilution.
- (2) The suffix [2C] of specific analytes signifies that the reported result is taken from the instrument's second column.
- (3) Results are wet unless otherwise specified.

Subject: LAUSD Roosevelt HS - Additional Laboratory Analyses of Soil Samples for STLC and TCLP
Attachments: Draft Table 2 - STLC and TCLP.xlsx

Importance: High

Rachelle – we need to conduct additional analyses for STLC and TCLP on the soil samples collected from LAUSD Roosevelt HS in Los Angeles. There are a total of:

- 65 samples to be analyzed for STLC for lead
- 6 samples to be analyzed for TCLP for lead
- 1 sample to be analyzed for STLC for arsenic

Attached is a spreadsheet showing the soil samples, the required analysis, and the corresponding laboratory report number for each of the samples. Please include TRC PO # 100816 on your invoice. Let me know if you have any questions.

Thanks,

John Nordenstam, PG

Notes:

Table summarizes arsenic and lead laboratory analytical reports for soil samples.

Samples with detectable concentrations presented in **bold font**.

Arsenic screening level based on California background level.

TTL screening level based on Department of Toxic Substances Control (DTSC) Office of Human Ecological Risk (HERO) Human Health Risk Assessment (HRRRA) Note Number 3, Table 1 (DTSC, 2015).

OCPs screening levels are based on Department of Toxic Substances Control (DTSC) Office of Human Ecological Risk (HERO) Human Health Risk Assessment (HRRRA) Note Number 3-Table 1 Cancer Value (or Non-Cancer value, lowest value) (DTSC, 2015) or United States Environmental Protection Agency (US EPA) Regional Screening Level (carcinogenic or non-carcinogenic, lowest value) (EPA, 2015).

LAUSD = Los Angeles Unified School District

ID = Identification

bgs = below ground surface

EPA = Environmental Protection Agency

--- = not analyzed

mg/kg = milligrams per kilogram

mg/L = milligrams per liter

μg/L = micrograms per liter

DUP = Duplicate of preceding sample

J = Analyte detected below the Practical Quantitation Limit but above or equal to the Method Detection Limit.

Result is an estimated concentration.

(1) = 3.8J Aroclor 1260

(2) = 11J Aroclor 1260

Re: ATL Work Order Number : 1603735
Client Reference : LAUSD Roosevelt HS, 265642.0000/TA02

Enclosed are the results for sample(s) received on October 23, 2016 by Advanced Technology Laboratories. The sample(s) are tested for the parameters as indicated on the enclosed chain of custody in accordance with applicable laboratory certifications. The laboratory results contained in this report specifically pertains to the sample(s) submitted.

Thank you for the opportunity to serve the needs of your company. If you have any questions, please feel free to contact me or your Project Manager.

Sincerely,

A handwritten signature in black ink, appearing to read "E Rodriguez", is written over a light blue horizontal line.

Eddie Rodriguez
Laboratory Director

The cover letter and the case narrative are an integral part of this analytical report and its absence renders the report invalid. Test results contained within this data package meet the requirements of applicable state-specific certification programs. The report cannot be reproduced without written permission from the client and Advanced Technology Laboratories.

CASE NARRATIVE

Results were J-flagged. "J" is used to flag those results that are between the PQL (Practical Quantitation Limit) and the calculated MDL (Method Detection Limit). Results that are "J" flagged are estimated values since it becomes difficult to accurately quantitate the analyte near the MDL.

Notes and Definitions

R	RPD value outside acceptance criteria. Calculation is based on raw values.
J	Analyte detected below the Practical Quantitation Limit but above or equal to the Method Detection Limit. Result is an estimated concentration.
D5	Sample diluted due to failing internal standard in the original run.
ND	Analyte is not detected at or above the Practical Quantitation Limit (PQL). When client requests quantitation against MDL, analyte is not detected at or above the Method Detection Limit (MDL)
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
NR	Not Reported
RPD	Relative Percent Difference
CA2	CA-ELAP (CDPH)
OR1	OR-NELAP (OSPHL)
TX1	TX-NELAP (TCEQ)

Notes:

- (1) The reported MDL and PQL are based on prep ratio variation and analytical dilution.
- (2) The suffix [2C] of specific analytes signifies that the reported result is taken from the instrument's second column.
- (3) Results are wet unless otherwise specified.

Subject: RE: LAUSD Roosevelt High School - Additional Analyses (Duplicate Samples at 2.5 feet)

Rachelle,

For the requested analysis of soil samples collected at 2.5 feet (outlined in email chain below), please pull an aliquot from the following samples to be used as duplicate samples and perform the analyses for Arsenic and Lead (EPA Method 6010B).

Samples collected on October 8, 2016 (21 samples at 2.5 feet)

- Sample D-9-2.5
- Sample G-13-2.5

Samples collected on October 9, 2016 (41 samples at 2.5 feet)

- Sample E-14-2.5
- Sample B-13-2.5
- Sample D-14-2.5
- Sample K-16-2.5

Samples collected on October 15, 2016 (26 samples at 2.5 feet)

- Sample H-5-2.5
- Sample D-12-2.5
- Sample MB-2-2.5

Samples collected on October 16, 2016 (41 samples at 2.5 feet)

- Sample AA653-3-2.5
- Sample UB-5-2.5
- Sample Q-4-2.5
- Sample AUD-8-2.5

Samples collected on October 22, 2016 (46 samples at 2.5 feet)

- Sample W-15-2.5
- Sample Y-12-2.5
- Sample Y-9-2.5
- Sample AA923-2-2.5
- Sample AA828-6-2.5

Samples collected on October 23, 2016 (39 samples at 2.5 feet)

- Sample AA651/683-2-2.5
- Sample AA955-2-2.5
- Sample AA831-4-2.5
- Sample C-8-2.5

Please call me if you have any questions or need further clarification.

Thanks,

Jeff

Subject: LAUSD Roosevelt High School - Additional Analyses (Samples at 2.5 feet)

Rachelle,

Please analyze all soil samples collected at 2.5 feet (currently on hold) for Arsenic and Lead.

This applies to all locations where soil samples were collected at 0.5 feet (samples analyzed already) and 2.5 feet.

This does not apply to the following samples collected on October 22 – CL1-1, CL1-2, HL1-1, HL1-2, HL2-1, HL2-2, HL3-1, HL3-2, HL4-1, HL4-2, FILL 1, and FILL 2.

Please call me with any questions or clarifications.

Jeff

Subject: LAUSD Roosevelt High School - Additional Analyses (Duplicate Samples at 0.5 feet)

Rachelle,

For the soil samples collected at 0.5 feet on October 22/23, 2016, please pull an aliquot from the following samples to be used as duplicate samples and perform the analyses for Arsenic and Lead (EPA Method 6010B).

Samples collected on October 22, 2016 (46 samples at 0.5 feet)

- Sample W-14-0.5
- Sample X-17-0.5
- Sample Y-8-0.5
- Sample AA923-1-0.5
- Sample AA828-5-0.5

Samples collected on October 23, 2016 (39 samples at 0.5 feet)

- Sample AA651/683-3-0.5
- Sample AA955-3-0.5
- Sample AA831-3-0.5
- Sample D-8-0.5

Please call me if you have any questions or need further clarification.

Thanks,

Jeff

Enclosed are the results for sample(s) received on October 24, 2016 by Advanced Technology Laboratories. The sample(s) are tested for the parameters as indicated on the enclosed chain of custody in accordance with applicable laboratory certifications. The laboratory results contained in this report specifically pertains to the sample(s) submitted.

Thank you for the opportunity to serve the needs of your company. If you have any questions, please feel free to contact me or your Project Manager.

Sincerely,

A handwritten signature in black ink, appearing to read "Eddie Rodriguez", with a small "ER" monogram to the left.

Eddie Rodriguez
Laboratory Director

The cover letter and the case narrative are an integral part of this analytical report and its absence renders the report invalid. Test results contained within this data package meet the requirements of applicable state-specific certification programs. The report cannot be reproduced without written permission from the client and Advanced Technology Laboratories.

CASE NARRATIVE

Results were J-flagged. "J" is used to flag those results that are between the PQL (Practical Quantitation Limit) and the calculated MDL (Method Detection Limit). Results that are "J" flagged are estimated values since it becomes difficult to accurately quantitate the analyte near the MDL.

Notes and Definitions

S2	Surrogate recovery was below laboratory acceptance limit. Reextraction and/or reanalysis confirms low recovery caused by matrix effects.
S12	Surrogate recovery outside in-house established limit but within method default criteria.
R3	RPD value outside acceptance criteria. Calculation is based on raw values. The analytical batch was validated by the Laboratory Control Sample (LCS).
M2	Matrix spike recovery outside of acceptance limit due to possible matrix interference. The analytical batch was validated by the laboratory control sample.
J	Analyte detected below the Practical Quantitation Limit but above or equal to the Method Detection Limit. Result is an estimated concentration.
ND	Analyte is not detected at or above the Practical Quantitation Limit (PQL). When client requests quantitation against MDL, analyte is not detected at or above the Method Detection Limit (MDL)
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
NR	Not Reported
RPD	Relative Percent Difference
CA2	CA-ELAP (CDPH)
OR1	OR-NELAP (OSPHL)
TX1	TX-NELAP (TCEQ)

Notes:

- (1) The reported MDL and PQL are based on prep ratio variation and analytical dilution.
- (2) The suffix [2C] of specific analytes signifies that the reported result is taken from the instrument's second column.
- (3) Results are wet unless otherwise specified.

Subject: LAUSD Roosevelt HS PEA - Compositing Instructions for Samples to be collected 10/22-23/16

Rachelle – Attached are the compositing instructions for samples to be collected at LAUSD Roosevelt HS on October 22 and 23, 2016. We plan to conduct sampling activities in Areas 8 and 9, and complete sampling in Area 2. We may also start on sampling Area 6. However, I have not included compositing instructions for Area 6, since we are not sure how much sampling will be completed in this area. Let me know if you have any questions.

Thanks,

John Nordenstam, PG

Compositing Instructions for Samples to be collected on October 22 and 23, 2016

Area 2

Composite A11 – Composite Samples: B6-0.5' and B8-0.5' – analyze for OCPs
Composite A12 – Composite Samples: C6-0.5' and C8-0.5' – analyze for OCPs
Composite A13 – Composite Samples: D6-0.5' and D8-0.5' – analyze for OCPs
Composite A14 – Composite Samples: E6-0.5' and E8-0.5' – analyze for OCPs
Composite A15 – Composite Samples: F6-0.5' and F8-0.5' – analyze for OCPs – pull aliquot for duplicate sample and analyze for OCPs

Area 8

Composite D1 - Composite Samples: AA923-1-0.5', AA923-2-0.5', and AA923-3-0.5' – analyze for OCPs
Composite D2 –Composite Samples: AA923-4-0.5', AA923-5-0.5', and AA923-6-0.5' – analyze for OCPs
Composite D3 - Composite Samples: AA1322-1-0.5', AA1322-2-0.5', and AA1322-3-0.5' – analyze for OCPs
Composite D4 –Composite Samples: AA1322-4-0.5', AA1322-5-0.5', and AA1322-6-0.5' – analyze for OCPs
Composite D5 - Composite Samples: AA828-1-0.5', AA828-2-0.5', and AA828-3-0.5' – analyze for OCPs
Composite D6 –Composite Samples: AA828-4-0.5', AA828-5-0.5', and AA828-6-0.5' – analyze for OCPs
Composite D7 - Composite Samples: AA651/683-1-0.5', AA651/683-2-0.5', and AA651/683-3-0.5' – analyze for OCPs
Composite D8 –Composite Samples: AA651/683-4-0.5', AA651/683-5-0.5', and AA651/683-6-0.5' – analyze for OCPs
Composite D9 - Composite Samples: AA831-1-0.5', AA831-2-0.5', and AA831-3-0.5' – analyze for OCPs
Composite D10 –Composite Samples: AA831-4-0.5', AA831-5-0.5', and AA831-6-0.5' – analyze for OCPs and PCBs – pull aliquot for duplicate sample and analyze for OCPs and PCBs
Composite D11 – Composite Samples: X8-0.5', X9-0.5', X10-0.5', and X11-0.5' - analyze for OCPs
Composite D12 – Composite Samples: Y8-0.5', Y9-0.5', Y10-0.5', and Y11-0.5' - analyze for OCPs

Area 9

Composite E1 – Composite Samples: V13-0.5', V14-0.5', and V15-0.5' - analyze for OCPs
Composite E2 – Composite Samples: V16-0.5', and V17-0.5' - analyze for OCPs
Composite E3 – Composite Samples: W12-0.5', W13-0.5', and W14-0.5' - analyze for OCPs
Composite E4 – Composite Samples: W15-0.5', W16-0.5', and W17-0.5' - analyze for OCPs
Composite E5 – Composite Samples: X12-0.5', X13-0.5', and X14-0.5' - analyze for OCPs
Composite E6 – Composite Samples: X15-0.5', X16-0.5', and X17-0.5' - analyze for OCPs
Composite E7 – Composite Samples: Y12-0.5', Y13-0.5', and Y14-0.5' - analyze for OCPs and PCBs
Composite E8 – Composite Samples: Y15-0.5', Y16-0.5', and Y17-0.5' - analyze for OCPs - pull aliquot for duplicate sample and analyze for OCPs

Re: ATL Work Order Number : 1603827

Client Reference : LAUSD - ROOSEVELT + HS, 265642.0000/TA02

Enclosed are the results for sample(s) received on October 29, 2016 by Advanced Technology Laboratories. The sample(s) are tested for the parameters as indicated on the enclosed chain of custody in accordance with applicable laboratory certifications. The laboratory results contained in this report specifically pertains to the sample(s) submitted.

Thank you for the opportunity to serve the needs of your company. If you have any questions, please feel free to contact me or your Project Manager.

Sincerely,

A handwritten signature in black ink, appearing to read "E Rodriguez", is written over a light blue horizontal line.

Eddie Rodriguez
Laboratory Director

The cover letter and the case narrative are an integral part of this analytical report and its absence renders the report invalid. Test results contained within this data package meet the requirements of applicable state-specific certification programs. The report cannot be reproduced without written permission from the client and Advanced Technology Laboratories.

CASE NARRATIVE

Results were J-flagged. "J" is used to flag those results that are between the PQL (Practical Quantitation Limit) and the calculated MDL (Method Detection Limit). Results that are "J" flagged are estimated values since it becomes difficult to accurately quantitate the analyte near the MDL.

Notes and Definitions

S12	Surrogate recovery outside in-house established limit but within method default criteria.
R	RPD value outside acceptance criteria. Calculation is based on raw values.
M1	Matrix spike recovery outside of acceptance limit. The analytical batch was validated by the laboratory control sample.
L3	Laboratory control sample outside in-house established limits but within method criteria.
D5	Sample diluted due to failing internal standard in the original run.
ND	Analyte is not detected at or above the Practical Quantitation Limit (PQL). When client requests quantitation against MDL, analyte is not detected at or above the Method Detection Limit (MDL)
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
NR	Not Reported
RPD	Relative Percent Difference
CA2	CA-ELAP (CDPH)
OR1	OR-NELAP (OSPHL)
TX1	TX-NELAP (TCEQ)

Notes:

- (1) The reported MDL and PQL are based on prep ratio variation and analytical dilution.
- (2) The suffix [2C] of specific analytes signifies that the reported result is taken from the instrument's second column.
- (3) Results are wet unless otherwise specified.

TAT = 3: 30% SURCHARGE 3RD BUSINESS DAY (COB 5:00 PM)
TAT = 4: 20% SURCHARGE 4TH BUSINESS DAY (COB 5:00 PM)
TAT = 5: NO SURCHARGE 5th BUSINESS DAY (COB 5:00 PM)
4. Weekend, holiday, after-hours work - ask for quote.
5. Samples requiring shorter TATs will incur a surcharge respective to the subcontract lab used for analysis.
6. Liquid and solid samples will be disposed of after 45 calendar days from receipt of samples; air samples will be disposed of after 14 calendar days after receipt of samples.
7. Electronic records maintained for five (5) years from report date.
8. Hard copy reports will be disposed of after 45 calendar days from report date.
9. Storage and Report Fees:
- Liquid & solid samples: Complimentary storage for receipt of samples; \$2/sample/month if extended storage or hold is requested.
- Air samples: Complimentary storage for ten (10) calendar days from receipt of samples; \$20/sample/week if extended storage is requested.
- Hard copy and regenerated reports/EDDs: \$17.50 per hard copy report requested; \$50.00 per regenerated/reforma? ed report; \$25 per reproposed EDD.
10. Rush TAT/SLIC samples: add 2 days to analysis TAT for extraction on procedure.
11. Unanalyzed samples will incur a disposal fee of \$7 per sample.

To: Rachelle Arada
Cc: Nordenstam, John
Subject: LAUSD Roosevelt High School - Clarifications for Soil Samples Collected October 29 and 30, 2016

Rachelle,

Please make the following additions/changes to the requested analyses for soil samples collected on October 29 and 30, 2016, at Roosevelt High School:

- **Analyze all soils samples collected at 2.5 feet for Arsenic and Lead** (the COC mistakenly requested that these samples be placed on Hold).
- **Please correct the sample names** for Samples CR-1-0.5, CR-1-2.5, CR-2-0.5, CR-2-2.5, CR-3-0.5, CR-3-2.5, CR-4-0.5, CR-4-2.5, CR-5-0.5, CR-5-2.5, CR-6-0.5, and CR-6-2.5 – the sample names should be CR1-1-0.5, CR1-1-2.5, CR1-2-0.5, CR1-2-2.5, CR1-3-0.5, CR1-3-2.5, CR1-4-0.5, CR1-4-2.5, CR1-5-0.5, CR1-5-2.5, CR1-6-0.5, and CR1-6-2.5 (the prefix for all samples should be CR1, not CR).
- **Do not perform PCB analysis (EPA Method 8082) on any of the discrete soil samples submitted for analysis.** Samples CR-1-0.5, CR-2-0.5, CR-3-0.5, CR-4-0.5, CR-5-0.5, CR-6-0.5, AS-1-0.5, AS-2-0.5, AS-3-0.5, and AS-4-0.5 were mistakenly identified on the COC as needing PCB analysis. Only composite soil samples will be analyzed for PCBs. A separate email request with instructions on compositing discrete soil samples for PCB and OCP analysis will be submitted later today.
- **Duplicate soil sample analysis** - please pull an aliquot from the following soil samples to be used as duplicate samples and perform the analyses for Arsenic and Lead (EPA Method 6010B).

