

## BACKGROUND:

**ZCO\_IHISTORY-Mass Internal Order Change History Report** is a custom Controlling (CO) report in SAP that displays Internal Order (IO) master data field and status changes en masse. SAP allows users to view individual IO change history via transaction codes KO03 and KO04. Unfortunately, there is no standard SAP transaction that enables users to view these changes for several IOs at one time. This report provides that functionality.

To gain access to the report, role RC444-CO Display should be requested via SAP GRC, if you don't already have this role.

## BASIC REPORT NAVIGATION:

1. From the SAP Welcome Screen, select **Reports > Controlling > Mass IO Change History Report**.

An alternative method to execute the report would be to type **/N or /O + ZCO\_IHISTORY** then hit/click Enter in an SAP session's command box as shown below:

2. Enter IO number/s.
  - a. For an **individual IO**, enter the value in the Order Number field.

- b. For a **list or range of IOs**, enter the values using the Multiple Selection functionality.
  - i. Click Multiple Selection to open the Multiple Selection screen.

- ii. Click on either Select Single Values or Select Ranges. For this example, a list of IOs will be entered so Select Single Values will be chosen.

- iii. Copy your list of IOs from an external source such as Excel, Notepad, or another SAP session and click Upload from Clipboard to load the values.

- iv. Click Copy.

- Once the IO number/s has/have been entered, choose which change history information you would like to display. Default items marked are Status Changes and Master Data Fields. You can leave these settings or unselect by removing the check mark for the information not needed. If you remove both check marks, your report will return empty.

**Mass IO Change History Report**

Selection Criteria

Order Number: 808000100807 to

Date: to

Status Changes

Master Data Fields

SAP | ZCO\_IOHISTORY | sapqrx-2tl | OVR

\*The Date fields can be used if you are interested in changes to an IO/s within a specific time frame only.

- Click Execute.

**Mass IO Change History Report**

Selection Criteria

Order Number: 808000100807 to

Date: to

Status Changes

Master Data Fields

SAP | ZCO\_IOHISTORY | sapqrx-2tl | OVR

5. Data will be presented as below.

Mass IO Change History Report

- b. As in master data field changes, you can change the fields to sort by and the sort order by highlighting the columns you wish to sort then clicking on one of the sort icons. Please note that when sorting multiple columns you can only choose either ascending or descending for ALL selected columns (example below).
  - \*To select multiple columns, hold down CTRL while clicking on desired columns.

Mass IO Change History Report
