Qualifiers and Definitions

Item	Qualifiers
BS	The recovery of this analyte in LCS and/or LCSD was outside control limit. Sample was accepted based on the remaining LCSand/or LCSD.
D	Sample was analyzed under dilution due to matrix interference.
DIL	Result for the compound reported from diluted analysis.
J	Analyte was detected. However, the analyte concentration is an estimated value, which is between the Method Detection Limit (MDL) and the Reporting Limit (RL).
R	The RPD was outside of QC acceptance limits due to possible matrix interference.
S6	Surrogate recovery is outside control limits due to matrix interference.

Item	Definitions
% wt	Percent Weight
%REC	Percent Recovery
°F	Degrees Fahrenheit
AETL	American Environmental Testing Laboratory, LLC
C	Carbon
CARB	California Air Resources Board
COC	Chain of Custody
Cresols	3-methylphenol/4-methylphenol coelute and cannot be chromatographically separated. Due to this coeluting isomer pair phenomenon, the laboratory uses a single cresol (4-methylphenol) as calibration standard for 3-methylphenol/4-methylphenol.
CRM	Certified Reference Material
DPD	Department of Planning and Development
DRO	Diesel Range Organics
Dup	Duplicate
ELAP	Environmental Laboratory Accreditation Program
EPA	Environmental Protection Agency
GC/FID	Gas Chromatography Flame Ionization Detection
GRO	Gasoline Range Organics
HC	Hydrocarbon
HEM	Hexane Extractable Material
HMU	Hazardous Material Unit
ICP/MS	Inductively Coupled Plasma Mass Spectrometry
LACSD	Los Angeles County Sanitation Districts
LCS	Laboratory Control Sample - A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes.
LCSD	Laboratory Control Sample Duplicate - A replicate of Laboratory Control Sample.
LOQ	Limit of Quantitation
MDL	Method Detection Limit - The minimum measured concentration of a substance that can be reported with 99% confidence. MDL is statistically derived number which is specific for each instrument, each method and each compound.

The contents of this report apply to the sample(s) analyzed in accordance with the chain of custody document.
No duplication of this report is allowed, except in its entirety without written approval of the laboratory.

mg/kg	Miligrams per Kilogram
mg/L	Miligrams per Liter
ml/L/hr	Milliliter per Liter per Hour
MRO	Motor oil Range Organics
MS	Matrix Spike - A sample prepared, taken through all sample preparation and analytical steps of the procedure and analyzed as an independent test results.
MSD	Matrix Spike Duplicate - A replicate of Matrix Spike Sample.
N	No
ND	Analyte is not detected below Method Detection Limit.
ng/m3	Nanograms per cubic meter
NIOSH	National Institute for Occupational Safety and Health
nL/L	Nanoliters per Liter
NTU	Nephelometric Turbidity Units
Ohm-cm	Ohms per centimeter
ORO	Oil Range Organics
OSHA	Occupational Safety and Health Administration
PCB	Polychlorinated Biphenyl
PSU	Practical Salinity Unit
RL	Reporting Limit - The lowest concentration at which an analyte can be detected in a sample and its concentration can be reported with a specified degree of confidence, accuracy and precision. For usage at AETL, RL is equivalant to LOQ.
RPD	Relative Percent Difference
SIM	Selective Ion Monitoring
SM	Standard Method
SPLP	Synthetic Precipitation Leaching Procedure
STLC	Soluble Threshold Limit Concentration
TCLP	Toxicity Characteristic Leaching Procedure
TPH	Total Petroleum Hydrocarbons
TTLC	Total Threshold Limit Concentrations
ug/kg	Micrograms per Kilogram
ug/L	Micrograms per Liter
ug/m3	Micrograms per cubic meter
WET	Waste Extraction Test
Y	Yes
ZHE	Zero Headspace Extraction

Laboratory Certification (ELAP) No.:2576
Expiration Date: 2023
Los Angeles County Sanitation District Lab ID# 10206

Laboratory Director's Name:
Mark Noorani

Client:	American Environmental Testing Laboratory
Laboratory Reference:	AETL 27834
Project Name:	BED0024
Project Number:	BED0024
Date Received:	4/7/2023
Date Reported:	4/12/2023
Chain of Custody Received:	☑
Analytical Method:	6020,

Mark Noorani, Laboratory Director

Lab Reference #: AETL 27834
Project Name: BED0024
Project #: BED0024

Case Narrative

Sample Receipt:

All samples on the Chain of Custody were received by OCA at 1ºC, on ice.

Holding Times:

All samples were analyzed within required holding times unless otherwise noted in the data qualifier section of the report.

Analytical Methods:

Sample analysis was performed following the analytical methods listed on the cover page.

Data Qualifiers:

Within this report, data qualifiers may have been assigned to clarify deviations in common laboratory procedures or any divergence from laboratory QA/QC criteria. If a data qualifier has been used, it will appear in the back of the report along with its description. All method QA/QC criteria have been met unless otherwise noted in the data qualifier section.

Definition of Terms:

The definitions of common terms and acronyms used in the report have been placed at the back of the report to assist data users.

Comments:

None

Definition of terms:

R	Result of unspiked laboratory sample used for matrix spike determination.
SP CONC (or Spike Conc.)	Spike concentration added to sample or blank
MS	Matrix Spike sample result
MSD	Matrix Spike Duplicate sample result
%MS	Percent recovery of MS: {(MS-R1) / SP CONC} x100
%MSD	Percent recovery of MSD: {(MSD-R1) / SP CONC} x 100
RPD (for MS/MSD)	Relative Percent Difference: {(MS-MSD) / (MS+MSD)} x 100 x 2
LCS	Laboratory Control Sample result
LCSD	Laboratory Control Sample Duplicate result
%LCS	Percent recovery of LCS: {(LCS) / SP CONC} x100
%LCSD	Percent recovery of LCSD: {(LCSD) / SP CONC} x 100
RPD (for LCS/LCSD)	Relative Percent Difference: {(LCS-LCSD) / (LCS+LCSD)} x 100 x 2
ACP %LCS	Acceptable percent recovery range for Laboratory Control Samples.
ACP %MS	Acceptable percent recovery range for Matrix Spike samples
ACP RPD	Acceptable Relative Percent Difference
D	Detectable, result must be greater than zero
Qual	A checked box indicates a data qualifier was utilized and/or required for this analyte see attached explanation.
ND	Analyte Not Detected

RE: BED0024

Attention: Hailley Coleman

Enclosed are the results for sample(s) received on April 07, 2023 by ASSET Laboratories. The sample(s) are tested for the parameters as indicated in the enclosed chain of custody in accordance with the applicable laboratory certifications.

Thank you for the opportunity to service the needs of your company.

Please feel free to call me at (562) 219-7435 if I can be of further assistance to your company.

Sincerely,

Ferdinand Paul Lugtu
Laboratory Director

CASE NARRATIVE

SAMPLE RECEIVING/GENERAL COMMENTS:

All sample containers were received intact with proper chain of custody documentation.

Information on sample receipt conditions including discrepancies can be found in attached Sample Receipt Checklist Form.

Cooler temperature and sample preservation were verified upon receipt of samples if applicable.

Samples were analyzed within method holding time.

Please review the checklist below. Any NO signifies non-compliance. Any non-compliance will be noted and must be understood as having an impact on the quality of the data. All tests will be performed as requested regardless of any compliance issues.

If you have any questions or further instruction, please contact our Project Coordinator at (702) 307-2659.

Cooler Received/Opened On:	4/7/2023	Workorder:	N055881
Rep sample Temp (Deg C):	5.2	IR Gun ID:	1
Temp Blank:	☐ Yes ☑ No		
Carrier name:	Walk-In		
Last 4 digits of Tracking No.:	NA	Packing Material Used:	None
Cooling process:	☑ Ice ☐ Ice Pack ☐ Dry Ice ☐ Other ☐ None		

Sample Receipt Checklist

1. Shipping container/cooler in good condition?	Yes ☑	No ☐	Not Present ☐
2. Custody seals intact, signed, dated on shippping container/cooler?	Yes ☐	No ☐	Not Present ☑
3. Custody seals intact on sample bottles?	Yes ☐	No ☐	Not Present ☑
4. Chain of custody present?	Yes ☑	No ☐	
5. Sampler's name present in COC?	Yes ☐	No ☑	
6. Chain of custody signed when relinquished and received?	Yes ☑	No ☐	
7. Chain of custody agrees with sample labels?	Yes ☑	No ☐	
8. Samples in proper container/bottle?	Yes ☑	No ☐	
9. Sample containers intact?	Yes ☑	No ☐	
10. Sufficient sample volume for indicated test?	Yes ☑	No ☐	
11. All samples received within holding time?	Yes ☑	No ☐	
12. Temperature of rep sample or Temp Blank within acceptable limit?	Yes ☑	No ☐	NA ☐
13. Water - VOA vials have zero headspace?	Yes ☐	No ☐	NA ☑
14. Water - pH acceptable upon receipt? Example: pH > 12 for (CN,S); pH<2 for Metals	Yes ☐	No ☐	NA ☑
15. Did the bottle labels indicate correct preservatives used?	Yes ☐	No ☐	NA ☑
16. Were there Non-Conformance issues at login?	Yes ☑	No ☐	NA ☐
Was Client notified?	Yes ☐	No ☐	NA ☑

Samples were received in: ☑ Cooler (__2_____) ☐ Other (Specify)**:**

Sample Container Temperature: __5.9__ °C IR Gun S/N: 51941911MV

Type of sample containers: ☐ VOA, ☐ Glass bottles, ☑Wide mouth jars, ☐HDPE bottles, ☐ Metal sleeves, ☐ Acetate sleeves, ☐ 5035 Kit: ☐ AETL or ☐ Client, ☐ Tedlar Bags, Summa Canister: ☐ 6L, ☐ 3L, ☐ 1L, Others (Specify): _____

How are samples preserved: ☐ None, ☑ Ice, ☐ Blue Ice, ☐ Dry Ice
☑ None, ☐ HNO_3, ☐ NaOH, ☐ ZnOAc, ☐ HCl, ☐ $Na_2S_2O_3$, ☐ MeOH, ☐ $NaHSO_4$
☐ Other (Specify):

	Yes	No	N/A	Note or Comment
1. Are the COCs Correct?	✔			
2. Are Sample labels legible & indelible ink?	✔			
3. Do samples match the COC?	✔			
4. Are the required analyses clear?	✔			
5. Is there enough samples for required analysis?	✔			
6. Does cooler or samples have custody seal(s)?			✔	
7. Are sample containers in good condition?	✔			
8. Are samples preserved?	✔			
9. Are samples preserved properly for the intended analysis?	✔			
10. Are the VOAs free of headspace? See footnote.			✔	
11. Are the jars free of headspace?			✔	

* = see note below. N/A = Not Applicable

PLEASE NOTE ALL SAMPLES WILL BE DISPOSED OF 30 DAYS AFTER RECEIVING DATE. IF AETL IS INFORMED OTHERWISE, THERE WILL BE A STORAGE CHARGE PER SAMPLE PER MONTH FOR ANY SAMPLE HELD BEYOND 30 DAYS.

◯ Example maximum headspace bubble size; acceptance criteria not to exceed 5-6 mm in diameter.

For headspace bubbles exceeding 6 mm in diameter, sample receiving will tag the VOA and notify the Project Manager. The Project Manager will contact client for Analyze or Resample instructions.

Case Narrative

The following "Sample Received" Section summarizes the samples received and associated analyses requested as specified on the enclosed chain of custody.

Results as reported by the laboratory apply only to 1) the items tested, 2) as the samples are received, and 3) the accuracy of information provided. Information supplied by the customer that may affect validity of results and may be contained in this report include Project Name/Number, Site Location, Sample Locations, Sampling Dates/Times, Sample ID, Sample Preservation, Sample Matrix, Sample Properties, Field Blanks, Field Duplicates, Field Spikes, and Site Historical Data.

Accreditation applies only to the test methods listed on each scope of accreditation held by the laboratory; certifications held by the laboratory may not apply to results supplied in this report.

Unless otherwise noted, all results of soil and solid samples are based on wet weight.

Qualifiers are noted in the report.

The samples were subcontracted to AIH Laboratory for EPA-600R-93/116. Please see attached report for results.

The samples were subcontracted to Orange Coast Analytical for EPA 6020-As. Please see attached report for results.

The samples were subcontracted to Asset Laboratories for EPA 7199. Please see attached report for results.

The contents of this report apply to the sample(s) analyzed in accordance with the chain of custody document.
No duplication of this report is allowed, except in its entirety without written approval of the laboratory.

Qualifiers and Definitions

Item	Qualifiers
J	Analyte was detected. However, the analyte concentration is an estimated value, which is between the Method Detection Limit (MDL) and the Reporting Limit (RL).
R	The RPD was outside of QC acceptance limits due to possible matrix interference.

Item	Definitions
% wt	Percent Weight
%REC	Percent Recovery
°F	Degrees Fahrenheit
AETL	American Environmental Testing Laboratory, LLC
C	Carbon
CARB	California Air Resources Board
COC	Chain of Custody
Cresols	3-methylphenol/4-methylphenol coelute and cannot be chromatographically separated. Due to this coeluting isomer pair phenomenon, the laboratory uses a single cresol (4-methylphenol) as calibration standard for 3-methylphenol/4-methylphenol.
CRM	Certified Reference Material
DPD	Department of Planning and Development
DRO	Diesel Range Organics
Dup	Duplicate
ELAP	Environmental Laboratory Accreditation Program
EPA	Environmental Protection Agency
GC/FID	Gas Chromatography Flame Ionization Detection
GRO	Gasoline Range Organics
HC	Hydrocarbon
HEM	Hexane Extractable Material
HMU	Hazardous Material Unit
ICP/MS	Inductively Coupled Plasma Mass Spectrometry
LACSD	Los Angeles County Sanitation Districts
LCS	Laboratory Control Sample - A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes.
LCSD	Laboratory Control Sample Duplicate - A replicate of Laboratory Control Sample.
LOQ	Limit of Quantitation
MDL	Method Detection Limit - The minimum measured concentration of a substance that can be reported with 99% confidence. MDL is statistically derived number which is specific for each instrument, each method and each compound.
mg/kg	Miligrams per Kilogram
mg/L	Miligrams per Liter
ml/L/hr	Milliliter per Liter per Hour
MRO	Motor oil Range Organics

The contents of this report apply to the sample(s) analyzed in accordance with the chain of custody document.
No duplication of this report is allowed, except in its entirety without written approval of the laboratory.

MS	Matrix Spike - A sample prepared, taken through all sample preparation and analytical steps of the procedure and analyzed as an independent test results.
MSD	Matrix Spike Duplicate - A replicate of Matrix Spike Sample.
N	No
ND	Analyte is not detected below Method Detection Limit.
ng/m3	Nanograms per cubic meter
NIOSH	National Institute for Occupational Safety and Health
nL/L	Nanoliters per Liter
NTU	Nephelometric Turbidity Units
Ohm-cm	Ohms per centimeter
ORO	Oil Range Organics
OSHA	Occupational Safety and Health Administration
PCB	Polychlorinated Biphenyl
PSU	Practical Salinity Unit
RL	Reporting Limit - The lowest concentration at which an analyte can be detected in a sample and its concentration can be reported with a specified degree of confidence, accuracy and precision. For usage at AETL, RL is equivalant to LOQ.
RPD	Relative Percent Difference
SIM	Selective Ion Monitoring
SM	Standard Method
SPLP	Synthetic Precipitation Leaching Procedure
STLC	Soluble Threshold Limit Concentration
TCLP	Toxicity Characteristic Leaching Procedure
TPH	Total Petroleum Hydrocarbons
TTLC	Total Threshold Limit Concentrations
ug/kg	Micrograms per Kilogram
ug/L	Micrograms per Liter
ug/m3	Micrograms per cubic meter
WET	Waste Extraction Test
Y	Yes
ZHE	Zero Headspace Extraction

Case Narrative

Sample Receipt:

All samples on the Chain of Custody were received by OCA at 1ºC, on ice.

Holding Times:

All samples were analyzed within required holding times unless otherwise noted in the data qualifier section of the report.

Analytical Methods:

Sample analysis was performed following the analytical methods listed on the cover page.

Data Qualifiers:

Within this report, data qualifiers may have been assigned to clarify deviations in common laboratory procedures or any divergence from laboratory QA/QC criteria. If a data qualifier has been used, it will appear in the back of the report along with its description. All method QA/QC criteria have been met unless otherwise noted in the data qualifier section.

Definition of Terms:

The definitions of common terms and acronyms used in the report have been placed at the back of the report to assist data users.

Definition of terms:

R	Result of unspiked laboratory sample used for matrix spike determination.
SP CONC (or Spike Conc.)	Spike concentration added to sample or blank
MS	Matrix Spike sample result
MSD	Matrix Spike Duplicate sample result
%MS	Percent recovery of MS: {(MS-R1) / SP CONC} x100
%MSD	Percent recovery of MSD: {(MSD-R1) / SP CONC} x 100
RPD (for MS/MSD)	Relative Percent Difference: {(MS-MSD) / (MS+MSD)} x 100 x 2
LCS	Laboratory Control Sample result
LCSD	Laboratory Control Sample Duplicate result
%LCS	Percent recovery of LCS: {(LCS) / SP CONC} x100
%LCSD	Percent recovery of LCSD: {(LCSD) / SP CONC} x 100
RPD (for LCS/LCSD)	Relative Percent Difference: {(LCS-LCSD) / (LCS+LCSD)} x 100 x 2
ACP %LCS	Acceptable percent recovery range for Laboratory Control Samples.
ACP %MS	Acceptable percent recovery range for Matrix Spike samples
ACP RPD	Acceptable Relative Percent Difference
D	Detectable, result must be greater than zero
Qual	A checked box indicates a data qualifier was utilized and/or required for this analyte see attached explanation.
ND	Analyte Not Detected

RE: BED0024

Attention: Hailley Coleman

Enclosed are the results for sample(s) received on April 07, 2023 by ASSET Laboratories. The sample(s) are tested for the parameters as indicated in the enclosed chain of custody in accordance with the applicable laboratory certifications.

Thank you for the opportunity to service the needs of your company.

Please feel free to call me at (562) 219-7435 if I can be of further assistance to your company.

Sincerely,

Ferdinand Paul Lugtu
Laboratory Director

CASE NARRATIVE

SAMPLE RECEIVING/GENERAL COMMENTS:

All sample containers were received intact with proper chain of custody documentation.

Information on sample receipt conditions including discrepancies can be found in attached Sample Receipt Checklist Form.

Cooler temperature and sample preservation were verified upon receipt of samples if applicable.

Samples were analyzed within method holding time.

Please review the checklist below. Any NO signifies non-compliance. Any non-compliance will be noted and must be understood as having an impact on the quality of the data. All tests will be performed as requested regardless of any compliance issues.

If you have any questions or further instruction, please contact our Project Coordinator at (702) 307-2659.

Cooler Received/Opened On:	4/7/2023	Workorder:	N055881
Rep sample Temp (Deg C):	5.2	IR Gun ID:	1
Temp Blank:	☐ Yes ☑ No		
Carrier name:	Walk-In		
Last 4 digits of Tracking No.:	NA	Packing Material Used:	None
Cooling process:	☑ Ice ☐ Ice Pack ☐ Dry Ice ☐ Other ☐ None		

Sample Receipt Checklist

1. Shipping container/cooler in good condition?	Yes ☑	No ☐	Not Present ☐
2. Custody seals intact, signed, dated on shippping container/cooler?	Yes ☐	No ☐	Not Present ☑
3. Custody seals intact on sample bottles?	Yes ☐	No ☐	Not Present ☑
4. Chain of custody present?	Yes ☑	No ☐	
5. Sampler's name present in COC?	Yes ☐	No ☑	
6. Chain of custody signed when relinquished and received?	Yes ☑	No ☐	
7. Chain of custody agrees with sample labels?	Yes ☑	No ☐	
8. Samples in proper container/bottle?	Yes ☑	No ☐	
9. Sample containers intact?	Yes ☑	No ☐	
10. Sufficient sample volume for indicated test?	Yes ☑	No ☐	
11. All samples received within holding time?	Yes ☑	No ☐	
12. Temperature of rep sample or Temp Blank within acceptable limit?	Yes ☑	No ☐	NA ☐
13. Water - VOA vials have zero headspace?	Yes ☐	No ☐	NA ☑
14. Water - pH acceptable upon receipt? Example: pH > 12 for (CN,S); pH<2 for Metals	Yes ☐	No ☐	NA ☑
15. Did the bottle labels indicate correct preservatives used?	Yes ☐	No ☐	NA ☑
16. Were there Non-Conformance issues at login?	Yes ☑	No ☐	NA ☐
Was Client notified?	Yes ☐	No ☐	NA ☑

COOLER RECEIPT FORM

Client Name: Parsons

Project Name: Canoga Park High School Project No.:

AETL Job Number: BED0024

Date Received: 04-06-23 Received by: Chantal A.

Carrier: ☑ AETL Courier ☐ Client ☐ GSL ☐ FedEx ☐ UPS
☐Others:

Samples were received in: ☑ Cooler (__2_____) ☐ Other (Specify)**:**

Sample Container Temperature: __5.9__ °C IR Gun S/N: 51941911MV

Type of sample containers: ☐ VOA, ☐ Glass bottles, ☑Wide mouth jars, ☐HDPE bottles, ☐ Metal sleeves, ☐ Acetate sleeves, ☐ 5035 Kit: ☐ AETL or ☐ Client, ☐ Tedlar Bags, Summa Canister: ☐ 6L, ☐ 3L, ☐ 1L, Others (Specify): _____

How are samples preserved: ☐ None, ☑ Ice, ☐ Blue Ice, ☐ Dry Ice
☑ None, ☐ HNO_3, ☐ NaOH, ☐ ZnOAc, ☐ HCl, ☐ $Na_2S_2O_3$, ☐ MeOH, ☐ $NaHSO_4$
☐ Other (Specify):

	Yes	No	N/A	Note or Comment
1. Are the COCs Correct?	✔			
2. Are Sample labels legible & indelible ink?	✔			
3. Do samples match the COC?	✔			
4. Are the required analyses clear?	✔			
5. Is there enough samples for required analysis?	✔			
6. Does cooler or samples have custody seal(s)?			✔	
7. Are sample containers in good condition?	✔			
8. Are samples preserved?	✔			
9. Are samples preserved properly for the intended analysis?	✔			
10. Are the VOAs free of headspace? See footnote.			✔	
11. Are the jars free of headspace?			✔	

* = see note below. N/A = Not Applicable

PLEASE NOTE ALL SAMPLES WILL BE DISPOSED OF 30 DAYS AFTER RECEIVING DATE. IF AETL IS INFORMED OTHERWISE, THERE WILL BE A STORAGE CHARGE PER SAMPLE PER MONTH FOR ANY SAMPLE HELD BEYOND 30 DAYS.

◯ Example maximum headspace bubble size; acceptance criteria not to exceed 5-6 mm in diameter.

For headspace bubbles exceeding 6 mm in diameter, sample receiving will tag the VOA and notify the Project Manager. The Project Manager will contact client for Analyze or Resample instructions.

Case Narrative

The following "Sample Received" Section summarizes the samples received and associated analyses requested as specified on the enclosed chain of custody.

Results as reported by the laboratory apply only to 1) the items tested, 2) as the samples are received, and 3) the accuracy of information provided. Information supplied by the customer that may affect validity of results and may be contained in this report include Project Name/Number, Site Location, Sample Locations, Sampling Dates/Times, Sample ID, Sample Preservation, Sample Matrix, Sample Properties, Field Blanks, Field Duplicates, Field Spikes, and Site Historical Data.

Accreditation applies only to the test methods listed on each scope of accreditation held by the laboratory; certifications held by the laboratory may not apply to results supplied in this report.

Unless otherwise noted, all results of soil and solid samples are based on wet weight.

Qualifiers are noted in the report.

The samples were subcontracted to AIH Laboratory for EPA-600R-93/116. Please see attached report for results.

The samples were subcontracted to Orange Coast Analytical for EPA 6020-As. Please see attached report for results.

The samples were subcontracted to Asset Laboratories for EPA 7199. Please see attached report for results.

The contents of this report apply to the sample(s) analyzed in accordance with the chain of custody document.
No duplication of this report is allowed, except in its entirety without written approval of the laboratory.

Qualifiers and Definitions

Item	Definitions
% wt	Percent Weight
%REC	Percent Recovery
°F	Degrees Fahrenheit
AETL	American Environmental Testing Laboratory, LLC
C	Carbon
CARB	California Air Resources Board
COC	Chain of Custody
Cresols	3-methylphenol/4-methylphenol coelute and cannot be chromatographically separated. Due to this coeluting isomer pair phenomenon, the laboratory uses a single cresol (4-methylphenol) as calibration standard for 3-methylphenol/4-methylphenol.
CRM	Certified Reference Material
DPD	Department of Planning and Development
DRO	Diesel Range Organics
Dup	Duplicate
ELAP	Environmental Laboratory Accreditation Program
EPA	Environmental Protection Agency
GC/FID	Gas Chromatography Flame Ionization Detection
GRO	Gasoline Range Organics
HC	Hydrocarbon
HEM	Hexane Extractable Material
HMU	Hazardous Material Unit
ICP/MS	Inductively Coupled Plasma Mass Spectrometry
LACSD	Los Angeles County Sanitation Districts
LCS	Laboratory Control Sample - A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes.
LCSD	Laboratory Control Sample Duplicate - A replicate of Laboratory Control Sample.
LOQ	Limit of Quantitation
MDL	Method Detection Limit - The minimum measured concentration of a substance that can be reported with 99% confidence. MDL is statistically derived number which is specific for each instrument, each method and each compound.
mg/kg	Miligrams per Kilogram
mg/L	Miligrams per Liter
ml/L/hr	Milliliter per Liter per Hour
MRO	Motor oil Range Organics
MS	Matrix Spike - A sample prepared, taken through all sample preparation and analytical steps of the procedure and analyzed as an independent test results.
MSD	Matrix Spike Duplicate - A replicate of Matrix Spike Sample.
N	No
ND	Analyte is not detected below Method Detection Limit.
ng/m3	Nanograms per cubic meter

The contents of this report apply to the sample(s) analyzed in accordance with the chain of custody document.
No duplication of this report is allowed, except in its entirety without written approval of the laboratory.

FAX:

Workorder No.: N056033

RE: BED0024

Attention: Hailley Coleman

Enclosed are the results for sample(s) received on April 18, 2023 by ASSET Laboratories. The sample(s) are tested for the parameters as indicated in the enclosed chain of custody in accordance with the applicable laboratory certifications.

Thank you for the opportunity to service the needs of your company.

Please feel free to call me at (562) 219-7435 if I can be of further assistance to your company.

Sincerely,

for

Ferdinand Paul Lugtu
Laboratory Director

The cover letter is an integral part of this analytical report. This Laboratory Report cannot be reproduced in part or in its entirety without written permission from the client and ASSET Laboratories - California.

CASE NARRATIVE

SAMPLE RECEIVING/GENERAL COMMENTS:

All sample containers were received intact with proper chain of custody documentation.

Information on sample receipt conditions including discrepancies can be found in attached Sample Receipt Checklist Form.

Cooler temperature and sample preservation were verified upon receipt of samples if applicable.

Samples were analyzed within method holding time.

Analytical Comments for EPA 6020:

Matrix Spike (MS) is outside recovery criteria for Arsenic in QC sample N056032-001A-MS possibly due to matrix interference. The associated Laboratory Control Sample (LCS) recovery was acceptable.

AETL Job Number: BED0024

Date Received: 04-06-23 Received by: Chantal A.

Carrier: ☑ AETL Courier ☐ Client ☐ GSL ☐ FedEx ☐ UPS
☐Others:

Samples were received in: ☑ Cooler (__2_____) ☐ Other (Specify)**:**

Sample Container Temperature: __5.9__ °C IR Gun S/N: 51941911MV

Type of sample containers: ☐ VOA, ☐ Glass bottles, ☑Wide mouth jars, ☐HDPE bottles, ☐ Metal sleeves, ☐ Acetate sleeves, ☐ 5035 Kit: ☐ AETL or ☐ Client, ☐ Tedlar Bags, Summa Canister: ☐ 6L, ☐ 3L, ☐ 1L, Others (Specify): _____

How are samples preserved: ☐ None, ☑ Ice, ☐ Blue Ice, ☐ Dry Ice
☑ None, ☐ HNO_3, ☐ NaOH, ☐ ZnOAc, ☐ HCl, ☐ $Na_2S_2O_3$, ☐ MeOH, ☐ $NaHSO_4$
☐ Other (Specify):

	Yes	No	N/A	Note or Comment
1. Are the COCs Correct?	✔			
2. Are Sample labels legible & indelible ink?	✔			
3. Do samples match the COC?	✔			
4. Are the required analyses clear?	✔			
5. Is there enough samples for required analysis?	✔			
6. Does cooler or samples have custody seal(s)?			✔	
7. Are sample containers in good condition?	✔			
8. Are samples preserved?	✔			
9. Are samples preserved properly for the intended analysis?	✔			
10. Are the VOAs free of headspace? See footnote.			✔	
11. Are the jars free of headspace?			✔	

* = see note below. N/A = Not Applicable

PLEASE NOTE ALL SAMPLES WILL BE DISPOSED OF 30 DAYS AFTER RECEIVING DATE. IF AETL IS INFORMED OTHERWISE, THERE WILL BE A STORAGE CHARGE PER SAMPLE PER MONTH FOR ANY SAMPLE HELD BEYOND 30 DAYS.

