TITLE: District-Wide 2017 Earthquake Exercise and Radio Test

NUMBER: REF-5216.9

ISSUER: Darneika Watson-Davis, Ph.D., Executive Director
Division of District Operations
Diane H. Pappas, Chief Executive Officer
District Operations & Digital Innovation

DATE: July 28, 2017

PURPOSE: The annual ShakeOut earthquake exercise is conducted under the direction of the school site administrator on Thursday, October 19, 2017, in conjunction with the State-wide earthquake drill, The Great California ShakeOut. All LAUSD schools will practice their response to a large earthquake. The exercise provides an opportunity to simulate a full disaster response and to evaluate and test the site’s emergency plan. The semi-annual radio test performed in conjunction with districtwide emergency drills will take place two days prior to the ShakeOut, as specified in REF-6537.0, Inter-Campus/District-Wide Safety Communications Test. The fall radio communications test will be conducted on Tuesday, October 17, 2017. A Districtwide Blackboard Connect emergency test message will be sent to all parents, guardians, and employees as part of the District-wide emergency exercise.

MAJOR CHANGES: This Reference Guide replaces REF-5216.8, Districtwide 2016 Earthquake Exercise and Radio Test, dated August 29, 2016, and reflects current District organization and procedures.

INSTRUCTIONS: 1. PRE-EXERCISE ACTIVITIES

   A. Prior to the ShakeOut earthquake exercise, school site administrators should complete the following activities:

      1. Review the school’s 2017-2018 Integrated Safe School Plan (ISSP) with key staff to familiarize them with their responsibilities. Remind staff that they can all view and download the ISSP for emergency team assignments, responsibilities, and procedures. Be sure to review the ISSP Planning View and Emergency View for:

         • Incident Command System
         • School Emergency and Crisis Team charts
         • Emergency Functions
         • Threats and Hazards
         - Earthquake
         - Utility Failure
• Train/Exercise (Step 6, Planning View)

2. Distribute a drill memo to staff, and include the information that school staff can use single sign-on to access the ISSP at https://issp.lausd.net.

4. Encourage staff and parents to download the LAUSD emergency plan app for smartphones and tablet devices. Information is available at http://achieve.lausd.net/emergencyapps

4. Update and review emergency procedures with students, staff, and other site users. Make sure that emergency cards and student and staff lists are current. Schools should print out reports and lists to assist with student and staff accounting. All these documents should be in the school’s Emergency Response Box. For additional information see REF-5450.1, School Emergency Response Boxes, dated March 19, 2013.

5. Inspect and inventory emergency supplies and equipment and replace or add items as necessary. Refer to REF-5451.2, School Site Emergency/Disaster Supplies, dated August 23, 2016, which includes inventory lists of emergency supplies.

6. Ensure that school radios are fully functional. Batteries on handheld radios must be replaced every two years. If you have a non-battery related problem with a handheld radio, follow the repair directions on the Radio Unit’s link titled “Two Way Radio Services.” For problems with the principal’s emergency handheld radio or radio base station (located at secondary schools), please report the problem to the ITD Service Desk at (213) 241-5200. Review the “Using your Radios” video located on the Learning Zone to ensure that school site staff understand how to operate all radios. Schools can download the District’s updated “Radio Tree” at http://achieve.lausd.net/radiounit.

7. Remind staff that during an emergency, school employees may be designated as “Disaster Service Workers,” pursuant to California Government Code, Section 3100 and are to remain at school. Employees are to keep contact information updated using http://ess.lausd.net so that the District can keep employees informed during an emergency. District staff should have a complete home preparedness plan in place so they will know their family is provided for in their absence following an emergency. Employees can take the Learning Zone, online courses STEPS 101: Employee Duties during a Disaster and STEPS 102: Basic Emergency Preparedness for Home for details on these topics.
8. Remind students to discuss specific family plans with their parents to prepare for emergencies. Ensure that student emergency cards are current and complete in MiSiS, and that contact information is kept up to date. Site administrators are encouraged to make parents aware of the American Red Cross site at [www.redcross.org](http://www.redcross.org), which has family emergency plans in English and Spanish.