Samples collected on October 29, 2016 (100 soil samples)

Sample AA2573-2-0.5
Sample AA2685-4-2.5
Sample P14-0.5
Sample AA2543-2-2.5
Sample IA-3-0.5
Sample AS-2-2.5
Sample IM-3-0.5
Sample IM-6-2.5
Sample CRA-1-0.5
Sample CRB-4-2.5

Samples collected on October 30, 2016 (32 soil samples)

Sample CR1-1-0.5 (mistakenly labeled on COC as CR-1-0.5)
Sample AA2249-2-2.5
Sample AA2038-4-2.5

Please call me or John Nordenstam if you have any questions regarding this request.

Re: ATL Work Order Number : 1603827

Client Reference : LAUSD - ROOSEVELT + HS, 265642.0000/TA02

Enclosed are the results for sample(s) received on October 29, 2016 by Advanced Technology Laboratories. The sample(s) are tested for the parameters as indicated on the enclosed chain of custody in accordance with applicable laboratory certifications. The laboratory results contained in this report specifically pertains to the sample(s) submitted.

Thank you for the opportunity to serve the needs of your company. If you have any questions, please feel free to contact me or your Project Manager.

Sincerely,

A handwritten signature in black ink, appearing to read "E Rodriguez", is positioned above the printed name.

Eddie Rodriguez
Laboratory Director

The cover letter and the case narrative are an integral part of this analytical report and its absence renders the report invalid. Test results contained within this data package meet the requirements of applicable state-specific certification programs. The report cannot be reproduced without written permission from the client and Advanced Technology Laboratories.

SUMMARY OF SAMPLES

Sample ID	Laboratory ID	Matrix	Date Sampled	Date Received
AA1917-4-2.5	1603827-02	Soil	10/29/16 7:20	10/29/16 15:46

CASE NARRATIVE

Results were J-flagged. "J" is used to flag those results that are between the PQL (Practical Quantitation Limit) and the calculated MDL (Method Detection Limit). Results that are "J" flagged are estimated values since it becomes difficult to accurately quantitate the analyte near the MDL.

Project Number : LAUSD - ROOSEVELT + HS, 265642.00

Report To : John Nordenstam

Reported : 01/11/2017

Notes and Definitions

J	Analyte detected below the Practical Quantitation Limit but above or equal to the Method Detection Limit. Result is an estimated concentration.
ND	Analyte is not detected at or above the Practical Quantitation Limit (PQL). When client requests quantitation against MDL, analyte is not detected at or above the Method Detection Limit (MDL)
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
NR	Not Reported
RPD	Relative Percent Difference
CA2	CA-ELAP (CDPH)
OR1	OR-NELAP (OSPHL)
TX1	TX-NELAP (TCEQ)

Notes:

- (1) The reported MDL and PQL are based on prep ratio variation and analytical dilution.
- (2) The suffix [2C] of specific analytes signifies that the reported result is taken from the instrument's second column.
- (3) Results are wet unless otherwise specified.

Subject: LAUSD Roosevelt HS - Additional Laboratory Analyses of Soil Samples for STLC and TCLP
Attachments: Draft Table 2 - STLC and TCLP.xlsx

Importance: High

Rachelle – we need to conduct additional analyses for STLC and TCLP on the soil samples collected from LAUSD Roosevelt HS in Los Angeles. There are a total of:

- 65 samples to be analyzed for STLC for lead
- 6 samples to be analyzed for TCLP for lead
- 1 sample to be analyzed for STLC for arsenic

Attached is a spreadsheet showing the soil samples, the required analysis, and the corresponding laboratory report number for each of the samples. Please include TRC PO # 100816 on your invoice. Let me know if you have any questions.

Thanks,

Notes:

Table summarizes arsenic and lead laboratory analytical reports for soil samples.

Samples with detectable concentrations presented in **bold font**.

Arsenic screening level based on California background level.

TTL screening level based on Department of Toxic Substances Control (DTSC) Office of Human Ecological Risk (HERO) Human Health Risk Assessment (HRRRA) Note Number 3, Table 1 (DTSC, 2015).

OCPs screening levels are based on Department of Toxic Substances Control (DTSC) Office of Human Ecological Risk (HERO) Human Health Risk Assessment (HRRRA) Note Number 3-Table 1 Cancer Value (or Non-Cancer value, lowest value) (DTSC, 2015) or United States Environmental Protection Agency (US EPA) Regional Screening Level (carcinogenic or non-carcinogenic, lowest value) (EPA, 2015).

LAUSD = Los Angeles Unified School District

ID = Identification

bgs = below ground surface

EPA = Environmental Protection Agency

--- = not analyzed

mg/kg = milligrams per kilogram

mg/L = milligrams per liter

μg/L = micrograms per liter

DUP = Duplicate of preceding sample

J = Analyte detected below the Practical Quantitation Limit but above or equal to the Method Detection Limit.

Result is an estimated concentration.

(1) = 3.8J Aroclor 1260

(2) = 11J Aroclor 1260

Re: ATL Work Order Number : 1603828
Client Reference : LAUSD Roosevelt HS, 265642.0000/TA02

Enclosed are the results for sample(s) received on October 29, 2016 by Advanced Technology Laboratories. The sample(s) are tested for the parameters as indicated on the enclosed chain of custody in accordance with applicable laboratory certifications. The laboratory results contained in this report specifically pertains to the sample(s) submitted.

Thank you for the opportunity to serve the needs of your company. If you have any questions, please feel free to contact me or your Project Manager.

Sincerely,

A handwritten signature in black ink, appearing to read "Eddie Rodriguez", followed by the letters "Ar" in a smaller, cursive script.

Eddie Rodriguez
Laboratory Director

The cover letter and the case narrative are an integral part of this analytical report and its absence renders the report invalid. Test results contained within this data package meet the requirements of applicable state-specific certification programs. The report cannot be reproduced without written permission from the client and Advanced Technology Laboratories.

CASE NARRATIVE

Results were J-flagged. "J" is used to flag those results that are between the PQL (Practical Quantitation Limit) and the calculated MDL (Method Detection Limit). Results that are "J" flagged are estimated values since it becomes difficult to accurately quantitate the analyte near the MDL.

Notes and Definitions

S12	Surrogate recovery outside in-house established limit but within method default criteria.
R	RPD value outside acceptance criteria. Calculation is based on raw values.
L3	Laboratory control sample outside in-house established limits but within method criteria.
J	Analyte detected below the Practical Quantitation Limit but above or equal to the Method Detection Limit. Result is an estimated concentration.
D5	Sample diluted due to failing internal standard in the original run.
ND	Analyte is not detected at or above the Practical Quantitation Limit (PQL). When client requests quantitation against MDL, analyte is not detected at or above the Method Detection Limit (MDL)
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
NR	Not Reported
RPD	Relative Percent Difference
CA2	CA-ELAP (CDPH)
OR1	OR-NELAP (OSPHL)
TX1	TX-NELAP (TCEQ)

Notes:

- (1) The reported MDL and PQL are based on prep ratio variation and analytical dilution.
- (2) The suffix [2C] of specific analytes signifies that the reported result is taken from the instrument's second column.
- (3) Results are wet unless otherwise specified.

Subject: LAUSD Roosevelt High School - Clarifications for Soil Samples Collected October 29 and 30, 2016

Rachelle,

Please make the following additions/changes to the requested analyses for soil samples collected on October 29 and 30, 2016, at Roosevelt High School:

- **Analyze all soils samples collected at 2.5 feet for Arsenic and Lead** (the COC mistakenly requested that these samples be placed on Hold).
- **Please correct the sample names** for Samples CR-1-0.5, CR-1-2.5, CR-2-0.5, CR-2-2.5, CR-3-0.5, CR-3-2.5, CR-4-0.5, CR-4-2.5, CR-5-0.5, CR-5-2.5, CR-6-0.5, and CR-6-2.5 – the sample names should be CR1-1-0.5, CR1-1-2.5, CR1-2-0.5, CR1-2-2.5, CR1-3-0.5, CR1-3-2.5, CR1-4-0.5, CR1-4-2.5, CR1-5-0.5, CR1-5-2.5, CR1-6-0.5, and CR1-6-2.5 (the prefix for all samples should be CR1, not CR).
- **Do not perform PCB analysis (EPA Method 8082) on any of the discrete soil samples submitted for analysis.** Samples CR-1-0.5, CR-2-0.5, CR-3-0.5, CR-4-0.5, CR-5-0.5, CR-6-0.5, AS-1-0.5, AS-2-0.5, AS-3-0.5, and AS-4-0.5 were mistakenly identified on the COC as needing PCB analysis. Only composite soil samples will be analyzed for PCBs. A separate email request with instructions on compositing discrete soil samples for PCB and OCP analysis will be submitted later today.
- **Duplicate soil sample analysis** - please pull an aliquot from the following soil samples to be used as duplicate samples and perform the analyses for Arsenic and Lead (EPA Method 6010B).

Samples collected on October 29, 2016 (100 soil samples)

Sample AA2573-2-0.5
Sample AA2685-4-2.5
Sample P14-0.5
Sample AA2543-2-2.5
Sample IA-3-0.5
Sample AS-2-2.5
Sample IM-3-0.5
Sample IM-6-2.5
Sample CRA-1-0.5
Sample CRB-4-2.5

Samples collected on October 30, 2016 (32 soil samples)

Sample CR1-1-0.5 (mistakenly labeled on COC as CR-1-0.5)
Sample AA2249-2-2.5
Sample AA2038-4-2.5

Please call me or John Nordenstam if you have any questions regarding this request.

Jeff

Re: ATL Work Order Number : 1603828
Client Reference : LAUSD Roosevelt HS, 265642.0000/TA02

Enclosed are the results for sample(s) received on October 29, 2016 by Advanced Technology Laboratories. The sample(s) are tested for the parameters as indicated on the enclosed chain of custody in accordance with applicable laboratory certifications. The laboratory results contained in this report specifically pertains to the sample(s) submitted.

Thank you for the opportunity to serve the needs of your company. If you have any questions, please feel free to contact me or your Project Manager.

Sincerely,

A handwritten signature in black ink, appearing to read "E Rodriguez", is written over a white background.

Eddie Rodriguez
Laboratory Director

The cover letter and the case narrative are an integral part of this analytical report and its absence renders the report invalid. Test results contained within this data package meet the requirements of applicable state-specific certification programs. The report cannot be reproduced without written permission from the client and Advanced Technology Laboratories.

CASE NARRATIVE

Results were J-flagged. "J" is used to flag those results that are between the PQL (Practical Quantitation Limit) and the calculated MDL (Method Detection Limit). Results that are "J" flagged are estimated values since it becomes difficult to accurately quantitate the analyte near the MDL.

Report To : John Nordenstam

Reported : 01/11/2017

Notes and Definitions

ND	Analyte is not detected at or above the Practical Quantitation Limit (PQL). When client requests quantitation against MDL, analyte is not detected at or above the Method Detection Limit (MDL)
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
NR	Not Reported
RPD	Relative Percent Difference
CA2	CA-ELAP (CDPH)
OR1	OR-NELAP (OSPHL)
TX1	TX-NELAP (TCEQ)

Notes:

- (1) The reported MDL and PQL are based on prep ratio variation and analytical dilution.
- (2) The suffix [2C] of specific analytes signifies that the reported result is taken from the instrument's second column.
- (3) Results are wet unless otherwise specified.

Subject: LAUSD Roosevelt HS - Additional Laboratory Analyses of Soil Samples for STLC and TCLP
Attachments: Draft Table 2 - STLC and TCLP.xlsx

Importance: High

Rachelle – we need to conduct additional analyses for STLC and TCLP on the soil samples collected from LAUSD Roosevelt HS in Los Angeles. There are a total of:

- 65 samples to be analyzed for STLC for lead
- 6 samples to be analyzed for TCLP for lead
- 1 sample to be analyzed for STLC for arsenic

Attached is a spreadsheet showing the soil samples, the required analysis, and the corresponding laboratory report number for each of the samples. Please include TRC PO # 100816 on your invoice. Let me know if you have any questions.

Thanks,

John Nordenstam, PG

Notes:

Table summarizes arsenic and lead laboratory analytical reports for soil samples.

Samples with detectable concentrations presented in **bold font**.

Arsenic screening level based on California background level.

TTL screening level based on Department of Toxic Substances Control (DTSC) Office of Human Ecological Risk (HERO) Human Health Risk Assessment (HRRRA) Note Number 3, Table 1 (DTSC, 2015).

OCPs screening levels are based on Department of Toxic Substances Control (DTSC) Office of Human Ecological Risk (HERO) Human Health Risk Assessment (HRRRA) Note Number 3-Table 1 Cancer Value (or Non-Cancer value, lowest value) (DTSC, 2015) or United States Environmental Protection Agency (US EPA) Regional Screening Level (carcinogenic or non-carcinogenic, lowest value) (EPA, 2015).

LAUSD = Los Angeles Unified School District
ID = Identification
bgs = below ground surface
EPA = Environmental Protection Agency
--- = not analyzed

mg/kg = milligrams per kilogram

mg/L = milligrams per liter

μg/L = micrograms per liter

DUP = Duplicate of preceding sample

J = Analyte detected below the Practical Quantitation Limit but above or equal to the Method Detection Limit.

Result is an estimated concentration.

(1) = 3.8J Aroclor 1260

(2) = 11J Aroclor 1260

Re: ATL Work Order Number : 1603828
Client Reference : LAUSD Roosevelt HS, 265642.0000/TA02

Enclosed are the results for sample(s) received on October 29, 2016 by Advanced Technology Laboratories. The sample(s) are tested for the parameters as indicated on the enclosed chain of custody in accordance with applicable laboratory certifications. The laboratory results contained in this report specifically pertains to the sample(s) submitted.

Thank you for the opportunity to serve the needs of your company. If you have any questions, please feel free to contact me or your Project Manager.

Sincerely,

A handwritten signature in black ink, appearing to read "E Rodriguez", is written over a white background.

Eddie Rodriguez
Laboratory Director

The cover letter and the case narrative are an integral part of this analytical report and its absence renders the report invalid. Test results contained within this data package meet the requirements of applicable state-specific certification programs. The report cannot be reproduced without written permission from the client and Advanced Technology Laboratories.

CASE NARRATIVE

Results were J-flagged. "J" is used to flag those results that are between the PQL (Practical Quantitation Limit) and the calculated MDL (Method Detection Limit). Results that are "J" flagged are estimated values since it becomes difficult to accurately quantitate the analyte near the MDL.

Irvine , CA 92618

Project Number : LAUSD Roosevelt HS, 265642.0000/TA0

Report To : John Nordenstam

Reported : 01/25/2017

Notes and Definitions

J	Analyte detected below the Practical Quantitation Limit but above or equal to the Method Detection Limit. Result is an estimated concentration.
D1	Sample required dilution due to possible matrix interference.
ND	Analyte is not detected at or above the Practical Quantitation Limit (PQL). When client requests quantitation against MDL, analyte is not detected at or above the Method Detection Limit (MDL)
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
NR	Not Reported
RPD	Relative Percent Difference
CA2	CA-ELAP (CDPH)
OR1	OR-NELAP (OSPHL)
TX1	TX-NELAP (TCEQ)

Notes:

- (1) The reported MDL and PQL are based on prep ratio variation and analytical dilution.
- (2) The suffix [2C] of specific analytes signifies that the reported result is taken from the instrument's second column.
- (3) Results are wet unless otherwise specified.

Subject: LAUSD Roosevelt HS - Additional Laboratory Analyses of Soil Samples for TCLP
Attachments: Draft Table 2 - STLC and TCLP.xlsx

Rachelle – we need to conduct additional analyses for TCLP on the soil samples collected from LAUSD Roosevelt HS in Los Angeles. There are a total of 44 samples to be analyzed for TCLP for lead. Attached is a spreadsheet showing the soil samples, the required analysis, and the corresponding laboratory report number for each of the samples. Please include TRC PO # 100816 on your invoice. Let me know if you have any questions.

Thanks,

John Nordenstam, PG

Notes:
Table summarizes arsenic and lead laboratory analytical reports for soil samples.
Samples with detectable concentrations presented in **bold font**.
Arsenic screening level based on Department of Toxic Substances Control (DTSC) Office of Human Ecological Risk (HERO) Human Health Risk Assessment (HRRR) Note Number 3-Table 1 Cancer Value (or Non-Cancer value, lowest value) (DTSC, 2015) or United States Environmental Protection Agency (US EPA) Regional Screening Level [carcinogenic or non-carcinogenic, lowest value] (EPA, 2015).
LAUSD = Los Angeles Unified School District
ID = Identification
bgs = below ground surface
EPA = Environmental Protection Agency
--- = not analyzed

mg/kg = milligrams per kilogram
mg/L = milligrams per liter
μg/L = micrograms per liter
DUP = Duplicate of preceding sample
J = Analyte detected below the Practical Quantitation Limit but above or equal to the Method Detection Limit.
Result is an estimated concentration.

(1) = 3.8J Aroclor 1260
(2) = 1.1J Aroclor 1260

Notes:
 Table summarizes arsenic and lead laboratory analytical reports for soil samples.
 Samples with detectable concentrations presented in **bold** font.
 Arsenic screening level based on California background level.

TtLC screening level based on Department of Toxic Substances Control (DTSC) Office of Human Ecological Risk (HERO) Human Health Risk Assessment (HARRA) Note Number 3, Table 1 (DTSC, 2015).
 OCPs screening levels are based on Department of Toxic Substances Control (DTSC) Office of Human Ecological Risk (HERO) Human Health Risk Assessment (HARRA) Note Number 3-Table 1 Cancer Value (or Non-Cancer value, lowest value) (DTSC, 2015) or United States Environmental Protection Agency (US EPA) Regional Screening Level [carcinogenic or non-carcinogenic, lowest value] (EPA, 2015).

Re: ATL Work Order Number : 1603842
Client Reference : LAUSD Roosevelt HS, 265642.0000/TA02

Enclosed are the results for sample(s) received on October 30, 2016 by Advanced Technology Laboratories. The sample(s) are tested for the parameters as indicated on the enclosed chain of custody in accordance with applicable laboratory certifications. The laboratory results contained in this report specifically pertains to the sample(s) submitted.

Thank you for the opportunity to serve the needs of your company. If you have any questions, please feel free to contact me or your Project Manager.