◯ Example maximum headspace bubble size; acceptance criteria not to exceed 5-6 mm in diameter.

For headspace bubbles exceeding 6 mm in diameter, sample receiving will tag the VOA and notify the Project Manager. The Project Manager will contact client for Analyze or Resample instructions.

Case Narrative

The following "Sample Received" Section summarizes the samples received and associated analyses requested as specified on the enclosed chain of custody.

Results as reported by the laboratory apply only to 1) the items tested, 2) as the samples are received, and 3) the accuracy of information provided. Information supplied by the customer that may affect validity of results and may be contained in this report include Project Name/Number, Site Location, Sample Locations, Sampling Dates/Times, Sample ID, Sample Preservation, Sample Matrix, Sample Properties, Field Blanks, Field Duplicates, Field Spikes, and Site Historical Data.

Accreditation applies only to the test methods listed on each scope of accreditation held by the laboratory; certifications held by the laboratory may not apply to results supplied in this report.

Unless otherwise noted, all results of soil and solid samples are based on wet weight.

Qualifiers are noted in the report.

The samples were subcontracted to AIH Laboratory for EPA-600R-93/116. Please see attached report for results.

The samples were subcontracted to Orange Coast Analytical for EPA 6020-As. Please see attached report for results.

The samples were subcontracted to Asset Laboratories for EPA 7199. Please see attached report for results.

The contents of this report apply to the sample(s) analyzed in accordance with the chain of custody document.
No duplication of this report is allowed, except in its entirety without written approval of the laboratory.

Qualifiers and Definitions

Item	Definitions
% wt	Percent Weight
%REC	Percent Recovery
°F	Degrees Fahrenheit
AETL	American Environmental Testing Laboratory, LLC
C	Carbon
CARB	California Air Resources Board
COC	Chain of Custody
Cresols	3-methylphenol/4-methylphenol coelute and cannot be chromatographically separated. Due to this coeluting isomer pair phenomenon, the laboratory uses a single cresol (4-methylphenol) as calibration standard for 3-methylphenol/4-methylphenol.
CRM	Certified Reference Material
DPD	Department of Planning and Development
DRO	Diesel Range Organics
Dup	Duplicate
ELAP	Environmental Laboratory Accreditation Program
EPA	Environmental Protection Agency
GC/FID	Gas Chromatography Flame Ionization Detection
GRO	Gasoline Range Organics
HC	Hydrocarbon
HEM	Hexane Extractable Material
HMU	Hazardous Material Unit
ICP/MS	Inductively Coupled Plasma Mass Spectrometry
LACSD	Los Angeles County Sanitation Districts
LCS	Laboratory Control Sample - A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes.
LCSD	Laboratory Control Sample Duplicate - A replicate of Laboratory Control Sample.
LOQ	Limit of Quantitation
MDL	Method Detection Limit - The minimum measured concentration of a substance that can be reported with 99% confidence. MDL is statistically derived number which is specific for each instrument, each method and each compound.
mg/kg	Miligrams per Kilogram
mg/L	Miligrams per Liter
ml/L/hr	Milliliter per Liter per Hour
MRO	Motor oil Range Organics
MS	Matrix Spike - A sample prepared, taken through all sample preparation and analytical steps of the procedure and analyzed as an independent test results.
MSD	Matrix Spike Duplicate - A replicate of Matrix Spike Sample.
N	No
ND	Analyte is not detected below Method Detection Limit.
ng/m3	Nanograms per cubic meter

The contents of this report apply to the sample(s) analyzed in accordance with the chain of custody document.
No duplication of this report is allowed, except in its entirety without written approval of the laboratory.

Case Narrative

Sample Receipt:

All samples on the Chain of Custody were received by OCA at 2ºC, on ice.

Holding Times:

All samples were analyzed within required holding times unless otherwise noted in the data qualifier section of the report.

Analytical Methods:

Sample analysis was performed following the analytical methods listed on the cover page.

Data Qualifiers:

Within this report, data qualifiers may have been assigned to clarify deviations in common laboratory procedures or any divergence from laboratory QA/QC criteria. If a data qualifier has been used, it will appear in the back of the report along with its description. All method QA/QC criteria have been met unless otherwise noted in the data qualifier section.

Definition of Terms:

The definitions of common terms and acronyms used in the report have been placed at the back of the report to assist data users.

COOLER RECEIPT FORM

Client Name: Parsons

Project Name: Canoga Park High School Project No.:

AETL Job Number: BED0025

Date Received: 04-06-23 Received by: Chantal A.

Carrier: ☑ AETL Courier ☐ Client ☐ GSL ☐ FedEx ☐ UPS
☐Others:

Samples were received in: ☑ Cooler (_1_____) ☐ Other (Specify):

Sample Container Temperature: __5.9__ °C IR Gun S/N: 51941911MV_____

Type of sample containers: ☑ VOA, ☑ Glass bottles, ☐Wide mouth jars, ☑HDPE bottles,
☐ Metal sleeves, ☐ Acetate sleeves, ☐ 5035 Kit: ☐ AETL or ☐ Client, ☐ Tedlar Bags,
Summa Canister: ☐ 6L, ☐ 3L, ☐ 1L, Others (Specify): _____

How are samples preserved: ☐ None, ☑ Ice, ☐ Blue Ice, ☐ Dry Ice
☐ None, ☑ HNO_3, ☐ NaOH, ☐ ZnOAc, ☑ HCl, ☐ $Na_2S_2O_3$,
☐ MeOH, ☐ $NaHSO_4$
☐ Other (Specify):

	Yes	No	N/A	Note or Comment
1. Are the COCs Correct?	✔			
2. Are Sample labels legible & indelible ink?	✔			
3. Do samples match the COC?	✔			
4. Are the required analyses clear?	✔			
5. Is there enough samples for required analysis?	✔			
6. Does cooler or samples have custody seal(s)?			✔	
7. Are sample containers in good condition?	✔			
8. Are samples preserved?	✔			
9. Are samples preserved properly for the intended analysis?	✔			
10. Are the VOAs free of headspace? See footnote.			✔	
11. Are the jars free of headspace?			✔	

* = see note below. N/A = Not Applicable

PLEASE NOTE ALL SAMPLES WILL BE DISPOSED OF 30 DAYS AFTER RECEIVING DATE. IF AETL IS INFORMED OTHERWISE, THERE WILL BE A STORAGE CHARGE PER SAMPLE PER MONTH FOR ANY SAMPLE HELD BEYOND 30 DAYS.

◯ Example maximum headspace bubble size; acceptance criteria not to exceed 5-6 mm in diameter.

For headspace bubbles exceeding 6 mm in diameter, sample receiving will tag the VOA and notify the Project Manager. The Project Manager will contact client for Analyze or Resample instructions.

Case Narrative

The following "Sample Received" Section summarizes the samples received and associated analyses requested as specified on the enclosed chain of custody.

Results as reported by the laboratory apply only to 1) the items tested, 2) as the samples are received, and 3) the accuracy of information provided. Information supplied by the customer that may affect validity of results and may be contained in this report include Project Name/Number, Site Location, Sample Locations, Sampling Dates/Times, Sample ID, Sample Preservation, Sample Matrix, Sample Properties, Field Blanks, Field Duplicates, Field Spikes, and Site Historical Data.

Accreditation applies only to the test methods listed on each scope of accreditation held by the laboratory; certifications held by the laboratory may not apply to results supplied in this report.

Qualifiers are noted in the report.

The sample was subcontracted to LA Testing for EPA 100.2. Please see attached report for results.

The contents of this report apply to the sample(s) analyzed in accordance with the chain of custody document.
No duplication of this report is allowed, except in its entirety without written approval of the laboratory.

Qualifiers and Definitions

Item	Qualifiers
B1	This analyte was found in the method blank, which was possibly contaminated during sample preparation. The batch was accepted since this analyte was either not detected or more than 10 times of the blank value for all the samples in the batch.
D	Sample was analyzed under dilution due to matrix interference.
DIL	Result for the compound reported from diluted analysis.
J	Analyte was detected. However, the analyte concentration is an estimated value, which is between the Method Detection Limit (MDL) and the Reporting Limit (RL).
S6	Surrogate recovery is outside control limits due to matrix interference.

Item	Definitions
% wt	Percent Weight
%REC	Percent Recovery
°F	Degrees Fahrenheit
AETL	American Environmental Testing Laboratory, LLC
C	Carbon
CARB	California Air Resources Board
COC	Chain of Custody
Cresols	3-methylphenol/4-methylphenol coelute and cannot be chromatographically separated. Due to this coeluting isomer pair phenomenon, the laboratory uses a single cresol (4-methylphenol) as calibration standard for 3-methylphenol/4-methylphenol.
CRM	Certified Reference Material
DPD	Department of Planning and Development
DRO	Diesel Range Organics
Dup	Duplicate
ELAP	Environmental Laboratory Accreditation Program
EPA	Environmental Protection Agency
GC/FID	Gas Chromatography Flame Ionization Detection
GRO	Gasoline Range Organics
HC	Hydrocarbon
HEM	Hexane Extractable Material
HMU	Hazardous Material Unit
ICP/MS	Inductively Coupled Plasma Mass Spectrometry
LACSD	Los Angeles County Sanitation Districts
LCS	Laboratory Control Sample - A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes.
LCSD	Laboratory Control Sample Duplicate - A replicate of Laboratory Control Sample.
LOQ	Limit of Quantitation
MDL	Method Detection Limit - The minimum measured concentration of a substance that can be reported with 99% confidence. MDL is statistically derived number which is specific for each instrument, each method and each compound.
mg/kg	Miligrams per Kilogram

The contents of this report apply to the sample(s) analyzed in accordance with the chain of custody document.
No duplication of this report is allowed, except in its entirety without written approval of the laboratory.

Parsons	AETL Job Number:	BED0025	Site:	6850 CA-27
100 West Walnut Street	Project Number:	[none]		Canoga Park, CA 91303
Pasadena, CA 91124	Attention:	Justin King		
	Project Name:	Canoga Park High School	Reported:	04/13/2023 16:19

mg/L	Miligrams per Liter
ml/L/hr	Milliliter per Liter per Hour
MRO	Motor oil Range Organics
MS	Matrix Spike - A sample prepared, taken through all sample preparation and analytical steps of the procedure and analyzed as an independent test results.
MSD	Matrix Spike Duplicate - A replicate of Matrix Spike Sample.
N	No
ND	Analyte is not detected below Method Detection Limit.
ng/m3	Nanograms per cubic meter
NIOSH	National Institute for Occupational Safety and Health
nL/L	Nanoliters per Liter
NTU	Nephelometric Turbidity Units
Ohm-cm	Ohms per centimeter
ORO	Oil Range Organics
OSHA	Occupational Safety and Health Administration
PCB	Polychlorinated Biphenyl
PSU	Practical Salinity Unit
RL	Reporting Limit - The lowest concentration at which an analyte can be detected in a sample and its concentration can be reported with a specified degree of confidence, accuracy and precision. For usage at AETL, RL is equivalant to LOQ.
RPD	Relative Percent Difference
SIM	Selective Ion Monitoring
SM	Standard Method
SPLP	Synthetic Precipitation Leaching Procedure
STLC	Soluble Threshold Limit Concentration
TCLP	Toxicity Characteristic Leaching Procedure
TPH	Total Petroleum Hydrocarbons
TTLC	Total Threshold Limit Concentrations
ug/kg	Micrograms per Kilogram
ug/L	Micrograms per Liter
ug/m3	Micrograms per cubic meter
WET	Waste Extraction Test
Y	Yes
ZHE	Zero Headspace Extraction

Initial report from: 04/12/2023 10:03:59

LA Testing maintains liability limited to cost of analysis. Interpretation and use of test results are the responsibility of the client. This report relates only to the samples reported above, and may not be reproduced, except in full, without written approval by LA Testing. LA Testing bears no responsibility for sample collection activities or analytical method limitations. The report reflects the samples as received. Results are generated from the field sampling data (sampling volumes and areas, locations, etc.) provided by the client on the Chain of Custody. Samples are within quality control criteria and met method specifications unless otherwise noted. Estimation of uncertainty is available on request. Sample collection and containers provided by the client, acceptable bottle blank level is defined as ≤0.01MFL>10um. ND=None Detected. No Fibers Detected: the value will be reported as less than 369% of the concentration equivalent to one fiber. 1 to 4 fibers: The result will be reported as less than the corresponding upper 95% confidence limit (Poisson).5 to 30 fibers: Mean and 95% confidence intervals will be reported on the basis of the Poisson assumption. When more than 30 fibers are counted, both the Gaussian 95% confidence interval and the Poisson 95% confidence interval will be calculated. The large of these two intervals will be selected for data reporting. When the Gaussian 95% confidence interval is selected for data reporting, the Poisson will also be noted.

COOLER RECEIPT FORM

Client Name: Parsons

Project Name: Canoga Park High School Project No.:

AETL Job Number: BEF0102

Date Received: 06/12/2023 Received by: Greta G

Carrier: ☐ AETL Courier ☑ Client ☐ GSL ☐ FedEx ☐ UPS
☐Others:

Samples were received in: ☑ Cooler (__1_____) ☐ Other (Specify):

Sample Container Temperature: __5.7__ °C IR Gun S/N: 51941911MV

Type of sample containers: ☐ VOA, ☐ Glass bottles, ☑Wide mouth jars, ☐HDPE bottles, ☐ Metal sleeves, ☐ Acetate sleeves, ☐ 5035 Kit: ☐ AETL or ☐ Client, ☐ Tedlar Bags, Summa Canister: ☐ 6L, ☐ 3L, ☐ 1L, Others (Specify): _____

How are samples preserved: ☐ None, ☑ Ice, ☐ Blue Ice, ☐ Dry Ice
☑ None, ☐ HNO_3, ☐ NaOH, ☐ ZnOAc, ☐ HCl, ☐ $Na_2S_2O_3$, ☐ MeOH, ☐ $NaHSO_4$
☐ Other (Specify):

	Yes	No	N/A	Note or Comment
1. Are the COCs Correct?	✔			
2. Are Sample labels legible & indelible ink?	✔			
3. Do samples match the COC?	✔			
4. Are the required analyses clear?	✔			
5. Is there enough samples for required analysis?	✔			
6. Does cooler or samples have custody seal(s)?			✔	
7. Are sample containers in good condition?	✔			
8. Are samples preserved?	✔			
9. Are samples preserved properly for the intended analysis?	✔			
10. Are the VOAs free of headspace? See footnote.			✔	
11. Are the jars free of headspace?			✔	

* = see note below. N/A = Not Applicable

PLEASE NOTE ALL SAMPLES WILL BE DISPOSED OF 30 DAYS AFTER RECEIVING DATE. IF AETL IS INFORMED OTHERWISE, THERE WILL BE A STORAGE CHARGE PER SAMPLE PER MONTH FOR ANY SAMPLE HELD BEYOND 30 DAYS.

◯ Example maximum headspace bubble size; acceptance criteria not to exceed 5-6 mm in diameter.

For headspace bubbles exceeding 6 mm in diameter, sample receiving will tag the VOA and notify the Project Manager. The Project Manager will contact client for Analyze or Resample instructions.

A KYZER LABS COMPANY

Parsons 100 West Walnut Street Pasadena, CA 91124	AETL Job Number: Project Number: Attention: Project Name:	BEF0098 [none] Justin King Canoga Park High School	Site: Reported:	LAUSD Canoga 6850 CA-27 Canoga Park, CA 91303 06/20/2023 16:17

Case Narrative

The following "Sample Received" Section summarizes the samples received and associated analyses requested as specified on the enclosed chain of custody.

Results as reported by the laboratory apply only to 1) the items tested, 2) as the samples are received, and 3) the accuracy of information provided. Information supplied by the customer that may affect validity of results and may be contained in this report include Project Name/Number, Site Location, Sample Locations, Sampling Dates/Times, Sample ID, Sample Preservation, Sample Matrix, Sample Properties, Field Blanks, Field Duplicates, Field Spikes, and Site Historical Data.

Accreditation applies only to the test methods listed on each scope of accreditation held by the laboratory; certifications held by the laboratory may not apply to results supplied in this report.

Unless otherwise noted, all results of soil and solid samples are based on wet weight.

Qualifiers are noted in the report.

The samples were subcontracted to Asset Laboratories for EPA 6020-As. Please see attached report for results.

The contents of this report apply to the sample(s) analyzed in accordance with the chain of custody document.
No duplication of this report is allowed, except in its entirety without written approval of the laboratory.

AETL received the following samples on 06/12/2023 with the following specifications

Client ID	Sample Date
SB-44-W5-D0.5	06/12/2023 12:53

Lab ID	Matrix	Quantity of Containers
BEF0098-52	Soil	2

Method	Analyte	Units	TAT
EPA 6020	Arsenic, total by ICP/MS	mg/kg	5

Client ID	Sample Date
SB-44-W5-D2.0	06/12/2023 12:55

Lab ID	Matrix	Quantity of Containers
BEF0098-53	Soil	1

Method	Analyte	Units	TAT
Archive	Sample On Hold	N/A	0

Client ID	Sample Date
SB-44-W5-D3.0	06/12/2023 12:57

Lab ID	Matrix	Quantity of Containers
BEF0098-54	Soil	1

Method	Analyte	Units	TAT
Archive	Sample On Hold	N/A	0

Client ID	Sample Date
SB-44-N5-D0.5	06/12/2023 13:05

Lab ID	Matrix	Quantity of Containers
BEF0098-55	Soil	2

Method	Analyte	Units	TAT
EPA 6020	Arsenic, total by ICP/MS	mg/kg	5

The contents of this report apply to the sample(s) analyzed in accordance with the chain of custody document.

Qualifiers and Definitions

Item	Qualifiers
J	Analyte was detected. However, the analyte concentration is an estimated value, which is between the Method Detection Limit (MDL) and the Reporting Limit (RL).

Item	Definitions
% wt	Percent Weight
%REC	Percent Recovery
°F	Degrees Fahrenheit
AETL	American Environmental Testing Laboratory, LLC
C	Carbon
CARB	California Air Resources Board
COC	Chain of Custody
Cresols	3-methylphenol/4-methylphenol coelute and cannot be chromatographically separated. Due to this coeluting isomer pair phenomenon, the laboratory uses a single cresol (4-methylphenol) as calibration standard for 3-methylphenol/4-methylphenol.
CRM	Certified Reference Material
DI	Deionized Water
DPD	Department of Planning and Development
DRO	Diesel Range Organics
Dup	Duplicate
ELAP	Environmental Laboratory Accreditation Program
EPA	Environmental Protection Agency
GC/FID	Gas Chromatography Flame Ionization Detection
GRO	Gasoline Range Organics
HC	Hydrocarbon
HEM	Hexane Extractable Material
HMU	Hazardous Material Unit
ICP/MS	Inductively Coupled Plasma Mass Spectrometry
LACSD	Los Angeles County Sanitation Districts
LCS	Laboratory Control Sample - A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes.
LCSD	Laboratory Control Sample Duplicate - A replicate of Laboratory Control Sample.
LOQ	Limit of Quantitation
MDL	Method Detection Limit - The minimum measured concentration of a substance that can be reported with 99% confidence. MDL is statistically derived number which is specific for each instrument, each method and each compound.
mg/kg	Miligrams per Kilogram
mg/L	Miligrams per Liter
ml/L/hr	Milliliter per Liter per Hour
MRO	Motor oil Range Organics

The contents of this report apply to the sample(s) analyzed in accordance with the chain of custody document.
No duplication of this report is allowed, except in its entirety without written approval of the laboratory.

Parsons	AETL Job Number:	BEF0098	Site:	LAUSD Canoga
100 West Walnut Street	Project Number:	[none]		6850 CA-27
Pasadena, CA 91124	Attention:	Justin King		Canoga Park, CA 91303
	Project Name:	Canoga Park High School	Reported:	06/20/2023 16:17

MS	Matrix Spike - A sample prepared, taken through all sample preparation and analytical steps of the procedure and analyzed as an independent test results.
MSD	Matrix Spike Duplicate - A replicate of Matrix Spike Sample.
N	No
ND	Analyte is not detected below Method Detection Limit.
ng/m3	Nanograms per cubic meter
NIOSH	National Institute for Occupational Safety and Health
nL/L	Nanoliters per Liter
NTU	Nephelometric Turbidity Units
Ohm-cm	Ohms per centimeter
ORO	Oil Range Organics
OSHA	Occupational Safety and Health Administration
PCB	Polychlorinated Biphenyl
ppb v	Parts per billion by volume
ppmC	Parts per million Carbon
PSU	Practical Salinity Unit
RL	Reporting Limit - The lowest concentration at which an analyte can be detected in a sample and its concentration can be reported with a specified degree of confidence, accuracy and precision. For usage at AETL, RL is equivalant to LOQ.
RPD	Relative Percent Difference
SIM	Selective Ion Monitoring
SM	Standard Method
SPLP	Synthetic Precipitation Leaching Procedure
STLC	Soluble Threshold Limit Concentration
TCLP	Toxicity Characteristic Leaching Procedure
TPH	Total Petroleum Hydrocarbons
TTLC	Total Threshold Limit Concentrations
ug/kg	Micrograms per Kilogram
ug/L	Micrograms per Liter
ug/m3	Micrograms per cubic meter
WET	Waste Extraction Test
Y	Yes
ZHE	Zero Headspace Extraction

Workorder No.: N057164

RE: BEF0098

Attention: Hailley Coleman

Enclosed are the results for sample(s) received on June 14, 2023 by ASSET Laboratories. The sample(s) are tested for the parameters as indicated in the enclosed chain of custody in accordance with the applicable laboratory certifications.

Thank you for the opportunity to service the needs of your company.

Please feel free to call me at (702) 307-2659 if I can be of further assistance to your company.

Sincerely,

Ferdinand Paul Lugtu
Laboratory Director

The cover letter is an integral part of this analytical report. This Laboratory Report cannot be reproduced in part or in its entirety without written permission from the client and ASSET Laboratories - Las Vegas.

CLIENT: American Environmental Testing Laborator
Project: BEF0098
Lab Order: N057164

CASE NARRATIVE

SAMPLE RECEIVING/GENERAL COMMENTS:

All sample containers were received intact with proper chain of custody documentation.

Information on sample receipt conditions including discrepancies can be found in attached Sample Receipt Checklist Form.

Cooler temperature and sample preservation were verified upon receipt of samples if applicable.

Samples were analyzed within method holding time.

Analytical Comments for EPA 6020:

Matrix Spike (MS) and Matrix Spike Duplicate (MSD) are outside criteria since the analyte concentration in the sample is disproportionate to the spike level. The associated Laboratory Control Sample (LCS) recovery was acceptable.

Please review the checklist below. Any NO signifies non-compliance. Any non-compliance will be noted and must be understood as having an impact on the quality of the data. All tests will be performed as requested regardless of any compliance issues.

If you have any questions or further instruction, please contact our Project Coordinator at (702) 307-2659.

Cooler Received/Opened On:	6/14/2023	Workorder:	N057164
Rep sample Temp (Deg C):	5.8	IR Gun ID:	1
Temp Blank:	☐ Yes ☑ No		
Carrier name:	Walk-In		
Last 4 digits of Tracking No.:	NA	Packing Material Used:	None
Cooling process:	☑ Ice ☐ Ice Pack ☐ Dry Ice ☐ Other ☐ None		

Sample Receipt Checklist

1. Shipping container/cooler in good condition?	Yes ☑	No ☐	Not Present ☐
2. Custody seals intact, signed, dated on shippping container/cooler?	Yes ☐	No ☐	Not Present ☑
3. Custody seals intact on sample bottles?	Yes ☐	No ☐	Not Present ☑
4. Chain of custody present?	Yes ☑	No ☐	
5. Sampler's name present in COC?	Yes ☐	No ☑	
6. Chain of custody signed when relinquished and received?	Yes ☑	No ☐	
7. Chain of custody agrees with sample labels?	Yes ☑	No ☐	
8. Samples in proper container/bottle?	Yes ☑	No ☐	
9. Sample containers intact?	Yes ☑	No ☐	
10. Sufficient sample volume for indicated test?	Yes ☑	No ☐	
11. All samples received within holding time?	Yes ☑	No ☐	
12. Temperature of rep sample or Temp Blank within acceptable limit?	Yes ☑	No ☐	NA ☐
13. Water - VOA vials have zero headspace?	Yes ☐	No ☐	NA ☑
14. Water - pH acceptable upon receipt? Example: pH > 12 for (CN,S); pH<2 for Metals	Yes ☐	No ☐	NA ☑
15. Did the bottle labels indicate correct preservatives used?	Yes ☐	No ☐	NA ☑
16. Were there Non-Conformance issues at login?	Yes ☑	No ☐	NA ☐
Was Client notified?	Yes ☐	No ☐	NA ☑

☐Others:

Samples were received in: ☑ Cooler (__1_____) ☐ Other (Specify)**:**

Sample Container Temperature: __5.7__ °C IR Gun S/N: 51941911MV

Type of sample containers: ☐ VOA, ☐ Glass bottles, ☑Wide mouth jars, ☐HDPE bottles, ☐ Metal sleeves, ☐ Acetate sleeves, ☐ 5035 Kit: ☐ AETL or ☐ Client, ☐ Tedlar Bags, Summa Canister: ☐ 6L, ☐ 3L, ☐ 1L, Others (Specify): _____

How are samples preserved: ☐ None, ☑ Ice, ☐ Blue Ice, ☐ Dry Ice
☑ None, ☐ HNO_3, ☐ NaOH, ☐ ZnOAc, ☐ HCl, ☐ $Na_2S_2O_3$, ☐ MeOH, ☐ $NaHSO_4$
☐ Other (Specify):

	Yes	No	N/A	Note or Comment
1. Are the COCs Correct?	✔			
2. Are Sample labels legible & indelible ink?	✔			
3. Do samples match the COC?	✔			
4. Are the required analyses clear?	✔			
5. Is there enough samples for required analysis?	✔			
6. Does cooler or samples have custody seal(s)?			✔	
7. Are sample containers in good condition?	✔			
8. Are samples preserved?	✔			
9. Are samples preserved properly for the intended analysis?	✔			
10. Are the VOAs free of headspace? See footnote.			✔	
11. Are the jars free of headspace?			✔	

* = see note below. N/A = Not Applicable

PLEASE NOTE ALL SAMPLES WILL BE DISPOSED OF 30 DAYS AFTER RECEIVING DATE. IF AETL IS INFORMED OTHERWISE, THERE WILL BE A STORAGE CHARGE PER SAMPLE PER MONTH FOR ANY SAMPLE HELD BEYOND 30 DAYS.

◯ Example maximum headspace bubble size; acceptance criteria not to exceed 5-6 mm in diameter.

For headspace bubbles exceeding 6 mm in diameter, sample receiving will tag the VOA and notify the Project Manager. The Project Manager will contact client for Analyze or Resample instructions.

Parsons 100 West Walnut Street Pasadena, CA 91124	AETL Job Number: Project Number: Attention: Project Name:	BEF0098 [none] Justin King Canoga Park High School	Site: Reported:	LAUSD Canoga 6850 CA-27 Canoga Park, CA 91303 07/06/2023 09:22

Case Narrative

The following "Sample Received" Section summarizes the samples received and associated analyses requested as specified on the enclosed chain of custody.

Results as reported by the laboratory apply only to 1) the items tested, 2) as the samples are received, and 3) the accuracy of information provided. Information supplied by the customer that may affect validity of results and may be contained in this report include Project Name/Number, Site Location, Sample Locations, Sampling Dates/Times, Sample ID, Sample Preservation, Sample Matrix, Sample Properties, Field Blanks, Field Duplicates, Field Spikes, and Site Historical Data.

Accreditation applies only to the test methods listed on each scope of accreditation held by the laboratory; certifications held by the laboratory may not apply to results supplied in this report.

Unless otherwise noted, all results of soil and solid samples are based on wet weight.

Qualifiers are noted in the report.

The samples were subcontracted to Asset Laboratories for EPA 6020-As, STLC, and TCLP. Please see attached report for results.

The contents of this report apply to the sample(s) analyzed in accordance with the chain of custody document.
No duplication of this report is allowed, except in its entirety without written approval of the laboratory.

Qualifiers and Definitions

Item	Qualifiers
J	Analyte was detected. However, the analyte concentration is an estimated value, which is between the Method Detection Limit (MDL) and the Reporting Limit (RL).
R	The RPD was outside of QC acceptance limits due to possible matrix interference.