9. Incorporate any additional employees who work with your students and/or staff into your drill plans. Include any before or after school program employees, as well as itinerant instructors. Involve anyone who is assigned to the school in this drill.

10. Plan for the Shakeout exercise with representatives from all schools on campus, including small schools, charters, Prop 39 co-locations, and any others. All schools on a site are to participate in the exercise together.

11. Provide earthquake information and resources to teachers and parents. One good, free resource for secondary classrooms and parent groups is the Extreme Event: Earthquake role-playing game developed by the National Academy of Sciences, and emphasizing community resilience. Materials can be downloaded at [http://extreme-event.org](http://extreme-event.org).

12. Practice submitting a School Emergency Status Report (SESR). The SESR is a new online tool that will help LAUSD compile critical disaster information from every school to get help and resources where it is needed in a large disaster (See Attachment H). During an actual disaster, schools will be notified if they need to submit a SESR. Principals and/or designees are to log in to [https://myapps.lausd.net/SchoolStatus](https://myapps.lausd.net/SchoolStatus) and complete one SESR at any time during Shakeout week. As this is a practice submission to gain familiarity with the tool, schools may create disaster data to submit.

II. EXERCISE SCENARIO

On Thursday, October 19, 2017 at 10:15 a.m., a magnitude 7.2 earthquake occurs on the South San Andreas fault, causing a rupture from the Salton Sea all the way North to Lake Hughes. The slip along the fault measures 24 feet in some areas. The shaking lasts over two minutes. The physical damage to L.A. County’s infrastructure is catastrophic. There is no electrical power. There are many water main breaks that reduce the availability of water. A “boil water” order has been issued to areas that do have water. Gas and sewer lines are also damaged. Caltrans and CHP close all freeways and highway bridges until they can be inspected. Several pipelines carrying petroleum products across the fault line have ruptured and caught fire. The resulting large brush fires can be seen from all over Los Angeles. It is estimated that over 300,000 people are homeless because of extensive damage to their homes.
The school’s telephone system is inoperable but all handheld radios work. Traffic comes to a halt as surface streets are severely impacted by excess traffic volume and inoperable traffic lights. Numerous fires have started, caused by severed underground gas lines. The Superintendent declares a state of emergency and orders staff to remain at their sites and shelter all students at schools until they can be reunited with a parent or legal guardian. Police and Fire departments are overwhelmed by 911 calls and dispatchers will not say if or when units will respond. School staff must assume that they will be on their own to shelter and care for students and staff.

III. EXERCISE STANDARDS

A. The drill must continue long enough to determine the effectiveness of the school’s emergency plan. The following elements of the plan must be activated and practiced to ensure that skills have been mastered and everyone understands the following protocols and procedures:

- Drop, Cover and Hold-on for all students and staff
- Total building evacuation to the designated safe refuge area
- Implement the School Incident Command System (ICS)
- Activate the Assembly Area Team to account for all students and staff
- Set up the First Aid Station, Request and Reunion Gates, and activate the teams assigned to those locations
- Activate the School Crisis Team to support students and staff
- Activate the Search and Rescue Team(s) to find missing people
- Activate the Security/Utilities Team
- Activate the Fire Suppression/Haz-Mat Team
- Initiate a Blackboard Connect call to all parents from the safe assembly area
- Designate areas for toilets, morgue, media, etc.
- Complete the Emergency Drill Survey at [http://emergencydrills.lausd.net](http://emergencydrills.lausd.net)

B. In the event of inclement weather, the outdoor portions of the drill should be modified and/or rescheduled by the school site administrator, but not cancelled. The purpose of this drill is to practice the procedures and skills that will be needed in response to a major event. While the event may be rescheduled within a few days of the given date to accommodate individual school needs, the drill must take place.

C. Every effort should be made to make this drill as robust as possible so that all school members will be prepared to respond appropriately to a true catastrophic event. Site administrators are encouraged to include the following:
1. Include earthquake sound effects in your ShakeOut drill. A 30-second sound file can be downloaded from the Administrator’s Corner page of http://achieve.lausd.net/emergencyservices and played during the drill announcement over the intercom.