Sincerely,

A handwritten signature in black ink, appearing to read "Eddie Rodriguez", followed by the letters "Ar" in a smaller, less legible script.

Eddie Rodriguez
Laboratory Director

The cover letter and the case narrative are an integral part of this analytical report and its absence renders the report invalid. Test results contained within this data package meet the requirements of applicable state-specific certification programs. The report cannot be reproduced without written permission from the client and Advanced Technology Laboratories.

CASE NARRATIVE

Results were J-flagged. "J" is used to flag those results that are between the PQL (Practical Quantitation Limit) and the calculated MDL (Method Detection Limit). Results that are "J" flagged are estimated values since it becomes difficult to accurately quantitate the analyte near the MDL.

Notes and Definitions

S12	Surrogate recovery outside in-house established limit but within method default criteria.
R	RPD value outside acceptance criteria. Calculation is based on raw values.
L3	Laboratory control sample outside in-house established limits but within method criteria.
J	Analyte detected below the Practical Quantitation Limit but above or equal to the Method Detection Limit. Result is an estimated concentration.
D5	Sample diluted due to failing internal standard in the original run.
ND	Analyte is not detected at or above the Practical Quantitation Limit (PQL). When client requests quantitation against MDL, analyte is not detected at or above the Method Detection Limit (MDL)
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
NR	Not Reported
RPD	Relative Percent Difference
CA2	CA-ELAP (CDPH)
OR1	OR-NELAP (OSPHL)
TX1	TX-NELAP (TCEQ)

Notes:

- (1) The reported MDL and PQL are based on prep ratio variation and analytical dilution.
- (2) The suffix [2C] of specific analytes signifies that the reported result is taken from the instrument's second column.
- (3) Results are wet unless otherwise specified.

Subject: LAUSD Roosevelt High School - Clarifications for Soil Samples Collected October 29 and 30, 2016

Rachelle,

Please make the following additions/changes to the requested analyses for soil samples collected on October 29 and 30, 2016, at Roosevelt High School:

- **Analyze all soils samples collected at 2.5 feet for Arsenic and Lead** (the COC mistakenly requested that these samples be placed on Hold).
- **Please correct the sample names** for Samples CR-1-0.5, CR-1-2.5, CR-2-0.5, CR-2-2.5, CR-3-0.5, CR-3-2.5, CR-4-0.5, CR-4-2.5, CR-5-0.5, CR-5-2.5, CR-6-0.5, and CR-6-2.5 – the sample names should be CR1-1-0.5, CR1-1-2.5, CR1-2-0.5, CR1-2-2.5, CR1-3-0.5, CR1-3-2.5, CR1-4-0.5, CR1-4-2.5, CR1-5-0.5, CR1-5-2.5, CR1-6-0.5, and CR1-6-2.5 (the prefix for all samples should be CR1, not CR).
- **Do not perform PCB analysis (EPA Method 8082) on any of the discrete soil samples submitted for analysis.** Samples CR-1-0.5, CR-2-0.5, CR-3-0.5, CR-4-0.5, CR-5-0.5, CR-6-0.5, AS-1-0.5, AS-2-0.5, AS-3-0.5, and AS-4-0.5 were mistakenly identified on the COC as needing PCB analysis. Only composite soil samples will be analyzed for PCBs. A separate email request with instructions on compositing discrete soil samples for PCB and OCP analysis will be submitted later today.
- **Duplicate soil sample analysis** - please pull an aliquot from the following soil samples to be used as duplicate samples and perform the analyses for Arsenic and Lead (EPA Method 6010B).

Samples collected on October 29, 2016 (100 soil samples)

Sample AA2573-2-0.5
Sample AA2685-4-2.5
Sample P14-0.5
Sample AA2543-2-2.5
Sample IA-3-0.5
Sample AS-2-2.5
Sample IM-3-0.5
Sample IM-6-2.5
Sample CRA-1-0.5
Sample CRB-4-2.5

Samples collected on October 30, 2016 (32 soil samples)

Sample CR1-1-0.5 (mistakenly labeled on COC as CR-1-0.5)
Sample AA2249-2-2.5
Sample AA2038-4-2.5

Please call me or John Nordenstam if you have any questions regarding this request.

Re: ATL Work Order Number : 1603842
Client Reference : LAUSD Roosevelt HS, 265642.0000/TA02

Enclosed are the results for sample(s) received on October 30, 2016 by Advanced Technology Laboratories. The sample(s) are tested for the parameters as indicated on the enclosed chain of custody in accordance with applicable laboratory certifications. The laboratory results contained in this report specifically pertains to the sample(s) submitted.

Thank you for the opportunity to serve the needs of your company. If you have any questions, please feel free to contact me or your Project Manager.

Sincerely,

A handwritten signature in black ink, appearing to read "E Rodriguez", is written over a white background.

Eddie Rodriguez
Laboratory Director

The cover letter and the case narrative are an integral part of this analytical report and its absence renders the report invalid. Test results contained within this data package meet the requirements of applicable state-specific certification programs. The report cannot be reproduced without written permission from the client and Advanced Technology Laboratories.

SUMMARY OF SAMPLES

Sample ID	Laboratory ID	Matrix	Date Sampled	Date Received
CRA-2-0.5	1603842-05	Soil	10/30/16 8:12	10/30/16 11:51
CRA-2-2.5	1603842-06	Soil	10/30/16 8:16	10/30/16 11:51
CR1-2-0.5	1603842-07	Soil	10/30/16 8:40	10/30/16 11:51
CR1-5-0.5	1603842-11	Soil	10/30/16 8:58	10/30/16 11:51
CR1-4-0.5	1603842-13	Soil	10/30/16 9:09	10/30/16 11:51

CASE NARRATIVE

Results were J-flagged. "J" is used to flag those results that are between the PQL (Practical Quantitation Limit) and the calculated MDL (Method Detection Limit). Results that are "J" flagged are estimated values since it becomes difficult to accurately quantitate the analyte near the MDL.

Project Number : LAUSD Roosevelt HS, 265642.0000/TA0

Report To : John Nordenstam

Reported : 01/11/2017

Notes and Definitions

ND	Analyte is not detected at or above the Practical Quantitation Limit (PQL). When client requests quantitation against MDL, analyte is not detected at or above the Method Detection Limit (MDL)
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
NR	Not Reported
RPD	Relative Percent Difference
CA2	CA-ELAP (CDPH)
OR1	OR-NELAP (OSPHL)
TX1	TX-NELAP (TCEQ)

Notes:

- (1) The reported MDL and PQL are based on prep ratio variation and analytical dilution.
- (2) The suffix [2C] of specific analytes signifies that the reported result is taken from the instrument's second column.
- (3) Results are wet unless otherwise specified.

Subject: LAUSD Roosevelt HS - Additional Laboratory Analyses of Soil Samples for STLC and TCLP
Attachments: Draft Table 2 - STLC and TCLP.xlsx

Importance: High

Rachelle – we need to conduct additional analyses for STLC and TCLP on the soil samples collected from LAUSD Roosevelt HS in Los Angeles. There are a total of:

- 65 samples to be analyzed for STLC for lead
- 6 samples to be analyzed for TCLP for lead
- 1 sample to be analyzed for STLC for arsenic

Attached is a spreadsheet showing the soil samples, the required analysis, and the corresponding laboratory report number for each of the samples. Please include TRC PO # 100816 on your invoice. Let me know if you have any questions.

Thanks,

John Nordenstam, PG

Notes:

Table summarizes arsenic and lead laboratory analytical reports for soil samples.

Samples with detectable concentrations presented in **bold font**.

Arsenic screening level based on California background level.

TTL screening level based on Department of Toxic Substances Control (DTSC) Office of Human Ecological Risk (HERO) Human Health Risk Assessment (HRRRA) Note Number 3, Table 1 (DTSC, 2015).

OCPs screening levels are based on Department of Toxic Substances Control (DTSC) Office of Human Ecological Risk (HERO) Human Health Risk Assessment (HRRRA) Note Number 3-Table 1 Cancer Value (or Non-Cancer value, lowest value) (DTSC, 2015) or United States Environmental Protection Agency (US EPA) Regional Screening Level (carcinogenic or non-carcinogenic, lowest value) (EPA, 2015).

LAUSD = Los Angeles Unified School District

ID = Identification

bgs = below ground surface

EPA = Environmental Protection Agency

--- = not analyzed

mg/kg = milligrams per kilogram

mg/L = milligrams per liter

μg/L = micrograms per liter

DUP = Duplicate of preceding sample

J = Analyte detected below the Practical Quantitation Limit but above or equal to the Method Detection Limit.

Result is an estimated concentration.

(1) = 3.8J Aroclor 1260

(2) = 11J Aroclor 1260

Re: ATL Work Order Number : 1603842
Client Reference : LAUSD Roosevelt HS, 265642.0000/TA02

Enclosed are the results for sample(s) received on October 30, 2016 by Advanced Technology Laboratories. The sample(s) are tested for the parameters as indicated on the enclosed chain of custody in accordance with applicable laboratory certifications. The laboratory results contained in this report specifically pertains to the sample(s) submitted.

Thank you for the opportunity to serve the needs of your company. If you have any questions, please feel free to contact me or your Project Manager.

Sincerely,

A handwritten signature in black ink, appearing to read "E Rodriguez", is written over a light blue horizontal line.

Eddie Rodriguez
Laboratory Director

The cover letter and the case narrative are an integral part of this analytical report and its absence renders the report invalid. Test results contained within this data package meet the requirements of applicable state-specific certification programs. The report cannot be reproduced without written permission from the client and Advanced Technology Laboratories.

CASE NARRATIVE

Results were J-flagged. "J" is used to flag those results that are between the PQL (Practical Quantitation Limit) and the calculated MDL (Method Detection Limit). Results that are "J" flagged are estimated values since it becomes difficult to accurately quantitate the analyte near the MDL.

Notes and Definitions

J	Analyte detected below the Practical Quantitation Limit but above or equal to the Method Detection Limit. Result is an estimated concentration.
D1	Sample required dilution due to possible matrix interference.
ND	Analyte is not detected at or above the Practical Quantitation Limit (PQL). When client requests quantitation against MDL, analyte is not detected at or above the Method Detection Limit (MDL)
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
NR	Not Reported
RPD	Relative Percent Difference
CA2	CA-ELAP (CDPH)
OR1	OR-NELAP (OSPHL)
TX1	TX-NELAP (TCEQ)

Notes:

- (1) The reported MDL and PQL are based on prep ratio variation and analytical dilution.
- (2) The suffix [2C] of specific analytes signifies that the reported result is taken from the instrument's second column.
- (3) Results are wet unless otherwise specified.

Subject: LAUSD Roosevelt HS - Additional Laboratory Analyses of Soil Samples for TCLP
Attachments: Draft Table 2 - STLC and TCLP.xlsx

Rachelle – we need to conduct additional analyses for TCLP on the soil samples collected from LAUSD Roosevelt HS in Los Angeles. There are a total of 44 samples to be analyzed for TCLP for lead. Attached is a spreadsheet showing the soil samples, the required analysis, and the corresponding laboratory report number for each of the samples. Please include TRC PO # 100816 on your invoice. Let me know if you have any questions.

Thanks,

John Nordenstam, PG

Notes:
Table summarizes arsenic and lead laboratory analytical reports for soil samples.
Samples with detectable concentrations presented in **bold font**.
Arsenic screening level based on Department of Toxic Substances Control (DTSC) Office of Human Ecological Risk (HERO) Human Health Risk Assessment (HRRR) Note Number 3-Table 1 Cancer Value (or Non-Cancer value, lowest value) (DTSC, 2015) or United States Environmental Protection Agency (US EPA) Regional Screening Level [carcinogenic or non-carcinogenic, lowest value] (EPA, 2015).
LAUSD = Los Angeles Unified School District
ID = Identification
bgs = below ground surface
EPA = Environmental Protection Agency
--- = not analyzed

mg/kg = milligrams per kilogram
mg/L = milligrams per liter
μg/L = micrograms per liter
DUP = Duplicate of preceding sample
J = Analyte detected below the Practical Quantitation Limit but above or equal to the Method Detection Limit.
Result is an estimated concentration.

(1) = 3.8J Aroclor 1260
(2) = 1.1J Aroclor 1260

Notes:
 Table summarizes arsenic and lead laboratory analytical reports for soil samples.
 Samples with detectable concentrations presented in bold font.
 Arsenic screening level based on California background level.

TtLC screening level based on Department of Toxic Substances Control (DTSC) Office of Human Ecological Risk (HERO) Human Health Risk Assessment (HRA) Note Number 3, Table 1 (DTSC, 2015).
 OCPs screening levels are based on Department of Toxic Substances Control (DTSC) Office of Human Ecological Risk (HERO) Human Health Risk Assessment (HRA) Note Number 3-Table 1 Cancer Value (or Non-Cancer value, lowest value) (DTSC, 2015) or United States Environmental Protection Agency (US EPA) Regional Screening Level [carcinogenic or non-carcinogenic, lowest value] (EPA, 2015).

Re: ATL Work Order Number : 1603843
Client Reference : LAUSD Roosevelt HS, 265642.0000/TA02

Enclosed are the results for sample(s) received on October 30, 2016 by Advanced Technology Laboratories. The sample(s) are tested for the parameters as indicated on the enclosed chain of custody in accordance with applicable laboratory certifications. The laboratory results contained in this report specifically pertains to the sample(s) submitted.

Thank you for the opportunity to serve the needs of your company. If you have any questions, please feel free to contact me or your Project Manager.

Sincerely,

A handwritten signature in black ink, appearing to read "Eddie Rodriguez", with a small "ER" monogram to the left.

Eddie Rodriguez
Laboratory Director

The cover letter and the case narrative are an integral part of this analytical report and its absence renders the report invalid. Test results contained within this data package meet the requirements of applicable state-specific certification programs. The report cannot be reproduced without written permission from the client and Advanced Technology Laboratories.

CASE NARRATIVE

Results were J-flagged. "J" is used to flag those results that are between the PQL (Practical Quantitation Limit) and the calculated MDL (Method Detection Limit). Results that are "J" flagged are estimated values since it becomes difficult to accurately quantitate the analyte near the MDL.

Notes and Definitions

S12	Surrogate recovery outside in-house established limit but within method default criteria.
R	RPD value outside acceptance criteria. Calculation is based on raw values.
L3	Laboratory control sample outside in-house established limits but within method criteria.
J	Analyte detected below the Practical Quantitation Limit but above or equal to the Method Detection Limit. Result is an estimated concentration.
D5	Sample diluted due to failing internal standard in the original run.
ND	Analyte is not detected at or above the Practical Quantitation Limit (PQL). When client requests quantitation against MDL, analyte is not detected at or above the Method Detection Limit (MDL)
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
NR	Not Reported
RPD	Relative Percent Difference
CA2	CA-ELAP (CDPH)
OR1	OR-NELAP (OSPHL)
TX1	TX-NELAP (TCEQ)

Notes:

- (1) The reported MDL and PQL are based on prep ratio variation and analytical dilution.
- (2) The suffix [2C] of specific analytes signifies that the reported result is taken from the instrument's second column.
- (3) Results are wet unless otherwise specified.

Subject: LAUSD Roosevelt High School - Clarifications for Soil Samples Collected October 29 and 30, 2016

Rachelle,

Please make the following additions/changes to the requested analyses for soil samples collected on October 29 and 30, 2016, at Roosevelt High School:

- **Analyze all soils samples collected at 2.5 feet for Arsenic and Lead** (the COC mistakenly requested that these samples be placed on Hold).
- **Please correct the sample names** for Samples CR-1-0.5, CR-1-2.5, CR-2-0.5, CR-2-2.5, CR-3-0.5, CR-3-2.5, CR-4-0.5, CR-4-2.5, CR-5-0.5, CR-5-2.5, CR-6-0.5, and CR-6-2.5 – the sample names should be CR1-1-0.5, CR1-1-2.5, CR1-2-0.5, CR1-2-2.5, CR1-3-0.5, CR1-3-2.5, CR1-4-0.5, CR1-4-2.5, CR1-5-0.5, CR1-5-2.5, CR1-6-0.5, and CR1-6-2.5 (the prefix for all samples should be CR1, not CR).
- **Do not perform PCB analysis (EPA Method 8082) on any of the discrete soil samples submitted for analysis.** Samples CR-1-0.5, CR-2-0.5, CR-3-0.5, CR-4-0.5, CR-5-0.5, CR-6-0.5, AS-1-0.5, AS-2-0.5, AS-3-0.5, and AS-4-0.5 were mistakenly identified on the COC as needing PCB analysis. Only composite soil samples will be analyzed for PCBs. A separate email request with instructions on compositing discrete soil samples for PCB and OCP analysis will be submitted later today.
- **Duplicate soil sample analysis** - please pull an aliquot from the following soil samples to be used as duplicate samples and perform the analyses for Arsenic and Lead (EPA Method 6010B).

Samples collected on October 29, 2016 (100 soil samples)

Sample AA2573-2-0.5
Sample AA2685-4-2.5
Sample P14-0.5
Sample AA2543-2-2.5
Sample IA-3-0.5
Sample AS-2-2.5
Sample IM-3-0.5
Sample IM-6-2.5
Sample CRA-1-0.5
Sample CRB-4-2.5

Samples collected on October 30, 2016 (32 soil samples)

Sample CR1-1-0.5 (mistakenly labeled on COC as CR-1-0.5)
Sample AA2249-2-2.5
Sample AA2038-4-2.5

Please call me or John Nordenstam if you have any questions regarding this request.

Jeff

Re: ATL Work Order Number : 1603852

Client Reference : LAUSD Roosevelt HS PEA, 265642.0000 / TA02

Enclosed are the results for sample(s) received on November 01, 2016 by Advanced Technology Laboratories. The sample(s) are tested for the parameters as indicated on the enclosed chain of custody in accordance with applicable laboratory certifications. The laboratory results contained in this report specifically pertains to the sample(s) submitted.

Thank you for the opportunity to serve the needs of your company. If you have any questions, please feel free to contact me or your Project Manager.

Sincerely,

A handwritten signature in black ink, appearing to read "E Rodriguez", is positioned above the printed name.

Eddie Rodriguez
Laboratory Director

The cover letter and the case narrative are an integral part of this analytical report and its absence renders the report invalid. Test results contained within this data package meet the requirements of applicable state-specific certification programs. The report cannot be reproduced without written permission from the client and Advanced Technology Laboratories.