Item	Definitions
% wt	Percent Weight
%REC	Percent Recovery
°F	Degrees Fahrenheit
AETL	American Environmental Testing Laboratory, LLC
C	Carbon
CARB	California Air Resources Board
COC	Chain of Custody
Cresols	3-methylphenol/4-methylphenol coelute and cannot be chromatographically separated. Due to this coeluting isomer pair phenomenon, the laboratory uses a single cresol (4-methylphenol) as calibration standard for 3-methylphenol/4-methylphenol.
CRM	Certified Reference Material
DI	Deionized Water
DPD	Department of Planning and Development
DRO	Diesel Range Organics
Dup	Duplicate
ELAP	Environmental Laboratory Accreditation Program
EPA	Environmental Protection Agency
GC/FID	Gas Chromatography Flame Ionization Detection
GRO	Gasoline Range Organics
HC	Hydrocarbon
HEM	Hexane Extractable Material
HMU	Hazardous Material Unit
ICP/MS	Inductively Coupled Plasma Mass Spectrometry
LACSD	Los Angeles County Sanitation Districts
LCS	Laboratory Control Sample - A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes.
LCSD	Laboratory Control Sample Duplicate - A replicate of Laboratory Control Sample.
LOQ	Limit of Quantitation
MDL	Method Detection Limit - The minimum measured concentration of a substance that can be reported with 99% confidence. MDL is statistically derived number which is specific for each instrument, each method and each compound.
mg/kg	Miligrams per Kilogram
mg/L	Miligrams per Liter
ml/L/hr	Milliliter per Liter per Hour
MRO	Motor oil Range Organics

The contents of this report apply to the sample(s) analyzed in accordance with the chain of custody document.
No duplication of this report is allowed, except in its entirety without written approval of the laboratory.

Parsons	AETL Job Number:	BEF0098	Site:	LAUSD Canoga	
100 West Walnut Street	Project Number:	[none]		6850 CA-27	
Pasadena, CA 91124	Attention:	Justin King		Canoga Park, CA 91303	
	Project Name:	Canoga Park High School	Reported:	07/06/2023 09:22	

MS	Matrix Spike - A sample prepared, taken through all sample preparation and analytical steps of the procedure and analyzed as an independent test results.
MSD	Matrix Spike Duplicate - A replicate of Matrix Spike Sample.
N	No
ND	Analyte is not detected below Method Detection Limit.
ng/m3	Nanograms per cubic meter
NIOSH	National Institute for Occupational Safety and Health
nL/L	Nanoliters per Liter
NTU	Nephelometric Turbidity Units
Ohm-cm	Ohms per centimeter
ORO	Oil Range Organics
OSHA	Occupational Safety and Health Administration
PCB	Polychlorinated Biphenyl
ppb v	Parts per billion by volume
ppmC	Parts per million Carbon
PSU	Practical Salinity Unit
RL	Reporting Limit - The lowest concentration at which an analyte can be detected in a sample and its concentration can be reported with a specified degree of confidence, accuracy and precision. For usage at AETL, RL is equivalant to LOQ.
RPD	Relative Percent Difference
SIM	Selective Ion Monitoring
SM	Standard Method
SPLP	Synthetic Precipitation Leaching Procedure
STLC	Soluble Threshold Limit Concentration
TCLP	Toxicity Characteristic Leaching Procedure
TPH	Total Petroleum Hydrocarbons
TTLC	Total Threshold Limit Concentrations
ug/kg	Micrograms per Kilogram
ug/L	Micrograms per Liter
ug/m3	Micrograms per cubic meter
WET	Waste Extraction Test
Y	Yes
ZHE	Zero Headspace Extraction

FAX:

Workorder No.: N057413

RE: BEF0098.01

Attention: Hailley Coleman

Enclosed are the results for sample(s) received on June 27, 2023 by ASSET Laboratories. The sample(s) are tested for the parameters as indicated in the enclosed chain of custody in accordance with the applicable laboratory certifications.

Thank you for the opportunity to service the needs of your company.

Please feel free to call me at (562) 219-7435 if I can be of further assistance to your company.

Sincerely,

for

Ferdinand Paul Lugtu
Laboratory Director

The cover letter is an integral part of this analytical report. This Laboratory Report cannot be reproduced in part or in its entirety without written permission from the client and ASSET Laboratories - California.

SAMPLE RECEIVING/GENERAL COMMENTS:

All sample containers were received intact with proper chain of custody documentation.

Information on sample receipt conditions including discrepancies can be found in attached Sample Receipt Checklist Form.

Cooler temperature and sample preservation were verified upon receipt of samples if applicable.

Samples were analyzed within method holding time.

Analytical Comments for EPA 6010B_STLC:

Dilution was necessary due to matrix.

Analytical Comments for EPA 1311/ 6010B:

Matrix Spike (MS) and Matrix Spike Duplicate (MSD) are outside recovery criteria for Lead in QC samples N057393-001A-MS/MSD possibly due to matrix interference. The associated Laboratory Control Sample (LCS) recovery was acceptable.

Sample Receipt Checklist

1. Shipping container/cooler in good condition?	Yes ☑	No ☐	Not Present ☐
2. Custody seals intact, signed, dated on shippping container/cooler?	Yes ☐	No ☐	Not Present ☑
3. Custody seals intact on sample bottles?	Yes ☐	No ☐	Not Present ☑
4. Chain of custody present?	Yes ☑	No ☐	
5. Sampler's name present in COC?	Yes ☐	No ☑	
6. Chain of custody signed when relinquished and received?	Yes ☑	No ☐	
7. Chain of custody agrees with sample labels?	Yes ☑	No ☐	
8. Samples in proper container/bottle?	Yes ☑	No ☐	
9. Sample containers intact?	Yes ☑	No ☐	
10. Sufficient sample volume for indicated test?	Yes ☑	No ☐	
11. All samples received within holding time?	Yes ☑	No ☐	
12. Temperature of rep sample or Temp Blank within acceptable limit?	Yes ☐	No ☑	NA ☐
13. Water - VOA vials have zero headspace?	Yes ☐	No ☐	NA ☑
14. Water - pH acceptable upon receipt? Example: pH > 12 for (CN,S); pH<2 for Metals	Yes ☐	No ☐	NA ☑
15. Did the bottle labels indicate correct preservatives used?	Yes ☐	No ☐	NA ☑
16. Were there Non-Conformance issues at login?	Yes ☑	No ☐	NA ☐
Was Client notified?	Yes ☑	No ☐	NA ☐

Comments: See correspondence. Received at Las Vegas Lab on 6/28/23 at 2.4°C, IR#3, GW#8718.

Hailey,

The samples were received out of temperature criteria. We will continue with analyses unless otherwise instructed.

Thank you.

Kim

COOLER RECEIPT FORM

Client Name: Parsons

Project Name: Canoga Park High School Project No.:

AETL Job Number: BEF0102

Date Received: 06/12/2023 Received by: Greta G

Carrier: ☐ AETL Courier ☑ Client ☐ GSL ☐ FedEx ☐ UPS
☐Others:

Samples were received in: ☑ Cooler (__1_____) ☐ Other (Specify):

Sample Container Temperature: __5.7__ °C IR Gun S/N: 51941911MV

Type of sample containers: ☐ VOA, ☐ Glass bottles, ☑Wide mouth jars, ☐HDPE bottles, ☐ Metal sleeves, ☐ Acetate sleeves, ☐ 5035 Kit: ☐ AETL or ☐ Client, ☐ Tedlar Bags, Summa Canister: ☐ 6L, ☐ 3L, ☐ 1L, Others (Specify): _____

How are samples preserved: ☐ None, ☑ Ice, ☐ Blue Ice, ☐ Dry Ice
☑ None, ☐ HNO_3, ☐ NaOH, ☐ ZnOAc, ☐ HCl, ☐ $Na_2S_2O_3$, ☐ MeOH, ☐ $NaHSO_4$
☐ Other (Specify):

	Yes	No	N/A	Note or Comment
1. Are the COCs Correct?	✔			
2. Are Sample labels legible & indelible ink?	✔			
3. Do samples match the COC?	✔			
4. Are the required analyses clear?	✔			
5. Is there enough samples for required analysis?	✔			
6. Does cooler or samples have custody seal(s)?			✔	
7. Are sample containers in good condition?	✔			
8. Are samples preserved?	✔			
9. Are samples preserved properly for the intended analysis?	✔			
10. Are the VOAs free of headspace? See footnote.			✔	
11. Are the jars free of headspace?			✔	

* = see note below. N/A = Not Applicable

PLEASE NOTE ALL SAMPLES WILL BE DISPOSED OF 30 DAYS AFTER RECEIVING DATE. IF AETL IS INFORMED OTHERWISE, THERE WILL BE A STORAGE CHARGE PER SAMPLE PER MONTH FOR ANY SAMPLE HELD BEYOND 30 DAYS.

◯ Example maximum headspace bubble size; acceptance criteria not to exceed 5-6 mm in diameter.

For headspace bubbles exceeding 6 mm in diameter, sample receiving will tag the VOA and notify the Project Manager. The Project Manager will contact client for Analyze or Resample instructions.

Parsons 100 West Walnut Street Pasadena, CA 91124	AETL Job Number: Project Number: Attention: Project Name:	BEF0098 [none] Justin King Canoga Park High School	Site: Reported:	LAUSD Canoga 6850 CA-27 Canoga Park, CA 91303 07/17/2023 12:27

Case Narrative

The following "Sample Received" Section summarizes the samples received and associated analyses requested as specified on the enclosed chain of custody.

Results as reported by the laboratory apply only to 1) the items tested, 2) as the samples are received, and 3) the accuracy of information provided. Information supplied by the customer that may affect validity of results and may be contained in this report include Project Name/Number, Site Location, Sample Locations, Sampling Dates/Times, Sample ID, Sample Preservation, Sample Matrix, Sample Properties, Field Blanks, Field Duplicates, Field Spikes, and Site Historical Data.

Accreditation applies only to the test methods listed on each scope of accreditation held by the laboratory; certifications held by the laboratory may not apply to results supplied in this report.

Unless otherwise noted, all results of soil and solid samples are based on wet weight.

Qualifiers are noted in the report.

The samples were subcontracted to Asset Laboratories for EPA 6020-As, STLC, and TCLP. Please see attached report for results.

The contents of this report apply to the sample(s) analyzed in accordance with the chain of custody document.
No duplication of this report is allowed, except in its entirety without written approval of the laboratory.

Qualifiers and Definitions

Item	Qualifiers
J	Analyte was detected. However, the analyte concentration is an estimated value, which is between the Method Detection Limit (MDL) and the Reporting Limit (RL).

Item	Definitions
% wt	Percent Weight
%REC	Percent Recovery
°F	Degrees Fahrenheit
AETL	American Environmental Testing Laboratory, LLC
C	Carbon
CARB	California Air Resources Board
COC	Chain of Custody
Cresols	3-methylphenol/4-methylphenol coelute and cannot be chromatographically separated. Due to this coeluting isomer pair phenomenon, the laboratory uses a single cresol (4-methylphenol) as calibration standard for 3-methylphenol/4-methylphenol.
CRM	Certified Reference Material
DI	Deionized Water
DPD	Department of Planning and Development
DRO	Diesel Range Organics
Dup	Duplicate
ELAP	Environmental Laboratory Accreditation Program
EPA	Environmental Protection Agency
GC/FID	Gas Chromatography Flame Ionization Detection
GRO	Gasoline Range Organics
HC	Hydrocarbon
HEM	Hexane Extractable Material
HMU	Hazardous Material Unit
ICP/MS	Inductively Coupled Plasma Mass Spectrometry
LACSD	Los Angeles County Sanitation Districts
LCS	Laboratory Control Sample - A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes.
LCSD	Laboratory Control Sample Duplicate - A replicate of Laboratory Control Sample.
LOQ	Limit of Quantitation
MDL	Method Detection Limit - The minimum measured concentration of a substance that can be reported with 99% confidence. MDL is statistically derived number which is specific for each instrument, each method and each compound.
mg/kg	Miligrams per Kilogram
mg/L	Miligrams per Liter
ml/L/hr	Milliliter per Liter per Hour
MRO	Motor oil Range Organics

The contents of this report apply to the sample(s) analyzed in accordance with the chain of custody document.
No duplication of this report is allowed, except in its entirety without written approval of the laboratory.

Pasadena, CA 91124	Attention:	Justin King		Canoga Park, CA 91303
	Project Name:	Canoga Park High School	Reported:	07/17/2023 12:27

MS	Matrix Spike - A sample prepared, taken through all sample preparation and analytical steps of the procedure and analyzed as an independent test results.
MSD	Matrix Spike Duplicate - A replicate of Matrix Spike Sample.
N	No
ND	Analyte is not detected below Method Detection Limit.
ng/m3	Nanograms per cubic meter
NIOSH	National Institute for Occupational Safety and Health
nL/L	Nanoliters per Liter
NTU	Nephelometric Turbidity Units
Ohm-cm	Ohms per centimeter
ORO	Oil Range Organics
OSHA	Occupational Safety and Health Administration
PCB	Polychlorinated Biphenyl
ppb v	Parts per billion by volume
ppmC	Parts per million Carbon
PSU	Practical Salinity Unit
RL	Reporting Limit - The lowest concentration at which an analyte can be detected in a sample and its concentration can be reported with a specified degree of confidence, accuracy and precision. For usage at AETL, RL is equivalant to LOQ.
RPD	Relative Percent Difference
SIM	Selective Ion Monitoring
SM	Standard Method
SPLP	Synthetic Precipitation Leaching Procedure
STLC	Soluble Threshold Limit Concentration
TCLP	Toxicity Characteristic Leaching Procedure
TPH	Total Petroleum Hydrocarbons
TTLC	Total Threshold Limit Concentrations
ug/kg	Micrograms per Kilogram
ug/L	Micrograms per Liter
ug/m3	Micrograms per cubic meter
WET	Waste Extraction Test
Y	Yes
ZHE	Zero Headspace Extraction

TEL: (818) 845-8200
FAX:

Workorder No.: N057589

RE: BEF0098.02

Attention: Hailley Coleman

Enclosed are the results for sample(s) received on July 07, 2023 by ASSET Laboratories. The sample(s) are tested for the parameters as indicated in the enclosed chain of custody in accordance with the applicable laboratory certifications.

Thank you for the opportunity to service the needs of your company.

Please feel free to call me at (562) 219-7435 if I can be of further assistance to your company.

Sincerely,

Ferdinand Paul Lugtu
Laboratory Director

The cover letter is an integral part of this analytical report. This Laboratory Report cannot be reproduced in part or in its entirety without written permission from the client and ASSET Laboratories - California.

CASE NARRATIVE

SAMPLE RECEIVING/GENERAL COMMENTS:

All sample containers were received intact with proper chain of custody documentation.

Information on sample receipt conditions including discrepancies can be found in attached Sample Receipt Checklist Form.

Cooler temperature and sample preservation were verified upon receipt of samples if applicable.

Samples were analyzed within method holding time.

Analytical Comments for WET/ EPA 6010B:

Matrix Spike Duplicate (MSD) are outside recovery criteria since the analyte concentration in the sample is disproportionate to the spike level. The associated Laboratory Control Sample (LCS) recovery was acceptable.

Analytical Comments for EPA 6020:

Matrix Spike (MS) and Matrix Spike Duplicate (MSD) are outside recovery criteria possibly due to matrix interference. The associated Laboratory Control Sample (LCS) recovery was acceptable.

Please review the checklist below. Any NO signifies non-compliance. Any non-compliance will be noted and must be understood as having an impact on the quality of the data. All tests will be performed as requested regardless of any compliance issues.

If you have any questions or further instruction, please contact our Project Coordinator at (702) 307-2659.

Cooler Received/Opened On:	7/7/2023	Workorder:	N057589
Rep sample Temp (Deg C):	1.9	IR Gun ID:	2
Temp Blank:	☐ Yes ☑ No		
Carrier name:	Walk-In		
Last 4 digits of Tracking No.:	NA	Packing Material Used:	None
Cooling process:	☑ Ice ☐ Ice Pack ☐ Dry Ice ☐ Other ☐ None		

Sample Receipt Checklist

1. Shipping container/cooler in good condition?	Yes ☑	No ☐	Not Present ☐
2. Custody seals intact, signed, dated on shippping container/cooler?	Yes ☐	No ☐	Not Present ☑
3. Custody seals intact on sample bottles?	Yes ☐	No ☐	Not Present ☑
4. Chain of custody present?	Yes ☑	No ☐	
5. Sampler's name present in COC?	Yes ☐	No ☑	
6. Chain of custody signed when relinquished and received?	Yes ☑	No ☐	
7. Chain of custody agrees with sample labels?	Yes ☑	No ☐	
8. Samples in proper container/bottle?	Yes ☑	No ☐	
9. Sample containers intact?	Yes ☑	No ☐	
10. Sufficient sample volume for indicated test?	Yes ☑	No ☐	
11. All samples received within holding time?	Yes ☑	No ☐	
12. Temperature of rep sample or Temp Blank within acceptable limit?	Yes ☑	No ☐	NA ☐
13. Water - VOA vials have zero headspace?	Yes ☐	No ☐	NA ☑
14. Water - pH acceptable upon receipt? Example: pH > 12 for (CN,S); pH<2 for Metals	Yes ☐	No ☐	NA ☑
15. Did the bottle labels indicate correct preservatives used?	Yes ☐	No ☐	NA ☑
16. Were there Non-Conformance issues at login?	Yes ☑	No ☐	NA ☐
Was Client notified?	Yes ☐	No ☐	NA ☑

AETL Job Number: BEF0102

Date Received: 06/12/2023 Received by: Greta G

Carrier: ☐ AETL Courier ☑ Client ☐ GSL ☐ FedEx ☐ UPS
☐Others:

Samples were received in: ☑ Cooler (__1_____) ☐ Other (Specify)**:**

Sample Container Temperature: __5.7__ °C IR Gun S/N: 51941911MV

Type of sample containers: ☐ VOA, ☐ Glass bottles, ☑Wide mouth jars, ☐HDPE bottles, ☐ Metal sleeves, ☐ Acetate sleeves, ☐ 5035 Kit: ☐ AETL or ☐ Client, ☐ Tedlar Bags, Summa Canister: ☐ 6L, ☐ 3L, ☐ 1L, Others (Specify): _____

How are samples preserved: ☐ None, ☑ Ice, ☐ Blue Ice, ☐ Dry Ice
☑ None, ☐ HNO_3, ☐ NaOH, ☐ ZnOAc, ☐ HCl, ☐ $Na_2S_2O_3$, ☐ MeOH, ☐ $NaHSO_4$
☐ Other (Specify):

	Yes	No	N/A	Note or Comment
1. Are the COCs Correct?	✔			
2. Are Sample labels legible & indelible ink?	✔			
3. Do samples match the COC?	✔			
4. Are the required analyses clear?	✔			
5. Is there enough samples for required analysis?	✔			
6. Does cooler or samples have custody seal(s)?			✔	
7. Are sample containers in good condition?	✔			
8. Are samples preserved?	✔			
9. Are samples preserved properly for the intended analysis?	✔			
10. Are the VOAs free of headspace? See footnote.			✔	
11. Are the jars free of headspace?			✔	

* = see note below. N/A = Not Applicable

PLEASE NOTE ALL SAMPLES WILL BE DISPOSED OF 30 DAYS AFTER RECEIVING DATE. IF AETL IS INFORMED OTHERWISE, THERE WILL BE A STORAGE CHARGE PER SAMPLE PER MONTH FOR ANY SAMPLE HELD BEYOND 30 DAYS.

◯ Example maximum headspace bubble size; acceptance criteria not to exceed 5-6 mm in diameter.

For headspace bubbles exceeding 6 mm in diameter, sample receiving will tag the VOA and notify the Project Manager. The Project Manager will contact client for Analyze or Resample instructions.

Case Narrative

The following "Sample Received" Section summarizes the samples received and associated analyses requested as specified on the enclosed chain of custody.

Results as reported by the laboratory apply only to 1) the items tested, 2) as the samples are received, and 3) the accuracy of information provided. Information supplied by the customer that may affect validity of results and may be contained in this report include Project Name/Number, Site Location, Sample Locations, Sampling Dates/Times, Sample ID, Sample Preservation, Sample Matrix, Sample Properties, Field Blanks, Field Duplicates, Field Spikes, and Site Historical Data.

Accreditation applies only to the test methods listed on each scope of accreditation held by the laboratory; certifications held by the laboratory may not apply to results supplied in this report.

Unless otherwise noted, all results of soil and solid samples are based on wet weight.

Qualifiers are noted in the report.

The samples were subcontracted to Asset Laboratories for EPA 6020-As, STLC, and TCLP. Please see attached report for results.

The contents of this report apply to the sample(s) analyzed in accordance with the chain of custody document.
No duplication of this report is allowed, except in its entirety without written approval of the laboratory.

Qualifiers and Definitions

Item	Definitions
% wt	Percent Weight
%REC	Percent Recovery
°F	Degrees Fahrenheit
AETL	American Environmental Testing Laboratory, LLC
C	Carbon
CARB	California Air Resources Board
COC	Chain of Custody
Cresols	3-methylphenol/4-methylphenol coelute and cannot be chromatographically separated. Due to this coeluting isomer pair phenomenon, the laboratory uses a single cresol (4-methylphenol) as calibration standard for 3-methylphenol/4-methylphenol.
CRM	Certified Reference Material
DI	Deionized Water
DPD	Department of Planning and Development
DRO	Diesel Range Organics
Dup	Duplicate
ELAP	Environmental Laboratory Accreditation Program
EPA	Environmental Protection Agency
GC/FID	Gas Chromatography Flame Ionization Detection
GRO	Gasoline Range Organics
HC	Hydrocarbon
HEM	Hexane Extractable Material
HMU	Hazardous Material Unit
ICP/MS	Inductively Coupled Plasma Mass Spectrometry
LACSD	Los Angeles County Sanitation Districts
LCS	Laboratory Control Sample - A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes.
LCSD	Laboratory Control Sample Duplicate - A replicate of Laboratory Control Sample.
LOQ	Limit of Quantitation
MDL	Method Detection Limit - The minimum measured concentration of a substance that can be reported with 99% confidence. MDL is statistically derived number which is specific for each instrument, each method and each compound.
mg/kg	Miligrams per Kilogram
mg/L	Miligrams per Liter
ml/L/hr	Milliliter per Liter per Hour
MRO	Motor oil Range Organics
MS	Matrix Spike - A sample prepared, taken through all sample preparation and analytical steps of the procedure and analyzed as an independent test results.
MSD	Matrix Spike Duplicate - A replicate of Matrix Spike Sample.
N	No
ND	Analyte is not detected below Method Detection Limit.

The contents of this report apply to the sample(s) analyzed in accordance with the chain of custody document.
No duplication of this report is allowed, except in its entirety without written approval of the laboratory.

Parsons 100 West Walnut Street Pasadena, CA 91124	AETL Job Number: Project Number: Attention: Project Name:	BEF0098 [none] Justin King Canoga Park High School	Site: Reported:	LAUSD Canoga 6850 CA-27 Canoga Park, CA 91303 07/25/2023 16:57

ng/m3	Nanograms per cubic meter
NIOSH	National Institute for Occupational Safety and Health
nL/L	Nanoliters per Liter
NTU	Nephelometric Turbidity Units
Ohm-cm	Ohms per centimeter
ORO	Oil Range Organics
OSHA	Occupational Safety and Health Administration
PCB	Polychlorinated Biphenyl
ppb v	Parts per billion by volume
ppmC	Parts per million Carbon
PSU	Practical Salinity Unit
RL	Reporting Limit - The lowest concentration at which an analyte can be detected in a sample and its concentration can be reported with a specified degree of confidence, accuracy and precision. For usage at AETL, RL is equivalant to LOQ.
RPD	Relative Percent Difference
SIM	Selective Ion Monitoring
SM	Standard Method
SPLP	Synthetic Precipitation Leaching Procedure
STLC	Soluble Threshold Limit Concentration
TCLP	Toxicity Characteristic Leaching Procedure
TPH	Total Petroleum Hydrocarbons
TTLC	Total Threshold Limit Concentrations
ug/kg	Micrograms per Kilogram
ug/L	Micrograms per Liter
ug/m3	Micrograms per cubic meter
WET	Waste Extraction Test
Y	Yes
ZHE	Zero Headspace Extraction

RE: BEF0098.03

Attention: Hailley Coleman

Enclosed are the results for sample(s) received on July 18, 2023 by ASSET Laboratories. The sample(s) are tested for the parameters as indicated in the enclosed chain of custody in accordance with the applicable laboratory certifications.

Thank you for the opportunity to service the needs of your company.

Please feel free to call me at (562) 219-7435 if I can be of further assistance to your company.

Sincerely,

for

Ferdinand Paul Lugtu
Laboratory Director

The cover letter is an integral part of this analytical report. This Laboratory Report cannot be reproduced in part or in its entirety without written permission from the client and ASSET Laboratories - California.

CLIENT: American Environmental Testing Laborator
Project: BEF0098.03
Lab Order: N057834

CASE NARRATIVE

SAMPLE RECEIVING/GENERAL COMMENTS:

All sample containers were received intact with proper chain of custody documentation.

Information on sample receipt conditions including discrepancies can be found in attached Sample Receipt Checklist Form.

Cooler temperature and sample preservation were verified upon receipt of samples if applicable.

Samples were analyzed within method holding time.

Analytical Comments for EPA 6020:

Matrix Spike Duplicate (MSD) recovery and RPD criteria are outside criteria for Arsenic in QC samples N057833-001A-MS/MSD possibly due to matrix interference. The associated Laboratory Control Sample (LCS) recovery was acceptable.

CLIENT: American Environmental Testing Laborator
Project: BEF0098.03

Please review the checklist below. Any NO signifies non-compliance. Any non-compliance will be noted and must be understood having an impact on the quality of the data. All tests will be performed as requested regardless of any compliance issues.

If you have any questions or further instruction, please contact our Project Coordinator at (702) 307-2659.

Cooler Received/Opened On:	7/18/2023	Workorder:	N057834
Rep sample Temp (Deg C):	4.6	IR Gun ID:	1

Temp Blank: ☐ Yes ☑ No

Carrier name: Walk-In

Last 4 digits of Tracking No.: NA Packing Material Used: None

Cooling process: ☑ Ice ☐ Ice Pack ☐ Dry Ice ☐ Other ☐ None

Sample Receipt Checklist

1. Shipping container/cooler in good condition?	Yes ☑	No ☐	Not Present ☐
2. Custody seals intact, signed, dated on shippping container/cooler?	Yes ☐	No ☐	Not Present ☑
3. Custody seals intact on sample bottles?	Yes ☐	No ☐	Not Present ☑
4. Chain of custody present?	Yes ☑	No ☐	
5. Sampler's name present in COC?	Yes ☐	No ☑	
6. Chain of custody signed when relinquished and received?	Yes ☑	No ☐	
7. Chain of custody agrees with sample labels?	Yes ☑	No ☐	
8. Samples in proper container/bottle?	Yes ☑	No ☐	
9. Sample containers intact?	Yes ☑	No ☐	
10. Sufficient sample volume for indicated test?	Yes ☑	No ☐	
11. All samples received within holding time?	Yes ☑	No ☐	
12. Temperature of rep sample or Temp Blank within acceptable limit?	Yes ☑	No ☐	NA ☐
13. Water - VOA vials have zero headspace?	Yes ☐	No ☐	NA ☑
14. Water - pH acceptable upon receipt? Example: pH > 12 for (CN,S); pH<2 for Metals	Yes ☐	No ☐	NA ☑
15. Did the bottle labels indicate correct preservatives used?	Yes ☐	No ☐	NA ☑
16. Were there Non-Conformance issues at login?	Yes ☑	No ☐	NA ☐
Was Client notified?	Yes ☐	No ☐	NA ☑

COOLER RECEIPT FORM

Client Name: Parsons

Project Name: Lausd Canoga Project No.:

AETL Job Number: BEF0111

Date Received: 06/13/2023 Received by: Greta G

Carrier: ☐ AETL Courier ☑ Client ☐ GSL ☐ FedEx ☐ UPS
☐Others:

Samples were received in: ☑ Cooler (1) ☐ Other (Specify):

Sample Container Temperature: 5.8 °C IR Gun S/N: 51941911MV

Type of sample containers: ☐ VOA, ☐ Glass bottles, ☑Wide mouth jars, ☐HDPE bottles, ☐ Metal sleeves, ☐ Acetate sleeves, ☐ 5035 Kit: ☐ AETL or ☐ Client, ☐ Tedlar Bags, Summa Canister: ☐ 6L, ☐ 3L, ☐ 1L, Others (Specify): _____

How are samples preserved: ☐ None, ☑ Ice, ☐ Blue Ice, ☐ Dry Ice
☑ None, ☐ HNO_3, ☐ NaOH, ☐ ZnOAc, ☐ HCl, ☐ $Na_2S_2O_3$, ☐ MeOH, ☐ $NaHSO_4$
☐ Other (Specify):

	Yes	No	N/A	Note or Comment
1. Are the COCs Correct?	✔			
2. Are Sample labels legible & indelible ink?	✔			
3. Do samples match the COC?	✔			
4. Are the required analyses clear?	✔			
5. Is there enough samples for required analysis?	✔			
6. Does cooler or samples have custody seal(s)?			✔	
7. Are sample containers in good condition?	✔			
8. Are samples preserved?	✔			
9. Are samples preserved properly for the intended analysis?	✔			
10. Are the VOAs free of headspace? See footnote.			✔	
11. Are the jars free of headspace?			✔	

* = see note below. N/A = Not Applicable

PLEASE NOTE ALL SAMPLES WILL BE DISPOSED OF 30 DAYS AFTER RECEIVING DATE. IF AETL IS INFORMED OTHERWISE, THERE WILL BE A STORAGE CHARGE PER SAMPLE PER MONTH FOR ANY SAMPLE HELD BEYOND 30 DAYS.

