

Café LA Harvest Bar Set – Up

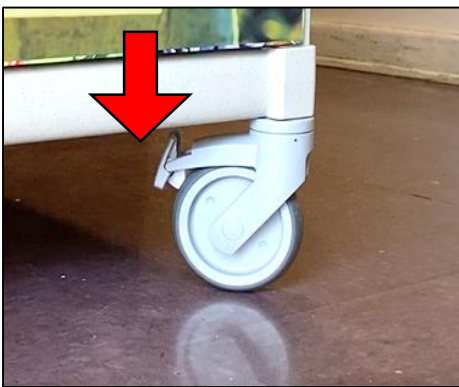

Harvest Bars will be used to display daily offerings of fruits and vegetables. Harvest Bars will arrive at school site already assembled with the following items:

- 8 clear Bins – (4) small (4) large
- 6 name tag holders

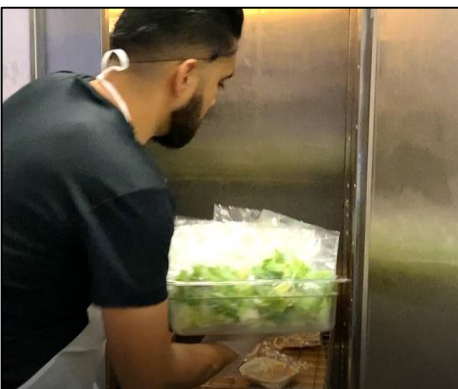

Position Harvest Bar at start of lunch line. Students should select from Harvest Bar before other offered lunch items.

Avoid trip hazards and push wheels inside and underneath the harvest bar. Secure wheel by pushing down on lock.

Insert frozen ice blankets into clear bins before placing pre-cut fruits and/or vegetables. Not required for whole fruit.

Some items that do not weigh much may be pre-filled into clear bins and stored in refrigerator until service.

Other items, such as heavier whole fruit, will need to be loaded directly into the bins.

Insert name tag of items into sign holder. Reattach sign holder after inserting name tag.

If available, restock items from back of Harvest Bar. There is no need to interrupt service to restock if the back of harvest bar is accessible.

Set up Harvest Bar so that it is visually appealing. Place more popular items on bottom shelf for ease of access to smaller students.

At end of service, clean bins, using the wash, rinse and sanitize procedure and let air dry for next day service.