CASE NARRATIVE

Results were J-flagged. "J" is used to flag those results that are between the PQL (Practical Quantitation Limit) and the calculated MDL (Method Detection Limit). Results that are "J" flagged are estimated values since it becomes difficult to accurately quantitate the analyte near the MDL.

Notes and Definitions

S12	Surrogate recovery outside in-house established limit but within method default criteria.
R3	RPD value outside acceptance criteria. Calculation is based on raw values. The analytical batch was validated by the Laboratory Control Sample (LCS).
J	Analyte detected below the Practical Quantitation Limit but above or equal to the Method Detection Limit. Result is an estimated concentration.
ND	Analyte is not detected at or above the Practical Quantitation Limit (PQL). When client requests quantitation against MDL, analyte is not detected at or above the Method Detection Limit (MDL)
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
NR	Not Reported
RPD	Relative Percent Difference
CA2	CA-ELAP (CDPH)
OR1	OR-NELAP (OSPHL)
TX1	TX-NELAP (TCEQ)

Notes:

- (1) The reported MDL and PQL are based on prep ratio variation and analytical dilution.
- (2) The suffix [2C] of specific analytes signifies that the reported result is taken from the instrument's second column.
- (3) Results are wet unless otherwise specified.

Subject: LAUSD Roosevelt High School - Additional Soil Sample Compositing Instructions

Good morning Rachelle,

See below for additional soil sample compositing instructions for samples collected from Area 6.

- Composite F1 – composite Samples AA955-1-0.5, AA955-2-0.5, and AA955-3-0.5 – analyze for OCPs and PCBs
- Composite F2 – composite Samples AA955-4-0.5, AA955-5-0.5, and AA955-6-0.5 – analyze for OCPs
- Composite F3 – composite Samples AA2573-1-0.5, AA2573-2-0.5, and AA2573-3-0.5 – analyze for OCPs
- Composite F4 – composite Samples AA2573-4-0.5 and AA2573-5-0.5 – analyze for OCPs
- Composite F5 – composite Samples AA1917-1-0.5, AA1917-2-0.5, AA1917-3-0.5, and AA1917-4-0.5 – analyze for OCPs
- Composite F6 – composite Samples AA2685-1-0.5, AA2685-2-0.5, AA2685-3-0.5, and AA2685-4-0.5 – analyze for OCPs
- Composite F7 – composite Samples AA2684-1-0.5, AA2684-2-0.5, AA2684-3-0.5, and AA2684-4-0.5 – analyze for OCPs
- Composite F8 – composite Samples AA2543-1-0.5, AA2543-2-0.5, and AA2543-3-0.5 – analyze for OCPs
- Composite F9 – composite Samples AA2543-4-0.5, AA2543-5-0.5, and AA2543-6-0.5 – analyze for OCPs
- Composite F10 – composite Samples AA2038-1-0.5, AA2038-2-0.5, AA2038-3-0.5, and AA2038-4-0.5 – analyze for OCPs (please also analyze a DUPLICATE)
- Composite F11 – composite Samples AA2249-1-0.5, AA2249-2-0.5, AA2249-3-0.5, and AA2249-4-0.5 – analyze for OCPs
- Composite F12 – composite Samples FS-1-0.5, FS-2-0.5, FS-3-0.5, and FS-4-0.5 – analyze for OCPs
- Composite F13 – composite Samples AS-1-0.5, AS-2-0.5, AS-3-0.5, and AS-4-0.5 – analyze for OCPs and PCBs
- Composite F14 – composite Samples IM-1-0.5, IM-2-0.5, and IM-3-0.5 – analyze for OCPs
- Composite F15 – composite Samples IM-4-0.5, IM-5-0.5, and IM-6-0.5 – analyze for OCPs
- Composite F16 – composite Samples CRA-1-0.5, CRA-2-0.5, CRA-3-0.5, and CRA-4-0.5 – analyze for OCPs
- Composite F17 – composite Samples CRB-1-0.5, CRB-2-0.5, CRB-3-0.5, and CRB-4-0.5 – analyze for OCPs
- Composite F18 – composite Samples CR1-1-0.5, CR1-2-0.5, and CR1-3-0.5 – analyze for OCPs and PCBs (please also analyze a DUPLICATE)
- Composite F19 – composite Samples CR1-4-0.5, CR1-5-0.5, and CR1-6-0.5 – analyze for OCPs
- Composite F20 – composite Samples P14-0.5, P15-0.5, and P16-0.5 – analyze for OCPs
- Composite F21 – composite Samples Q14-0.5, Q15-0.5, and Q16-0.5 – analyze for OCPs
- Composite F22 – composite Samples R14-0.5, R15-0.5, and R16-0.5 – analyze for OCPs

Please call me or John Nordenstam if you have any questions.

Re: ATL Work Order Number : 1604222
Client Reference : ROOSEVELT HS, 265642

Enclosed are the results for sample(s) received on November 21, 2016 by Advanced Technology Laboratories. The sample(s) are tested for the parameters as indicated on the enclosed chain of custody in accordance with applicable laboratory certifications. The laboratory results contained in this report specifically pertains to the sample(s) submitted.

Thank you for the opportunity to serve the needs of your company. If you have any questions, please feel free to contact me or your Project Manager.

Sincerely,

A handwritten signature in black ink, appearing to read "E Rodriguez", is written over a light blue horizontal line.

Eddie Rodriguez
Laboratory Director

The cover letter and the case narrative are an integral part of this analytical report and its absence renders the report invalid. Test results contained within this data package meet the requirements of applicable state-specific certification programs. The report cannot be reproduced without written permission from the client and Advanced Technology Laboratories.

Notes and Definitions

J	Analyte detected below the Practical Quantitation Limit but above or equal to the Method Detection Limit. Result is an estimated concentration.
D6	Sample required dilution due to high concentration of target analyte.
D5	Sample diluted due to failing internal standard in the original run.
ND	Analyte is not detected at or above the Practical Quantitation Limit (PQL). When client requests quantitation against MDL, analyte is not detected at or above the Method Detection Limit (MDL)
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
NR	Not Reported
RPD	Relative Percent Difference
CA2	CA-ELAP (CDPH)
OR1	OR-NELAP (OSPHL)
TX1	TX-NELAP (TCEQ)

Notes:

- (1) The reported MDL and PQL are based on prep ratio variation and analytical dilution.
- (2) The suffix [2C] of specific analytes signifies that the reported result is taken from the instrument's second column.
- (3) Results are wet unless otherwise specified.

1. Sample receiving hours: 7:30 AM to 7:30 PM Monday - Friday; Saturday 8:00 AM to 12:00 PM.
2. Samples Submitted AFTER 3:00 PM, are considered received the following Business day at 8:00 AM.
3. The following samples will be received the following Business day at 8:00 AM:
TAT = 0 - 30% SURCHARGE SAME BUSINESS DAY (if received by 9:00 AM)
TAT = 1 - 100% SURCHARGE NEXT BUSINESS DAY (COB 5:00 PM)
TAT = 2 - 50% SURCHARGE 2ND BUSINESS DAY (COB 5:00 PM)
TAT = 3 - 30% SURCHARGE 3RD BUSINESS DAY (COB 5:00 PM)
TAT = 4 - 20% SURCHARGE 4TH BUSINESS DAY (COB 5:00 PM)
TAT = 5 - NO SURCHARGE 5TH BUSINESS DAY (COB 5:00 PM)

4. Weekend, holiday, after-hours work - ask for quote.
5. Subcontract TAT to 10 - 15 business days. Projects requiring shorter TATs will incur a surcharge respective to the subcontract lab ... ask for quote.
6. Liquid and solid samples will be disposed of after 45 calendar days from receipt of samples; air samples will be disposed of after 14 calendar days after receipt of samples.

7. Electronic records maintained for five (5) years from report date.
8. Hard copy records will be disposed of after 45 calendar days from report date.
9. Storage and Report Fees:
- Liquid & solid samples: Complimentary storage for forty-five (45) calendar days from receipt of samples; \$2/sample/month if extended storage or hold is requested.
- Samples: Complimentary storage for ten (10) calendar days from receipt of samples; \$20/ sample/week if extended storage is requested. Complimentary storage for ten (10) calendar days from receipt of samples; \$20/ sample/week if extended storage is requested.
- Hard copy and regenerated EODs: \$17.50 per hard copy/report requested; \$50.00 per regenerated/reforma; ed report; \$35 per reprocessed EOD.
10. Rush TAT/STC samples: add 2 days to analysis TAT for extraction on procedure.
11. Unanalyzed samples will incur a disposal fee of \$7 per sample.

As the authorized agent of the company above, I hereby purchase laboratory services from ATL as shown above and hereby guarantee payment as quoted.

Subject: LAUSD Roosevelt High School - Clarifications for Soil Samples Collected November 21, 2016
Attachments: DOC120216-001.pdf

Rachelle – Please make the following additions/changes to the requested analyses for soil samples collected on November 21, 2016, at LAUSD Roosevelt High School (see attachment):

- **Duplicate soil sample analysis** - please pull an aliquot from the following soil samples to be used as duplicate samples and perform the analyses for Arsenic and/or Lead (EPA Method 6010B) as specified below.
 - AUD-4-0.25 - Lead
 - AUD-6C-0.25 - Lead
 - W-14b-2.5 - Lead
 - W-14c-0.5 - Lead
 - X-14c-2.5 - Lead
 - V-16b-0.5 - Lead
 - X-17b-0.5 - Arsenic
 - Y-17d-0.5 - Arsenic
 - H-2c-2.5 - Lead
 - H-2d-3.5 - Lead

Let me know if you have any questions.

Thanks,

John Nordenstam, PG

Re: ATL Work Order Number : 1604222
Client Reference : ROOSEVELT HS, 265642

Enclosed are the results for sample(s) received on November 21, 2016 by Advanced Technology Laboratories. The sample(s) are tested for the parameters as indicated on the enclosed chain of custody in accordance with applicable laboratory certifications. The laboratory results contained in this report specifically pertains to the sample(s) submitted.

Thank you for the opportunity to serve the needs of your company. If you have any questions, please feel free to contact me or your Project Manager.

Sincerely,

A handwritten signature in black ink, appearing to read "E Rodriguez", is written over a light blue horizontal line.

Eddie Rodriguez
Laboratory Director

The cover letter and the case narrative are an integral part of this analytical report and its absence renders the report invalid. Test results contained within this data package meet the requirements of applicable state-specific certification programs. The report cannot be reproduced without written permission from the client and Advanced Technology Laboratories.

Notes and Definitions

D1	Sample required dilution due to possible matrix interference.
ND	Analyte is not detected at or above the Practical Quantitation Limit (PQL). When client requests quantitation against MDL, analyte is not detected at or above the Method Detection Limit (MDL)
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
NR	Not Reported
RPD	Relative Percent Difference
CA2	CA-ELAP (CDPH)
OR1	OR-NELAP (OSPHL)
TX1	TX-NELAP (TCEQ)

Notes:

- (1) The reported MDL and PQL are based on prep ratio variation and analytical dilution.
- (2) The suffix [2C] of specific analytes signifies that the reported result is taken from the instrument's second column.
- (3) Results are wet unless otherwise specified.

Subject: LAUSD Roosevelt HS - Additional Laboratory Analyses of Soil Samples for STLC and TCLP
Attachments: Draft Table 2 - STLC and TCLP.xlsx

Importance: High

Rachelle – we need to conduct additional analyses for STLC and TCLP on the soil samples collected from LAUSD Roosevelt HS in Los Angeles. There are a total of:

- 65 samples to be analyzed for STLC for lead
- 6 samples to be analyzed for TCLP for lead
- 1 sample to be analyzed for STLC for arsenic

Attached is a spreadsheet showing the soil samples, the required analysis, and the corresponding laboratory report number for each of the samples. Please include TRC PO # 100816 on your invoice. Let me know if you have any questions.

Thanks,

John Nordenstam, PG
Senior Project Geologist

Notes:

Table summarizes arsenic and lead laboratory analytical reports for soil samples.

Samples with detectable concentrations presented in **bold font**.

Arsenic screening level based on California background level.

TTL screening level based on Department of Toxic Substances Control (DTSC) Office of Human Ecological Risk (HERO) Human Health Risk Assessment (HRRRA) Note Number 3, Table 1 (DTSC, 2015).

OCPs screening levels are based on Department of Toxic Substances Control (DTSC) Office of Human Ecological Risk (HERO) Human Health Risk Assessment (HRRRA) Note Number 3-Table 1 Cancer Value (or Non-Cancer value, lowest value) (DTSC, 2015) or United States Environmental Protection Agency (US EPA) Regional Screening Level (carcinogenic or non-carcinogenic, lowest value) (EPA, 2015).

LAUSD = Los Angeles Unified School District

ID = Identification

bgs = below ground surface

EPA = Environmental Protection Agency

--- = not analyzed

mg/kg = milligrams per kilogram

mg/L = milligrams per liter

μg/L = micrograms per liter

DUP = Duplicate of proceeding sample

J = Analyte detected below the Practical Quantitation Limit but above or equal to the Method Detection Limit.

Result is an estimated concentration.

(1) = 3.8J Aroclor 1260

(2) = 11J Aroclor 1260

Re: ATL Work Order Number : 1604222
Client Reference : ROOSEVELT HS, 265642

Enclosed are the results for sample(s) received on November 21, 2016 by Advanced Technology Laboratories. The sample(s) are tested for the parameters as indicated on the enclosed chain of custody in accordance with applicable laboratory certifications. The laboratory results contained in this report specifically pertains to the sample(s) submitted.

Thank you for the opportunity to serve the needs of your company. If you have any questions, please feel free to contact me or your Project Manager.

Sincerely,

A handwritten signature in black ink, appearing to read "E Rodriguez", is positioned above the printed name.

Eddie Rodriguez
Laboratory Director

The cover letter and the case narrative are an integral part of this analytical report and its absence renders the report invalid. Test results contained within this data package meet the requirements of applicable state-specific certification programs. The report cannot be reproduced without written permission from the client and Advanced Technology Laboratories.

Notes and Definitions

J	Analyte detected below the Practical Quantitation Limit but above or equal to the Method Detection Limit. Result is an estimated concentration.
D1	Sample required dilution due to possible matrix interference.
ND	Analyte is not detected at or above the Practical Quantitation Limit (PQL). When client requests quantitation against MDL, analyte is not detected at or above the Method Detection Limit (MDL)
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
NR	Not Reported
RPD	Relative Percent Difference
CA2	CA-ELAP (CDPH)
OR1	OR-NELAP (OSPHL)
TX1	TX-NELAP (TCEQ)

Notes:

- (1) The reported MDL and PQL are based on prep ratio variation and analytical dilution.
- (2) The suffix [2C] of specific analytes signifies that the reported result is taken from the instrument's second column.
- (3) Results are wet unless otherwise specified.

Subject: LAUSD Roosevelt HS - Additional Laboratory Analyses of Soil Samples for TCLP
Attachments: Draft Table 2 - STLC and TCLP.xlsx

Rachelle – we need to conduct additional analyses for TCLP on the soil samples collected from LAUSD Roosevelt HS in Los Angeles. There are a total of 44 samples to be analyzed for TCLP for lead. Attached is a spreadsheet showing the soil samples, the required analysis, and the corresponding laboratory report number for each of the samples. Please include TRC PO # 100816 on your invoice. Let me know if you have any questions.

Thanks,

John Nordenstam, PG

Diane – you are correct; there is not a sample labeled P16c-3.5 My mistake – sorry for the confusion.

Thanks,

John Nordenstam, PG

Hi John,

I have received your request but don't see sample labeled P16c-3.5 under ATL WO# 1604231 in our system.

Thanks,

Diane

Subject: LAUSD Roosevelt HS - Additional Laboratory Analyses of Soil Samples for As and Pb

Rachelle – we need to conduct additional analyses for arsenic and lead on the soil samples collected from LAUSD Roosevelt HS in Los Angeles. There are a total of 35 samples to be analyzed for arsenic and/or lead. Refer to the summary of sample IDs and corresponding lab report numbers presented below. Please include TRC PO # 100816 on your invoice.

Area 3 (Lab report #1604231)

Enclosed are the results for sample(s) received on November 22, 2016 by Advanced Technology Laboratories. The sample(s) are tested for the parameters as indicated on the enclosed chain of custody in accordance with applicable laboratory certifications. The laboratory results contained in this report specifically pertains to the sample(s) submitted.

Thank you for the opportunity to serve the needs of your company. If you have any questions, please feel free to contact me or your Project Manager.

Sincerely,

CASE NARRATIVE

Results were J-flagged. "J" is used to flag those results that are between the PQL (Practical Quantitation Limit) and the calculated MDL (Method Detection Limit). Results that are "J" flagged are estimated values since it becomes difficult to accurately quantitate the analyte near the MDL.

Notes and Definitions

R	RPD value outside acceptance criteria. Calculation is based on raw values.
M1	Matrix spike recovery outside of acceptance limit. The analytical batch was validated by the laboratory control sample.
J	Analyte detected below the Practical Quantitation Limit but above or equal to the Method Detection Limit. Result is an estimated concentration.
D6	Sample required dilution due to high concentration of target analyte.
D5	Sample diluted due to failing internal standard in the original run.
ND	Analyte is not detected at or above the Practical Quantitation Limit (PQL). When client requests quantitation against MDL, analyte is not detected at or above the Method Detection Limit (MDL)
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
NR	Not Reported
RPD	Relative Percent Difference
CA2	CA-ELAP (CDPH)
OR1	OR-NELAP (OSPHL)
TX1	TX-NELAP (TCEQ)

Notes:

- (1) The reported MDL and PQL are based on prep ratio variation and analytical dilution.
- (2) The suffix [2C] of specific analytes signifies that the reported result is taken from the instrument's second column.
- (3) Results are wet unless otherwise specified.

Subject: LAUSD Roosevelt High School - Clarifications for Soil Samples Collected November 22, 2016
Attachments: DOC120216.pdf

Rachelle – Please make the following additions/changes to the requested analyses for soil samples collected on November 22, 2016, at LAUSD Roosevelt High School (see attachment):

- **Duplicate soil sample analysis** - please pull an aliquot from the following soil samples to be used as duplicate samples and perform the analyses for Arsenic and/or Lead (EPA Method 6010B) as specified below.
 - B-14a-0.5 - Arsenic
 - B-16a-0.5 – Lead and Arsenic
 - B-16c-0.5 – Lead and Arsenic
 - AA1917-4c-2.5 - Lead
 - AA1917-4d-2.5 - Lead
 - P15d-2.5 - Lead
 - Q15a-3.5 - Lead
 - R15-0.25 - Lead
 - CRA-2d-0.5 Lead and Arsenic
 - CRA-2d-2.5 - Lead

Let me know if you have any questions.