◯ Example maximum headspace bubble size; acceptance criteria not to exceed 5-6 mm in diameter.

For headspace bubbles exceeding 6 mm in diameter, sample receiving will tag the VOA and notify the Project Manager. The Project Manager will contact client for Analyze or Resample instructions.

Revised and Reissued
Rev. 01

Parsons 100 West Walnut Street Pasadena, CA 91124	AETL Job Number: Project Number: Attention: Project Name:	BEF0111 [none] Justin King LASUD Canoga	Site: Reported:	Canoga Park High School 6850 CA-27 Canoga Park, CA 91303 06/23/2023 10:33

Case Narrative

The following "Sample Received" Section summarizes the samples received and associated analyses requested as specified on the enclosed chain of custody.

Results as reported by the laboratory apply only to 1) the items tested, 2) as the samples are received, and 3) the accuracy of information provided. Information supplied by the customer that may affect validity of results and may be contained in this report include Project Name/Number, Site Location, Sample Locations, Sampling Dates/Times, Sample ID, Sample Preservation, Sample Matrix, Sample Properties, Field Blanks, Field Duplicates, Field Spikes, and Site Historical Data.

Accreditation applies only to the test methods listed on each scope of accreditation held by the laboratory; certifications held by the laboratory may not apply to results supplied in this report.

Unless otherwise noted, all results of soil and solid samples are based on wet weight.

No analytical non-conformances were encountered.

Qualifiers are noted in the report.

The samples were subcontracted to Asset Laboratories for EPA 6020. Please see attached report for results.

The contents of this report apply to the sample(s) analyzed in accordance with the chain of custody document.
No duplication of this report is allowed, except in its entirety without written approval of the laboratory.

Qualifiers and Definitions

Item	Qualifiers
J	Analyte was detected. However, the analyte concentration is an estimated value, which is between the Method Detection Limit (MDL) and the Reporting Limit (RL).

Item	Definitions
% wt	Percent Weight
%REC	Percent Recovery
°F	Degrees Fahrenheit
AETL	American Environmental Testing Laboratory, LLC
C	Carbon
CARB	California Air Resources Board
COC	Chain of Custody
Cresols	3-methylphenol/4-methylphenol coelute and cannot be chromatographically separated. Due to this coeluting isomer pair phenomenon, the laboratory uses a single cresol (4-methylphenol) as calibration standard for 3-methylphenol/4-methylphenol.
CRM	Certified Reference Material
DI	Deionized Water
DPD	Department of Planning and Development
DRO	Diesel Range Organics
Dup	Duplicate
ELAP	Environmental Laboratory Accreditation Program
EPA	Environmental Protection Agency
GC/FID	Gas Chromatography Flame Ionization Detection
GRO	Gasoline Range Organics
HC	Hydrocarbon
HEM	Hexane Extractable Material
HMU	Hazardous Material Unit
ICP/MS	Inductively Coupled Plasma Mass Spectrometry
LACSD	Los Angeles County Sanitation Districts
LCS	Laboratory Control Sample - A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes.
LCSD	Laboratory Control Sample Duplicate - A replicate of Laboratory Control Sample.
LOQ	Limit of Quantitation
MDL	Method Detection Limit - The minimum measured concentration of a substance that can be reported with 99% confidence. MDL is statistically derived number which is specific for each instrument, each method and each compound.
mg/kg	Miligrams per Kilogram
mg/L	Miligrams per Liter
ml/L/hr	Milliliter per Liter per Hour
MRO	Motor oil Range Organics

The contents of this report apply to the sample(s) analyzed in accordance with the chain of custody document.
No duplication of this report is allowed, except in its entirety without written approval of the laboratory.

Pasadena, CA 91124	Attention:	Justin King		Canoga Park, CA 91303
	Project Name:	LASUD Canoga	Reported:	06/23/2023 10:33

MS	Matrix Spike - A sample prepared, taken through all sample preparation and analytical steps of the procedure and analyzed as an independent test results.
MSD	Matrix Spike Duplicate - A replicate of Matrix Spike Sample.
N	No
ND	Analyte is not detected below Method Detection Limit.
ng/m3	Nanograms per cubic meter
NIOSH	National Institute for Occupational Safety and Health
nL/L	Nanoliters per Liter
NTU	Nephelometric Turbidity Units
Ohm-cm	Ohms per centimeter
ORO	Oil Range Organics
OSHA	Occupational Safety and Health Administration
PCB	Polychlorinated Biphenyl
ppb v	Parts per billion by volume
ppmC	Parts per million Carbon
PSU	Practical Salinity Unit
RL	Reporting Limit - The lowest concentration at which an analyte can be detected in a sample and its concentration can be reported with a specified degree of confidence, accuracy and precision. For usage at AETL, RL is equivalant to LOQ.
RPD	Relative Percent Difference
SIM	Selective Ion Monitoring
SM	Standard Method
SPLP	Synthetic Precipitation Leaching Procedure
STLC	Soluble Threshold Limit Concentration
TCLP	Toxicity Characteristic Leaching Procedure
TPH	Total Petroleum Hydrocarbons
TTLC	Total Threshold Limit Concentrations
ug/kg	Micrograms per Kilogram
ug/L	Micrograms per Liter
ug/m3	Micrograms per cubic meter
WET	Waste Extraction Test
Y	Yes
ZHE	Zero Headspace Extraction

The contents of this report apply to the sample(s) analyzed in accordance with the chain of custody document.
No duplication of this report is allowed, except in its entirety without written approval of the laboratory.

TEL: (818) 845-8200
FAX:

Workorder No.: N057163

RE: BEF0111

Attention: Hailley Coleman

Enclosed are the results for sample(s) received on June 14, 2023 by ASSET Laboratories. The sample(s) are tested for the parameters as indicated in the enclosed chain of custody in accordance with the applicable laboratory certifications.

Thank you for the opportunity to service the needs of your company.

Please feel free to call me at (562) 219-7435 if I can be of further assistance to your company.

Sincerely,

for

Ferdinand Paul Lugtu
Laboratory Director

The cover letter is an integral part of this analytical report. This Laboratory Report cannot be reproduced in part or in its entirety without written permission from the client and ASSET Laboratories - California.

CASE NARRATIVE

SAMPLE RECEIVING/GENERAL COMMENTS:

All sample containers were received intact with proper chain of custody documentation.

Information on sample receipt conditions including discrepancies can be found in attached Sample Receipt Checklist Form.

Cooler temperature and sample preservation were verified upon receipt of samples if applicable.

Samples were analyzed within method holding time.

Analytical Comments for EPA 6020:

Matrix Spike (MS) and Matrix Spike Duplicate (MSD) are outside criteria in QC samples N057163-001A-MS/MSD since the analyte concentration in the sample is disproportionate to the spike level. The associated Laboratory Control Sample (LCS) recovery was acceptable.

COOLER RECEIPT FORM

Client Name: Parsons

Project Name: Lausd Canoga Project No.:

AETL Job Number: BEF0111

Date Received: 06/13/2023 Received by: Greta G

Carrier: ☐ AETL Courier ☑ Client ☐ GSL ☐ FedEx ☐ UPS
☐Others:

Samples were received in: ☑ Cooler (1) ☐ Other (Specify):

Sample Container Temperature: 5.8 °C IR Gun S/N: 51941911MV

Type of sample containers: ☐ VOA, ☐ Glass bottles, ☑Wide mouth jars, ☐HDPE bottles, ☐ Metal sleeves, ☐ Acetate sleeves, ☐ 5035 Kit: ☐ AETL or ☐ Client, ☐ Tedlar Bags, Summa Canister: ☐ 6L, ☐ 3L, ☐ 1L, Others (Specify): _____

How are samples preserved: ☐ None, ☑ Ice, ☐ Blue Ice, ☐ Dry Ice
☑ None, ☐ HNO_3, ☐ NaOH, ☐ ZnOAc, ☐ HCl, ☐ $Na_2S_2O_3$, ☐ MeOH, ☐ $NaHSO_4$
☐ Other (Specify):

	Yes	No	N/A	Note or Comment
1. Are the COCs Correct?	✔			
2. Are Sample labels legible & indelible ink?	✔			
3. Do samples match the COC?	✔			
4. Are the required analyses clear?	✔			
5. Is there enough samples for required analysis?	✔			
6. Does cooler or samples have custody seal(s)?			✔	
7. Are sample containers in good condition?	✔			
8. Are samples preserved?	✔			
9. Are samples preserved properly for the intended analysis?	✔			
10. Are the VOAs free of headspace? See footnote.			✔	
11. Are the jars free of headspace?			✔	

* = see note below. N/A = Not Applicable

PLEASE NOTE ALL SAMPLES WILL BE DISPOSED OF 30 DAYS AFTER RECEIVING DATE. IF AETL IS INFORMED OTHERWISE, THERE WILL BE A STORAGE CHARGE PER SAMPLE PER MONTH FOR ANY SAMPLE HELD BEYOND 30 DAYS.

◯ Example maximum headspace bubble size; acceptance criteria not to exceed 5-6 mm in diameter.

For headspace bubbles exceeding 6 mm in diameter, sample receiving will tag the VOA and notify the Project Manager. The Project Manager will contact client for Analyze or Resample instructions.

Parsons 100 West Walnut Street Pasadena, CA 91124	AETL Job Number: Project Number: Attention: Project Name:	BEF0111 [none] Justin King LASUD Canoga	Site: Reported:	Canoga Park High School 6850 CA-27 Canoga Park, CA 91303 07/07/2023 11:20

Case Narrative

The following "Sample Received" Section summarizes the samples received and associated analyses requested as specified on the enclosed chain of custody.

Results as reported by the laboratory apply only to 1) the items tested, 2) as the samples are received, and 3) the accuracy of information provided. Information supplied by the customer that may affect validity of results and may be contained in this report include Project Name/Number, Site Location, Sample Locations, Sampling Dates/Times, Sample ID, Sample Preservation, Sample Matrix, Sample Properties, Field Blanks, Field Duplicates, Field Spikes, and Site Historical Data.

Accreditation applies only to the test methods listed on each scope of accreditation held by the laboratory; certifications held by the laboratory may not apply to results supplied in this report.

Unless otherwise noted, all results of soil and solid samples are based on wet weight.

No analytical non-conformances were encountered.

Qualifiers are noted in the report.

The samples were subcontracted to Asset Laboratories for EPA 6020. Please see attached report for results.

The contents of this report apply to the sample(s) analyzed in accordance with the chain of custody document.
No duplication of this report is allowed, except in its entirety without written approval of the laboratory.

Qualifiers and Definitions

Item	Definitions
% wt	Percent Weight
%REC	Percent Recovery
°F	Degrees Fahrenheit
AETL	American Environmental Testing Laboratory, LLC
C	Carbon
CARB	California Air Resources Board
COC	Chain of Custody
Cresols	3-methylphenol/4-methylphenol coelute and cannot be chromatographically separated. Due to this coeluting isomer pair phenomenon, the laboratory uses a single cresol (4-methylphenol) as calibration standard for 3-methylphenol/4-methylphenol.
CRM	Certified Reference Material
DI	Deionized Water
DPD	Department of Planning and Development
DRO	Diesel Range Organics
Dup	Duplicate
ELAP	Environmental Laboratory Accreditation Program
EPA	Environmental Protection Agency
GC/FID	Gas Chromatography Flame Ionization Detection
GRO	Gasoline Range Organics
HC	Hydrocarbon
HEM	Hexane Extractable Material
HMU	Hazardous Material Unit
ICP/MS	Inductively Coupled Plasma Mass Spectrometry
LACSD	Los Angeles County Sanitation Districts
LCS	Laboratory Control Sample - A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes.
LCSD	Laboratory Control Sample Duplicate - A replicate of Laboratory Control Sample.
LOQ	Limit of Quantitation
MDL	Method Detection Limit - The minimum measured concentration of a substance that can be reported with 99% confidence. MDL is statistically derived number which is specific for each instrument, each method and each compound.
mg/kg	Miligrams per Kilogram
mg/L	Miligrams per Liter
ml/L/hr	Milliliter per Liter per Hour
MRO	Motor oil Range Organics
MS	Matrix Spike - A sample prepared, taken through all sample preparation and analytical steps of the procedure and analyzed as an independent test results.
MSD	Matrix Spike Duplicate - A replicate of Matrix Spike Sample.
N	No
ND	Analyte is not detected below Method Detection Limit.

The contents of this report apply to the sample(s) analyzed in accordance with the chain of custody document.
No duplication of this report is allowed, except in its entirety without written approval of the laboratory.

ng/m3	Nanograms per cubic meter
NIOSH	National Institute for Occupational Safety and Health
nL/L	Nanoliters per Liter
NTU	Nephelometric Turbidity Units
Ohm-cm	Ohms per centimeter
ORO	Oil Range Organics
OSHA	Occupational Safety and Health Administration
PCB	Polychlorinated Biphenyl
ppb v	Parts per billion by volume
ppmC	Parts per million Carbon
PSU	Practical Salinity Unit
RL	Reporting Limit - The lowest concentration at which an analyte can be detected in a sample and its concentration can be reported with a specified degree of confidence, accuracy and precision. For usage at AETL, RL is equivalant to LOQ.
RPD	Relative Percent Difference
SIM	Selective Ion Monitoring
SM	Standard Method
SPLP	Synthetic Precipitation Leaching Procedure
STLC	Soluble Threshold Limit Concentration
TCLP	Toxicity Characteristic Leaching Procedure
TPH	Total Petroleum Hydrocarbons
TTLC	Total Threshold Limit Concentrations
ug/kg	Micrograms per Kilogram
ug/L	Micrograms per Liter
ug/m3	Micrograms per cubic meter
WET	Waste Extraction Test
Y	Yes
ZHE	Zero Headspace Extraction

Attention: Hailley Coleman

Enclosed are the results for sample(s) received on June 28, 2023 by ASSET Laboratories. The sample(s) are tested for the parameters as indicated in the enclosed chain of custody in accordance with the applicable laboratory certifications.

Thank you for the opportunity to service the needs of your company.

Please feel free to call me at (562) 219-7435 if I can be of further assistance to your company.

Sincerely,

for

Ferdinand Paul Lugtu
Laboratory Director

The cover letter is an integral part of this analytical report. This Laboratory Report cannot be reproduced in part or in its entirety without written permission from the client and ASSET Laboratories - California.

SAMPLE RECEIVING/GENERAL COMMENTS:

All sample containers were received intact with proper chain of custody documentation.

Information on sample receipt conditions including discrepancies can be found in attached Sample Receipt Checklist Form.

Cooler temperature and sample preservation were verified upon receipt of samples if applicable.

Samples were analyzed within method holding time.

Analytical Comments for EPA 6010B_STLC:

Dilution was necessary due to matrix.

Matrix Spike (MS) is outside recovery criteria possibly due to matrix interference. The associated Laboratory Control Sample (LCS) recovery was acceptable.

Analytical Comments for EPA 6020:

Matrix Spike (MS) and Matrix Spike Duplicate (MSD) are outside recovery and RPD criteria possibly due to matrix interference. The associated Laboratory Control Sample (LCS) recovery was acceptable.

Please review the checklist below. Any NO signifies non-compliance. Any non-compliance will be noted and must be understood as having an impact on the quality of the data. All tests will be performed as requested regardless of any compliance issues.

If you have any questions or further instruction, please contact our Project Coordinator at (702) 307-2659.

Cooler Received/Opened On:	6/28/2023	Workorder:	N057444
Rep sample Temp (Deg C):	4.4	IR Gun ID:	1
Temp Blank:	☐ Yes ☑ No		
Carrier name:	Walk-In		
Last 4 digits of Tracking No.:	NA	Packing Material Used:	None
Cooling process:	☑ Ice ☐ Ice Pack ☐ Dry Ice ☐ Other ☐ None		

Sample Receipt Checklist

1. Shipping container/cooler in good condition?	Yes ☑	No ☐	Not Present ☐
2. Custody seals intact, signed, dated on shippping container/cooler?	Yes ☐	No ☐	Not Present ☑
3. Custody seals intact on sample bottles?	Yes ☐	No ☐	Not Present ☑
4. Chain of custody present?	Yes ☑	No ☐	
5. Sampler's name present in COC?	Yes ☐	No ☑	
6. Chain of custody signed when relinquished and received?	Yes ☑	No ☐	
7. Chain of custody agrees with sample labels?	Yes ☑	No ☐	
8. Samples in proper container/bottle?	Yes ☑	No ☐	
9. Sample containers intact?	Yes ☑	No ☐	
10. Sufficient sample volume for indicated test?	Yes ☑	No ☐	
11. All samples received within holding time?	Yes ☑	No ☐	
12. Temperature of rep sample or Temp Blank within acceptable limit?	Yes ☑	No ☐	NA ☐
13. Water - VOA vials have zero headspace?	Yes ☐	No ☐	NA ☑
14. Water - pH acceptable upon receipt? Example: pH > 12 for (CN,S); pH<2 for Metals	Yes ☐	No ☐	NA ☑

RE: BEF0111.01

Attention: Hailley Coleman

Enclosed are the results for sample(s) received on June 26, 2023 by ASSET Laboratories. The sample(s) are tested for the parameters as indicated in the enclosed chain of custody in accordance with the applicable laboratory certifications.

Thank you for the opportunity to service the needs of your company.

Please feel free to call me at (562) 219-7435 if I can be of further assistance to your company.

Sincerely,

for

Ferdinand Paul Lugtu
Laboratory Director

The cover letter is an integral part of this analytical report. This Laboratory Report cannot be reproduced in part or in its entirety without written permission from the client and ASSET Laboratories - California.

CASE NARRATIVE

SAMPLE RECEIVING/GENERAL COMMENTS:

All sample containers were received intact with proper chain of custody documentation.

Information on sample receipt conditions including discrepancies can be found in attached Sample Receipt Checklist Form.

Cooler temperature and sample preservation were verified upon receipt of samples if applicable.

Samples were analyzed within method holding time.

COOLER RECEIPT FORM

Client Name: Parsons

Project Name: Lausd Canoga Project No.:

AETL Job Number: BEF0111

Date Received: 06/13/2023 Received by: Greta G

Carrier: ☐ AETL Courier ☑ Client ☐ GSL ☐ FedEx ☐ UPS
☐Others:

Samples were received in: ☑ Cooler (1) ☐ Other (Specify):

Sample Container Temperature: 5.8 °C IR Gun S/N: 51941911MV

Type of sample containers: ☐ VOA, ☐ Glass bottles, ☑Wide mouth jars, ☐HDPE bottles, ☐ Metal sleeves, ☐ Acetate sleeves, ☐ 5035 Kit: ☐ AETL or ☐ Client, ☐ Tedlar Bags, Summa Canister: ☐ 6L, ☐ 3L, ☐ 1L, Others (Specify): _____

How are samples preserved: ☐ None, ☑ Ice, ☐ Blue Ice, ☐ Dry Ice
☑ None, ☐ HNO_3, ☐ NaOH, ☐ ZnOAc, ☐ HCl, ☐ $Na_2S_2O_3$, ☐ MeOH, ☐ $NaHSO_4$
☐ Other (Specify):

	Yes	No	N/A	Note or Comment
1. Are the COCs Correct?	✔			
2. Are Sample labels legible & indelible ink?	✔			
3. Do samples match the COC?	✔			
4. Are the required analyses clear?	✔			
5. Is there enough samples for required analysis?	✔			
6. Does cooler or samples have custody seal(s)?			✔	
7. Are sample containers in good condition?	✔			
8. Are samples preserved?	✔			
9. Are samples preserved properly for the intended analysis?	✔			
10. Are the VOAs free of headspace? See footnote.			✔	
11. Are the jars free of headspace?			✔	

* = see note below. N/A = Not Applicable

PLEASE NOTE ALL SAMPLES WILL BE DISPOSED OF 30 DAYS AFTER RECEIVING DATE. IF AETL IS INFORMED OTHERWISE, THERE WILL BE A STORAGE CHARGE PER SAMPLE PER MONTH FOR ANY SAMPLE HELD BEYOND 30 DAYS.

◯ Example maximum headspace bubble size; acceptance criteria not to exceed 5-6 mm in diameter.

For headspace bubbles exceeding 6 mm in diameter, sample receiving will tag the VOA and notify the Project Manager. The Project Manager will contact client for Analyze or Resample instructions.

Parsons 100 West Walnut Street Pasadena, CA 91124	AETL Job Number: Project Number: Attention: Project Name:	BEF0111 [none] Justin King LASUD Canoga	Site: Reported:	Canoga Park High School 6850 CA-27 Canoga Park, CA 91303 07/17/2023 18:30

Case Narrative

The following "Sample Received" Section summarizes the samples received and associated analyses requested as specified on the enclosed chain of custody.

Results as reported by the laboratory apply only to 1) the items tested, 2) as the samples are received, and 3) the accuracy of information provided. Information supplied by the customer that may affect validity of results and may be contained in this report include Project Name/Number, Site Location, Sample Locations, Sampling Dates/Times, Sample ID, Sample Preservation, Sample Matrix, Sample Properties, Field Blanks, Field Duplicates, Field Spikes, and Site Historical Data.

Accreditation applies only to the test methods listed on each scope of accreditation held by the laboratory; certifications held by the laboratory may not apply to results supplied in this report.

Unless otherwise noted, all results of soil and solid samples are based on wet weight.

No analytical non-conformances were encountered.

Qualifiers are noted in the report.

The samples were subcontracted to Asset Laboratories for EPA 6020, STLC, and TCLP. Please see attached report for results.

The contents of this report apply to the sample(s) analyzed in accordance with the chain of custody document.
No duplication of this report is allowed, except in its entirety without written approval of the laboratory.

Qualifiers and Definitions

Item	Definitions
% wt	Percent Weight
%REC	Percent Recovery
°F	Degrees Fahrenheit
AETL	American Environmental Testing Laboratory, LLC
C	Carbon
CARB	California Air Resources Board
COC	Chain of Custody
Cresols	3-methylphenol/4-methylphenol coelute and cannot be chromatographically separated. Due to this coeluting isomer pair phenomenon, the laboratory uses a single cresol (4-methylphenol) as calibration standard for 3-methylphenol/4-methylphenol.
CRM	Certified Reference Material
DI	Deionized Water
DPD	Department of Planning and Development
DRO	Diesel Range Organics
Dup	Duplicate
ELAP	Environmental Laboratory Accreditation Program
EPA	Environmental Protection Agency
GC/FID	Gas Chromatography Flame Ionization Detection
GRO	Gasoline Range Organics
HC	Hydrocarbon
HEM	Hexane Extractable Material
HMU	Hazardous Material Unit
ICP/MS	Inductively Coupled Plasma Mass Spectrometry
LACSD	Los Angeles County Sanitation Districts
LCS	Laboratory Control Sample - A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes.
LCSD	Laboratory Control Sample Duplicate - A replicate of Laboratory Control Sample.
LOQ	Limit of Quantitation
MDL	Method Detection Limit - The minimum measured concentration of a substance that can be reported with 99% confidence. MDL is statistically derived number which is specific for each instrument, each method and each compound.
mg/kg	Miligrams per Kilogram
mg/L	Miligrams per Liter
ml/L/hr	Milliliter per Liter per Hour
MRO	Motor oil Range Organics
MS	Matrix Spike - A sample prepared, taken through all sample preparation and analytical steps of the procedure and analyzed as an independent test results.
MSD	Matrix Spike Duplicate - A replicate of Matrix Spike Sample.
N	No
ND	Analyte is not detected below Method Detection Limit.

The contents of this report apply to the sample(s) analyzed in accordance with the chain of custody document.
No duplication of this report is allowed, except in its entirety without written approval of the laboratory.

Parsons	AETL Job Number:	BEF0111	Site:	Canoga Park High School

	Project Name:	LASUD Canoga	Reported:	07/17/2023 18:30	

ng/m3	Nanograms per cubic meter
NIOSH	National Institute for Occupational Safety and Health
nL/L	Nanoliters per Liter
NTU	Nephelometric Turbidity Units
Ohm-cm	Ohms per centimeter
ORO	Oil Range Organics
OSHA	Occupational Safety and Health Administration
PCB	Polychlorinated Biphenyl
ppb v	Parts per billion by volume
ppmC	Parts per million Carbon
PSU	Practical Salinity Unit
RL	Reporting Limit - The lowest concentration at which an analyte can be detected in a sample and its concentration can be reported with a specified degree of confidence, accuracy and precision. For usage at AETL, RL is equivalant to LOQ.
RPD	Relative Percent Difference
SIM	Selective Ion Monitoring
SM	Standard Method
SPLP	Synthetic Precipitation Leaching Procedure
STLC	Soluble Threshold Limit Concentration
TCLP	Toxicity Characteristic Leaching Procedure
TPH	Total Petroleum Hydrocarbons
TTLC	Total Threshold Limit Concentrations
ug/kg	Micrograms per Kilogram
ug/L	Micrograms per Liter
ug/m3	Micrograms per cubic meter
WET	Waste Extraction Test
Y	Yes
ZHE	Zero Headspace Extraction

RE: BEF0111.02

Attention: Hailley Coleman

Enclosed are the results for sample(s) received on July 10, 2023 by ASSET Laboratories. The sample(s) are tested for the parameters as indicated in the enclosed chain of custody in accordance with the applicable laboratory certifications.

Thank you for the opportunity to service the needs of your company.

Please feel free to call me at (562) 219-7435 if I can be of further assistance to your company.

Sincerely,

for

Ferdinand Paul Lugtu
Laboratory Director

The cover letter is an integral part of this analytical report. This Laboratory Report cannot be reproduced in part or in its entirety without written permission from the client and ASSET Laboratories - California.

CASE NARRATIVE

SAMPLE RECEIVING/GENERAL COMMENTS:

All sample containers were received intact with proper chain of custody documentation.

Information on sample receipt conditions including discrepancies can be found in attached Sample Receipt Checklist Form.

Cooler temperature and sample preservation were verified upon receipt of samples if applicable.

Samples were analyzed within method holding time.

Please review the checklist below. Any NO signifies non-compliance. Any non-compliance will be noted and must be understood as having an impact on the quality of the data. All tests will be performed as requested regardless of any compliance issues.

If you have any questions or further instruction, please contact our Project Coordinator at (702) 307-2659.

Cooler Received/Opened On:	7/10/2023	Workorder:	N057611
Rep sample Temp (Deg C):	3.2	IR Gun ID:	1
Temp Blank:	☐ Yes ☑ No		
Carrier name:	Walk-In		
Last 4 digits of Tracking No.:	NA	Packing Material Used:	None
Cooling process:	☑ Ice ☐ Ice Pack ☐ Dry Ice ☐ Other ☐ None		

Sample Receipt Checklist

1. Shipping container/cooler in good condition?	Yes ☑	No ☐	Not Present ☐
2. Custody seals intact, signed, dated on shippping container/cooler?	Yes ☐	No ☐	Not Present ☑
3. Custody seals intact on sample bottles?	Yes ☐	No ☐	Not Present ☑
4. Chain of custody present?	Yes ☑	No ☐	
5. Sampler's name present in COC?	Yes ☐	No ☑	
6. Chain of custody signed when relinquished and received?	Yes ☑	No ☐	
7. Chain of custody agrees with sample labels?	Yes ☑	No ☐	
8. Samples in proper container/bottle?	Yes ☑	No ☐	
9. Sample containers intact?	Yes ☑	No ☐	
10. Sufficient sample volume for indicated test?	Yes ☑	No ☐	
11. All samples received within holding time?	Yes ☑	No ☐	
12. Temperature of rep sample or Temp Blank within acceptable limit?	Yes ☑	No ☐	NA ☐
13. Water - VOA vials have zero headspace?	Yes ☐	No ☐	NA ☑
14. Water - pH acceptable upon receipt? Example: pH > 12 for (CN,S); pH<2 for Metals	Yes ☐	No ☐	NA ☑
15. Did the bottle labels indicate correct preservatives used?	Yes ☐	No ☐	NA ☑
16. Were there Non-Conformance issues at login?	Yes ☑	No ☐	NA ☐
Was Client notified?	Yes ☐	No ☐	NA ☑

ADVANCED TECHNOLOGY LABORATORIES 3151 W POST RD LAS VEGAS, NV 89118 US +1 (702) 307-2659	74299 - 1

It is agreed that the goods described herein are accepted in apparent good order and condition (except as noted) for carriage **subject to Southwest Airlines' Contract of Carriage which is www.swacargo.com and any location where air waybills are available. Shipper's attention is drawn to the terms of the contract which includes, among other things; (1) Limits on Carriers' liability for loss, damage, or delay of goods, including fragile or perishable goods; (2) Claim restrictions, including time within which shippers or consignees must file a claim or bring an action against the carrier for its acts or omissions or those of its agents; (3) Right of the carrier to change the terms of the contract; (4) Rules about refusal to carry; and (5) Rights of the carrier and limitations, concerning delay or failure to perform service, including schedule changes, rerouting, substitution of an alternate carrier or aircraft, or means of carriage including road unless specific contrary instructions are given hereon by shipper, and shipper agrees the shipment may be carried via intermediate stopping places the carrier deems appropriate.** Shipper may increase liability limits by declaring a higher value for carriage and paying a supplemental charge if required.

