

## Insulated Bag Packaging Guide

The following practices are to be followed when packing meals for the RAP program. These practices will streamline the counting of meals upon delivery to the park site.

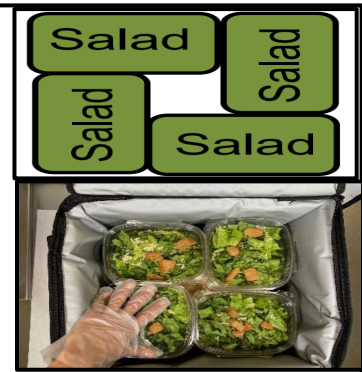

Hot/Cold Grab & Go Bags: 24 bags per insulated bag.

- Do not pack hot and cold meals inside the same insulated bag

When packing entrée salads, stagger containers to permit 24 containers to fit inside a large insulated bag.

- 6 rows of 4 salads = 24 per insulated bag
- Never place salads in the freezer

Insulated bags containing less than 24 meals must be labeled with the amount of meals packed inside the insulated bag. Affix a piece of tape with the quantity on the lower left-hand corner of the insulated bag.