Thanks,

John Nordenstam, PG
Senior Project Geologist

Special Instructions/Comments:			
1. Sample receiving hours: 7:30 AM to 7:30 PM Monday - Friday; Saturday 8:00 AM to 12:00 PM. 2. Samples submitted after 3:00 PM, are considered received the following business day at 8:00 AM. 3. The following turnaround time conditions apply: TAT = 0 : 300% Surcharge SAME BUSINESS DAY (if received by 9:00 AM) TAT = 1 : 100% Surcharge NEXT BUSINESS DAY (COB 5:00 PM) TAT = 2 : 30% Surcharge 2ND BUSINESS DAY (COB 5:00 PM) TAT = 3 : 30% Surcharge 3RD BUSINESS DAY (COB 5:00 PM) TAT = 4 : 20% Surcharge 4TH BUSINESS DAY (COB 5:00 PM) TAT = 5 : NO SURCHARGE 5TH BUSINESS DAY (COB 5:00 PM) 4. Weekend, holiday, after-hours work - ask for quote. 5. Subcontract TAT is 10 - 15 business days. Projects requiring shorter TATs will incur a surcharge respective to the subcontractor - ask for quote. 6. Liquid and solid samples will be disposed of after 45 calendar days from receipt of samples; air samples will be disposed of after 14 calendar days after receipt of samples. 7. Electronic records maintained for five (5) years from report date. 8. Hard copy reports will be disposed of after 45 calendar days from report date. 9. All reports are prepared by the laboratory. Complimentary storage for forty-five (45) calendar days from receipt of samples; \$20/sample/week if extended storage is requested. 10. Rust TAT/STC samples: add 2 days to analysis TAT for extraction on procedure. 11. Unanalyzed samples will incur a disposal fee of \$7 per sample.

Re: ATL Work Order Number : 1604231
Client Reference : Roosevelt HS, 265642

Enclosed are the results for sample(s) received on November 22, 2016 by Advanced Technology Laboratories. The sample(s) are tested for the parameters as indicated on the enclosed chain of custody in accordance with applicable laboratory certifications. The laboratory results contained in this report specifically pertains to the sample(s) submitted.

Thank you for the opportunity to serve the needs of your company. If you have any questions, please feel free to contact me or your Project Manager.

Sincerely,

A handwritten signature in black ink, appearing to read "E Rodriguez", is positioned above the printed name.

Eddie Rodriguez
Laboratory Director

The cover letter and the case narrative are an integral part of this analytical report and its absence renders the report invalid. Test results contained within this data package meet the requirements of applicable state-specific certification programs. The report cannot be reproduced without written permission from the client and Advanced Technology Laboratories.

CASE NARRATIVE

Results were J-flagged. "J" is used to flag those results that are between the PQL (Practical Quantitation Limit) and the calculated MDL (Method Detection Limit). Results that are "J" flagged are estimated values since it becomes difficult to accurately quantitate the analyte near the MDL.

Notes and Definitions

M1	Matrix spike recovery outside of acceptance limit. The analytical batch was validated by the laboratory control sample.
J	Analyte detected below the Practical Quantitation Limit but above or equal to the Method Detection Limit. Result is an estimated concentration.
D1	Sample required dilution due to possible matrix interference.
ND	Analyte is not detected at or above the Practical Quantitation Limit (PQL). When client requests quantitation against MDL, analyte is not detected at or above the Method Detection Limit (MDL)
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
NR	Not Reported
RPD	Relative Percent Difference
CA2	CA-ELAP (CDPH)
OR1	OR-NELAP (OSPHL)
TX1	TX-NELAP (TCEQ)

Notes:

- (1) The reported MDL and PQL are based on prep ratio variation and analytical dilution.
- (2) The suffix [2C] of specific analytes signifies that the reported result is taken from the instrument's second column.
- (3) Results are wet unless otherwise specified.

Subject: LAUSD Roosevelt HS - Additional Laboratory Analyses of Soil Samples for STLC and TCLP
Attachments: Draft Table 2 - STLC and TCLP.xlsx

Importance: High

Rachelle – we need to conduct additional analyses for STLC and TCLP on the soil samples collected from LAUSD Roosevelt HS in Los Angeles. There are a total of:

- 65 samples to be analyzed for STLC for lead
- 6 samples to be analyzed for TCLP for lead
- 1 sample to be analyzed for STLC for arsenic

Attached is a spreadsheet showing the soil samples, the required analysis, and the corresponding laboratory report number for each of the samples. Please include TRC PO # 100816 on your invoice. Let me know if you have any questions.

Thanks,

John Nordenstam, PG

Notes:

Table summarizes arsenic and lead laboratory analytical reports for soil samples.

Samples with detectable concentrations presented in **bold font**.

Arsenic screening level based on California background level.

TTL screening level based on Department of Toxic Substances Control (DTSC) Office of Human Ecological Risk (HERO) Human Health Risk Assessment (HRR) Note Number 3, Table 1 (DTSC, 2015).

OCPs screening levels are based on Department of Toxic Substances Control (DTSC) Office of Human Ecological Risk (HERO) Human Health Risk Assessment (HRR) Note Number 3-Table 1 Cancer Value (or Non-Cancer value, lowest value) (DTSC, 2015) or United States Environmental Protection Agency (US EPA) Regional Screening Level (carcinogenic or non-carcinogenic, lowest value) (EPA, 2015).

LAUSD = Los Angeles Unified School District

ID = Identification

bgs = below ground surface

EPA = Environmental Protection Agency

--- = not analyzed

mg/kg = milligrams per kilogram

mg/L = milligrams per liter

μg/L = micrograms per liter

DUP = Duplicate of preceding sample

J = Analyte detected below the Practical Quantitation Limit but above or equal to the Method Detection Limit.

Result is an estimated concentration.

(1) = 3.8J Aroclor 1260

(2) = 11J Aroclor 1260

Re: ATL Work Order Number : 1604231
Client Reference : Roosevelt HS, 265642

Enclosed are the results for sample(s) received on November 22, 2016 by Advanced Technology Laboratories. The sample(s) are tested for the parameters as indicated on the enclosed chain of custody in accordance with applicable laboratory certifications. The laboratory results contained in this report specifically pertains to the sample(s) submitted.

Thank you for the opportunity to serve the needs of your company. If you have any questions, please feel free to contact me or your Project Manager.

Sincerely,

A handwritten signature in black ink, appearing to read "E Rodriguez", is written over a light gray horizontal line.

Eddie Rodriguez
Laboratory Director

The cover letter and the case narrative are an integral part of this analytical report and its absence renders the report invalid. Test results contained within this data package meet the requirements of applicable state-specific certification programs. The report cannot be reproduced without written permission from the client and Advanced Technology Laboratories.

CASE NARRATIVE

Results were J-flagged. "J" is used to flag those results that are between the PQL (Practical Quantitation Limit) and the calculated MDL (Method Detection Limit). Results that are "J" flagged are estimated values since it becomes difficult to accurately quantitate the analyte near the MDL.

Notes and Definitions

R	RPD value outside acceptance criteria. Calculation is based on raw values.
M1	Matrix spike recovery outside of acceptance limit. The analytical batch was validated by the laboratory control sample.
J	Analyte detected below the Practical Quantitation Limit but above or equal to the Method Detection Limit. Result is an estimated concentration.
D1	Sample required dilution due to possible matrix interference.
ND	Analyte is not detected at or above the Practical Quantitation Limit (PQL). When client requests quantitation against MDL, analyte is not detected at or above the Method Detection Limit (MDL)
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
NR	Not Reported
RPD	Relative Percent Difference
CA2	CA-ELAP (CDPH)
OR1	OR-NELAP (OSPHL)
TX1	TX-NELAP (TCEQ)

Notes:

- (1) The reported MDL and PQL are based on prep ratio variation and analytical dilution.
- (2) The suffix [2C] of specific analytes signifies that the reported result is taken from the instrument's second column.
- (3) Results are wet unless otherwise specified.

Subject: LAUSD Roosevelt HS - Additional Laboratory Analyses of Soil Samples for TCLP
Attachments: Draft Table 2 - STLC and TCLP.xlsx

Rachelle – we need to conduct additional analyses for TCLP on the soil samples collected from LAUSD Roosevelt HS in Los Angeles. There are a total of 44 samples to be analyzed for TCLP for lead. Attached is a spreadsheet showing the soil samples, the required analysis, and the corresponding laboratory report number for each of the samples. Please include TRC PO # 100816 on your invoice. Let me know if you have any questions.

Thanks,

John Nordenstam, PG

Hi John,

I have received your request but don't see sample labeled P16c-3.5 under ATL WO# 1604231 in our system.

Thanks,

Diane

Subject: LAUSD Roosevelt HS - Additional Laboratory Analyses of Soil Samples for As and Pb

Rachelle – we need to conduct additional analyses for arsenic and lead on the soil samples collected from LAUSD Roosevelt HS in Los Angeles. There are a total of 35 samples to be analyzed for arsenic and/or lead. Refer to the summary of sample IDs and corresponding lab report numbers presented below. Please include TRC PO # 100816 on your invoice.

Area 3 (Lab report #1604231)

Enclosed are the results for sample(s) received on November 22, 2016 by Advanced Technology Laboratories. The sample(s) are tested for the parameters as indicated on the enclosed chain of custody in accordance with applicable laboratory certifications. The laboratory results contained in this report specifically pertains to the sample(s) submitted.

Thank you for the opportunity to serve the needs of your company. If you have any questions, please feel free to contact me or your Project Manager.

Sincerely,

A handwritten signature in black ink, appearing to read "Eddie Rodriguez", with a small "ER" monogram below it.

Eddie Rodriguez
Laboratory Director

The cover letter and the case narrative are an integral part of this analytical report and its absence renders the report invalid. Test results contained within this data package meet the requirements of applicable state-specific certification programs. The report cannot be reproduced without written permission from the client and Advanced Technology Laboratories.

SUMMARY OF SAMPLES

Sample ID	Laboratory ID	Matrix	Date Sampled	Date Received
B-13a-2.5	1604231-02	Soil	11/22/16 7:44	11/22/16 18:30
B-15b-0.5	1604231-13	Soil	11/22/16 8:04	11/22/16 18:30

CASE NARRATIVE

Results were J-flagged. "J" is used to flag those results that are between the PQL (Practical Quantitation Limit) and the calculated MDL (Method Detection Limit). Results that are "J" flagged are estimated values since it becomes difficult to accurately quantitate the analyte near the MDL.

Irvine , CA 92618

Project Number : Roosevelt HS, 265642

Report To : John Nordenstam

Reported : 02/08/2017

Notes and Definitions

R	RPD value outside acceptance criteria. Calculation is based on raw values.
M1	Matrix spike recovery outside of acceptance limit. The analytical batch was validated by the laboratory control sample.
D1	Sample required dilution due to possible matrix interference.
ND	Analyte is not detected at or above the Practical Quantitation Limit (PQL). When client requests quantitation against MDL, analyte is not detected at or above the Method Detection Limit (MDL)
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
NR	Not Reported
RPD	Relative Percent Difference
CA2	CA-ELAP (CDPH)
OR1	OR-NELAP (OSPHL)
TX1	TX-NELAP (TCEQ)

Notes:

- (1) The reported MDL and PQL are based on prep ratio variation and analytical dilution.
- (2) The suffix [2C] of specific analytes signifies that the reported result is taken from the instrument's second column.
- (3) Results are wet unless otherwise specified.

Subject: LAUSD Roosevelt HS - Additional Laboratory Analyses of Soil Samples for STLC Extraction for Lead

Rachelle – we need to conduct additional analyses for lead on the soil samples collected from LAUSD Roosevelt HS in Los Angeles. There are a total of 3 samples to be analyzed for STLC extraction for lead:

Area 3 (Lab report #1604231)

- B-13a-2.5
- B-15b-0.5

Area 6 (Lab report # 1604849)

- AA2038-9-0.5

Please include TRC PO # 100816 on your invoice. Let me know if you have any questions.

Thanks,

John Nordenstam, PG

TX1	TX-NELAP (TCEQ)

Notes:

- (1) The reported MDL and PQL are based on prep ratio variation and analytical dilution.
- (2) The suffix [2C] of specific analytes signifies that the reported result is taken from the instrument's second column.
- (3) Results are wet unless otherwise specified.

Subject: RE: LAUSD Roosevelt HS - Additional Laboratory Analyses of Soil Samples for As and Pb

Rachelle – There are three additional sample analyses needed for the samples collected from Area 6 of LAUSD Roosevelt HS:

- Sample ID: Q-15b-2.5 for lead (Lab report #1604231)
- Sample ID: Q-15d-2.5 for lead (Lab report #1604231)
- Sample ID: R15a-2.5 for lead (Lab report #1604231)

Please include TRC PO # 100816 on your invoice. Let me know if you have any questions.

Thanks,

John Nordenstam, PG
Senior Project Geologist

Re: ATL Work Order Number : 1604231
Client Reference : Roosevelt HS, 265642

Enclosed are the results for sample(s) received on November 22, 2016 by Advanced Technology Laboratories. The sample(s) are tested for the parameters as indicated on the enclosed chain of custody in accordance with applicable laboratory certifications. The laboratory results contained in this report specifically pertains to the sample(s) submitted.

Thank you for the opportunity to serve the needs of your company. If you have any questions, please feel free to contact me or your Project Manager.

Sincerely,

A handwritten signature in black ink, appearing to read "E Rodriguez".

Eddie Rodriguez
Laboratory Director

The cover letter and the case narrative are an integral part of this analytical report and its absence renders the report invalid. Test results contained within this data package meet the requirements of applicable state-specific certification programs. The report cannot be reproduced without written permission from the client and Advanced Technology Laboratories.

SUMMARY OF SAMPLES

Sample ID	Laboratory ID	Matrix	Date Sampled	Date Received
Q15d-2.5	1604231-75	Soil	11/22/16 12:55	11/22/16 18:30

CASE NARRATIVE

Results were J-flagged. "J" is used to flag those results that are between the PQL (Practical Quantitation Limit) and the calculated MDL (Method Detection Limit). Results that are "J" flagged are estimated values since it becomes difficult to accurately quantitate the analyte near the MDL.

Notes and Definitions

J	Analyte detected below the Practical Quantitation Limit but above or equal to the Method Detection Limit. Result is an estimated concentration.
D1	Sample required dilution due to possible matrix interference.
ND	Analyte is not detected at or above the Practical Quantitation Limit (PQL). When client requests quantitation against MDL, analyte is not detected at or above the Method Detection Limit (MDL)
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
NR	Not Reported
RPD	Relative Percent Difference
CA2	CA-ELAP (CDPH)
OR1	OR-NELAP (OSPHL)
TX1	TX-NELAP (TCEQ)

Notes:

- (1) The reported MDL and PQL are based on prep ratio variation and analytical dilution.
- (2) The suffix [2C] of specific analytes signifies that the reported result is taken from the instrument's second column.
- (3) Results are wet unless otherwise specified.

Irvine , CA 92618

Project Number : ROOSEVELT HS, 265642

Report To : John Nordenstam

Reported : 12/16/2016

Notes and Definitions

R	RPD value outside acceptance criteria. Calculation is based on raw values.
M1	Matrix spike recovery outside of acceptance limit. The analytical batch was validated by the laboratory control sample.
J	Analyte detected below the Practical Quantitation Limit but above or equal to the Method Detection Limit. Result is an estimated concentration.
ND	Analyte is not detected at or above the Practical Quantitation Limit (PQL). When client requests quantitation against MDL, analyte is not detected at or above the Method Detection Limit (MDL)
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
NR	Not Reported
RPD	Relative Percent Difference
CA2	CA-ELAP (CDPH)
OR1	OR-NELAP (OSPHL)
TX1	TX-NELAP (TCEQ)

Notes:

- (1) The reported MDL and PQL are based on prep ratio variation and analytical dilution.
- (2) The suffix [2C] of specific analytes signifies that the reported result is taken from the instrument's second column.
- (3) Results are wet unless otherwise specified.

1. Sample receiving hours: 7:30 AM to 7:30 PM Monday - Friday, Saturday 8:00 AM to 12:00 PM.
2. Samples Submitted AFTER 3:00 PM, are considered received the following Business day at 8:00 AM.
3. The following turnaround time conditions apply:
TAT = 1: 100% Surcharge NEXT BUSINESS DAY (COB 5:00 PM)
TAT = 2: 50% Surcharge 2ND BUSINESS DAY (COB 5:00 PM)
TAT = 3: 30% Surcharge 3RD BUSINESS DAY (COB 5:00 PM)
TAT = 4: 20% Surcharge 4TH BUSINESS DAY (COB 5:00 PM)
TAT = 5: NO SURCHARGE 5th BUSINESS DAY (COB 5:00 PM)
4. Weekend, Holiday, or serious work - ask for quote.
5. Subjective to the subcontract lab - ask for quote.
6. Liquid and solid samples will be disposed of after 45 calendar days from receipt of samples, air samples will be disposed of after 14 calendar days after receipt of samples.
7. Electronic records maintained for five (5) years from report date.
8. Hard copy records will be disposed of after 45 calendar days from report date.
9. Storage and Report Fees:
- Liquid & solid samples: Complimentary storage for forty-five (45) calendar days from receipt of samples; \$20/sample/month if extended storage or hold is requested.
- Air samples: Complimentary storage for ten (10) calendar days from receipt of samples; \$30/sample/week if extended storage is requested.
- Hard copy and regenerated reports/EDOs: \$17.50 per hard copy report requested; \$50.00 per regenerated/reforma? ed report; \$35 per EDO processed EDO.
10. R. (PST) minimum turnaround time is 2 days to analysis TAT for extraction on procedure.
11. Unanalyzed samples will incur a disposal fee of \$7 per sample.

Re: ATL Work Order Number : 1604246
Client Reference : ROOSEVELT HS, 265642

Enclosed are the results for sample(s) received on November 23, 2016 by Advanced Technology Laboratories. The sample(s) are tested for the parameters as indicated on the enclosed chain of custody in accordance with applicable laboratory certifications. The laboratory results contained in this report specifically pertains to the sample(s) submitted.

Thank you for the opportunity to serve the needs of your company. If you have any questions, please feel free to contact me or your Project Manager.