COOLER RECEIPT FORM

Client Name: Parsons

Project Name: Lausd Canoga Project No.:

AETL Job Number: BEF0111

Date Received: 06/13/2023 Received by: Greta G

Carrier: ☐ AETL Courier ☑ Client ☐ GSL ☐ FedEx ☐ UPS
☐Others:

Samples were received in: ☑ Cooler (1) ☐ Other (Specify):

Sample Container Temperature: 5.8 °C IR Gun S/N: 51941911MV

Type of sample containers: ☐ VOA, ☐ Glass bottles, ☑Wide mouth jars, ☐HDPE bottles, ☐ Metal sleeves, ☐ Acetate sleeves, ☐ 5035 Kit: ☐ AETL or ☐ Client, ☐ Tedlar Bags, Summa Canister: ☐ 6L, ☐ 3L, ☐ 1L, Others (Specify): _____

How are samples preserved: ☐ None, ☑ Ice, ☐ Blue Ice, ☐ Dry Ice
☑ None, ☐ HNO_3, ☐ NaOH, ☐ ZnOAc, ☐ HCl, ☐ $Na_2S_2O_3$, ☐ MeOH, ☐ $NaHSO_4$
☐ Other (Specify):

	Yes	No	N/A	Note or Comment
1. Are the COCs Correct?	✔			
2. Are Sample labels legible & indelible ink?	✔			
3. Do samples match the COC?	✔			
4. Are the required analyses clear?	✔			
5. Is there enough samples for required analysis?	✔			
6. Does cooler or samples have custody seal(s)?			✔	
7. Are sample containers in good condition?	✔			
8. Are samples preserved?	✔			
9. Are samples preserved properly for the intended analysis?	✔			
10. Are the VOAs free of headspace? See footnote.			✔	
11. Are the jars free of headspace?			✔	

* = see note below. N/A = Not Applicable

PLEASE NOTE ALL SAMPLES WILL BE DISPOSED OF 30 DAYS AFTER RECEIVING DATE. IF AETL IS INFORMED OTHERWISE, THERE WILL BE A STORAGE CHARGE PER SAMPLE PER MONTH FOR ANY SAMPLE HELD BEYOND 30 DAYS.

◯ Example maximum headspace bubble size; acceptance criteria not to exceed 5-6 mm in diameter.

For headspace bubbles exceeding 6 mm in diameter, sample receiving will tag the VOA and notify the Project Manager. The Project Manager will contact client for Analyze or Resample instructions.

Case Narrative

The following "Sample Received" Section summarizes the samples received and associated analyses requested as specified on the enclosed chain of custody.

Results as reported by the laboratory apply only to 1) the items tested, 2) as the samples are received, and 3) the accuracy of information provided. Information supplied by the customer that may affect validity of results and may be contained in this report include Project Name/Number, Site Location, Sample Locations, Sampling Dates/Times, Sample ID, Sample Preservation, Sample Matrix, Sample Properties, Field Blanks, Field Duplicates, Field Spikes, and Site Historical Data.

Accreditation applies only to the test methods listed on each scope of accreditation held by the laboratory; certifications held by the laboratory may not apply to results supplied in this report.

Unless otherwise noted, all results of soil and solid samples are based on wet weight.

No analytical non-conformances were encountered.

Qualifiers are noted in the report.

The samples were subcontracted to Asset Laboratories for EPA 6020, STLC, and TCLP. Please see attached report for results.

The contents of this report apply to the sample(s) analyzed in accordance with the chain of custody document.
No duplication of this report is allowed, except in its entirety without written approval of the laboratory.

Qualifiers and Definitions

Item	Definitions
% wt	Percent Weight
%REC	Percent Recovery
°F	Degrees Fahrenheit
AETL	American Environmental Testing Laboratory, LLC
C	Carbon
CARB	California Air Resources Board
COC	Chain of Custody
Cresols	3-methylphenol/4-methylphenol coelute and cannot be chromatographically separated. Due to this coeluting isomer pair phenomenon, the laboratory uses a single cresol (4-methylphenol) as calibration standard for 3-methylphenol/4-methylphenol.
CRM	Certified Reference Material
DI	Deionized Water
DPD	Department of Planning and Development
DRO	Diesel Range Organics
Dup	Duplicate
ELAP	Environmental Laboratory Accreditation Program
EPA	Environmental Protection Agency
GC/FID	Gas Chromatography Flame Ionization Detection
GRO	Gasoline Range Organics
HC	Hydrocarbon
HEM	Hexane Extractable Material
HMU	Hazardous Material Unit
ICP/MS	Inductively Coupled Plasma Mass Spectrometry
LACSD	Los Angeles County Sanitation Districts
LCS	Laboratory Control Sample - A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes.
LCSD	Laboratory Control Sample Duplicate - A replicate of Laboratory Control Sample.
LOQ	Limit of Quantitation
MDL	Method Detection Limit - The minimum measured concentration of a substance that can be reported with 99% confidence. MDL is statistically derived number which is specific for each instrument, each method and each compound.
mg/kg	Miligrams per Kilogram
mg/L	Miligrams per Liter
ml/L/hr	Milliliter per Liter per Hour
MRO	Motor oil Range Organics
MS	Matrix Spike - A sample prepared, taken through all sample preparation and analytical steps of the procedure and analyzed as an independent test results.
MSD	Matrix Spike Duplicate - A replicate of Matrix Spike Sample.
N	No
ND	Analyte is not detected below Method Detection Limit.

The contents of this report apply to the sample(s) analyzed in accordance with the chain of custody document.
No duplication of this report is allowed, except in its entirety without written approval of the laboratory.

RE: BEF0111.03

Attention: Hailley Coleman

Enclosed are the results for sample(s) received on July 18, 2023 by ASSET Laboratories. The sample(s) are tested for the parameters as indicated in the enclosed chain of custody in accordance with the applicable laboratory certifications.

Thank you for the opportunity to service the needs of your company.

Please feel free to call me at (562) 219-7435 if I can be of further assistance to your company.

Sincerely,

for

Ferdinand Paul Lugtu
Laboratory Director

The cover letter is an integral part of this analytical report. This Laboratory Report cannot be reproduced in part or in its entirety without written permission from the client and ASSET Laboratories - California.

CASE NARRATIVE

SAMPLE RECEIVING/GENERAL COMMENTS:

All sample containers were received intact with proper chain of custody documentation.

Information on sample receipt conditions including discrepancies can be found in attached Sample Receipt Checklist Form.

Cooler temperature and sample preservation were verified upon receipt of samples if applicable.

Samples were analyzed within method holding time.

Analytical Comments for EPA 6020:

Matrix Spike Duplicate (MSD) recovery and RPD criteria are outside criteria for Arsenic in QC samples N057833-001A-MS/MSD possibly due to matrix interference. The associated Laboratory Control Sample (LCS) recovery was acceptable.

COOLER RECEIPT FORM

Client Name: Parsons

Project Name: LAUSD Canoga Project No.:

AETL Job Number: BEF0119

Date Received: 06/14/2023 Received by: Greta G

Carrier: ☐ AETL Courier ☑ Client ☐ GSL ☐ FedEx ☐ UPS
☐Others:

Samples were received in: ☑ Cooler (1) ☐ Other (Specify):

Sample Container Temperature: 5.8 °C IR Gun S/N: 51941911MV

Type of sample containers: ☐ VOA, ☐ Glass bottles, ☑Wide mouth jars, ☐HDPE bottles, ☐ Metal sleeves, ☐ Acetate sleeves, ☐ 5035 Kit: ☐ AETL or ☐ Client, ☐ Tedlar Bags, Summa Canister: ☐ 6L, ☐ 3L, ☐ 1L, Others (Specify): _____

How are samples preserved: ☐ None, ☑ Ice, ☐ Blue Ice, ☐ Dry Ice
☑ None, ☐ HNO_3, ☐ NaOH, ☐ ZnOAc, ☐ HCl, ☐ $Na_2S_2O_3$, ☐ MeOH, ☐ $NaHSO_4$
☐ Other (Specify):

	Yes	No	N/A	Note or Comment
1. Are the COCs Correct?	✔			
2. Are Sample labels legible & indelible ink?	✔			
3. Do samples match the COC?	✔			
4. Are the required analyses clear?	✔			
5. Is there enough samples for required analysis?	✔			
6. Does cooler or samples have custody seal(s)?			✔	
7. Are sample containers in good condition?	✔			
8. Are samples preserved?	✔			
9. Are samples preserved properly for the intended analysis?	✔			
10. Are the VOAs free of headspace? See footnote.			✔	
11. Are the jars free of headspace?			✔	

* = see note below. N/A = Not Applicable

PLEASE NOTE ALL SAMPLES WILL BE DISPOSED OF 30 DAYS AFTER RECEIVING DATE. IF AETL IS INFORMED OTHERWISE, THERE WILL BE A STORAGE CHARGE PER SAMPLE PER MONTH FOR ANY SAMPLE HELD BEYOND 30 DAYS.

◯ Example maximum headspace bubble size; acceptance criteria not to exceed 5-6 mm in diameter.

For headspace bubbles exceeding 6 mm in diameter, sample receiving will tag the VOA and notify the Project Manager. The Project Manager will contact client for Analyze or Resample instructions.

Parsons 100 West Walnut Street Pasadena, CA 91124	AETL Job Number: Project Number: Attention: Project Name:	BEF0119 [none] Justin King LAUSD Canoga	Site: Reported:	Canoga Park High School 6850 CA-27 Canoga Park, CA 91303 06/22/2023 15:47

Case Narrative

The following "Sample Received" Section summarizes the samples received and associated analyses requested as specified on the enclosed chain of custody.

Results as reported by the laboratory apply only to 1) the items tested, 2) as the samples are received, and 3) the accuracy of information provided. Information supplied by the customer that may affect validity of results and may be contained in this report include Project Name/Number, Site Location, Sample Locations, Sampling Dates/Times, Sample ID, Sample Preservation, Sample Matrix, Sample Properties, Field Blanks, Field Duplicates, Field Spikes, and Site Historical Data.

Accreditation applies only to the test methods listed on each scope of accreditation held by the laboratory; certifications held by the laboratory may not apply to results supplied in this report.

Unless otherwise noted, all results of soil and solid samples are based on wet weight.

No analytical non-conformances were encountered.

Qualifiers are noted in the report.

The sample was subcontracted to Asset Laboratories for EPA 6020. Please see attached report for results.

The contents of this report apply to the sample(s) analyzed in accordance with the chain of custody document.
No duplication of this report is allowed, except in its entirety without written approval of the laboratory.

CARB	California Air Resources Board
COC	Chain of Custody
Cresols	3-methylphenol/4-methylphenol coelute and cannot be chromatographically separated. Due to this coeluting isomer pair phenomenon, the laboratory uses a single cresol (4-methylphenol) as calibration standard for 3-methylphenol/4-methylphenol.
CRM	Certified Reference Material
DI	Deionized Water
DPD	Department of Planning and Development
DRO	Diesel Range Organics
Dup	Duplicate
ELAP	Environmental Laboratory Accreditation Program
EPA	Environmental Protection Agency
GC/FID	Gas Chromatography Flame Ionization Detection
GRO	Gasoline Range Organics
HC	Hydrocarbon
HEM	Hexane Extractable Material
HMU	Hazardous Material Unit
ICP/MS	Inductively Coupled Plasma Mass Spectrometry
LACSD	Los Angeles County Sanitation Districts
LCS	Laboratory Control Sample - A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes.
LCSD	Laboratory Control Sample Duplicate - A replicate of Laboratory Control Sample.
LOQ	Limit of Quantitation
MDL	Method Detection Limit - The minimum measured concentration of a substance that can be reported with 99% confidence. MDL is statistically derived number which is specific for each instrument, each method and each compound.
mg/kg	Miligrams per Kilogram
mg/L	Miligrams per Liter
ml/L/hr	Milliliter per Liter per Hour
MRO	Motor oil Range Organics
MS	Matrix Spike - A sample prepared, taken through all sample preparation and analytical steps of the procedure and analyzed as an independent test results.
MSD	Matrix Spike Duplicate - A replicate of Matrix Spike Sample.
N	No
ND	Analyte is not detected below Method Detection Limit.

The contents of this report apply to the sample(s) analyzed in accordance with the chain of custody document.
No duplication of this report is allowed, except in its entirety without written approval of the laboratory.

Burbank, CA 91504

TEL: (818) 845-8200
FAX:

Workorder No.: N057199

RE: BEF0119

Attention: Hailley Coleman

Enclosed are the results for sample(s) received on June 15, 2023 by ASSET Laboratories. The sample(s) are tested for the parameters as indicated in the enclosed chain of custody in accordance with the applicable laboratory certifications.

Thank you for the opportunity to service the needs of your company.

Please feel free to call me at (562) 219-7435 if I can be of further assistance to your company.

Sincerely,

for

Ferdinand Paul Lugtu
Laboratory Director

The cover letter is an integral part of this analytical report. This Laboratory Report cannot be reproduced in part or in its entirety without written permission from the client and ASSET Laboratories - California.

SAMPLE RECEIVING/GENERAL COMMENTS:

All sample containers were received intact with proper chain of custody documentation.

Information on sample receipt conditions including discrepancies can be found in attached Sample Receipt Checklist Form.

Cooler temperature and sample preservation were verified upon receipt of samples if applicable.

Samples were analyzed within method holding time.

COOLER RECEIPT FORM

Client Name: Parsons

Project Name: LAUSD Canoga Project No.:

AETL Job Number: BEF0119

Date Received: 06/14/2023 Received by: Greta G

Carrier: ☐ AETL Courier ☑ Client ☐ GSL ☐ FedEx ☐ UPS
☐Others:

Samples were received in: ☑ Cooler (1) ☐ Other (Specify):

Sample Container Temperature: 5.8 °C IR Gun S/N: 51941911MV

Type of sample containers: ☐ VOA, ☐ Glass bottles, ☑Wide mouth jars, ☐HDPE bottles, ☐ Metal sleeves, ☐ Acetate sleeves, ☐ 5035 Kit: ☐ AETL or ☐ Client, ☐ Tedlar Bags, Summa Canister: ☐ 6L, ☐ 3L, ☐ 1L, Others (Specify): _____

How are samples preserved: ☐ None, ☑ Ice, ☐ Blue Ice, ☐ Dry Ice
☑ None, ☐ HNO_3, ☐ NaOH, ☐ ZnOAc, ☐ HCl, ☐ $Na_2S_2O_3$, ☐ MeOH, ☐ $NaHSO_4$
☐ Other (Specify):

	Yes	No	N/A	Note or Comment
1. Are the COCs Correct?	✔			
2. Are Sample labels legible & indelible ink?	✔			
3. Do samples match the COC?	✔			
4. Are the required analyses clear?	✔			
5. Is there enough samples for required analysis?	✔			
6. Does cooler or samples have custody seal(s)?			✔	
7. Are sample containers in good condition?	✔			
8. Are samples preserved?	✔			
9. Are samples preserved properly for the intended analysis?	✔			
10. Are the VOAs free of headspace? See footnote.			✔	
11. Are the jars free of headspace?			✔	

* = see note below. N/A = Not Applicable

PLEASE NOTE ALL SAMPLES WILL BE DISPOSED OF 30 DAYS AFTER RECEIVING DATE. IF AETL IS INFORMED OTHERWISE, THERE WILL BE A STORAGE CHARGE PER SAMPLE PER MONTH FOR ANY SAMPLE HELD BEYOND 30 DAYS.

◯ Example maximum headspace bubble size; acceptance criteria not to exceed 5-6 mm in diameter.

For headspace bubbles exceeding 6 mm in diameter, sample receiving will tag the VOA and notify the Project Manager. The Project Manager will contact client for Analyze or Resample instructions.

Parsons 100 West Walnut Street Pasadena, CA 91124	AETL Job Number: Project Number: Attention: Project Name:	BEF0119 [none] Justin King LAUSD Canoga	Site: Reported:	Canoga Park High School 6850 CA-27 Canoga Park, CA 91303 07/07/2023 11:36

Case Narrative

The following "Sample Received" Section summarizes the samples received and associated analyses requested as specified on the enclosed chain of custody.

Results as reported by the laboratory apply only to 1) the items tested, 2) as the samples are received, and 3) the accuracy of information provided. Information supplied by the customer that may affect validity of results and may be contained in this report include Project Name/Number, Site Location, Sample Locations, Sampling Dates/Times, Sample ID, Sample Preservation, Sample Matrix, Sample Properties, Field Blanks, Field Duplicates, Field Spikes, and Site Historical Data.

Accreditation applies only to the test methods listed on each scope of accreditation held by the laboratory; certifications held by the laboratory may not apply to results supplied in this report.

Unless otherwise noted, all results of soil and solid samples are based on wet weight.

No analytical non-conformances were encountered.

Qualifiers are noted in the report.

The sample was subcontracted to Asset Laboratories for EPA 6020, STLC, and TCLP. Please see attached report for results.

The contents of this report apply to the sample(s) analyzed in accordance with the chain of custody document.
No duplication of this report is allowed, except in its entirety without written approval of the laboratory.

Qualifiers and Definitions

Item	Definitions
% wt	Percent Weight
%REC	Percent Recovery
°F	Degrees Fahrenheit
AETL	American Environmental Testing Laboratory, LLC
C	Carbon
CARB	California Air Resources Board
COC	Chain of Custody
Cresols	3-methylphenol/4-methylphenol coelute and cannot be chromatographically separated. Due to this coeluting isomer pair phenomenon, the laboratory uses a single cresol (4-methylphenol) as calibration standard for 3-methylphenol/4-methylphenol.
CRM	Certified Reference Material
DI	Deionized Water
DPD	Department of Planning and Development
DRO	Diesel Range Organics
Dup	Duplicate
ELAP	Environmental Laboratory Accreditation Program
EPA	Environmental Protection Agency
GC/FID	Gas Chromatography Flame Ionization Detection
GRO	Gasoline Range Organics
HC	Hydrocarbon
HEM	Hexane Extractable Material
HMU	Hazardous Material Unit
ICP/MS	Inductively Coupled Plasma Mass Spectrometry
LACSD	Los Angeles County Sanitation Districts
LCS	Laboratory Control Sample - A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes.
LCSD	Laboratory Control Sample Duplicate - A replicate of Laboratory Control Sample.
LOQ	Limit of Quantitation
MDL	Method Detection Limit - The minimum measured concentration of a substance that can be reported with 99% confidence. MDL is statistically derived number which is specific for each instrument, each method and each compound.
mg/kg	Miligrams per Kilogram
mg/L	Miligrams per Liter
ml/L/hr	Milliliter per Liter per Hour
MRO	Motor oil Range Organics
MS	Matrix Spike - A sample prepared, taken through all sample preparation and analytical steps of the procedure and analyzed as an independent test results.
MSD	Matrix Spike Duplicate - A replicate of Matrix Spike Sample.
N	No
ND	Analyte is not detected below Method Detection Limit.

The contents of this report apply to the sample(s) analyzed in accordance with the chain of custody document.
No duplication of this report is allowed, except in its entirety without written approval of the laboratory.

Parsons	AETL Job Number:	BEF0119	Site:	Canoga Park High School	
100 West Walnut Street	Project Number:	[none]		6850 CA-27	
Pasadena, CA 91124	Attention:	Justin King		Canoga Park, CA 91303	
	Project Name:	LAUSD Canoga	Reported:	07/07/2023 11:36	

ng/m3	Nanograms per cubic meter
NIOSH	National Institute for Occupational Safety and Health
nL/L	Nanoliters per Liter
NTU	Nephelometric Turbidity Units
Ohm-cm	Ohms per centimeter
ORO	Oil Range Organics
OSHA	Occupational Safety and Health Administration
PCB	Polychlorinated Biphenyl
ppb v	Parts per billion by volume
ppmC	Parts per million Carbon
PSU	Practical Salinity Unit
RL	Reporting Limit - The lowest concentration at which an analyte can be detected in a sample and its concentration can be reported with a specified degree of confidence, accuracy and precision. For usage at AETL, RL is equivalant to LOQ.
RPD	Relative Percent Difference
SIM	Selective Ion Monitoring
SM	Standard Method
SPLP	Synthetic Precipitation Leaching Procedure
STLC	Soluble Threshold Limit Concentration
TCLP	Toxicity Characteristic Leaching Procedure
TPH	Total Petroleum Hydrocarbons
TTLC	Total Threshold Limit Concentrations
ug/kg	Micrograms per Kilogram
ug/L	Micrograms per Liter
ug/m3	Micrograms per cubic meter
WET	Waste Extraction Test
Y	Yes
ZHE	Zero Headspace Extraction

Workorder No.: N057442

RE: BEF0119.01

Attention: Hailley Coleman

Enclosed are the results for sample(s) received on June 28, 2023 by ASSET Laboratories. The sample(s) are tested for the parameters as indicated in the enclosed chain of custody in accordance with the applicable laboratory certifications.

Thank you for the opportunity to service the needs of your company.

Please feel free to call me at (562) 219-7435 if I can be of further assistance to your company.

Sincerely,

for

Ferdinand Paul Lugtu
Laboratory Director

The cover letter is an integral part of this analytical report. This Laboratory Report cannot be reproduced in part or in its entirety without written permission from the client and ASSET Laboratories - California.

SAMPLE RECEIVING/GENERAL COMMENTS:

All sample containers were received intact with proper chain of custody documentation.

Information on sample receipt conditions including discrepancies can be found in attached Sample Receipt Checklist Form.

Cooler temperature and sample preservation were verified upon receipt of samples if applicable.

Samples were analyzed within method holding time.

Analytical Comments for EPA 6010B_STLC:

Dilution was necessary due to matrix.

Matrix Spike (MS) is outside recovery criteria possibly due to matrix interference. The associated Laboratory Control Sample (LCS) recovery was acceptable.

Analytical Comments for EPA 6020:

Matrix Spike (MS) and Matrix Spike Duplicate (MSD) are outside recovery and RPD criteria possibly due to matrix interference. The associated Laboratory Control Sample (LCS) recovery was acceptable.

Please review the checklist below. Any NO signifies non-compliance. Any non-compliance will be noted and must be understood as having an impact on the quality of the data. All tests will be performed as requested regardless of any compliance issues.

If you have any questions or further instruction, please contact our Project Coordinator at (702) 307-2659.

Cooler Received/Opened On:	6/28/2023	Workorder:	N057442
Rep sample Temp (Deg C):	4.4	IR Gun ID:	1
Temp Blank:	☐ Yes ☑ No		
Carrier name:	Walk-In		
Last 4 digits of Tracking No.:	NA	Packing Material Used:	None
Cooling process:	☑ Ice ☐ Ice Pack ☐ Dry Ice ☐ Other ☐ None		

Sample Receipt Checklist

1. Shipping container/cooler in good condition?	Yes ☑	No ☐	Not Present ☐
2. Custody seals intact, signed, dated on shippping container/cooler?	Yes ☐	No ☐	Not Present ☑
3. Custody seals intact on sample bottles?	Yes ☐	No ☐	Not Present ☑
4. Chain of custody present?	Yes ☑	No ☐	
5. Sampler's name present in COC?	Yes ☐	No ☑	
6. Chain of custody signed when relinquished and received?	Yes ☑	No ☐	
7. Chain of custody agrees with sample labels?	Yes ☑	No ☐	
8. Samples in proper container/bottle?	Yes ☑	No ☐	
9. Sample containers intact?	Yes ☑	No ☐	
10. Sufficient sample volume for indicated test?	Yes ☑	No ☐	
11. All samples received within holding time?	Yes ☑	No ☐	
12. Temperature of rep sample or Temp Blank within acceptable limit?	Yes ☑	No ☐	NA ☐
13. Water - VOA vials have zero headspace?	Yes ☐	No ☐	NA ☑
14. Water - pH acceptable upon receipt? Example: pH > 12 for (CN,S); pH<2 for Metals	Yes ☐	No ☐	NA ☑
15. Did the bottle labels indicate correct preservatives used?	Yes ☐	No ☐	NA ☑
16. Were there Non-Conformance issues at login?	Yes ☑	No ☐	NA ☐
Was Client notified?	Yes ☐	No ☐	NA ☑

COOLER RECEIPT FORM

Client Name: Parsons

Project Name: LAUSD Canoga Project No.:

AETL Job Number: BEF0119

Date Received: 06/14/2023 Received by: Greta G

Carrier: ☐ AETL Courier ☑ Client ☐ GSL ☐ FedEx ☐ UPS
☐Others:

Samples were received in: ☑ Cooler (__1_____) ☐ Other (Specify):

Sample Container Temperature: __5.8__ °C IR Gun S/N: 51941911MV

Type of sample containers: ☐ VOA, ☐ Glass bottles, ☑Wide mouth jars, ☐HDPE bottles, ☐ Metal sleeves, ☐ Acetate sleeves, ☐ 5035 Kit: ☐ AETL or ☐ Client, ☐ Tedlar Bags, Summa Canister: ☐ 6L, ☐ 3L, ☐ 1L, Others (Specify): _____

How are samples preserved: ☐ None, ☑ Ice, ☐ Blue Ice, ☐ Dry Ice
☑ None, ☐ HNO_3, ☐ NaOH, ☐ ZnOAc, ☐ HCl, ☐ $Na_2S_2O_3$, ☐ MeOH, ☐ $NaHSO_4$
☐ Other (Specify):

	Yes	No	N/A	Note or Comment
1. Are the COCs Correct?	✔			
2. Are Sample labels legible & indelible ink?	✔			
3. Do samples match the COC?	✔			
4. Are the required analyses clear?	✔			
5. Is there enough samples for required analysis?	✔			
6. Does cooler or samples have custody seal(s)?			✔	
7. Are sample containers in good condition?	✔			
8. Are samples preserved?	✔			
9. Are samples preserved properly for the intended analysis?	✔			
10. Are the VOAs free of headspace? See footnote.			✔	
11. Are the jars free of headspace?			✔	

* = see note below. N/A = Not Applicable

PLEASE NOTE ALL SAMPLES WILL BE DISPOSED OF 30 DAYS AFTER RECEIVING DATE. IF AETL IS INFORMED OTHERWISE, THERE WILL BE A STORAGE CHARGE PER SAMPLE PER MONTH FOR ANY SAMPLE HELD BEYOND 30 DAYS.

◯ Example maximum headspace bubble size; acceptance criteria not to exceed 5-6 mm in diameter.

For headspace bubbles exceeding 6 mm in diameter, sample receiving will tag the VOA and notify the Project Manager. The Project Manager will contact client for Analyze or Resample instructions.

Case Narrative

The following "Sample Received" Section summarizes the samples received and associated analyses requested as specified on the enclosed chain of custody.

Results as reported by the laboratory apply only to 1) the items tested, 2) as the samples are received, and 3) the accuracy of information provided. Information supplied by the customer that may affect validity of results and may be contained in this report include Project Name/Number, Site Location, Sample Locations, Sampling Dates/Times, Sample ID, Sample Preservation, Sample Matrix, Sample Properties, Field Blanks, Field Duplicates, Field Spikes, and Site Historical Data.

Accreditation applies only to the test methods listed on each scope of accreditation held by the laboratory; certifications held by the laboratory may not apply to results supplied in this report.

Unless otherwise noted, all results of soil and solid samples are based on wet weight.

No analytical non-conformances were encountered.

Qualifiers are noted in the report.

The sample was subcontracted to Asset Laboratories for EPA 6020, STLC, and TCLP. Please see attached report for results.

The contents of this report apply to the sample(s) analyzed in accordance with the chain of custody document.
No duplication of this report is allowed, except in its entirety without written approval of the laboratory.

Qualifiers and Definitions

Item	Definitions
% wt	Percent Weight
%REC	Percent Recovery
°F	Degrees Fahrenheit
AETL	American Environmental Testing Laboratory, LLC
C	Carbon
CARB	California Air Resources Board
COC	Chain of Custody
Cresols	3-methylphenol/4-methylphenol coelute and cannot be chromatographically separated. Due to this coeluting isomer pair phenomenon, the laboratory uses a single cresol (4-methylphenol) as calibration standard for 3-methylphenol/4-methylphenol.
CRM	Certified Reference Material
DI	Deionized Water
DPD	Department of Planning and Development
DRO	Diesel Range Organics
Dup	Duplicate
ELAP	Environmental Laboratory Accreditation Program
EPA	Environmental Protection Agency
GC/FID	Gas Chromatography Flame Ionization Detection
GRO	Gasoline Range Organics
HC	Hydrocarbon
HEM	Hexane Extractable Material
HMU	Hazardous Material Unit
ICP/MS	Inductively Coupled Plasma Mass Spectrometry
LACSD	Los Angeles County Sanitation Districts
LCS	Laboratory Control Sample - A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes.
LCSD	Laboratory Control Sample Duplicate - A replicate of Laboratory Control Sample.
LOQ	Limit of Quantitation
MDL	Method Detection Limit - The minimum measured concentration of a substance that can be reported with 99% confidence. MDL is statistically derived number which is specific for each instrument, each method and each compound.
mg/kg	Miligrams per Kilogram
mg/L	Miligrams per Liter
ml/L/hr	Milliliter per Liter per Hour
MRO	Motor oil Range Organics
MS	Matrix Spike - A sample prepared, taken through all sample preparation and analytical steps of the procedure and analyzed as an independent test results.
MSD	Matrix Spike Duplicate - A replicate of Matrix Spike Sample.
N	No
ND	Analyte is not detected below Method Detection Limit.