2. Simulate that some stairwells or exits are blocked so that participants will be forced to consider alternate exits.

3. Select students and staff to portray injured victims to test how well they will be found, transported, treated and logged by school emergency responders. Use the Emergency Drill Triage Kit (Victim Tags); materials previously sent to schools. Additional materials can be downloaded from the LAUSD Emergency Services website at http://achieve.lausd.net/2309.

4. Encourage parents to participate in the drill by requesting their child at the request gate or by observing the exercise. Use this drill as an opportunity to show and reassure parents that the school is prepared for such events and that the students are safe and secure at school during an emergency.

5. The site administrator should send a Blackboard Connect message to the parents from the field. The message can be simply, “All students and staff are now practicing their emergency earthquake response procedures as part of the Great California ShakeOut”. For assistance on how to use Blackboard Connect from the field please refer to http://bbc.lausd.net. Principals can always call Blackboard Connect directly for assistance at (866) 435-7684. STEPS 407, “Communication Methods in an Emergency” is specific to sending Blackboard Connect messages from a location other than an office.

6. Simulate changes in weather or other conditions that would require the emergency response team to adapt and modify their response.

7. Pump water from one water barrel and distribute it to one class to test the school’s ability to provide water to students.

8. Set up one portable toilet to practice how it will be done in an emergency and to remind students and staff that this will be part of the school’s emergency response.

9. Set up any tents or tarps that are in the emergency bin so that staff will know that these supplies are on campus and have used them once before any emergency.
IV. EMERGENCY TEAM LOG PROCEDURES

Each emergency team should be issued an adequate number of Emergency Response Team Log forms (Attachment G) to document events for evaluation. These logs would also be used to document any costs the District may claim for reimbursement from State and/or Federal agencies.

V. EVALUATION PROCEDURES

At the conclusion of the ShakeOut earthquake exercise, school site administrators are to complete the attached Emergency Drill Data Worksheet (Attachment F). Additional copies can be downloaded from the Emergency Services website at http://achieve.lausd.net/emergencyservices. Look under “Administrator’s Corner.”

Once the drill and data worksheet have been completed, school personnel are to log on to http://emergencydrills.lausd.net and enter the drill information. A drill certificate will be automatically generated and e-mailed. This certificate is to be retained in the log book for proof of compliance during an inspection. The drill sheet does not need to be sent in; once the drill information has been submitted online, the information sheet can be placed in the school’s drill log book. For additional assistance see REF-5803.3, Emergency Drills and Procedures, dated March 02, 2016.

VI. RADIO TEST

The fall radio communications test is scheduled for Tuesday, October 17, 2017, at 10:00 a.m. (See REF-6537.0, Inter-Campus/District-Wide Safety Communications Test). A Districtwide Blackboard Connect emergency message will also be sent to all parents, guardians, and employees on this date as part of the District-wide emergency exercise.

ITD Telecommunications Branch will conduct a communications test of the following systems:

- School radio system used to contact School Police
- Back-up phone system (using the fax line)
  - Voice message will be sent to all school fax lines
- Superintendent’s Emergency Notification System
  - Message will be sent to all principals

Schools are expected to conduct a test of all back-up school communication systems, such as:
- Internal campus radios
- Cell phone contact for staff
- E-mail distribution list for staff

Schools can download the District’s updated “Radio Tree” and other documents from the radio unit web site at http://achieve.lausd.net/radiounit. After concluding the radio test, school site administrators are to complete the Radio Test Emergency Drill Survey at http://emergencydrills.lausd.net. Faxes are no longer accepted for Radio Test feedback.

The School Emergency Status Report (SESR) is a new online tool that will help LAUSD compile critical emergency data from every school and get help and resources to schools during a large disaster. During an actual disaster, schools will be notified if they need to submit a SESR. It is understood that information in SESR may change over time, and that reports may be submitted with incomplete data. This tool is not to be used in place of completing an iSTAR or trouble call/ticket during a routine school day.

Main Menu: After logging in, click on the Home icon to get to the Main Menu.

Step 1: Choose a school from the dropdown list and input the date of the incident.

To add a designee, select a name from the dropdown list and click on the Add Designee button.

Step 2: Input the name and title of the School Incident Commander for this incident and their Working Contact Information.