Sincerely,

A handwritten signature in black ink, appearing to read "E Rodriguez".

Eddie Rodriguez
Laboratory Director

The cover letter and the case narrative are an integral part of this analytical report and its absence renders the report invalid. Test results contained within this data package meet the requirements of applicable state-specific certification programs. The report cannot be reproduced without written permission from the client and Advanced Technology Laboratories.

CASE NARRATIVE

Results were J-flagged. "J" is used to flag those results that are between the PQL (Practical Quantitation Limit) and the calculated MDL (Method Detection Limit). Results that are "J" flagged are estimated values since it becomes difficult to accurately quantitate the analyte near the MDL.

Notes and Definitions

R	RPD value outside acceptance criteria. Calculation is based on raw values.
M1	Matrix spike recovery outside of acceptance limit. The analytical batch was validated by the laboratory control sample.
J	Analyte detected below the Practical Quantitation Limit but above or equal to the Method Detection Limit. Result is an estimated concentration.
D1	Sample required dilution due to possible matrix interference.
ND	Analyte is not detected at or above the Practical Quantitation Limit (PQL). When client requests quantitation against MDL, analyte is not detected at or above the Method Detection Limit (MDL)
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
NR	Not Reported
RPD	Relative Percent Difference
CA2	CA-ELAP (CDPH)
OR1	OR-NELAP (OSPHL)
TX1	TX-NELAP (TCEQ)

Notes:

- (1) The reported MDL and PQL are based on prep ratio variation and analytical dilution.
- (2) The suffix [2C] of specific analytes signifies that the reported result is taken from the instrument's second column.
- (3) Results are wet unless otherwise specified.

Subject: LAUSD Roosevelt HS - Additional Laboratory Analyses of Soil Samples for STLC and TCLP
Attachments: Draft Table 2 - STLC and TCLP.xlsx

Importance: High

Rachelle – we need to conduct additional analyses for STLC and TCLP on the soil samples collected from LAUSD Roosevelt HS in Los Angeles. There are a total of:

- 65 samples to be analyzed for STLC for lead
- 6 samples to be analyzed for TCLP for lead
- 1 sample to be analyzed for STLC for arsenic

Attached is a spreadsheet showing the soil samples, the required analysis, and the corresponding laboratory report number for each of the samples. Please include TRC PO # 100816 on your invoice. Let me know if you have any questions.

Thanks,

John Nordenstam, PG
Senior Project Geologist

Notes:

Table summarizes arsenic and lead laboratory analytical reports for soil samples.

Samples with detectable concentrations presented in **bold font**.

Arsenic screening level based on California background level.

TTL screening level based on Department of Toxic Substances Control (DTSC) Office of Human Ecological Risk (HERO) Human Health Risk Assessment (HRRRA) Note Number 3, Table 1 (DTSC, 2015).

OCPs screening levels are based on Department of Toxic Substances Control (DTSC) Office of Human Ecological Risk (HERO) Human Health Risk Assessment (HRRRA) Note Number 3-Table 1 Cancer Value (or Non-Cancer value, lowest value) (DTSC, 2015) or United States Environmental Protection Agency (US EPA) Regional Screening Level (carcinogenic or non-carcinogenic, lowest value) (EPA, 2015).

LAUSD = Los Angeles Unified School District
ID = Identification
bgs = below ground surface
EPA = Environmental Protection Agency
--- = not analyzed

mg/kg = milligrams per kilogram

mg/L = milligrams per liter

μg/L = micrograms per liter

DUP = Duplicate of preceding sample

J = Analyte detected below the Practical Quantitation Limit but above or equal to the Method Detection Limit.

Result is an estimated concentration.

(1) = 3.8J Aroclor 1260

(2) = 11J Aroclor 1260

Re: ATL Work Order Number : 1604246
Client Reference : ROOSEVELT HS, 265642

Enclosed are the results for sample(s) received on November 23, 2016 by Advanced Technology Laboratories. The sample(s) are tested for the parameters as indicated on the enclosed chain of custody in accordance with applicable laboratory certifications. The laboratory results contained in this report specifically pertains to the sample(s) submitted.

Thank you for the opportunity to serve the needs of your company. If you have any questions, please feel free to contact me or your Project Manager.

Sincerely,

A handwritten signature in black ink, appearing to read "E Rodriguez", is written over a light gray horizontal line.

Eddie Rodriguez
Laboratory Director

The cover letter and the case narrative are an integral part of this analytical report and its absence renders the report invalid. Test results contained within this data package meet the requirements of applicable state-specific certification programs. The report cannot be reproduced without written permission from the client and Advanced Technology Laboratories.

CASE NARRATIVE

Results were J-flagged. "J" is used to flag those results that are between the PQL (Practical Quantitation Limit) and the calculated MDL (Method Detection Limit). Results that are "J" flagged are estimated values since it becomes difficult to accurately quantitate the analyte near the MDL.

Notes and Definitions

R	RPD value outside acceptance criteria. Calculation is based on raw values.
J	Analyte detected below the Practical Quantitation Limit but above or equal to the Method Detection Limit. Result is an estimated concentration.
D1	Sample required dilution due to possible matrix interference.
ND	Analyte is not detected at or above the Practical Quantitation Limit (PQL). When client requests quantitation against MDL, analyte is not detected at or above the Method Detection Limit (MDL)
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
NR	Not Reported
RPD	Relative Percent Difference
CA2	CA-ELAP (CDPH)
OR1	OR-NELAP (OSPHL)
TX1	TX-NELAP (TCEQ)

Notes:

- (1) The reported MDL and PQL are based on prep ratio variation and analytical dilution.
- (2) The suffix [2C] of specific analytes signifies that the reported result is taken from the instrument's second column.
- (3) Results are wet unless otherwise specified.

Subject: LAUSD Roosevelt HS - Additional Laboratory Analyses of Soil Samples for STLC and TCLP
Attachments: Draft Table 2 - STLC and TCLP.xlsx

Importance: High

Rachelle – we need to conduct additional analyses for STLC and TCLP on the soil samples collected from LAUSD Roosevelt HS in Los Angeles. There are a total of:

- 65 samples to be analyzed for STLC for lead
- 6 samples to be analyzed for TCLP for lead
- 1 sample to be analyzed for STLC for arsenic

Attached is a spreadsheet showing the soil samples, the required analysis, and the corresponding laboratory report number for each of the samples. Please include TRC PO # 100816 on your invoice. Let me know if you have any questions.

Thanks,

John Nordenstam, PG
Senior Project Geologist

Notes:

Table summarizes arsenic and lead laboratory analytical reports for soil samples.

Samples with detectable concentrations presented in **bold font**.

Arsenic screening level based on California background level.

TTL screening level based on Department of Toxic Substances Control (DTSC) Office of Human Ecological Risk (HERO) Human Health Risk Assessment (HRRRA) Note Number 3, Table 1 (DTSC, 2015).

OCPs screening levels are based on Department of Toxic Substances Control (DTSC) Office of Human Ecological Risk (HERO) Human Health Risk Assessment (HRRRA) Note Number 3-Table 1 Cancer Value (or Non-Cancer value, lowest value) (DTSC, 2015) or United States Environmental Protection Agency (US EPA) Regional Screening Level (carcinogenic or non-carcinogenic, lowest value) (EPA, 2015).

LAUSD = Los Angeles Unified School District

ID = Identification

bgs = below ground surface

EPA = Environmental Protection Agency

--- = not analyzed

mg/kg = milligrams per kilogram

mg/L = milligrams per liter

μg/L = micrograms per liter

DUP = Duplicate of preceding sample

J = Analyte detected below the Practical Quantitation Limit but above or equal to the Method Detection Limit.

Result is an estimated concentration.

(1) = 3.8J Aroclor 1260

(2) = 11J Aroclor 1260

Re: ATL Work Order Number : 1604849
Client Reference : ROOSEVELT HS, 265642

Enclosed are the results for sample(s) received on December 21, 2016 by Advanced Technology Laboratories. The sample(s) are tested for the parameters as indicated on the enclosed chain of custody in accordance with applicable laboratory certifications. The laboratory results contained in this report specifically pertains to the sample(s) submitted.

Thank you for the opportunity to serve the needs of your company. If you have any questions, please feel free to contact me or your Project Manager.

Sincerely,

A handwritten signature in black ink, appearing to read "E Rodriguez", is written over a light blue horizontal line.

Eddie Rodriguez
Laboratory Director

The cover letter and the case narrative are an integral part of this analytical report and its absence renders the report invalid. Test results contained within this data package meet the requirements of applicable state-specific certification programs. The report cannot be reproduced without written permission from the client and Advanced Technology Laboratories.

CASE NARRATIVE

All volatile analyses were performed using 5035 preservation requirements. Any high level dilutions were performed on a preserved methanol sample unless otherwise noted.

Results were J-flagged. "J" is used to flag those results that are between the PQL (Practical Quantitation Limit) and the calculated MDL (Method Detection Limit). Results that are "J" flagged are estimated values since it becomes difficult to accurately quantitate the analyte near the MDL.

Notes and Definitions

S4	Surrogate was diluted out.
R3	RPD value outside acceptance criteria. Calculation is based on raw values. The analytical batch was validated by the Laboratory Control Sample (LCS).
R	RPD value outside acceptance criteria. Calculation is based on raw values.
M2	Matrix spike recovery outside of acceptance limit due to possible matrix interference. The analytical batch was validated by the laboratory control sample.
M1	Matrix spike recovery outside of acceptance limit. The analytical batch was validated by the laboratory control sample.
L4	Laboratory Control Sample outside of control limit but within Marginal Exceedance (ME) limit.
J	Analyte detected below the Practical Quantitation Limit but above or equal to the Method Detection Limit. Result is an estimated concentration.
ND	Analyte is not detected at or above the Practical Quantitation Limit (PQL). When client requests quantitation against MDL, analyte is not detected at or above the Method Detection Limit (MDL)
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
NR	Not Reported
RPD	Relative Percent Difference
CA2	CA-ELAP (CDPH)
OR1	OR-NELAP (OSPHL)
TX1	TX-NELAP (TCEQ)

Notes:

- (1) The reported MDL and PQL are based on prep ratio variation and analytical dilution.
- (2) The suffix [2C] of specific analytes signifies that the reported result is taken from the instrument's second column.
- (3) Results are wet unless otherwise specified.

Subject: LAUSD Roosevelt HS - Compositing Instructions for IDW Soil Sample
Importance: High

Rachelle – Here are additional instructions for the IDW Soil Sample from LAUSD Roosevelt HS. Please analyze only one of the TerraCore sets for TPH-G and VOCs; hold all other analyses on the extra TerraCores. Composite all three sample jars for this sample (Composite 3:1) and analyze the composite sample for all other analyses (see attachment). Let me know if you have any questions.

Thanks,

John Nordenstam, PG

 • Liquid & solid samples: Complimentary storage for forty-h v (45) calendar days from receipt of samples, \$2/sample/month if extended storage or hold is requested;
 • Extended storage: \$20/sample/week if extended storage is requested;
 • Complimentary storage for ten (10) calendar days from receipt of samples, \$207/sample/week if extended storage is requested;
 • Hard copy and regenerated reports/EODS: \$17.50 per hard copy request; \$50.00 per regenerated/reformat ed report;
 \$35 per processed EDO.
10. Rush TOLP/STLC samples, add 2 days to analysis TAT for extraction on procedure.
11. Unanalyzed samples will incur a disposal fee of \$7 per sample.

1. Sample receiving hours: 7:30 AM to 7:30 PM Monday - Friday, Saturday 8:00 AM to 12:00 PM.
2. Samples Submitted After 3:00 PM, are considered received the following Business day at 8:00 AM.
3. The following turnaround time conditions apply: PAY IF RECEIVED BY 9:00 AM
TAT = 1: 100% SURCHARGE NEXT BUSINESS DAY (COB 5:00 PM)
TAT = 2: 50% SURCHARGE NEXT BUSINESS DAY (COB 5:00 PM)
TAT = 3: 30% SURCHARGE 3RD BUSINESS DAY (COB 5:00 PM)
TAT = 4: 10% SURCHARGE 4TH BUSINESS DAY (COB 5:00 PM)
TAT = 5: NO SURCHARGE 5TH BUSINESS DAY (COB 5:00 PM)
Weekend, holiday, after-hours work - ask for quote.
Subcontract TAT is 10 - 15 business days. Projects requiring shorter TATs will incur a surcharge respective to the subcontract lab ... ask for quote.
Liquid and solid samples will be disposed of after 45 calendar days from receipt of samples; air

Subject: LAUSD Roosevelt HS - Duplicates for Soil Samples Collected 12/21/16

Rachelle – Please make the following additions/changes to the requested analyses for soil samples collected on December 21, 2016, at LAUSD Roosevelt High School (see attachment):

- **Duplicate soil sample analysis** - please pull an aliquot from the following soil samples to be used as duplicate samples and perform the analyses for Arsenic using EPA Method 6010B:
 - [AA2684-6@0.5](#) - Arsenic
 - [AA2543-7@2.5](#) – Arsenic
 - [AA2038-7@3.5](#) – Arsenic
 - [AA2249-5@0.5](#) – Arsenic

Let me know if you have any questions.

Thanks,

John Nordenstam, PG
Senior Project Geologist

Enclosed are the results for sample(s) received on December 21, 2016 by Advanced Technology Laboratories. The sample(s) are tested for the parameters as indicated on the enclosed chain of custody in accordance with applicable laboratory certifications. The laboratory results contained in this report specifically pertains to the sample(s) submitted.

Thank you for the opportunity to serve the needs of your company. If you have any questions, please feel free to contact me or your Project Manager.

Sincerely,

A handwritten signature in black ink, appearing to read "E Rodriguez", is positioned above the printed name.

Eddie Rodriguez
Laboratory Director

The cover letter and the case narrative are an integral part of this analytical report and its absence renders the report invalid. Test results contained within this data package meet the requirements of applicable state-specific certification programs. The report cannot be reproduced without written permission from the client and Advanced Technology Laboratories.

CASE NARRATIVE

All volatile analyses were performed using 5035 preservation requirements. Any high level dilutions were performed on a preserved methanol sample unless otherwise noted.

Results were J-flagged. "J" is used to flag those results that are between the PQL (Practical Quantitation Limit) and the calculated MDL (Method Detection Limit). Results that are "J" flagged are estimated values since it becomes difficult to accurately quantitate the analyte near the MDL.

Notes and Definitions

ND	Analyte is not detected at or above the Practical Quantitation Limit (PQL). When client requests quantitation against MDL, analyte is not detected at or above the Method Detection Limit (MDL)
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
NR	Not Reported
RPD	Relative Percent Difference
CA2	CA-ELAP (CDPH)
OR1	OR-NELAP (OSPHL)
TX1	TX-NELAP (TCEQ)

Notes:

- (1) The reported MDL and PQL are based on prep ratio variation and analytical dilution.
- (2) The suffix [2C] of specific analytes signifies that the reported result is taken from the instrument's second column.
- (3) Results are wet unless otherwise specified.

Hi John,

I have received your request but don't see sample labeled P16c-3.5 under ATL WO# 1604231 in our system.

Thanks,

Diane

SUMMARY OF SAMPLES

Sample ID	Laboratory ID	Matrix	Date Sampled	Date Received
AA2038-9 @ 0.5	1604849-22	Soil	12/21/16 9:53	12/21/16 13:30

CASE NARRATIVE

Results were J-flagged. "J" is used to flag those results that are between the PQL (Practical Quantitation Limit) and the calculated MDL (Method Detection Limit). Results that are "J" flagged are estimated values since it becomes difficult to accurately quantitate the analyte near the MDL.

Report To : John Nordenstam

Reported : 02/08/2017

Notes and Definitions

R	RPD value outside acceptance criteria. Calculation is based on raw values.
M1	Matrix spike recovery outside of acceptance limit. The analytical batch was validated by the laboratory control sample.
D1	Sample required dilution due to possible matrix interference.
ND	Analyte is not detected at or above the Practical Quantitation Limit (PQL). When client requests quantitation against MDL, analyte is not detected at or above the Method Detection Limit (MDL)
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
NR	Not Reported
RPD	Relative Percent Difference
CA2	CA-ELAP (CDPH)
OR1	OR-NELAP (OSPHL)
TX1	TX-NELAP (TCEQ)

Notes:

- (1) The reported MDL and PQL are based on prep ratio variation and analytical dilution.
- (2) The suffix [2C] of specific analytes signifies that the reported result is taken from the instrument's second column.
- (3) Results are wet unless otherwise specified.

Enclosed are the results for sample(s) received on December 21, 2016 by Advanced Technology Laboratories. The sample(s) are tested for the parameters as indicated on the enclosed chain of custody in accordance with applicable laboratory certifications. The laboratory results contained in this report specifically pertains to the sample(s) submitted.

Thank you for the opportunity to serve the needs of your company. If you have any questions, please feel free to contact me or your Project Manager.

Sincerely,

A handwritten signature in black ink, appearing to read "E Rodriguez", is placed above the printed name.

Certificate of Analysis

TRC

9685 Research Drive

Irvine , CA 92618

Project Number : Roosevelt HS, 265642 / TA02

Report To : John Nordenstam

Reported : 04/03/2017

Notes and Definitions

R	RPD value outside acceptance criteria. Calculation is based on raw values.
M1	Matrix spike recovery outside of acceptance limit. The analytical batch was validated by the laboratory control sample.
J	Analyte detected below the Practical Quantitation Limit but above or equal to the Method Detection Limit. Result is an estimated concentration.
D1	Sample required dilution due to possible matrix interference.
ND	Analyte is not detected at or above the Practical Quantitation Limit (PQL). When client requests quantitation against MDL, analyte is not detected at or above the Method Detection Limit (MDL)
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
NR	Not Reported
RPD	Relative Percent Difference
CA2	CA-ELAP (CDPH)
OR1	OR-NELAP (OSPHL)
TX1	TX-NELAP (TCEQ)

Notes:

- (1) The reported MDL and PQL are based on prep ratio variation and analytical dilution.
- (2) The suffix [2C] of specific analytes signifies that the reported result is taken from the instrument's second column.
- (3) Results are wet unless otherwise specified.

samples will be disposed of after 14 calendar days after receipt of samples.

Electronic records maintained for five (5) years from report date.

Hard copy reports will be disposed of after 45 calendar days from report date.