The contents of this report apply to the sample(s) analyzed in accordance with the chain of custody document.
No duplication of this report is allowed, except in its entirety without written approval of the laboratory.

Parsons	AETL Job Number:	BEF0119	Site:	Canoga Park High School
100 West Walnut Street	Project Number:	[none]		6850 CA-27
Pasadena, CA 91124	Attention:	Justin King		Canoga Park, CA 91303
	Project Name:	LAUSD Canoga	Reported:	07/17/2023 18:37

ng/m3	Nanograms per cubic meter
NIOSH	National Institute for Occupational Safety and Health
nL/L	Nanoliters per Liter
NTU	Nephelometric Turbidity Units
Ohm-cm	Ohms per centimeter
ORO	Oil Range Organics
OSHA	Occupational Safety and Health Administration
PCB	Polychlorinated Biphenyl
ppb v	Parts per billion by volume
ppmC	Parts per million Carbon
PSU	Practical Salinity Unit
RL	Reporting Limit - The lowest concentration at which an analyte can be detected in a sample and its concentration can be reported with a specified degree of confidence, accuracy and precision. For usage at AETL, RL is equivalant to LOQ.
RPD	Relative Percent Difference
SIM	Selective Ion Monitoring
SM	Standard Method
SPLP	Synthetic Precipitation Leaching Procedure
STLC	Soluble Threshold Limit Concentration
TCLP	Toxicity Characteristic Leaching Procedure
TPH	Total Petroleum Hydrocarbons
TTLC	Total Threshold Limit Concentrations
ug/kg	Micrograms per Kilogram
ug/L	Micrograms per Liter
ug/m3	Micrograms per cubic meter
WET	Waste Extraction Test
Y	Yes
ZHE	Zero Headspace Extraction

The contents of this report apply to the sample(s) analyzed in accordance with the chain of custody document.
No duplication of this report is allowed, except in its entirety without written approval of the laboratory.

RE: BEF0119.02

Attention: Hailley Coleman

Enclosed are the results for sample(s) received on July 10, 2023 by ASSET Laboratories. The sample(s) are tested for the parameters as indicated in the enclosed chain of custody in accordance with the applicable laboratory certifications.

Thank you for the opportunity to service the needs of your company.

Please feel free to call me at (562) 219-7435 if I can be of further assistance to your company.

Sincerely,

for

Ferdinand Paul Lugtu
Laboratory Director

The cover letter is an integral part of this analytical report. This Laboratory Report cannot be reproduced in part or in its entirety without written permission from the client and ASSET Laboratories - California.

CASE NARRATIVE

SAMPLE RECEIVING/GENERAL COMMENTS:

All sample containers were received intact with proper chain of custody documentation.

Information on sample receipt conditions including discrepancies can be found in attached Sample Receipt Checklist Form.

Cooler temperature and sample preservation were verified upon receipt of samples if applicable.

Samples were analyzed within method holding time.

Date Received: 06/14/2023 Received by: Greta G

Carrier: ☐ AETL Courier ☑ Client ☐ GSL ☐ FedEx ☐ UPS
☐Others:

Samples were received in: ☑ Cooler (1) ☐ Other (Specify):

Sample Container Temperature: 5.8 °C IR Gun S/N: 51941911MV

Type of sample containers: ☐ VOA, ☐ Glass bottles, ☑Wide mouth jars, ☐HDPE bottles, ☐ Metal sleeves, ☐ Acetate sleeves, ☐ 5035 Kit: ☐ AETL or ☐ Client, ☐ Tedlar Bags, Summa Canister: ☐ 6L, ☐ 3L, ☐ 1L, Others (Specify): _____

How are samples preserved: ☐ None, ☑ Ice, ☐ Blue Ice, ☐ Dry Ice
☑ None, ☐ HNO_3, ☐ NaOH, ☐ ZnOAc, ☐ HCl, ☐ $Na_2S_2O_3$, ☐ MeOH, ☐ $NaHSO_4$
☐ Other (Specify):

	Yes	No	N/A	Note or Comment
1. Are the COCs Correct?	✔			
2. Are Sample labels legible & indelible ink?	✔			
3. Do samples match the COC?	✔			
4. Are the required analyses clear?	✔			
5. Is there enough samples for required analysis?	✔			
6. Does cooler or samples have custody seal(s)?			✔	
7. Are sample containers in good condition?	✔			
8. Are samples preserved?	✔			
9. Are samples preserved properly for the intended analysis?	✔			
10. Are the VOAs free of headspace? See footnote.			✔	
11. Are the jars free of headspace?			✔	

* = see note below. N/A = Not Applicable

PLEASE NOTE ALL SAMPLES WILL BE DISPOSED OF 30 DAYS AFTER RECEIVING DATE. IF AETL IS INFORMED OTHERWISE, THERE WILL BE A STORAGE CHARGE PER SAMPLE PER MONTH FOR ANY SAMPLE HELD BEYOND 30 DAYS.

◯ Example maximum headspace bubble size; acceptance criteria not to exceed 5-6 mm in diameter.

For headspace bubbles exceeding 6 mm in diameter, sample receiving will tag the VOA and notify the Project Manager. The Project Manager will contact client for Analyze or Resample instructions.

Case Narrative

The following "Sample Received" Section summarizes the samples received and associated analyses requested as specified on the enclosed chain of custody.

Results as reported by the laboratory apply only to 1) the items tested, 2) as the samples are received, and 3) the accuracy of information provided. Information supplied by the customer that may affect validity of results and may be contained in this report include Project Name/Number, Site Location, Sample Locations, Sampling Dates/Times, Sample ID, Sample Preservation, Sample Matrix, Sample Properties, Field Blanks, Field Duplicates, Field Spikes, and Site Historical Data.

Accreditation applies only to the test methods listed on each scope of accreditation held by the laboratory; certifications held by the laboratory may not apply to results supplied in this report.

Unless otherwise noted, all results of soil and solid samples are based on wet weight.

No analytical non-conformances were encountered.

Qualifiers are noted in the report.

The sample was subcontracted to Asset Laboratories for EPA 6020, STLC, and TCLP. Please see attached report for results.

Qualifiers and Definitions

Item	Definitions
% wt	Percent Weight
%REC	Percent Recovery
°F	Degrees Fahrenheit
AETL	American Environmental Testing Laboratory, LLC
C	Carbon
CARB	California Air Resources Board
COC	Chain of Custody
Cresols	3-methylphenol/4-methylphenol coelute and cannot be chromatographically separated. Due to this coeluting isomer pair phenomenon, the laboratory uses a single cresol (4-methylphenol) as calibration standard for 3-methylphenol/4-methylphenol.
CRM	Certified Reference Material
DI	Deionized Water
DPD	Department of Planning and Development
DRO	Diesel Range Organics
Dup	Duplicate
ELAP	Environmental Laboratory Accreditation Program
EPA	Environmental Protection Agency
GC/FID	Gas Chromatography Flame Ionization Detection
GRO	Gasoline Range Organics
HC	Hydrocarbon
HEM	Hexane Extractable Material
HMU	Hazardous Material Unit
ICP/MS	Inductively Coupled Plasma Mass Spectrometry
LACSD	Los Angeles County Sanitation Districts
LCS	Laboratory Control Sample - A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes.
LCSD	Laboratory Control Sample Duplicate - A replicate of Laboratory Control Sample.
LOQ	Limit of Quantitation
MDL	Method Detection Limit - The minimum measured concentration of a substance that can be reported with 99% confidence. MDL is statistically derived number which is specific for each instrument, each method and each compound.
mg/kg	Miligrams per Kilogram
mg/L	Miligrams per Liter
ml/L/hr	Milliliter per Liter per Hour
MRO	Motor oil Range Organics
MS	Matrix Spike - A sample prepared, taken through all sample preparation and analytical steps of the procedure and analyzed as an independent test results.
MSD	Matrix Spike Duplicate - A replicate of Matrix Spike Sample.
N	No
ND	Analyte is not detected below Method Detection Limit.

The contents of this report apply to the sample(s) analyzed in accordance with the chain of custody document.
No duplication of this report is allowed, except in its entirety without written approval of the laboratory.

RE: BEF0119.02

Attention: Hailley Coleman

Enclosed are the results for sample(s) received on July 18, 2023 by ASSET Laboratories. The sample(s) are tested for the parameters as indicated in the enclosed chain of custody in accordance with the applicable laboratory certifications.

Thank you for the opportunity to service the needs of your company.

Please feel free to call me at (562) 219-7435 if I can be of further assistance to your company.

Sincerely,

for

Ferdinand Paul Lugtu
Laboratory Director

The cover letter is an integral part of this analytical report. This Laboratory Report cannot be reproduced in part or in its entirety without written permission from the client and ASSET Laboratories - California.

SAMPLE RECEIVING/GENERAL COMMENTS:

All sample containers were received intact with proper chain of custody documentation.

Information on sample receipt conditions including discrepancies can be found in attached Sample Receipt Checklist Form.

Cooler temperature and sample preservation were verified upon receipt of samples if applicable.

Samples were analyzed within method holding time.

This is an addendum for workorder N057610.

Hailey,

TCLP requires minimum of 100g per SOP. However, it can be run as a limited sample. Please let us know if we could proceed.

Thank you,

Kim

COOLER RECEIPT FORM

Client Name: Parsons

Project Name: LAUSD Canoga Project No.:

AETL Job Number: BEG0118

Date Received: 07/17/2023 Received by: Greta G

Carrier: ☐ AETL Courier ☑ Client ☐ GSL ☐ FedEx ☐ UPS
☐Others:

Samples were received in: ☑ Cooler (__2_____) ☐ Other (Specify):

Sample Container Temperature: __5.8__ °C IR Gun S/N: 51941911MV

Type of sample containers: ☐ VOA, ☐ Glass bottles, ☑Wide mouth jars, ☐HDPE bottles, ☐ Metal sleeves, ☐ Acetate sleeves, ☐ 5035 Kit: ☐ AETL or ☐ Client, ☐ Tedlar Bags, Summa Canister: ☐ 6L, ☐ 3L, ☐ 1L, Others (Specify): _____

How are samples preserved: ☐ None, ☑ Ice, ☐ Blue Ice, ☐ Dry Ice
☑ None, ☐ HNO_3, ☐ NaOH, ☐ ZnOAc, ☐ HCl, ☐ $Na_2S_2O_3$, ☐ MeOH, ☐ $NaHSO_4$
☐ Other (Specify):

	Yes	No	N/A	Note or Comment
1. Are the COCs Correct?	✔			
2. Are Sample labels legible & indelible ink?	✔			
3. Do samples match the COC?	✔			
4. Are the required analyses clear?	✔			
5. Is there enough samples for required analysis?	✔			
6. Does cooler or samples have custody seal(s)?			✔	
7. Are sample containers in good condition?	✔			
8. Are samples preserved?	✔			
9. Are samples preserved properly for the intended analysis?	✔			
10. Are the VOAs free of headspace? See footnote.			✔	
11. Are the jars free of headspace?			✔	

* = see note below. N/A = Not Applicable

PLEASE NOTE ALL SAMPLES WILL BE DISPOSED OF 30 DAYS AFTER RECEIVING DATE. IF AETL IS INFORMED OTHERWISE, THERE WILL BE A STORAGE CHARGE PER SAMPLE PER MONTH FOR ANY SAMPLE HELD BEYOND 30 DAYS.

◯ Example maximum headspace bubble size; acceptance criteria not to exceed 5-6 mm in diameter.

For headspace bubbles exceeding 6 mm in diameter, sample receiving will tag the VOA and notify the Project Manager. The Project Manager will contact client for Analyze or Resample instructions.

Revised and Reissued
Rev. 01

Parsons 100 West Walnut Street Pasadena, CA 91124	AETL Job Number: Project Number: Attention: Project Name:	BEG0118 [none] Justin King LAUSD Canoga	Site: Reported:	Canoga Park High School 6850 CA-27 Canoga Park, CA 91303 08/15/2023 13:45

Case Narrative

The following "Sample Received" Section summarizes the samples received and associated analyses requested as specified on the enclosed chain of custody.

Results as reported by the laboratory apply only to 1) the items tested, 2) as the samples are received, and 3) the accuracy of information provided. Information supplied by the customer that may affect validity of results and may be contained in this report include Project Name/Number, Site Location, Sample Locations, Sampling Dates/Times, Sample ID, Sample Preservation, Sample Matrix, Sample Properties, Field Blanks, Field Duplicates, Field Spikes, and Site Historical Data.

Accreditation applies only to the test methods listed on each scope of accreditation held by the laboratory; certifications held by the laboratory may not apply to results supplied in this report.

Unless otherwise noted, all results of soil and solid samples are based on wet weight.

Qualifiers are noted in the report.

The samples were subcontracted to Asset Laboratories for EPA 6020, STLC, and TCLP. Please see attached report for results.

The contents of this report apply to the sample(s) analyzed in accordance with the chain of custody document.
No duplication of this report is allowed, except in its entirety without written approval of the laboratory.

Qualifiers and Definitions

Item	Qualifiers
J	Analyte was detected. However, the analyte concentration is an estimated value, which is between the Method Detection Limit (MDL) and the Reporting Limit (RL).

Item	Definitions
% wt	Percent Weight
%REC	Percent Recovery
°F	Degrees Fahrenheit
AETL	American Environmental Testing Laboratory, LLC
C	Carbon
CARB	California Air Resources Board
COC	Chain of Custody
Cresols	3-methylphenol/4-methylphenol coelute and cannot be chromatographically separated. Due to this coeluting isomer pair phenomenon, the laboratory uses a single cresol (4-methylphenol) as calibration standard for 3-methylphenol/4-methylphenol.
CRM	Certified Reference Material
DI	Deionized Water
DPD	Department of Planning and Development
DRO	Diesel Range Organics
Dup	Duplicate
ELAP	Environmental Laboratory Accreditation Program
EPA	Environmental Protection Agency
GC/FID	Gas Chromatography Flame Ionization Detection
GRO	Gasoline Range Organics
HC	Hydrocarbon
HEM	Hexane Extractable Material
HMU	Hazardous Material Unit
ICP/MS	Inductively Coupled Plasma Mass Spectrometry
LACSD	Los Angeles County Sanitation Districts
LCS	Laboratory Control Sample - A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes.
LCSD	Laboratory Control Sample Duplicate - A replicate of Laboratory Control Sample.
LOQ	Limit of Quantitation
MDL	Method Detection Limit - The minimum measured concentration of a substance that can be reported with 99% confidence. MDL is statistically derived number which is specific for each instrument, each method and each compound.
mg/kg	Miligrams per Kilogram
mg/L	Miligrams per Liter
ml/L/hr	Milliliter per Liter per Hour
MRO	Motor oil Range Organics

The contents of this report apply to the sample(s) analyzed in accordance with the chain of custody document.
No duplication of this report is allowed, except in its entirety without written approval of the laboratory.

Parsons	AETL Job Number:	BEG0118	Site:	Canoga Park High School
100 West Walnut Street	Project Number:	[none]		6850 CA-27
Pasadena, CA 91124	Attention:	Justin King		Canoga Park, CA 91303
	Project Name:	LAUSD Canoga	Reported:	08/15/2023 13:45

MS	Matrix Spike - A sample prepared, taken through all sample preparation and analytical steps of the procedure and analyzed as an independent test results.
MSD	Matrix Spike Duplicate - A replicate of Matrix Spike Sample.
N	No
ND	Analyte is not detected below Method Detection Limit.
ng/m3	Nanograms per cubic meter
NIOSH	National Institute for Occupational Safety and Health
nL/L	Nanoliters per Liter
NTU	Nephelometric Turbidity Units
Ohm-cm	Ohms per centimeter
ORO	Oil Range Organics
OSHA	Occupational Safety and Health Administration
PCB	Polychlorinated Biphenyl
ppb v	Parts per billion by volume
ppmC	Parts per million Carbon
PSU	Practical Salinity Unit
RL	Reporting Limit - The lowest concentration at which an analyte can be detected in a sample and its concentration can be reported with a specified degree of confidence, accuracy and precision. For usage at AETL, RL is equivalant to LOQ.
RPD	Relative Percent Difference
SIM	Selective Ion Monitoring
SM	Standard Method
SPLP	Synthetic Precipitation Leaching Procedure
STLC	Soluble Threshold Limit Concentration
TCLP	Toxicity Characteristic Leaching Procedure
TPH	Total Petroleum Hydrocarbons
TTLC	Total Threshold Limit Concentrations
ug/kg	Micrograms per Kilogram
ug/L	Micrograms per Liter
ug/m3	Micrograms per cubic meter
WET	Waste Extraction Test
Y	Yes
ZHE	Zero Headspace Extraction

The contents of this report apply to the sample(s) analyzed in accordance with the chain of custody document.

RE: BEG0118

Attention: Hailley Coleman

Enclosed are the results for sample(s) received on July 18, 2023 by ASSET Laboratories. The sample(s) are tested for the parameters as indicated in the enclosed chain of custody in accordance with the applicable laboratory certifications.

Thank you for the opportunity to service the needs of your company.

Please feel free to call me at (562) 219-7435 if I can be of further assistance to your company.

Sincerely,

for

Ferdinand Paul Lugtu
Laboratory Director

The cover letter is an integral part of this analytical report. This Laboratory Report cannot be reproduced in part or in its entirety without written permission from the client and ASSET Laboratories - California.

CLIENT: American Environmental Testing Laborator
Project: BEG0118
Lab Order: N057832

CASE NARRATIVE

SAMPLE RECEIVING/GENERAL COMMENTS:

All sample containers were received intact with proper chain of custody documentation.

Information on sample receipt conditions including discrepancies can be found in attached Sample Receipt Checklist Form.

Cooler temperature and sample preservation were verified upon receipt of samples if applicable.

Samples were analyzed within method holding time.

Analytical Comments for EPA 6020:

Matrix Spike (MS) and Matrix Spike Duplicate (MSD) are outside recovery criteria possibly due to matrix interference. The associated Laboratory Control Sample (LCS) recovery was acceptable.

CLIENT: American Environmental Testing Laborator
Project: BEG0118
Lab Order: N057832

Please review the checklist below. Any NO signifies non-compliance. Any non-compliance will be noted and must be understood as having an impact on the quality of the data. All tests will be performed as requested regardless of any compliance issues.

If you have any questions or further instruction, please contact our Project Coordinator at (702) 307-2659.

Cooler Received/Opened On:	7/18/2023	Workorder:	N057832
Rep sample Temp (Deg C):	4.6	IR Gun ID:	1
Temp Blank:	☐ Yes ☑ No		
Carrier name:	Walk-In		
Last 4 digits of Tracking No.:	NA	Packing Material Used:	None
Cooling process:	☑ Ice ☐ Ice Pack ☐ Dry Ice ☐ Other ☐ None		

Sample Receipt Checklist

1. Shipping container/cooler in good condition?	Yes ☑	No ☐	Not Present ☐
2. Custody seals intact, signed, dated on shippping container/cooler?	Yes ☐	No ☐	Not Present ☑
3. Custody seals intact on sample bottles?	Yes ☐	No ☐	Not Present ☑
4. Chain of custody present?	Yes ☑	No ☐	
5. Sampler's name present in COC?	Yes ☐	No ☑	
6. Chain of custody signed when relinquished and received?	Yes ☑	No ☐	
7. Chain of custody agrees with sample labels?	Yes ☑	No ☐	
8. Samples in proper container/bottle?	Yes ☑	No ☐	
9. Sample containers intact?	Yes ☑	No ☐	
10. Sufficient sample volume for indicated test?	Yes ☑	No ☐	
11. All samples received within holding time?	Yes ☑	No ☐	
12. Temperature of rep sample or Temp Blank within acceptable limit?	Yes ☑	No ☐	NA ☐
13. Water - VOA vials have zero headspace?	Yes ☐	No ☐	NA ☑
14. Water - pH acceptable upon receipt? Example: pH > 12 for (CN,S); pH<2 for Metals	Yes ☐	No ☐	NA ☑
15. Did the bottle labels indicate correct preservatives used?	Yes ☐	No ☐	NA ☑
16. Were there Non-Conformance issues at login?	Yes ☑	No ☐	NA ☐
Was Client notified?	Yes ☐	No ☐	NA ☑

COOLER RECEIPT FORM

Client Name: Parsons

Project Name: LAUSD Canoga Project No.:

AETL Job Number: BEG0118

Date Received: 07/17/2023 Received by: Greta G

Carrier: ☐ AETL Courier ☑ Client ☐ GSL ☐ FedEx ☐ UPS
☐Others:

Samples were received in: ☑ Cooler (__2_____) ☐ Other (Specify):

Sample Container Temperature: __5.8__ °C IR Gun S/N: 51941911MV

Type of sample containers: ☐ VOA, ☐ Glass bottles, ☑Wide mouth jars, ☐HDPE bottles, ☐ Metal sleeves, ☐ Acetate sleeves, ☐ 5035 Kit: ☐ AETL or ☐ Client, ☐ Tedlar Bags, Summa Canister: ☐ 6L, ☐ 3L, ☐ 1L, Others (Specify): _____

How are samples preserved: ☐ None, ☑ Ice, ☐ Blue Ice, ☐ Dry Ice
☑ None, ☐ HNO_3, ☐ NaOH, ☐ ZnOAc, ☐ HCl, ☐ $Na_2S_2O_3$, ☐ MeOH, ☐ $NaHSO_4$
☐ Other (Specify):

	Yes	No	N/A	Note or Comment
1. Are the COCs Correct?	✔			
2. Are Sample labels legible & indelible ink?	✔			
3. Do samples match the COC?	✔			
4. Are the required analyses clear?	✔			
5. Is there enough samples for required analysis?	✔			
6. Does cooler or samples have custody seal(s)?			✔	
7. Are sample containers in good condition?	✔			
8. Are samples preserved?	✔			
9. Are samples preserved properly for the intended analysis?	✔			
10. Are the VOAs free of headspace? See footnote.			✔	
11. Are the jars free of headspace?			✔	

* = see note below. N/A = Not Applicable

PLEASE NOTE ALL SAMPLES WILL BE DISPOSED OF 30 DAYS AFTER RECEIVING DATE. IF AETL IS INFORMED OTHERWISE, THERE WILL BE A STORAGE CHARGE PER SAMPLE PER MONTH FOR ANY SAMPLE HELD BEYOND 30 DAYS.

◯ Example maximum headspace bubble size; acceptance criteria not to exceed 5-6 mm in diameter.

For headspace bubbles exceeding 6 mm in diameter, sample receiving will tag the VOA and notify the Project Manager. The Project Manager will contact client for Analyze or Resample instructions.

Parsons 100 West Walnut Street Pasadena, CA 91124	AETL Job Number: Project Number: Attention: Project Name:	BEG0118 [none] Justin King LAUSD Canoga	Site: Reported:	Canoga Park High School 6850 CA-27 Canoga Park, CA 91303 08/01/2023 09:53

Case Narrative

The following "Sample Received" Section summarizes the samples received and associated analyses requested as specified on the enclosed chain of custody.

Results as reported by the laboratory apply only to 1) the items tested, 2) as the samples are received, and 3) the accuracy of information provided. Information supplied by the customer that may affect validity of results and may be contained in this report include Project Name/Number, Site Location, Sample Locations, Sampling Dates/Times, Sample ID, Sample Preservation, Sample Matrix, Sample Properties, Field Blanks, Field Duplicates, Field Spikes, and Site Historical Data.

Accreditation applies only to the test methods listed on each scope of accreditation held by the laboratory; certifications held by the laboratory may not apply to results supplied in this report.

Unless otherwise noted, all results of soil and solid samples are based on wet weight.

Qualifiers are noted in the report.

The samples were subcontracted to Asset Laboratories for EPA 6020, STLC, and TCLP. Please see attached report for results.

The contents of this report apply to the sample(s) analyzed in accordance with the chain of custody document.
No duplication of this report is allowed, except in its entirety without written approval of the laboratory.

Qualifiers and Definitions

Item	Qualifiers
J	Analyte was detected. However, the analyte concentration is an estimated value, which is between the Method Detection Limit (MDL) and the Reporting Limit (RL).

Item	Definitions
% wt	Percent Weight
%REC	Percent Recovery
°F	Degrees Fahrenheit
AETL	American Environmental Testing Laboratory, LLC
C	Carbon
CARB	California Air Resources Board
COC	Chain of Custody
Cresols	3-methylphenol/4-methylphenol coelute and cannot be chromatographically separated. Due to this coeluting isomer pair phenomenon, the laboratory uses a single cresol (4-methylphenol) as calibration standard for 3-methylphenol/4-methylphenol.
CRM	Certified Reference Material
DI	Deionized Water
DPD	Department of Planning and Development
DRO	Diesel Range Organics
Dup	Duplicate
ELAP	Environmental Laboratory Accreditation Program
EPA	Environmental Protection Agency
GC/FID	Gas Chromatography Flame Ionization Detection
GRO	Gasoline Range Organics
HC	Hydrocarbon
HEM	Hexane Extractable Material
HMU	Hazardous Material Unit
ICP/MS	Inductively Coupled Plasma Mass Spectrometry
LACSD	Los Angeles County Sanitation Districts
LCS	Laboratory Control Sample - A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes.
LCSD	Laboratory Control Sample Duplicate - A replicate of Laboratory Control Sample.
LOQ	Limit of Quantitation
MDL	Method Detection Limit - The minimum measured concentration of a substance that can be reported with 99% confidence. MDL is statistically derived number which is specific for each instrument, each method and each compound.
mg/kg	Miligrams per Kilogram
mg/L	Miligrams per Liter
ml/L/hr	Milliliter per Liter per Hour
MRO	Motor oil Range Organics

The contents of this report apply to the sample(s) analyzed in accordance with the chain of custody document.
No duplication of this report is allowed, except in its entirety without written approval of the laboratory.

Parsons	AETL Job Number:	BEG0118	Site:	Canoga Park High School
100 West Walnut Street	Project Number:	[none]		6850 CA-27
Pasadena, CA 91124	Attention:	Justin King		Canoga Park, CA 91303
	Project Name:	LAUSD Canoga	Reported:	08/01/2023 09:53

MS	Matrix Spike - A sample prepared, taken through all sample preparation and analytical steps of the procedure and analyzed as an independent test results.
MSD	Matrix Spike Duplicate - A replicate of Matrix Spike Sample.
N	No
ND	Analyte is not detected below Method Detection Limit.
ng/m3	Nanograms per cubic meter
NIOSH	National Institute for Occupational Safety and Health
nL/L	Nanoliters per Liter
NTU	Nephelometric Turbidity Units
Ohm-cm	Ohms per centimeter
ORO	Oil Range Organics
OSHA	Occupational Safety and Health Administration
PCB	Polychlorinated Biphenyl
ppb v	Parts per billion by volume
ppmC	Parts per million Carbon
PSU	Practical Salinity Unit
RL	Reporting Limit - The lowest concentration at which an analyte can be detected in a sample and its concentration can be reported with a specified degree of confidence, accuracy and precision. For usage at AETL, RL is equivalant to LOQ.
RPD	Relative Percent Difference
SIM	Selective Ion Monitoring
SM	Standard Method
SPLP	Synthetic Precipitation Leaching Procedure
STLC	Soluble Threshold Limit Concentration
TCLP	Toxicity Characteristic Leaching Procedure
TPH	Total Petroleum Hydrocarbons
TTLC	Total Threshold Limit Concentrations
ug/kg	Micrograms per Kilogram
ug/L	Micrograms per Liter
ug/m3	Micrograms per cubic meter
WET	Waste Extraction Test
Y	Yes
ZHE	Zero Headspace Extraction

The contents of this report apply to the sample(s) analyzed in accordance with the chain of custody document.
No duplication of this report is allowed, except in its entirety without written approval of the laboratory.

RE: BEG0118.01

Attention: Hailley Coleman

Enclosed are the results for sample(s) received on July 26, 2023 by ASSET Laboratories. The sample(s) are tested for the parameters as indicated in the enclosed chain of custody in accordance with the applicable laboratory certifications.

Thank you for the opportunity to service the needs of your company.

Please feel free to call me at (562) 219-7435 if I can be of further assistance to your company.

Sincerely,

Ferdinand Paul Lugtu
Laboratory Director

The cover letter is an integral part of this analytical report. This Laboratory Report cannot be reproduced in part or in its entirety without written permission from the client and ASSET Laboratories - California.

