

Updated: 4/25/2019

Pre-Legacy Replacement Program (LRP) Internal Orders (IOs) were Settled to a dummy Cost Center prior to LRP golive. Consequently, the Internal Orders were on a Settlement Profile that required IOs to have a zero balance prior to closing. Attempts to close these IOs yielded hard errors similar to the ones shown below:

데 Order 808000058238	×

The following outline the steps to set Pre-LRP IOs with balances to status Closed and Locked (CLSD LKD). This status prevents further postings against the IO.

1. Verify the Settlement Profile used by going to the Settlement Rule.

🖲 🖌 Change In	nternal Order: Master data

5. A window will pop-up indicating warnings have occurred. Click on "Display warning msgs".

6. Verify that the message is indeed a warning, not a hard error. Hit/click Enter to continue.