Storage and Report Fees:

- Extended storage: Complimentary storage for forty-five (45) calendar days from receipt of samples; \$2/sample/month if retained & solid samples; \$20/sample/week if extended storage is requested.
- Extended storage: Complimentary storage for ten (10) calendar days from receipt of samples; \$20/sample/week if extended storage is requested.
- Hard copy and regenerated reports/EDDs: \$17.50 per hard copy report requested; \$50.00 per regenerated/reformatted report; \$35 per reprocessed EDD.

Q. Rush TCU/STLC samples: add 2 days to analysis TAT for extraction on procedure.

As the authorized agent of the company above, I hereby purchase laboratory services from ATL as shown above and hereby guarantee payment as quoted.

Sample Description

[illegible]

PROJECT SAMPLES

1. Sample receiving hours: 7:30 AM to 7:30 PM Monday - Friday; Saturday 8:00 AM to 12:00 PM.
2. Samples received after 7:30 PM on Monday - Friday will be received and received the following business day at 8:00 AM.
3. The following turnaround time conditions apply:
TAT = 0 - 30000+ Surcharge. SAME BUSINESS DAY if received by 9:00 AM
TAT = 1 - 100% Surcharge NEXT BUSINESS DAY (COB 5:00 PM)
TAT = 2 - 50% Surcharge 2ND BUSINESS DAY (COB 5:00 PM)
TAT = 3 - 30% Surcharge 3RD BUSINESS DAY (COB 5:00 PM)
TAT = 4 - 20% Surcharge 4TH BUSINESS DAY (COB 5:00 PM)
TAT = 5 - 10% Surcharge 5TH BUSINESS DAY (COB 5:00 PM)
TAT = 6 - NO SURCHARGE. 6TH BUSINESS DAY. ask for quote.
4. Weekend and holidays are not included in the above turn-around, ask for quote.
5. Subcontract TAT is 10 - 15 business days. Projects resulting shorter TATs will incur a surcharge.
6. Samples received after 7:30 PM on Monday - Friday will be received and received the following business day at 8:00 AM.
7. Liquid and solid samples will be disposed of after 15 calendar days from receipt of samples; air samples will be disposed of after 30 calendar days from receipt of samples; air

samples will be disposed of after 14 calendar days after receipt of samples.

Electronic records maintained for five (5) years from report date.

Hard copy reports will be disposed of after 45 calendar days from report date.

Storage and Report Fees:

Liquid & solid samples: Complementary storage for forty-hr vs (45) calendar days from receipt of samples; \$2/sample/month if extended storage is requested.

All samples: Complementary storage for ten (10) calendar days from receipt of samples; \$200/sample/week if extended storage is requested.

Hard copy and regenerated reports/EDOs: \$17.50 per hard copy report requested; \$50.00 per regenerated/reforma? ed report; \$35 per reprocesed EDO.

Hard copy and regenerated reports/EDOs: add 2 days to analysis TAT for extraction on procedure.

Unanalyzed samples will incur a disposal fee of \$21 per sample.

As the authorized agent of the company above, I hereby purchase laboratory services from ATL as shown above and hereby guarantee payment as quoted

Subject: Roosevelt HS - received 03/25/2017 and 03/26/2017

Hi John,

For samples collected on 03/25/17 the collection time in the chain of custody (CoC) does not match the container label for sample P15d1-4.5. On the CoC, the collection time is 14:35 but on the container it is 14:40. **Please use the sample time indicated on the sample container.**

For samples collected on 3/26/17, do you also need a 2 day TAT for IA-8-2.5, IA-8-3.5, IA-8-4.5, IA-7-0.5, IA-7-2.5, IA-7-3.5, IA-7-4.5, Q-15d1-0.5 & Q-15d1-2.5? TAT is not marked on the CoC. **YES, please analyze these samples on a 48 hour TAT.**

Please advise. I attached a copy of the CoC for your reference.

Thanks,
Marnellie

Advanced Technology Laboratories

Tel: (562) 989-4045 ext. 236
Fax: (562) 989-8807

Advanced Technology Laboratories is a full-service environmental lab providing organic and inorganic analyses of soil, water, wastewater, storm water and hazardous waste samples. ATL is accredited by the State of California, NELAP and State of Nevada and holds various SBE, DBE and MBE certificates and a USDA soil permit. ATL takes pride in providing our customers with quick turnaround time, excellent customer service and defensible data while offering very competitive rates. *Advanced Technology Labs - Your Partner for Quality Environmental Testing*

Subject: LAUSD Roosevelt High School - Clarifications for Soil Samples Collected March 25, 2017
Attachments: LAUSD Roosevelt - GC_3-25-17.pdf; LAUSD Roosevelt - AR_3-25-17.pdf

Rachelle – Please make the following additions/changes to the requested analyses for soil samples collected on March 25, 2017, at LAUSD Roosevelt High School (see attachments):

- Please add the analysis for lead for the following samples:
 - CR1-5d1-0.5
 - CR1-5d1-2.5
- **Duplicate soil sample analysis** - please pull an aliquot from the following soil samples to be used as duplicate samples and perform the analyses for Arsenic and/or Lead (EPA Method 6010B) as specified below.
 - H-2d1-3.5 for lead
 - C-18a-0.5 for lead
 - B-16a-3.5 for arsenic
 - CR1-5d1-0.5 for arsenic and lead
 - P15d1-4.5 for lead
 - AUD-3a1-0.5 for lead
 - AA1917-4-3.5 for lead
 - AA2684-2-3.5 for arsenic
- **Sample turnaround time (TAT)** - The TAT was not indicated on the COC for the following samples. Please analyze these samples on a 48 hour TAT:
 - CR1-5d1-0.5
 - P15d1-0.5
 - P15d1-2.5
 - P15d1-3.5
 - P15d1-4.5

Let me know if you have any questions.

Thanks,

John Nordenstam, PG

Subject: RE: Rush TAT Results - Roosevelt HS, 265642 / TA02 (ATL# 1701285)

Importance: High

Rachelle – Please conduct STLC extractions for lead on a 48 hour TAT for the following samples included on this lab report :

- H-2d1-0.5
- PE-3-3.5
- PE-3b1-2.5
- B-13a-3.5
- Q15a-4.5
- P15d1-3.5

Let me know if you have any questions.

Thanks,

John Nordenstam, PG
Senior Project Geologist

Subject: Rush TAT Results - Roosevelt HS, 265642 / TA02 (ATL# 1701285)

Hi John,

Please find your rush TAT results for the above project attached. If I can further assist, please let me know. Thanks.

Rachelle Arada
Project Manager

Advanced Technology Laboratories
www.atlglobal.com

Fax: (562) 989-4040

Advanced Technology Laboratories is a full-service environmental lab providing organic and inorganic analyses of soil, water, wastewater, storm water and hazardous waste samples. ATL is accredited by the State of California, NELAP and State of Oregon (Air) and holds various SBE, DBE and MBE certificates and a USDA soil permit. ATL takes pride in providing our customers with quick turnaround time, excellent customer service and defensible data while offering very competitive rates. *Advanced Technology Labs - Your Partner for Quality Environmental Testing*

Re: ATL Work Order Number : 1701285
Client Reference : Roosevelt HS, 265642 / TA02

Enclosed are the results for sample(s) received on March 25, 2017 by Advanced Technology Laboratories. The sample(s) are tested for the parameters as indicated on the enclosed chain of custody in accordance with applicable laboratory certifications. The laboratory results contained in this report specifically pertains to the sample(s) submitted.

Thank you for the opportunity to serve the needs of your company. If you have any questions, please feel free to contact me or your Project Manager.

Sincerely,

A handwritten signature in black ink, appearing to read "E Rodriguez", is placed above the printed name.

Eddie Rodriguez
Laboratory Director

The cover letter and the case narrative are an integral part of this analytical report and its absence renders the report invalid. Test results contained within this data package meet the requirements of applicable state-specific certification programs. The report cannot be reproduced without written permission from the client and Advanced Technology Laboratories.

SUMMARY OF SAMPLES

Sample ID	Laboratory ID	Matrix	Date Sampled	Date Received
PE-3-3.5	1701285-11	Soil	3/25/17 9:00	3/25/17 16:00
P15d1-3.5	1701285-48	Soil	3/25/17 14:30	3/25/17 16:00

CASE NARRATIVE

Results were J-flagged. "J" is used to flag those results that are between the PQL (Practical Quantitation Limit) and the calculated MDL (Method Detection Limit). Results that are "J" flagged are estimated values since it becomes difficult to accurately quantitate the analyte near the MDL.

Notes and Definitions

J	Analyte detected below the Practical Quantitation Limit but above or equal to the Method Detection Limit. Result is an estimated concentration.
D1	Sample required dilution due to possible matrix interference.
ND	Analyte is not detected at or above the Practical Quantitation Limit (PQL). When client requests quantitation against MDL, analyte is not detected at or above the Method Detection Limit (MDL)
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
NR	Not Reported
RPD	Relative Percent Difference
CA2	CA-ELAP (CDPH)
OR1	OR-NELAP (OSPHL)
TX1	TX-NELAP (TCEQ)

Notes:

- (1) The reported MDL and PQL are based on prep ratio variation and analytical dilution.
- (2) The suffix [2C] of specific analytes signifies that the reported result is taken from the instrument's second column.
- (3) Results are wet unless otherwise specified.

Notes and Definitions

R	RPD value outside acceptance criteria. Calculation is based on raw values.
M1	Matrix spike recovery outside of acceptance limit. The analytical batch was validated by the laboratory control sample.
J	Analyte detected below the Practical Quantitation Limit but above or equal to the Method Detection Limit. Result is an estimated concentration.
D1	Sample required dilution due to possible matrix interference.
ND	Analyte is not detected at or above the Practical Quantitation Limit (PQL). When client requests quantitation against MDL, analyte is not detected at or above the Method Detection Limit (MDL)
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
NR	Not Reported
RPD	Relative Percent Difference
CA2	CA-ELAP (CDPH)
OR1	OR-NELAP (OSPHL)
TX1	TX-NELAP (TCEQ)

Notes:

- (1) The reported MDL and PQL are based on prep ratio variation and analytical dilution.
- (2) The suffix [2C] of specific analytes signifies that the reported result is taken from the instrument's second column.
- (3) Results are wet unless otherwise specified.

Rachelle Arada

From: Nordenstam, John [jnordenstam@trcsolutions.com]
Sent: Monday, March 27, 2017 11:33 AM
To: Rachelle Arada
Cc: Carmen Aguila; Maxwell, Jeff
Subject: LAUSD Roosevelt High School - Clarifications for Soil Samples Collected March 25, 2017
Attachments: LAUSD Roosevelt - GC_3-25-17.pdf; LAUSD Roosevelt - AR_3-25-17.pdf

Rachelle – Please make the following additions/changes to the requested analyses for soil samples collected on March 25, 2017, at LAUSD Roosevelt High School (see attachments):

- Please add the analysis for lead for the following samples:
 - CR1-5d1-0.5
 - CR1-5d1-2.5
- **Duplicate soil sample analysis** - please pull an aliquot from the following soil samples to be used as duplicate samples and perform the analyses for Arsenic and/or Lead (EPA Method 6010B) as specified below.
 - H-2d1-3.5 for lead
 - C-18a-0.5 for lead
 - B-16a-3.5 for arsenic
 - CR1-5d1-0.5 for arsenic and lead
 - P15d1-4.5 for lead
 - AUD-3a1-0.5 for lead
 - AA1917-4-3.5 for lead
 - AA2684-2-3.5 for arsenic
- **Sample turnaround time (TAT)** - The TAT was not indicated on the COC for the following samples. Please analyze these samples on a 48 hour TAT:
 - CR1-5d1-0.5
 - P15d1-0.5
 - P15d1-2.5
 - P15d1-3.5
 - P15d1-4.5

Let me know if you have any questions.

Thanks,

John Nordenstam, PG
Senior Project Geologist

As the authorized agent of the company above, I hereby purchase laboratory services from ATL as shown above and hereby guarantee payment as quoted.

Signature: [Signature] Date: 3/25/17

Submitter Print Name: John Norden

TERMS:
1. Samples received hours: 7:30 AM to 7:30 PM Monday - Friday, Saturday 8:00 AM to 12:00 PM.
2. Samples Submitted AFTER 3:00 PM, are considered received the following Business day at 8:00 AM.
3. The fee for 1000 Surcharge, SAME BUSINESS DAY if received by 8:00 AM
TAT = 1: 1000 Surcharge NEXT BUSINESS DAY (COB 5:00 PM)
TAT = 2: 500 Surcharge 2ND BUSINESS DAY (COB 5:00 PM)
TAT = 3: 300 Surcharge 3RD BUSINESS DAY (COB 5:00 PM)
TAT = 4: 200 Surcharge 4TH BUSINESS DAY (COB 5:00 PM)
TAT = 5: NO SURCHARGE 5TH BUSINESS DAY (COB 5:00 PM)
4. Weekend, holiday, after-hours work - ask for quote.
5. Subcontract TAT is 10 - 15 Business days. Projects requiring shorter TATs will incur a surcharge.
6. Liquid and solid samples will be disposed of after 45 calendar days from receipt of samples, air respective to the subcontract ask - ask for quote.
7. Electronic records maintained for five (5) years from report date.
8. Hard copy reports will be disposed of after 45 calendar days from report date.
9. Storage and Report Fees:
- Liquid & solid samples: Complimentary storage for forty-five (45) calendar days from receipt of samples; \$200 sample/week if extended storage is requested.
- Extended storage or field is requested.
- Hard copy and regenerated reports/EDDs: \$15.50 per hard copy report requested; \$50.00 per regenerated/reformat ed report; \$35 per reprocessed EDD.
10. Rush TAT/STC samples: add a days to analysis TAT for extraction on procedure.
11. Unanalyzed samples will incur a disposal fee of \$7 per sample.

Good evening John.

I just wanted to let you know that the STLC results will not be available tonight. We had to recalibrate our instruments due to power outage this afternoon that put us behind schedule. I will provide another update tomorrow. Sorry for the delay. Thanks.

Rachelle

Re: ATL Work Order Number : 1701287

Client Reference : ROOSEVELT HS, 265642/TA02

Enclosed are the results for sample(s) received on March 26, 2017 by Advanced Technology Laboratories. The sample(s) are tested for the parameters as indicated on the enclosed chain of custody in accordance with applicable laboratory certifications. The laboratory results contained in this report specifically pertains to the sample(s) submitted.

Thank you for the opportunity to serve the needs of your company. If you have any questions, please feel free to contact me or your Project Manager.

Sincerely,

A handwritten signature in black ink, appearing to read "E Rodriguez", is positioned above the printed name.

Eddie Rodriguez
Laboratory Director

The cover letter and the case narrative are an integral part of this analytical report and its absence renders the report invalid. Test results contained within this data package meet the requirements of applicable state-specific certification programs. The report cannot be reproduced without written permission from the client and Advanced Technology Laboratories.

CASE NARRATIVE

Results were J-flagged. "J" is used to flag those results that are between the PQL (Practical Quantitation Limit) and the calculated MDL (Method Detection Limit). Results that are "J" flagged are estimated values since it becomes difficult to accurately quantitate the analyte near the MDL.

Notes and Definitions

R	RPD value outside acceptance criteria. Calculation is based on raw values.
M1	Matrix spike recovery outside of acceptance limit. The analytical batch was validated by the laboratory control sample.
ND	Analyte is not detected at or above the Practical Quantitation Limit (PQL). When client requests quantitation against MDL, analyte is not detected at or above the Method Detection Limit (MDL)
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
NR	Not Reported
RPD	Relative Percent Difference
CA2	CA-ELAP (CDPH)
OR1	OR-NELAP (OSPHL)
TX1	TX-NELAP (TCEQ)

Notes:

- (1) The reported MDL and PQL are based on prep ratio variation and analytical dilution.
- (2) The suffix [2C] of specific analytes signifies that the reported result is taken from the instrument's second column.
- (3) Results are wet unless otherwise specified.

Subject: LAUSD Roosevelt High School - Clarifications for Soil Samples Collected March 26, 2017
Attachments: LAUSD Roosevelt - AR_3-26-17.pdf; LAUSD Roosevelt - GC_3-26-17.pdf

Rachelle – Please make the following additions/changes to the requested analyses for soil samples collected on March 26, 2017, at LAUSD Roosevelt High School (see attachments):

- **Duplicate soil sample analysis** - please pull an aliquot from the following soil samples to be used as duplicate samples and perform the analyses for Arsenic and/or Lead (EPA Method 6010B) as specified below.
 - o CR1-4b1-0.5 for lead
 - o AA2543-5-3.5 for arsenic
 - o Q-15d1-2.5 for lead
 - o IM-5d-4.5 for arsenic
 - o CRA-2c-4.5 for lead
- **Sample turnaround time (TAT)** - The TAT was not indicated on the COC for the following samples. Please analyze these samples on a 48 hour TAT:
 - o IA-8-2.5
 - o IA-8-3.5
 - o IA-8-4.5
 - o IA-7-0.5
 - o IA-7-2.5
 - o IA-7-3.5
 - o IA-7-4.5
 - o Q-15d1-0.5
 - o Q-15d1-2.5

Let me know if you have any questions.

Thanks,

John Nordenstam, PG
Senior Project Geologist

Re: ATL Work Order Number : 1701288
Client Reference : Roosevelt HS, 265642

Enclosed are the results for sample(s) received on March 26, 2017 by Advanced Technology Laboratories. The sample(s) are tested for the parameters as indicated on the enclosed chain of custody in accordance with applicable laboratory certifications. The laboratory results contained in this report specifically pertains to the sample(s) submitted.

Thank you for the opportunity to serve the needs of your company. If you have any questions, please feel free to contact me or your Project Manager.

Sincerely,

A handwritten signature in black ink, appearing to read "E Rodriguez", is positioned above the printed name.

Eddie Rodriguez
Laboratory Director

The cover letter and the case narrative are an integral part of this analytical report and its absence renders the report invalid. Test results contained within this data package meet the requirements of applicable state-specific certification programs. The report cannot be reproduced without written permission from the client and Advanced Technology Laboratories.

SUMMARY OF SAMPLES

Sample ID	Laboratory ID	Matrix	Date Sampled	Date Received
IDW SOIL A	1701288-01	Soil	3/26/17 10:45	3/26/17 11:46
IDW SOIL COMPOSITE	1701288-05	Soil	3/26/17 0:00	3/26/17 11:46

CASE NARRATIVE

Results were J-flagged. "J" is used to flag those results that are between the PQL (Practical Quantitation Limit) and the calculated MDL (Method Detection Limit). Results that are "J" flagged are estimated values since it becomes difficult to accurately quantitate the analyte near the MDL.