CLIENT: American Environmental Testing Laborator
Project: BEG0118.01
Lab Order: N058018

CASE NARRATIVE

SAMPLE RECEIVING/GENERAL COMMENTS:

All sample containers were received intact with proper chain of custody documentation.

Information on sample receipt conditions including discrepancies can be found in attached Sample Receipt Checklist Form.

Cooler temperature and sample preservation were verified upon receipt of samples if applicable.

Samples were analyzed within method holding time.

Analytical Comments for WET/ EPA 6010B:

Matrix Spike (MS) and Matrix Spike Duplicate (MSD) are outside recovery criteria for some analytes in QC samples N058018-012A-MS/MSD possibly due to matrix interference. The associated Laboratory Control Sample (LCS) recovery was acceptable.

CLIENT: American Environmental Testing Laborator

Hailley,

We received BEG0118-40 & BEG0118-45 not listed on the COC. Will these be analyzed for anything?

Thank you,

Maribel Ramos

Hi Hailey,

If we receive these samples tomorrow morning assuming by 10am, we could report them by 10am the following morning but would apply a 24 hr Rush TAT.

Regards
Thad

They are soil. Would next day TAT with reporting the following morning be potentially possible?

Hi Thad,

We have around 10-12 samples for 6020-As we need results for as soon as possible. If we deliver them first thing tomorrow morning, is it possible to get same-day TAT? Let me know what the fastest TAT you could do is.

I know it is very last minute, and I really appreciate you guys for all of the rushes we have sent recently!

Thank you,

Hailley Coleman

Subject: N058018 (BEG0118.01)

Hailey,

We have insufficient volume for the following samples;

N058018-008 (BEG0118-12)

N058018-012 (BEG0118-30)

N058018-014 (BEG0118-33)

N058018-019 (BEG0118-47)

TCLP requires minimum of 100g per SOP. However, it can be run as a limited sample. Please

let us know if we could proceed.

Thank you,

Kim

ADVANCED TECHNOLOGY LABORATORIES 3151 W POST RD LAS VEGAS, NV 89118 US +1 (702) 307-2659	74299 - 1

It is agreed that the goods described herein are accepted in apparent good order and condition (except as noted) for carriage **subject to Southwest Airlines' Contract of Carriage which is www.swacargo.com and any location where air waybills are available. Shipper's attention is drawn to the terms of the contract which includes, among other things; (1) Limits on Carriers' liability for loss, damage, or delay of goods, including fragile or perishable goods; (2) Claim restrictions, including time within which shippers or consignees must file a claim or bring an action against the carrier for its acts or omissions or those of its agents; (3) Right of the carrier to change the terms of the contract; (4) Rules about refusal to carry; and (5) Rights of the carrier and limitations, concerning delay or failure to perform service, including schedule changes, rerouting, substitution of an alternate carrier or aircraft, or means of carriage including road unless specific contrary instructions are given hereon by shipper, and shipper agrees the shipment may be carried via intermediate stopping places the carrier deems appropriate.** Shipper may increase liability limits by declaring a higher value for carriage and paying a supplemental charge if required.

COOLER RECEIPT FORM

Client Name: Parsons

Project Name: LAUSD Canoga Project No.:

AETL Job Number: BEG0118

Date Received: 07/17/2023 Received by: Greta G

Carrier: ☐ AETL Courier ☑ Client ☐ GSL ☐ FedEx ☐ UPS
☐Others:

Samples were received in: ☑ Cooler (__2_____) ☐ Other (Specify):

Sample Container Temperature: __5.8__ °C IR Gun S/N: 51941911MV

Type of sample containers: ☐ VOA, ☐ Glass bottles, ☑Wide mouth jars, ☐HDPE bottles, ☐ Metal sleeves, ☐ Acetate sleeves, ☐ 5035 Kit: ☐ AETL or ☐ Client, ☐ Tedlar Bags, Summa Canister: ☐ 6L, ☐ 3L, ☐ 1L, Others (Specify): _____

How are samples preserved: ☐ None, ☑ Ice, ☐ Blue Ice, ☐ Dry Ice
☑ None, ☐ HNO_3, ☐ NaOH, ☐ ZnOAc, ☐ HCl, ☐ $Na_2S_2O_3$, ☐ MeOH, ☐ $NaHSO_4$
☐ Other (Specify):

	Yes	No	N/A	Note or Comment
1. Are the COCs Correct?	✔			
2. Are Sample labels legible & indelible ink?	✔			
3. Do samples match the COC?	✔			
4. Are the required analyses clear?	✔			
5. Is there enough samples for required analysis?	✔			
6. Does cooler or samples have custody seal(s)?			✔	
7. Are sample containers in good condition?	✔			
8. Are samples preserved?	✔			
9. Are samples preserved properly for the intended analysis?	✔			
10. Are the VOAs free of headspace? See footnote.			✔	
11. Are the jars free of headspace?			✔	

* = see note below. N/A = Not Applicable

PLEASE NOTE ALL SAMPLES WILL BE DISPOSED OF 30 DAYS AFTER RECEIVING DATE. IF AETL IS INFORMED OTHERWISE, THERE WILL BE A STORAGE CHARGE PER SAMPLE PER MONTH FOR ANY SAMPLE HELD BEYOND 30 DAYS.

◯ Example maximum headspace bubble size; acceptance criteria not to exceed 5-6 mm in diameter.

For headspace bubbles exceeding 6 mm in diameter, sample receiving will tag the VOA and notify the Project Manager. The Project Manager will contact client for Analyze or Resample instructions.

Parsons 100 West Walnut Street Pasadena, CA 91124	AETL Job Number: Project Number: Attention: Project Name:	BEG0118 [none] Justin King LAUSD Canoga	Site: Reported:	Canoga Park High School 6850 CA-27 Canoga Park, CA 91303 08/09/2023 14:58

Case Narrative

The following "Sample Received" Section summarizes the samples received and associated analyses requested as specified on the enclosed chain of custody.

Results as reported by the laboratory apply only to 1) the items tested, 2) as the samples are received, and 3) the accuracy of information provided. Information supplied by the customer that may affect validity of results and may be contained in this report include Project Name/Number, Site Location, Sample Locations, Sampling Dates/Times, Sample ID, Sample Preservation, Sample Matrix, Sample Properties, Field Blanks, Field Duplicates, Field Spikes, and Site Historical Data.

Accreditation applies only to the test methods listed on each scope of accreditation held by the laboratory; certifications held by the laboratory may not apply to results supplied in this report.

Unless otherwise noted, all results of soil and solid samples are based on wet weight.

Qualifiers are noted in the report.

The samples were subcontracted to Asset Laboratories for EPA 6020, STLC, and TCLP. Please see attached report for results.

The contents of this report apply to the sample(s) analyzed in accordance with the chain of custody document.
No duplication of this report is allowed, except in its entirety without written approval of the laboratory.

Qualifiers and Definitions

Item	Qualifiers
J	Analyte was detected. However, the analyte concentration is an estimated value, which is between the Method Detection Limit (MDL) and the Reporting Limit (RL).

Item	Definitions
% wt	Percent Weight
%REC	Percent Recovery
°F	Degrees Fahrenheit
AETL	American Environmental Testing Laboratory, LLC
C	Carbon
CARB	California Air Resources Board
COC	Chain of Custody
Cresols	3-methylphenol/4-methylphenol coelute and cannot be chromatographically separated. Due to this coeluting isomer pair phenomenon, the laboratory uses a single cresol (4-methylphenol) as calibration standard for 3-methylphenol/4-methylphenol.
CRM	Certified Reference Material
DI	Deionized Water
DPD	Department of Planning and Development
DRO	Diesel Range Organics
Dup	Duplicate
ELAP	Environmental Laboratory Accreditation Program
EPA	Environmental Protection Agency
GC/FID	Gas Chromatography Flame Ionization Detection
GRO	Gasoline Range Organics
HC	Hydrocarbon
HEM	Hexane Extractable Material
HMU	Hazardous Material Unit
ICP/MS	Inductively Coupled Plasma Mass Spectrometry
LACSD	Los Angeles County Sanitation Districts
LCS	Laboratory Control Sample - A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes.
LCSD	Laboratory Control Sample Duplicate - A replicate of Laboratory Control Sample.
LOQ	Limit of Quantitation
MDL	Method Detection Limit - The minimum measured concentration of a substance that can be reported with 99% confidence. MDL is statistically derived number which is specific for each instrument, each method and each compound.
mg/kg	Miligrams per Kilogram
mg/L	Miligrams per Liter
ml/L/hr	Milliliter per Liter per Hour
MRO	Motor oil Range Organics

The contents of this report apply to the sample(s) analyzed in accordance with the chain of custody document.
No duplication of this report is allowed, except in its entirety without written approval of the laboratory.

Parsons	AETL Job Number:	BEG0118	Site:	Canoga Park High School
100 West Walnut Street	Project Number:	[none]		6850 CA-27
Pasadena, CA 91124	Attention:	Justin King		Canoga Park, CA 91303
	Project Name:	LAUSD Canoga	Reported:	08/09/2023 14:58

MS	Matrix Spike - A sample prepared, taken through all sample preparation and analytical steps of the procedure and analyzed as an independent test results.
MSD	Matrix Spike Duplicate - A replicate of Matrix Spike Sample.
N	No
ND	Analyte is not detected below Method Detection Limit.
ng/m3	Nanograms per cubic meter
NIOSH	National Institute for Occupational Safety and Health
nL/L	Nanoliters per Liter
NTU	Nephelometric Turbidity Units
Ohm-cm	Ohms per centimeter
ORO	Oil Range Organics
OSHA	Occupational Safety and Health Administration
PCB	Polychlorinated Biphenyl
ppb v	Parts per billion by volume
ppmC	Parts per million Carbon
PSU	Practical Salinity Unit
RL	Reporting Limit - The lowest concentration at which an analyte can be detected in a sample and its concentration can be reported with a specified degree of confidence, accuracy and precision. For usage at AETL, RL is equivalant to LOQ.
RPD	Relative Percent Difference
SIM	Selective Ion Monitoring
SM	Standard Method
SPLP	Synthetic Precipitation Leaching Procedure
STLC	Soluble Threshold Limit Concentration
TCLP	Toxicity Characteristic Leaching Procedure
TPH	Total Petroleum Hydrocarbons
TTLC	Total Threshold Limit Concentrations
ug/kg	Micrograms per Kilogram
ug/L	Micrograms per Liter
ug/m3	Micrograms per cubic meter
WET	Waste Extraction Test
Y	Yes
ZHE	Zero Headspace Extraction

The contents of this report apply to the sample(s) analyzed in accordance with the chain of custody document.
No duplication of this report is allowed, except in its entirety without written approval of the laboratory.

RE: BEG0118.02

Attention: Hailley Coleman

Enclosed are the results for sample(s) received on July 31, 2023 by ASSET Laboratories. The sample(s) are tested for the parameters as indicated in the enclosed chain of custody in accordance with the applicable laboratory certifications.

Thank you for the opportunity to service the needs of your company.

Please feel free to call me at (562) 219-7435 if I can be of further assistance to your company.

Sincerely,

Ferdinand Paul Lugtu
Laboratory Director

The cover letter is an integral part of this analytical report. This Laboratory Report cannot be reproduced in part or in its entirety without written permission from the client and ASSET Laboratories - California.

CLIENT: American Environmental Testing Laborator
Project: BEG0118.02
Lab Order: N058149

CASE NARRATIVE

SAMPLE RECEIVING/GENERAL COMMENTS:

All sample containers were received intact with proper chain of custody documentation.

Information on sample receipt conditions including discrepancies can be found in attached Sample Receipt Checklist Form.

Cooler temperature and sample preservation were verified upon receipt of samples if applicable.

Samples were analyzed within method holding time.

Analytical comments for EPA 6020:

Matrix Spike (MS) and Matrix Spike Duplicate (MSD) are outside recovery criteria possibly due to matrix interference. The associated Laboratory Control Sample (LCS) recovery was acceptable.

Analytical comments for EPA 1311/ 6010B:

Matrix Spike (MS) and Matrix Spike Duplicate (MSD) are outside recovery criteria possibly due to matrix interference. The associated Laboratory Control Sample (LCS) recovery was acceptable.

Analytical comments for WET/ EPA 6010B:

Matrix Spike (MS) and Matrix Spike Duplicate (MSD) are outside recovery criteria possibly due to matrix interference. The associated Laboratory Control Sample (LCS) recovery was acceptable.

Please review the checklist below. Any NO signifies non-compliance. Any non-compliance will be noted and must be understood as having an impact on the quality of the data. All tests will be performed as requested regardless of any compliance issues.

If you have any questions or further instruction, please contact our Project Coordinator at (702) 307-2659.

Cooler Received/Opened On:	7/31/2023	Workorder:	N058149
Rep sample Temp (Deg C):	1.6	IR Gun ID:	1
Temp Blank:	☐ Yes ☑ No		
Carrier name:	Walk-In		
Last 4 digits of Tracking No.:	NA	Packing Material Used:	None
Cooling process:	☑ Ice ☐ Ice Pack ☐ Dry Ice ☐ Other ☐ None		

Sample Receipt Checklist

1. Shipping container/cooler in good condition?	Yes ☑	No ☐	Not Present ☐
2. Custody seals intact, signed, dated on shippping container/cooler?	Yes ☐	No ☐	Not Present ☑
3. Custody seals intact on sample bottles?	Yes ☐	No ☐	Not Present ☑
4. Chain of custody present?	Yes ☑	No ☐	
5. Sampler's name present in COC?	Yes ☐	No ☑	
6. Chain of custody signed when relinquished and received?	Yes ☑	No ☐	
7. Chain of custody agrees with sample labels?	Yes ☑	No ☐	
8. Samples in proper container/bottle?	Yes ☑	No ☐	
9. Sample containers intact?	Yes ☑	No ☐	
10. Sufficient sample volume for indicated test?	Yes ☑	No ☐	
11. All samples received within holding time?	Yes ☑	No ☐	
12. Temperature of rep sample or Temp Blank within acceptable limit?	Yes ☑	No ☐	NA ☐
13. Water - VOA vials have zero headspace?	Yes ☐	No ☐	NA ☑
14. Water - pH acceptable upon receipt? Example: pH > 12 for (CN,S); pH<2 for Metals	Yes ☐	No ☐	NA ☑
15. Did the bottle labels indicate correct preservatives used?	Yes ☐	No ☐	NA ☑
16. Were there Non-Conformance issues at login?	Yes ☐	No ☐	NA ☑
Was Client notified?	Yes ☐	No ☐	NA ☑

Hailey,

TCLP requires minimum of 100g per SOP. However, it can be run as a limited sample. Please let us know if we could proceed.

Thank you,

Kim

Date Received: 07/17/2023 Received by: Greta G

Carrier: ☐ AETL Courier ☑ Client ☐ GSL ☐ FedEx ☐ UPS
☐Others:

Samples were received in: ☑ Cooler (__2_____) ☐ Other (Specify):

Sample Container Temperature: __5.8__ °C IR Gun S/N: 51941911MV

Type of sample containers: ☐ VOA, ☐ Glass bottles, ☑Wide mouth jars, ☐HDPE bottles, ☐ Metal sleeves, ☐ Acetate sleeves, ☐ 5035 Kit: ☐ AETL or ☐ Client, ☐ Tedlar Bags, Summa Canister: ☐ 6L, ☐ 3L, ☐ 1L, Others (Specify): _____

How are samples preserved: ☐ None, ☑ Ice, ☐ Blue Ice, ☐ Dry Ice
☑ None, ☐ HNO_3, ☐ NaOH, ☐ ZnOAc, ☐ HCl, ☐ $Na_2S_2O_3$, ☐ MeOH, ☐ $NaHSO_4$
☐ Other (Specify):

	Yes	No	N/A	Note or Comment
1. Are the COCs Correct?	✔			
2. Are Sample labels legible & indelible ink?	✔			
3. Do samples match the COC?	✔			
4. Are the required analyses clear?	✔			
5. Is there enough samples for required analysis?	✔			
6. Does cooler or samples have custody seal(s)?			✔	
7. Are sample containers in good condition?	✔			
8. Are samples preserved?	✔			
9. Are samples preserved properly for the intended analysis?	✔			
10. Are the VOAs free of headspace? See footnote.			✔	
11. Are the jars free of headspace?			✔	

* = see note below. N/A = Not Applicable

PLEASE NOTE ALL SAMPLES WILL BE DISPOSED OF 30 DAYS AFTER RECEIVING DATE. IF AETL IS INFORMED OTHERWISE, THERE WILL BE A STORAGE CHARGE PER SAMPLE PER MONTH FOR ANY SAMPLE HELD BEYOND 30 DAYS.

◯ Example maximum headspace bubble size; acceptance criteria not to exceed 5-6 mm in diameter.

For headspace bubbles exceeding 6 mm in diameter, sample receiving will tag the VOA and notify the Project Manager. The Project Manager will contact client for Analyze or Resample instructions.

Parsons 100 West Walnut Street Pasadena, CA 91124	AETL Job Number: Project Number: Attention: Project Name:	BEG0118 [none] Justin King LAUSD Canoga	Site: Reported:	Canoga Park High School 6850 CA-27 Canoga Park, CA 91303 08/09/2023 09:54

Case Narrative

The following "Sample Received" Section summarizes the samples received and associated analyses requested as specified on the enclosed chain of custody.

Results as reported by the laboratory apply only to 1) the items tested, 2) as the samples are received, and 3) the accuracy of information provided. Information supplied by the customer that may affect validity of results and may be contained in this report include Project Name/Number, Site Location, Sample Locations, Sampling Dates/Times, Sample ID, Sample Preservation, Sample Matrix, Sample Properties, Field Blanks, Field Duplicates, Field Spikes, and Site Historical Data.

Accreditation applies only to the test methods listed on each scope of accreditation held by the laboratory; certifications held by the laboratory may not apply to results supplied in this report.

Unless otherwise noted, all results of soil and solid samples are based on wet weight.

Qualifiers are noted in the report.

The samples were subcontracted to Asset Laboratories for EPA 6020, STLC, and TCLP. Please see attached report for results.

The contents of this report apply to the sample(s) analyzed in accordance with the chain of custody document.
No duplication of this report is allowed, except in its entirety without written approval of the laboratory.

Qualifiers and Definitions

Item	Definitions
% wt	Percent Weight
%REC	Percent Recovery
°F	Degrees Fahrenheit
AETL	American Environmental Testing Laboratory, LLC
C	Carbon
CARB	California Air Resources Board
COC	Chain of Custody
Cresols	3-methylphenol/4-methylphenol coelute and cannot be chromatographically separated. Due to this coeluting isomer pair phenomenon, the laboratory uses a single cresol (4-methylphenol) as calibration standard for 3-methylphenol/4-methylphenol.
CRM	Certified Reference Material
DI	Deionized Water
DPD	Department of Planning and Development
DRO	Diesel Range Organics
Dup	Duplicate
ELAP	Environmental Laboratory Accreditation Program
EPA	Environmental Protection Agency
GC/FID	Gas Chromatography Flame Ionization Detection
GRO	Gasoline Range Organics
HC	Hydrocarbon
HEM	Hexane Extractable Material
HMU	Hazardous Material Unit
ICP/MS	Inductively Coupled Plasma Mass Spectrometry
LACSD	Los Angeles County Sanitation Districts
LCS	Laboratory Control Sample - A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes.
LCSD	Laboratory Control Sample Duplicate - A replicate of Laboratory Control Sample.
LOQ	Limit of Quantitation
MDL	Method Detection Limit - The minimum measured concentration of a substance that can be reported with 99% confidence. MDL is statistically derived number which is specific for each instrument, each method and each compound.
mg/kg	Miligrams per Kilogram
mg/L	Miligrams per Liter
ml/L/hr	Milliliter per Liter per Hour
MRO	Motor oil Range Organics
MS	Matrix Spike - A sample prepared, taken through all sample preparation and analytical steps of the procedure and analyzed as an independent test results.
MSD	Matrix Spike Duplicate - A replicate of Matrix Spike Sample.
N	No
ND	Analyte is not detected below Method Detection Limit.

The contents of this report apply to the sample(s) analyzed in accordance with the chain of custody document.
No duplication of this report is allowed, except in its entirety without written approval of the laboratory.

Parsons 100 West Walnut Street Pasadena, CA 91124	AETL Job Number: Project Number: Attention: Project Name:	BEG0118 [none] Justin King LAUSD Canoga	Site: Reported:	Canoga Park High School 6850 CA-27 Canoga Park, CA 91303 08/09/2023 09:54

ng/m3	Nanograms per cubic meter
NIOSH	National Institute for Occupational Safety and Health
nL/L	Nanoliters per Liter
NTU	Nephelometric Turbidity Units
Ohm-cm	Ohms per centimeter
ORO	Oil Range Organics
OSHA	Occupational Safety and Health Administration
PCB	Polychlorinated Biphenyl
ppb v	Parts per billion by volume
ppmC	Parts per million Carbon
PSU	Practical Salinity Unit
RL	Reporting Limit - The lowest concentration at which an analyte can be detected in a sample and its concentration can be reported with a specified degree of confidence, accuracy and precision. For usage at AETL, RL is equivalant to LOQ.
RPD	Relative Percent Difference
SIM	Selective Ion Monitoring
SM	Standard Method
SPLP	Synthetic Precipitation Leaching Procedure
STLC	Soluble Threshold Limit Concentration
TCLP	Toxicity Characteristic Leaching Procedure
TPH	Total Petroleum Hydrocarbons
TTLC	Total Threshold Limit Concentrations
ug/kg	Micrograms per Kilogram
ug/L	Micrograms per Liter
ug/m3	Micrograms per cubic meter
WET	Waste Extraction Test
Y	Yes
ZHE	Zero Headspace Extraction

RE: BEG0118.03

Attention: Hailley Coleman

Enclosed are the results for sample(s) received on August 03, 2023 by ASSET Laboratories. The sample(s) are tested for the parameters as indicated in the enclosed chain of custody in accordance with the applicable laboratory certifications.

Thank you for the opportunity to service the needs of your company.

Please feel free to call me at (562) 219-7435 if I can be of further assistance to your company.

Sincerely,

for

Ferdinand Paul Lugtu
Laboratory Director

The cover letter is an integral part of this analytical report. This Laboratory Report cannot be reproduced in part or in its entirety without written permission from the client and ASSET Laboratories - California.

CLIENT: American Environmental Testing Laborator
Project: BEG0118.03
Lab Order: N058271

CASE NARRATIVE

SAMPLE RECEIVING/GENERAL COMMENTS:

All sample containers were received intact with proper chain of custody documentation.

Information on sample receipt conditions including discrepancies can be found in attached Sample Receipt Checklist Form.

Cooler temperature and sample preservation were verified upon receipt of samples if applicable.

Samples were analyzed within method holding time.

Analytical comments for EPA 6020:

.Matrix Spike (MS) and Matrix Spike Duplicate (MSD) are outside recovery criteria possibly due to matrix interference. The associated Laboratory Control Sample (LCS) recovery was acceptable.

CLIENT: American Environmental Testing Laborator
Project: BEG0118.03
Lab Order: N058271

Work Order Sample Summary

Lab Sample ID	Client Sample ID	Matrix	Collection Date	Date Received	Date Reported
N058271-001A	BEG0118-17	Soil	7/17/2023 9:04:00 AM	8/3/2023	8/9/2023
N058271-002A	BEG0118-49	Soil	7/17/2023 11:47:00 AM	8/3/2023	8/9/2023

CLIENT:	American Environmental Testing Laborator	**Client Sample ID:**	BEG0118-17
Lab Order:	N058271		
Project:	BEG0118.03	**Collection Date:**	7/17/2023 9:04:00 AM
Lab ID:	N058271-001	**Matrix:**	SOIL

Analyses	Result	PQL	Qual	Units	DF	Date Analyzed
TOTAL METALS BY ICPMS						
	EPA 3050B			**EPA 6020**		
RunID: NV00922-ICP8_230804A	QC Batch: 101307			PrepDate:	8/4/2023	Analyst: **DJ**
Arsenic	4.8	0.50		mg/Kg	1	8/4/2023 06:25 PM

Qualifiers:

B	Analyte detected in the associated Method Blank	E	Value above quantitation range
H	Holding times for preparation or analysis exceeded	ND	Not Detected at the Reporting Limit
S	Spike/Surrogate outside of limits due to matrix interference		Results are wet unless otherwise specified
DO	Surrogate Diluted Out		

CLIENT:	American Environmental Testing Laborator	**Client Sample ID:**	BEG0118-49
Lab Order:	N058271		
Project:	BEG0118.03	**Collection Date:**	7/17/2023 11:47:00 AM
Lab ID:	N058271-002	**Matrix:**	SOIL

Analyses	Result	PQL	Qual	Units	DF	Date Analyzed
ICP METALS BY STLC						
EPA 3010A				**WET/ EPA 6010B**		
RunID: CA01638-ICP01_230807C QC Batch: 101348				PrepDate:	8/7/2023	Analyst: **PL**
Arsenic	9.3	0.25		mg/L	5	8/7/2023 03:53 PM
ICP METALS BY TCLP EXTRACTION						
EPA 3010A				**EPA 1311/ 6010B**		
RunID: CA01638-ICP01_230807F QC Batch: 101356				PrepDate:	8/6/2023	Analyst: **PL**
Arsenic	1.9	0.050		mg/L	1	8/7/2023 04:17 PM

Qualifiers:

B	Analyte detected in the associated Method Blank	E	Value above quantitation range
H	Holding times for preparation or analysis exceeded	ND	Not Detected at the Reporting Limit
S	Spike/Surrogate outside of limits due to matrix interference		Results are wet unless otherwise specified
DO	Surrogate Diluted Out

Please review the checklist below. Any NO signifies non-compliance. Any non-compliance will be noted and must be understood as having an impact on the quality of the data. All tests will be performed as requested regardless of any compliance issues.

If you have any questions or further instruction, please contact our Project Coordinator at (702) 307-2659.

Cooler Received/Opened On:	8/3/2023	Workorder:	N058271
Rep sample Temp (Deg C):	0.8	IR Gun ID:	1
Temp Blank:	☐ Yes ☑ No		
Carrier name:	Walk-In		
Last 4 digits of Tracking No.:	NA	Packing Material Used:	None
Cooling process:	☑ Ice ☐ Ice Pack ☐ Dry Ice ☐ Other ☐ None		

Sample Receipt Checklist

1. Shipping container/cooler in good condition?	Yes ☑	No ☐	Not Present ☐
2. Custody seals intact, signed, dated on shippping container/cooler?	Yes ☐	No ☐	Not Present ☑
3. Custody seals intact on sample bottles?	Yes ☐	No ☐	Not Present ☑
4. Chain of custody present?	Yes ☑	No ☐	
5. Sampler's name present in COC?	Yes ☐	No ☑	
6. Chain of custody signed when relinquished and received?	Yes ☑	No ☐	
7. Chain of custody agrees with sample labels?	Yes ☑	No ☐	
8. Samples in proper container/bottle?	Yes ☑	No ☐	
9. Sample containers intact?	Yes ☑	No ☐	
10. Sufficient sample volume for indicated test?	Yes ☐	No ☑	
11. All samples received within holding time?	Yes ☑	No ☐	
12. Temperature of rep sample or Temp Blank within acceptable limit?	Yes ☑	No ☐	NA ☐
13. Water - VOA vials have zero headspace?	Yes ☐	No ☐	NA ☑
14. Water - pH acceptable upon receipt? Example: pH > 12 for (CN,S); pH<2 for Metals	Yes ☐	No ☐	NA ☑
15. Did the bottle labels indicate correct preservatives used?	Yes ☐	No ☐	NA ☑
16. Were there Non-Conformance issues at login?	Yes ☑	No ☐	NA ☐
Was Client notified?	Yes ☑	No ☐	NA ☐

Comments: See correspondence. Received at Las Vegas Lab on 8/4/2023 at 3.4°C, IR#3, via GSO#8068.

COOLER RECEIPT FORM

Client Name: Parsons

Project Name: LAUSD Canoga Project No.:

AETL Job Number: BEG0118

Date Received: 07/17/2023 Received by: Greta G

Carrier: ☐ AETL Courier ☑ Client ☐ GSL ☐ FedEx ☐ UPS
☐Others:

Samples were received in: ☑ Cooler (__2_____) ☐ Other (Specify):

Sample Container Temperature: __5.8__ °C IR Gun S/N: 51941911MV

Type of sample containers: ☐ VOA, ☐ Glass bottles, ☑Wide mouth jars, ☐HDPE bottles, ☐ Metal sleeves, ☐ Acetate sleeves, ☐ 5035 Kit: ☐ AETL or ☐ Client, ☐ Tedlar Bags, Summa Canister: ☐ 6L, ☐ 3L, ☐ 1L, Others (Specify): _____

How are samples preserved: ☐ None, ☑ Ice, ☐ Blue Ice, ☐ Dry Ice
☑ None, ☐ HNO_3, ☐ NaOH, ☐ ZnOAc, ☐ HCl, ☐ $Na_2S_2O_3$, ☐ MeOH, ☐ $NaHSO_4$
☐ Other (Specify):

	Yes	No	N/A	Note or Comment
1. Are the COCs Correct?	✔			
2. Are Sample labels legible & indelible ink?	✔			
3. Do samples match the COC?	✔			
4. Are the required analyses clear?	✔			
5. Is there enough samples for required analysis?	✔			
6. Does cooler or samples have custody seal(s)?			✔	
7. Are sample containers in good condition?	✔			
8. Are samples preserved?	✔			
9. Are samples preserved properly for the intended analysis?	✔			
10. Are the VOAs free of headspace? See footnote.			✔	
11. Are the jars free of headspace?			✔	

* = see note below. N/A = Not Applicable

PLEASE NOTE ALL SAMPLES WILL BE DISPOSED OF 30 DAYS AFTER RECEIVING DATE. IF AETL IS INFORMED OTHERWISE, THERE WILL BE A STORAGE CHARGE PER SAMPLE PER MONTH FOR ANY SAMPLE HELD BEYOND 30 DAYS.