Project Number : Roosevelt HS, 265642

Report To : John Nordenstam

Reported : 04/03/2017

Notes and Definitions

S4	Surrogate was diluted out.
R3	RPD value outside acceptance criteria. Calculation is based on raw values. The analytical batch was validated by the Laboratory Control Sample (LCS).
M2	Matrix spike recovery outside of acceptance limit due to possible matrix interference. The analytical batch was validated by the laboratory control sample.
J	Analyte detected below the Practical Quantitation Limit but above or equal to the Method Detection Limit. Result is an estimated concentration.
ND	Analyte is not detected at or above the Practical Quantitation Limit (PQL). When client requests quantitation against MDL, analyte is not detected at or above the Method Detection Limit (MDL)
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
NR	Not Reported
RPD	Relative Percent Difference
CA2	CA-ELAP (CDPH)
OR1	OR-NELAP (OSPHL)
TX1	TX-NELAP (TCEQ)

Notes:

- (1) The reported MDL and PQL are based on prep ratio variation and analytical dilution.
- (2) The suffix [2C] of specific analytes signifies that the reported result is taken from the instrument's second column.
- (3) Results are wet unless otherwise specified.

Re: ATL Work Order Number : 1701289

Client Reference : ROOSEVELT HS, 265642/TA02

Enclosed are the results for sample(s) received on March 26, 2017 by Advanced Technology Laboratories. The sample(s) are tested for the parameters as indicated on the enclosed chain of custody in accordance with applicable laboratory certifications. The laboratory results contained in this report specifically pertains to the sample(s) submitted.

Thank you for the opportunity to serve the needs of your company. If you have any questions, please feel free to contact me or your Project Manager.

Sincerely,

A handwritten signature in black ink, appearing to read "E Rodriguez", is positioned above the printed name.

Eddie Rodriguez
Laboratory Director

The cover letter and the case narrative are an integral part of this analytical report and its absence renders the report invalid. Test results contained within this data package meet the requirements of applicable state-specific certification programs. The report cannot be reproduced without written permission from the client and Advanced Technology Laboratories.

CASE NARRATIVE

Results were J-flagged. "J" is used to flag those results that are between the PQL (Practical Quantitation Limit) and the calculated MDL (Method Detection Limit). Results that are "J" flagged are estimated values since it becomes difficult to accurately quantitate the analyte near the MDL.

Notes and Definitions

R	RPD value outside acceptance criteria. Calculation is based on raw values.
M1	Matrix spike recovery outside of acceptance limit. The analytical batch was validated by the laboratory control sample.
J	Analyte detected below the Practical Quantitation Limit but above or equal to the Method Detection Limit. Result is an estimated concentration.
D1	Sample required dilution due to possible matrix interference.
ND	Analyte is not detected at or above the Practical Quantitation Limit (PQL). When client requests quantitation against MDL, analyte is not detected at or above the Method Detection Limit (MDL)
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
NR	Not Reported
RPD	Relative Percent Difference
CA2	CA-ELAP (CDPH)
OR1	OR-NELAP (OSPHL)
TX1	TX-NELAP (TCEQ)

Notes:

- (1) The reported MDL and PQL are based on prep ratio variation and analytical dilution.
- (2) The suffix [2C] of specific analytes signifies that the reported result is taken from the instrument's second column.
- (3) Results are wet unless otherwise specified.

samples will be disposed of after 14 calendar days after receipt of samples.

Electronic records maintained for five (5) years from report date.

3. Hard copy reports will be disposed of after 45 calendar days from report date.

Storage and Report Fees:

- Liquid & solid samples: Complimentary storage for forty-five (45) calendar days from receipt of samples; \$2/sample/month if requested.
- Air samples: Complimentary storage for ten (10) calendar days from receipt of samples; \$20/sample/week if extended storage is requested.
- Hard copy and regenerated reports/EDDs: \$17.50 per hard copy report requested; \$50.00 per regenerated/reformat ed report; \$35 per reprocessed EDD.
- Rush TCE/PTC samples: add 2 days to analysis TAT for extraction on procedure.
- Rush TCE/PTC samples: add 2 days to analysis TAT for extraction on procedure.

As the authorized agent of the company above, I hereby purchase laboratory services from ATL as shown above and hereby guarantee payment as quoted.

Subject: LAUSD Roosevelt High School - Clarifications for Soil Samples Collected March 26, 2017
Attachments: LAUSD Roosevelt - AR_3-26-17.pdf; LAUSD Roosevelt - GC_3-26-17.pdf

Rachelle – Please make the following additions/changes to the requested analyses for soil samples collected on March 26, 2017, at LAUSD Roosevelt High School (see attachments):

- **Duplicate soil sample analysis** - please pull an aliquot from the following soil samples to be used as duplicate samples and perform the analyses for Arsenic and/or Lead (EPA Method 6010B) as specified below.
 - o CR1-4b1-0.5 for lead
 - o AA2543-5-3.5 for arsenic
 - o Q-15d1-2.5 for lead
 - o IM-5d-4.5 for arsenic
 - o CRA-2c-4.5 for lead
- **Sample turnaround time (TAT)** - The TAT was not indicated on the COC for the following samples. Please analyze these samples on a 48 hour TAT:
 - o IA-8-2.5
 - o IA-8-3.5
 - o IA-8-4.5
 - o IA-7-0.5
 - o IA-7-2.5
 - o IA-7-3.5
 - o IA-7-4.5
 - o Q-15d1-0.5
 - o Q-15d1-2.5

Let me know if you have any questions.

Thanks,

John Nordenstam, PG

Advanced Technology Laboratories is a full-service environmental lab providing organic and inorganic analyses of soil, water, wastewater, storm water and hazardous waste samples. ATL is accredited by the State of California, NELAP and State of Oregon (Air) and holds various SBE, DBE and MBE certificates and a USDA soil permit. ATL takes pride in providing our customers with quick turnaround time, excellent customer service and defensible data while offering very competitive rates. *Advanced Technology Labs - Your Partner for Quality Environmental Testing*

Re: ATL Work Order Number : 1701289

Client Reference : ROOSEVELT HS, 265642/TA02

Enclosed are the results for sample(s) received on March 26, 2017 by Advanced Technology Laboratories. The sample(s) are tested for the parameters as indicated on the enclosed chain of custody in accordance with applicable laboratory certifications. The laboratory results contained in this report specifically pertains to the sample(s) submitted.

Thank you for the opportunity to serve the needs of your company. If you have any questions, please feel free to contact me or your Project Manager.

Sincerely,

A handwritten signature in black ink, appearing to read "E Rodriguez", is written over a white background.

Eddie Rodriguez
Laboratory Director

The cover letter and the case narrative are an integral part of this analytical report and its absence renders the report invalid. Test results contained within this data package meet the requirements of applicable state-specific certification programs. The report cannot be reproduced without written permission from the client and Advanced Technology Laboratories.

SUMMARY OF SAMPLES

Sample ID	Laboratory ID	Matrix	Date Sampled	Date Received
CRI-2d1-0.5	1701289-10	Soil	3/26/17 9:55	3/26/17 11:45

CASE NARRATIVE

Results were J-flagged. "J" is used to flag those results that are between the PQL (Practical Quantitation Limit) and the calculated MDL (Method Detection Limit). Results that are "J" flagged are estimated values since it becomes difficult to accurately quantitate the analyte near the MDL.

Report To : John Nordenstam

Reported : 04/07/2017

Notes and Definitions

J	Analyte detected below the Practical Quantitation Limit but above or equal to the Method Detection Limit. Result is an estimated concentration.
D1	Sample required dilution due to possible matrix interference.
ND	Analyte is not detected at or above the Practical Quantitation Limit (PQL). When client requests quantitation against MDL, analyte is not detected at or above the Method Detection Limit (MDL)
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
NR	Not Reported
RPD	Relative Percent Difference
CA2	CA-ELAP (CDPH)
OR1	OR-NELAP (OSPHL)
TX1	TX-NELAP (TCEQ)

Notes:

- (1) The reported MDL and PQL are based on prep ratio variation and analytical dilution.
- (2) The suffix [2C] of specific analytes signifies that the reported result is taken from the instrument's second column.
- (3) Results are wet unless otherwise specified.

Report To : John Nordenstam

Reported : 06/22/2017

CASE NARRATIVE

Results were J-flagged. "J" is used to flag those results that are between the PQL (Practical Quantitation Limit) and the calculated MDL (Method Detection Limit). Results that are "J" flagged are estimated values since it becomes difficult to accurately quantitate the analyte near the MDL.

Sample Receiving/General Comments:

Per client instructions, the following duplicate samples will be an aliquot taken from the original samples submitted.

B-6-3.5 Dup
W-14c-0.5 Dup
X-14b-0.5 Dup

Notes and Definitions

R	RPD value outside acceptance criteria. Calculation is based on raw values.
J	Analyte detected below the Practical Quantitation Limit but above or equal to the Method Detection Limit. Result is an estimated concentration.
ND	Analyte is not detected at or above the Practical Quantitation Limit (PQL). When client requests quantitation against MDL, analyte is not detected at or above the Method Detection Limit (MDL)
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
NR	Not Reported
RPD	Relative Percent Difference
CA2	CA-ELAP (CDPH)
OR1	OR-NELAP (OSPHL)
TX1	TX-NELAP (TCEQ)

Notes:

- (1) The reported MDL and PQL are based on prep ratio variation and analytical dilution.
- (2) The suffix [2C] of specific analytes signifies that the reported result is taken from the instrument's second column.
- (3) Results are wet unless otherwise specified.

- samples will be disposed of after 14 calendar days after receipt of samples.
- Electronic records maintained for 1 yr (5) years from report date.
- Hard copy reports will be disposed of after 45 calendar days from report date.

Storage and Report Fees:

- Liquid & solid samples: Complimentary storage for forty-five (45) calendar days from receipt of samples; \$2/sample/month if extended storage is requested.
- Air samples: Complimentary storage for ten (10) calendar days from receipt of samples; \$20/ sample/week if extended storage is requested.
- Hard copy and regenerated reports/EDOs: \$17.50 per hard copy report requested; \$50.00 per regenerated/reforma; ed report; \$35. per reprocessed EDO.

Analysis:

- o Samples received 2 days to analysis; FAX for extraction on procedure.
- o Laboratory samples will incur a disposal fee of \$75 per sample.

As the authorized agent of the company above, I hereby purchase laboratory services from ATL as shown above and hereby guarantee payment as quoted.

To: Rachelle Arada
Cc: Edric Caballero; Maxwell, Jeff
Subject: LAUSD Roosevelt High School - Duplicate Samples for Soil Samples Collected June 14, 2017

Rachelle – Please make the following additions/changes to the requested analyses for soil samples collected on June 14, 2017 at LAUSD Roosevelt High School:

- **Duplicate soil sample analysis** - please pull an aliquot from the following soil samples to be used as duplicate samples and perform the analyses for Arsenic and/or Lead (EPA Method 6010B) as specified below. Sample TAT will be 48 hours.
 - B-6-3.5 for lead
 - W-14c-0.5 for arsenic
 - X-14b-0.5 for arsenic

Let me know if you have any questions.

Thanks,

John Nordenstam, PG

Eurofins Calscience, Inc. (Calscience) certifies that the test results provided in this report meet all NELAC requirements for parameters for which accreditation is required or available. Any exceptions to NELAC requirements are noted in the case narrative. The original report of subcontracted analyses, if any, is attached to this report. The results in this report are limited to the sample(s) tested and any reproduction thereof must be made in its entirety. The client or recipient of this report is specifically prohibited from making material changes to said report and, to the extent that such changes are made, Calscience is not responsible, legally or otherwise. The client or recipient agrees to indemnify Calscience for any defense to any litigation which may arise.

Work Order Narrative

Work Order: 16-10-1242

Page 1 of 1

Condition Upon Receipt:

Samples were received under Chain-of-Custody (COC) on 10/17/16. They were assigned to Work Order 16-10-1242.

Unless otherwise noted on the Sample Receiving forms all samples were received in good condition and within the recommended EPA temperature criteria for the methods noted on the COC. The COC and Sample Receiving Documents are integral elements of the analytical report and are presented at the back of the report.

Holding Times:

All samples were analyzed within prescribed holding times (HT) and/or in accordance with the Calscience Sample Acceptance Policy unless otherwise noted in the analytical report and/or comprehensive case narrative, if required.

Any parameter identified in 40CFR Part 136.3 Table II that is designated as "analyze immediately" with a holding time of ≤ 15 minutes (40CFR-136.3 Table II, footnote 4), is considered a "field" test and the reported results will be qualified as being received outside of the stated holding time unless received at the laboratory within 15 minutes of the collection time.

Quality Control:

All quality control parameters (QC) were within established control limits except where noted in the QC summary forms or described further within this report.

Subcontractor Information:

Unless otherwise noted below (or on the subcontract form), no samples were subcontracted.

Additional Comments:

Air - Sorbent-extracted air methods (EPA TO-4A, EPA TO-10, EPA TO-13A, EPA TO-17): Analytical results are converted from mass/sample basis to mass/volume basis using client-supplied air volumes.

Solid - Unless otherwise indicated, solid sample data is reported on a wet weight basis, not corrected for % moisture. All QC results are always reported on a wet weight basis.

Page 1 of 1

<u>Qualifiers</u>	<u>Definition</u>
*	See applicable analysis comment.
<	Less than the indicated value.
>	Greater than the indicated value.
1	Surrogate compound recovery was out of control due to a required sample dilution. Therefore, the sample data was reported without further clarification.
2	Surrogate compound recovery was out of control due to matrix interference. The associated method blank surrogate spike compound was in control and, therefore, the sample data was reported without further clarification.
3	Recovery of the Matrix Spike (MS) or Matrix Spike Duplicate (MSD) compound was out of control due to suspected matrix interference. The associated LCS recovery was in control.
4	The MS/MSD RPD was out of control due to suspected matrix interference.
5	The PDS/PDSD or PES/PESD associated with this batch of samples was out of control due to suspected matrix interference.
6	Surrogate recovery below the acceptance limit.
7	Surrogate recovery above the acceptance limit.
B	Analyte was present in the associated method blank.
BU	Sample analyzed after holding time expired.
BV	Sample received after holding time expired.
CI	See case narrative.
E	Concentration exceeds the calibration range.
ET	Sample was extracted past end of recommended max. holding time.
HD	The chromatographic pattern was inconsistent with the profile of the reference fuel standard.
HDH	The sample chromatographic pattern for TPH matches the chromatographic pattern of the specified standard but heavier hydrocarbons were also present (or detected).
HDL	The sample chromatographic pattern for TPH matches the chromatographic pattern of the specified standard but lighter hydrocarbons were also present (or detected).
J	Analyte was detected at a concentration below the reporting limit and above the laboratory method detection limit. Reported value is estimated.
JA	Analyte positively identified but quantitation is an estimate.
ME	LCS Recovery Percentage is within Marginal Exceedance (ME) Control Limit range (+/- 4 SD from the mean).
ND	Parameter not detected at the indicated reporting limit.
Q	Spike recovery and RPD control limits do not apply resulting from the parameter concentration in the sample exceeding the spike concentration by a factor of four or greater.
SG	The sample extract was subjected to Silica Gel treatment prior to analysis.
X	% Recovery and/or RPD out-of-range.
Z	Analyte presence was not confirmed by second column or GC/MS analysis.
	Solid - Unless otherwise indicated, solid sample data is reported on a wet weight basis, not corrected for % moisture. All QC results are reported on a wet weight basis.
	Any parameter identified in 40CFR Part 136.3 Table II that is designated as "analyze immediately" with a holding time of <= 15 minutes (40CFR-136.3 Table II, footnote 4), is considered a "field" test and the reported results will be qualified as being received outside of the stated holding time unless received at the laboratory within 15 minutes of the collection time.
	A calculated total result (Example: Total Pesticides) is the summation of each component concentration and/or, if "J" flags are reported, estimated concentration. Component concentrations showing not detected (ND) are summed into the calculated total result as zero concentrations.

Eurofins Calscience, Inc. (Calscience) certifies that the test results provided in this report meet all NELAC requirements for parameters for which accreditation is required or available. Any exceptions to NELAC requirements are noted in the case narrative. The original report of subcontracted analyses, if any, is attached to this report. The results in this report are limited to the sample(s) tested and any reproduction thereof must be made in its entirety. The client or recipient of this report is specifically prohibited from making material changes to said report and, to the extent that such changes are made, Calscience is not responsible, legally or otherwise. The client or recipient agrees to indemnify Calscience for any defense to any litigation which may arise.

Work Order Narrative

Work Order: 17-03-1404

Page 1 of 1

Condition Upon Receipt:

Samples were received under Chain-of-Custody (COC) on 03/20/17. They were assigned to Work Order 17-03-1404.

Unless otherwise noted on the Sample Receiving forms all samples were received in good condition and within the recommended EPA temperature criteria for the methods noted on the COC. The COC and Sample Receiving Documents are integral elements of the analytical report and are presented at the back of the report.

Holding Times:

All samples were analyzed within prescribed holding times (HT) and/or in accordance with the Calscience Sample Acceptance Policy unless otherwise noted in the analytical report and/or comprehensive case narrative, if required.

Any parameter identified in 40CFR Part 136.3 Table II that is designated as "analyze immediately" with a holding time of ≤ 15 minutes (40CFR-136.3 Table II, footnote 4), is considered a "field" test and the reported results will be qualified as being received outside of the stated holding time unless received at the laboratory within 15 minutes of the collection time.

Quality Control:

All quality control parameters (QC) were within established control limits except where noted in the QC summary forms or described further within this report.

Subcontractor Information:

Unless otherwise noted below (or on the subcontract form), no samples were subcontracted.

Additional Comments:

Air - Sorbent-extracted air methods (EPA TO-4A, EPA TO-10, EPA TO-13A, EPA TO-17): Analytical results are converted from mass/sample basis to mass/volume basis using client-supplied air volumes.

Solid - Unless otherwise indicated, solid sample data is reported on a wet weight basis, not corrected for % moisture. All QC results are always reported on a wet weight basis.

LOG CODE:

SPECIAL INSTRUCTIONS:

Report methane in ppmv
Use bag marked "Prim" (Primary) for all analyses and QA/QC.
Use bag marked "Dup" (Duplicate) is insufficient volume in Primary.
Duplicate for M17-7 not submitted. Defective bag (leak).