◯ Example maximum headspace bubble size; acceptance criteria not to exceed 5-6 mm in diameter.

For headspace bubbles exceeding 6 mm in diameter, sample receiving will tag the VOA and notify the Project Manager. The Project Manager will contact client for Analyze or Resample instructions.

Parsons 100 West Walnut Street Pasadena, CA 91124	AETL Job Number: Project Number: Attention: Project Name:	BEG0118 [none] Justin King LAUSD Canoga	Site: Reported:	Canoga Park High School 6850 CA-27 Canoga Park, CA 91303 08/17/2023 14:27

Case Narrative

The following "Sample Received" Section summarizes the samples received and associated analyses requested as specified on the enclosed chain of custody.

Results as reported by the laboratory apply only to 1) the items tested, 2) as the samples are received, and 3) the accuracy of information provided. Information supplied by the customer that may affect validity of results and may be contained in this report include Project Name/Number, Site Location, Sample Locations, Sampling Dates/Times, Sample ID, Sample Preservation, Sample Matrix, Sample Properties, Field Blanks, Field Duplicates, Field Spikes, and Site Historical Data.

Accreditation applies only to the test methods listed on each scope of accreditation held by the laboratory; certifications held by the laboratory may not apply to results supplied in this report.

Unless otherwise noted, all results of soil and solid samples are based on wet weight.

Qualifiers are noted in the report.

The samples were subcontracted to Asset Laboratories for EPA 6020, STLC, and TCLP. Please see attached report for results.

The contents of this report apply to the sample(s) analyzed in accordance with the chain of custody document.
No duplication of this report is allowed, except in its entirety without written approval of the laboratory.

Qualifiers and Definitions

Item	Definitions
% wt	Percent Weight
%REC	Percent Recovery
°F	Degrees Fahrenheit
AETL	American Environmental Testing Laboratory, LLC
C	Carbon
CARB	California Air Resources Board
COC	Chain of Custody
Cresols	3-methylphenol/4-methylphenol coelute and cannot be chromatographically separated. Due to this coeluting isomer pair phenomenon, the laboratory uses a single cresol (4-methylphenol) as calibration standard for 3-methylphenol/4-methylphenol.
CRM	Certified Reference Material
DI	Deionized Water
DPD	Department of Planning and Development
DRO	Diesel Range Organics
Dup	Duplicate
ELAP	Environmental Laboratory Accreditation Program
EPA	Environmental Protection Agency
GC/FID	Gas Chromatography Flame Ionization Detection
GRO	Gasoline Range Organics
HC	Hydrocarbon
HEM	Hexane Extractable Material
HMU	Hazardous Material Unit
ICP/MS	Inductively Coupled Plasma Mass Spectrometry
LACSD	Los Angeles County Sanitation Districts
LCS	Laboratory Control Sample - A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes.
LCSD	Laboratory Control Sample Duplicate - A replicate of Laboratory Control Sample.
LOQ	Limit of Quantitation
MDL	Method Detection Limit - The minimum measured concentration of a substance that can be reported with 99% confidence. MDL is statistically derived number which is specific for each instrument, each method and each compound.
mg/kg	Miligrams per Kilogram
mg/L	Miligrams per Liter
ml/L/hr	Milliliter per Liter per Hour
MRO	Motor oil Range Organics
MS	Matrix Spike - A sample prepared, taken through all sample preparation and analytical steps of the procedure and analyzed as an independent test results.
MSD	Matrix Spike Duplicate - A replicate of Matrix Spike Sample.
N	No
ND	Analyte is not detected below Method Detection Limit.

The contents of this report apply to the sample(s) analyzed in accordance with the chain of custody document.
No duplication of this report is allowed, except in its entirety without written approval of the laboratory.

Parsons 100 West Walnut Street Pasadena, CA 91124	AETL Job Number: Project Number: Attention: Project Name:	BEG0118 [none] Justin King LAUSD Canoga	Site: Reported:	Canoga Park High School 6850 CA-27 Canoga Park, CA 91303 08/17/2023 14:27

ng/m3	Nanograms per cubic meter
NIOSH	National Institute for Occupational Safety and Health
nL/L	Nanoliters per Liter
NTU	Nephelometric Turbidity Units
Ohm-cm	Ohms per centimeter
ORO	Oil Range Organics
OSHA	Occupational Safety and Health Administration
PCB	Polychlorinated Biphenyl
ppb v	Parts per billion by volume
ppmC	Parts per million Carbon
PSU	Practical Salinity Unit
RL	Reporting Limit - The lowest concentration at which an analyte can be detected in a sample and its concentration can be reported with a specified degree of confidence, accuracy and precision. For usage at AETL, RL is equivalant to LOQ.
RPD	Relative Percent Difference
SIM	Selective Ion Monitoring
SM	Standard Method
SPLP	Synthetic Precipitation Leaching Procedure
STLC	Soluble Threshold Limit Concentration
TCLP	Toxicity Characteristic Leaching Procedure
TPH	Total Petroleum Hydrocarbons
TTLC	Total Threshold Limit Concentrations
ug/kg	Micrograms per Kilogram
ug/L	Micrograms per Liter
ug/m3	Micrograms per cubic meter
WET	Waste Extraction Test
Y	Yes
ZHE	Zero Headspace Extraction

RE: BEG0118.02

Attention: Hailley Coleman

Enclosed are the results for sample(s) received on August 10, 2023 by ASSET Laboratories. The sample(s) are tested for the parameters as indicated in the enclosed chain of custody in accordance with the applicable laboratory certifications.

Thank you for the opportunity to service the needs of your company.

Please feel free to call me at (562) 219-7435 if I can be of further assistance to your company.

Sincerely,

Ferdinand Paul Lugtu
Laboratory Director

The cover letter is an integral part of this analytical report. This Laboratory Report cannot be reproduced in part or in its entirety without written permission from the client and ASSET Laboratories - California.

CASE NARRATIVE

SAMPLE RECEIVING/GENERAL COMMENTS:

All sample containers were received intact with proper chain of custody documentation.

Information on sample receipt conditions including discrepancies can be found in attached Sample Receipt Checklist Form.

Cooler temperature and sample preservation were verified upon receipt of samples if applicable.

Samples were analyzed within method holding time.

Analytical Comments for EPA 1311/6010B:

Limited sample amount was submitted for 1311 extraction.

Suggested UCL to Use

95% Approximate Gamma UCL 18.75

When a data set follows an approximate distribution passing only one of the GOF tests,
it is suggested to use a UCL based upon a distribution passing both GOF tests in ProUCL

Note: Suggestions regarding the selection of a 95% UCL are provided to help the user to select the most appropriate 95% UCL.
Recommendations are based upon data size, data distribution, and skewness using results from simulation studies.
However, simulations results will not cover all Real World data sets; for additional insight the user may want to consult a statistician.

Gamma ROS Statistics using Imputed Non-Detects

53	GROS may not be used when data set has > 50% NDs with many tied observations at multiple DLs											
54	GROS may not be used when kstar of detects is small such as <1.0, especially when the sample size is small (e.g., <15-20)											
55	For such situations, GROS method may yield incorrect values of UCLs and BTVs											
56	This is especially true when the sample size is small.											
57	For gamma distributed detected data, BTVs and UCLs may be computed using gamma distribution on KM estimates

BASIS OF BEARING

THE HORIZONTAL BASIS OF BEARING FOR THIS TOPOGRAPHIC MAP IS THE CENTERLINE OF TOPANGA CANYON BOULEVARD (FORMERLY TOPANGA CANYON AVENUE) BEING "NORTH" AS SHOWN ON TRACT NO. 9267, MB. 136/98-99.

BENCHMARK

CITY OF LOS ANGELES BENCHMARK NO. 06-06688
DESCRIPTION: WIRE SPK IN N CURB VANOWEN ST; 0.4FT E OF C CURB RETURN E OF TOPANGA CANYON BLVD
ELEVATION = 799.284' (NAVD 1988) YEAR 2000

LAUSD BENCHMARK:
CHIS "X", N ARCADE WEST SIDE OF CAFETERIA BUILDING #31' PLUS OR MINUS E/O S AND E LINES PROD.
BLDG. # "E" ELEVATION = 796.02

ESTABLISHED BENCHMARK:
N ARCADE WEST SIDE OF CAFETERIA
ELEVATION = 798.75' IS BASED ON CITY OF LOS ANGELES BENCHMARK.

CONVERSION TO LAUSD BENCH MARK
LAUSD BM = 798.75 - 2.73 = 796.02

TOPOGRAPHIC SURVEY NOTES:

1. THIS MAP REPRESENTS A TOPOGRAPHIC SURVEY OF VISIBLE FIELD CONDITIONS AT THE TIME OF THIS SURVEY.
2. AS-BUILTS PROVIDED BY LAUSD ARE FOR REFERENCE ONLY.
3. NO ADDITIONAL SURVEY AND GPR THAT WAS RECENTLY REQUESTED IN THIS DRAWING.

EXECUTIVE SUMMARY

This document presents a *Soil Removal Plan* (SRP) for the removal of lead- and/or arsenic-impacted shallow soil located within the Los Angeles Unified School District (LAUSD) Major Modernization project footprint at Canoga Park Senior High School, 6850 Topanga Canyon Boulevard in Canoga Park, California 91303 (Site).

A *Preliminary Environmental Assessment-Equivalent Report (PEA-E)* was prepared to characterize environmental impacts present in Site soils in the proposed project areas. The PEA-E ruled out all chemicals of concerns except for lead and arsenic. The PEA-E recommended the development of this SPR to provide direction to manage the identified shallow lead and/or arsenic-impacted soil. The SRP includes:

- A summary of the recent environmental work done for this project.
- Justification for preliminary screening levels.
- Public participation requirements.
- Impacted soil excavation, storage, transportation, and disposal activity requirements.
- Cost Estimate.
- Confirmation soil sampling requirements.
- Soil Removal Completion Report required components.

An estimated 280 cubic yards (CYs) of soil at 12 areas of concern are impacted based on the results of the field investigation. Approximately 180 CYs can be managed as non-hazardous waste (above preliminary screening levels, but non-hazardous) and approximately 100 CYs can be managed as non-Resource Conservation and Recovery Act [hazardous in California] hazardous waste. The requirements of South Coast Air Quality Management District Rule 1466 must be complied with during the removal of this soil.

All soil excavation and disposal activities will be completed by a properly licensed Remediation Contractor under the oversight of an Environmental Consultant selected by LAUSD's Office of Environmental Health and Safety.

1.0 INTRODUCTION

This *Soil Removal Plan* (SRP) is for the removal of lead- and arsenic-impacted shallow soil located within the Los Angeles Unified School District (LAUSD) Major Modernization project footprint at Canoga Park Senior High School (Site), 6850 Topanga Canyon Boulevard in Canoga Park, California 91303 (**Figure 1**). **Figure 2** is an aerial view of the high school property.

A *Phase 1 Environmental Site Assessment Report* (ESA) was prepared by Eco & Associates for the school in 2019 (ECO, 2019). Based on the recommendations of the Phase I ESA, and the requirements of South Coast Air Quality Management District (SCAQMD) Rule 1466 (SCAQMD, 2017), a *Preliminary Endangerment Assessment-Equivalent Work Plan for Soil Sampling* (Assessment Plan) was prepared (Parsons, 2023a) to characterize potential environmental impacts present in Site soils in the proposed project areas. A *Preliminary Environmental Assessment – Equivalent Report* (PEA-E*)* (Parsons, 2023b) documented the results of the approved work activities described in the Assessment Plan.

The work described in the *PEA-E* was completed as part of LAUSD's plan to determine if historical or recent activities or materials have adversely impacted the surface soil or shallow soil (0 to 3 feet below ground surface [bgs]), prior to grading and construction for the proposed Site modernization activities. LAUSD is proposing the following for the Site (the "Project"):

- Demolition of Cafeteria Building and Lunch Shelter, 12 classrooms in portables and permanent buildings, Shop Building #1 and 3 J-Buildings.
- Construction of new Food Services/Classroom Building including 12 new classrooms with associated support spaces and covered walkways.
- Construction of new Home Restrooms/Concessions/Maintenance & Operations Building.
- Construction of new Visitors' Restrooms/Concessions Building.
- Exterior painting of all remaining buildings to provide a uniform appearance.
- Associated sitework, utilities, landscaping as required for new construction.
- Interim housing as required.
- Barrier removal to comply with Americans with Disability Act.

The PEA-E identified lead and arsenic as the chemicals of concern COCs) for the project. The PEA-E also concluded that the requirements of SCAQMD Rule 1466 apply to the removal of the soil with elevated arsenic and lead concentrations.

This SRP was developed to address shallow soil impacted with lead and/or arsenic identified in the PEA-E. The SRP includes the following: a summary of the PEA-E; justification for preliminary screening levels; requirements for public participation; excavation activities; storage and transportation of soil; confirmation sampling; and requirements of a Soil Removal Completion Report. The SRP assumes that all of the excavation and disposal activities will be completed by a properly licensed Remediation Contractor (Contractor) under the oversight of an Environmental Consultant (Consultant) selected by LAUSD's Office of Environmental Health and Safety

(OEHS). The Contractor will be responsible for providing all documents necessary for the Consultant to prepare and submit a Removal Action Completion Report (RACR) to LAUSD.

2.0 SUMMARY OF PEA-E

2.1 SITE SUMMARY

Canoga Park Senior High School had approximately 1,500 students in the grades 9-12, five (5) administrators, seventy-eight (78) teachers, and thirty-nine (39) support staff in the 2021-2022 school year. The campus initially opened in 1915 as Owensmouth High School and currently consists of 19 permanent buildings, 16 portable buildings, an athletic field, paved driveways and parking areas, and landscaping. The Site is approximately 21.4 acres within Assessor Parcel Number 2138-001-900 and located at 6850 Topanga Canyon Boulevard, Canoga Park, CA 91303.

The Site elevation is approximately796 feet above sea level. The Site is bound by Vanowen Street on its southern side, Jordan Avenue on its eastern side, Hart Street on its northern side, and Topanga Canyon Boulevard on its western side. Two concrete-lined channels cross the Site. Bell Creek enters the Site at the northwest corner and Calabasas Creek enters the Site at the central portion of the southern boundary. The confluence of both creeks forms the beginning of the Los Angeles River at the central portion of the eastern site boundary. Based on records search conducted on the Los Angeles County, Department of Public works well database (http:dpw.lacounty.gov/general/wells/#), the groundwater beneath the Site is located at a depth range of between 763 and 786 feet above sea level. This range is based on data obtained from two wells located approximately 0.5 miles northeast and 0.5 miles west of the Site, respectively. Depth to groundwater has ranged historically from 15 to 20 feet bgs (ECO, 2019). The groundwater flow direction beneath the Site is expected to flow toward the east, similar to the topographic gradient.

2.2 ASSESSMENT PLAN

The Assessment Plan was prepared (Parsons, 2023a) to characterize potential environmental impacts present in Site soils in the proposed project areas. Based on the former activities on the property, and age of the buildings, it was possible that the following were present in shallow soil:

- Lead-based paint (lead),
- Arsenic,
- Organochlorine pesticides (OCPs),
- Polychlorinated biphenyls (PCBs) from transformers, and
- Total petroleum hydrocarbons (TPH) from auto shop operations at the Site.

Note that sampling for TPH was limited to the driveway east of Shop Building #2 and did not include sampling for the hydraulic hoists within this building as this building is outside of the current project limits.

An additional objective of the Assessment Plan was to determine the applicability of SCAQMD Rule 1466. The following analytes were added to the sampling program for this reason:

- Cadmium, chromium, mercury, and nickel.
- Polycyclic Aromatic hydrocarbons (PAHs), and
- Asbestos

2.3 PEA-E

The work was conducted in general accordance with the Assessment Plan, applicable regulatory guidance, including the *Preliminary Endangerment Assessment Guidance Manual* prepared by the California Department of Toxic Substances Control (DTSC), and direction from LAUSD.

A total of 52 initial boring locations were sampled at depths of 0 to 0.5-, 1.5 to 2.0-, and 2.5 to 3.0-feet (ft) bgs. The samples at 2.0- and 3.0-ft bgs were placed on hold with the analytical laboratory pending the results of the 0.5-ft sample. After review of the initial data generated from the 0.5-foot samples where concentrations exceeded preliminary screening levels, 24 samples from deeper depths were analyzed for constituents that exceeded their respective action levels. After LAUSD and Parsons' review of the soil analytical data from the initial 52 borings, 68 step-out borings were also completed.

Analytical results for the soil samples were compared with risk-based screening levels to determine if the analytes are present at concentrations that may represent a potential health risk. The screening levels are referred to here and after as preliminary screening levels (PSLs). For direct exposures to soils, the DTSC's (2015) *Preliminary Endangerment Assessment Guidance Manual* states that risk-based screening levels used should be "the USEPA Regional Screening Level (RSL) for residential land use, modified as necessary by the DTSC in HHRA Note 3." Thus, the screening levels used here are, in general, the USEPA RSLs (2023) unless DTSC (2022) has published a screening value of its own, termed the DTSC-SLs. PSLs for OCPs, PCBs, polycyclic aromatic hydrocarbons (PAHs), and volatile organic compounds (VOCs) were determined in this way. Procedures prescribed by the San Francisco Regional Water Quality Control Board were used to determine the PSLs for TPH. Constituents with special considerations are discussed in more detail in Section 4.2 of the PEA-E (Parsons, 2023b).

2.3.1 Cleared Analytes

The following analytes were sampled for but were either not detected above their laboratory reporting limit, or if it detected, the result was below their respective PSL:

- Cadmium, nickel and mercury
- PAHs
- TPH
- VOCs
- Asbestos

2.3.2 Statistically Cleared Analytes

Given the spatial variability across a site, U.S. Environmental Protection Agency guidance recommends using the average concentration to represent a reasonable estimate of the concentration at a given location. The agency further recommends that due to the uncertainty associated with estimating a true average concentration, the 95 percent upper confidence limit of the arithmetic mean be used for this value. USEPA provides statistical software to determine a site-wide data evaluation: ProUCL.

Several analytes were detected above their respective PSLs. ProUCL was used to support that those individual detections above PSLs for the following analytes can be left in place when considered from a site-wide perspective:

- Hexavalent chromium,
- OCPs, and
- PCBs

2.3.3 Chemicals of Concern

The 95% UCL was calculated for soil samples with an arsenic result less than 30 milligrams per kilogram (mg/kg). ProUCL was used to support that arsenic detections below 30 mg/kg can be left in place when considered from a site-wide perspective. Step-out sampling was conducted at boring locations with an arsenic result exceeding 30 mg/kg to delineate impacts that were recommended for removal.

The 95% UCL was calculated for soil samples collected that did not exceed the Soluble Threshold Limit Concentration (STLC) for lead. ProUCL was used to support that lead detections that do not exceed the STLC threshold of 5.0 mg/L can be left in place when considered from a site-wide perspective. Step-out sampling was conducted at 4 sample locations with lead results that exceeded 5.0 mg/L for STLC to delineate impacts that were recommended for removal.

An estimated 280 cubic yards (CYs) of soil at 12 locations are impacted by arsenic and/or lead based on the results of the field investigation. The PEA-E did not identify any soil that would be defined as hazardous by the federal Resource Conservation and Recovery Act (RCRA). The PEA-E did identify approximately 180 CYs of soil that must be managed as non-hazardous waste (above PSL, but non-hazardous) and approximately 100 CYs of soil that must be managed as non-RCRA [hazardous in California] hazardous waste.

The PEA-E concluded that the requirements of SCAQMD Rule 1466 apply to the soil with elevated arsenic and/or lead concentrations.

3.0 SCREENING LEVELS FOR ARSENIC AND LEAD

Potential exposures to the COCs in soil could result from direct contact, i.e., dermal contact with soil, incidental ingestion of the affected soil, as well as the inhalation of airborne dust particulates.

3.1 ARSENIC

At the concentrations observed in soils at the Site, exposure to arsenic is unlikely to be life threatening from short-term exposures. Rather, longer-term exposures to the relatively low concentrations within the Project Area may result in skin cancer and cancer in the lungs, bladder, liver, kidney, and prostate; inhalation can increase the risk of lung cancer. Other effects that may occur but are less likely from exposures to these lower concentrations include nausea and vomiting, decreased production of red and white blood cells, abnormal heart rhythm, damage to blood vessels, and a sensation of "pins and needles" in hands and feet (ATSDR, 2007a).

The residential risk-based screening levels from USEPA (2023) and DTSC (2022) of 0.68 and 0.11 milligrams per kilogram (mg/kg), respectively, are well below background concentrations. DTSC (2020) conducted a statistical evaluation of background data for arsenic in soils from Los Angeles, Orange, Riverside, San Bernardino, and San Diego Counties to derive an upper bound background threshold value for arsenic. Based on an evaluation of 1,086 data points, the DTSC (2020) derived a background threshold value for arsenic of 12 mg/kg, which is used here as the arsenic screening level.

Soluble arsenic above the State and federal limits of 5 mg/L per their respective methods are considered hazardous. For this reason, 5 mg/L of arsenic is also a screening level for this SRP.

3.2 LEAD

Lead is a bio-accumulative substance and a reproductive and developmental toxin. At the concentrations observed in soils at the Site (i.e., up to 110 mg/kg), lead is unlikely to be life threatening from short-term exposures. Rather, longer-term exposures to the relatively low concentrations within the Project Area may result in decreased performance in some tests that measure functions of the nervous system, including intelligence quotient tests. It may also cause weakness in fingers, wrists, or ankles. Lead exposure also causes small increases in blood pressure, particularly in middle-aged and older people and can cause anemia (ATSDR, 2007b).

Adverse health effects associated with exposure to lead have been correlated with concentrations of lead in whole blood. Although USEPA uses 10 micrograms per deciliter (µg/dl) as the threshold level of concern, California (OEHHA 2007) uses 1 µg/dl. A screening level of 80 mg/kg is protective of a 90th percentile estimate of 1 µg/dl blood lead concentration in children was calculated by Cal EPA (OEHHA 2009), which is used by DTSC (2022). This standard represents the concentration of lead in soil that will result in a 90th percentile estimate of a 1 µg/dl increase

in blood lead in the most sensitive receptor (i.e., child or fetus). DTSC (2022) states that individual samples may exceed 80 mg/kg, as long as the 95% UCL is below 80 mg/kg and hot spots are not present.

Soluble lead above the State and federal limits of 5 mg/L per their respective methods are considered hazardous. For this reason, 5 mg/L of arsenic is also a screening level for this SRP.

4.0 NATURE, SOURCE AND EXTENT OF IMPACTS

There are twelve Areas of Concern (AOCs) identified within the Project Area that have soil containing lead and/or arsenic that exceed their PSLs (i.e., require removal). This SRP has been prepared to establish procedures to address the areas impacted by lead and/or arsenic. The approximate excavation areas are shown on **Figures 3a to 3l**, and include the following:

4.1.1 **AOC-1 (Figure 3a)**: AOC-1 is located east of Building J-219. The excavation in this area addresses soil with non-RCRA hazardous concentrations of soluble arsenic and non-hazardous concentrations of arsenic above the PSL. The excavation limits are undefined in all lateral directions. The existing building prevented step-out sampling to the west of the initial boring (SB-34) and utilities prevented sampling to the east and south. An additional 6 sidewall confirmation samples have been proposed for the northern, southern, western and eastern excavation boundaries to supplement existing data and ensure that arsenic-impacted soil has been removed. The proposed excavation contains non-RCRA hazardous soil as defined by the step-out sampling and is separated into two separate excavations, AOC-1-1 and AOC-1-2. Proposed excavation AOC-1-1 has a volume of approximately 128 cubic feet (CF), and non-RCRA hazardous soil will be removed to a total depth of 2 ft bgs (4.7 CY). AOC-1-2 has a volume of approximately 170 CF, non-RCRA hazardous soil will be removed from 0 to 2 ft bgs (4.2 CY), and non-hazardous soil will be removed from 2 to 3 ft bgs (2.1 CY).

4.1.2 **AOC-2 (Figure 3b):** AOC-2 is located south of the existing cafeteria. The excavation in this area addresses soil with non-RCRA hazardous concentrations of soluble arsenic and non-hazardous concentrations of arsenic above the PSL. The excavation boundaries are laterally undefined in all directions. The existing building prevented step-out sampling to the north of the initial boring (SB-26). An additional 8 sidewall confirmation samples have been proposed for the northern, southern, western and eastern excavation boundaries to supplement existing data and ensure that impacted soil has been removed. The proposed excavation contains both non-hazardous and non-RCRA hazardous soil as defined by step-out sampling and has been separated into five separate excavations, AOC-2-1 thru AOC-2-5. Proposed excavation AOC-2-1 has a volume of approximately 636 CF, and non-hazardous soil will be removed to a total depth of 2 ft bgs (24 CY). Proposed excavation AOC-2-2 has a volume of approximately 134 CF, and non-RCRA hazardous soil will be removed to a total depth of 2 ft bgs (5.0 CY). Proposed excavation AOC-2-3 has a volume of 176 CF, and non-RCRA hazardous soil will be removed to a total depth of 2 ft bgs (6.5 CY). Proposed excavation AOC-2-4 has a volume of approximately 300 CF, and non-hazardous soil will be removed to a total depth of 2 ft bgs (11 CY). Proposed excavation AOC-2-5 has a volume of approximately 348 CF, non-RCRA hazardous soil will be

removed from 0 to 2 ft bgs (8.6 CY), and non-hazardous soil will be removed from 2 to 3 ft bgs (4.3 CY).

4.1.3 **AOC-3 (Figure 3c)**: AOC-3 is located south of building AA-396. The excavation area addresses soil with non-RCRA hazardous concentrations of soluble lead. The extent of the excavation is defined to the east by boring SB-28-W10. The limits are undefined to the south (existing utilities prevented further step-out sampling), to the north (existing building prevented further step-out sampling), and to the east. An additional 5 sidewall confirmation samples have been proposed for the northern, southern and eastern excavation boundaries to supplement existing date and ensure that impacted soil has been removed. The excavation volume is approximately 156 CF and non-RCRA hazardous waste will be removed to 2 ft bgs (5.8 CY).

4.1.4 **AOC-4 (Figure 3d)**: AOC-4 is located on the north side of Buildings A-798 and A-797. The excavation in this area addresses soil with non-RCRA hazardous concentration of soluble arsenic and non-hazardous concentrations of arsenic above the PSL. The excavation areas are partially defined to the north by step-out sample SB-5-NE5 and to the east by step-out sample SB-5-W5. A total of 6 sidewall confirmation samples have been proposed for the northern, southern, western and eastern excavation boundaries to supplement existing data and ensure that impacted soil has been removed. The proposed excavation contains both non-hazardous and non-RCRA hazardous soil as defined by step-out sampling and has been separated into two separate excavations, AOC-4-1 and AOC-4-2. Proposed excavation AOC-4-1 has a volume of approximately 385 CF, and non-hazardous soil will be removed to a total depth of 2 ft bgs (14 CY). Proposed excavation AOC-4-2 has a volume of approximately 77 CF, and non-RCRA hazardous soil will be removed to a total depth of 2 ft bgs (2.9 CY).

4.1.5 **AOC-5 (Figure 3e)**: AOC-5 is located on the west side of Building A-796. The excavation in this area addresses soil with non-RCRA hazardous concentrations of soluble arsenic and non-hazardous concentrations of arsenic above the PSL. The excavation area is delineated to the south by step-out borings SB-7-SW25, SB-7-SW20, and SB-7-S20. The existing building prevented step-out sampling to the west. A total of 4 sidewall confirmation samples have been proposed for the northern, western and eastern excavation boundaries to supplement existing data and ensure that impacted soil has been removed. The proposed excavation contains both non-hazardous and non-RCRA hazardous soil as defined by step-out sampling and has been separated into two separate excavations, AOC-5-1 and AOC-5-2. Proposed excavation AOC-5-1 has a volume of approximately 823 CF, and non-hazardous soil will be removed to a total depth of 2 ft bgs (31 CY). Proposed excavation AOC-5-2 has a volume of approximately 208 CF, and non-RCRA hazardous soil will be removed to a total depth of 2 ft bgs (7.7 CY).

4.1.6 **AOC-6 (Figure 3f)**: AOC-6 is located on the northwest side of Building AA-293. The excavation in this area addresses soil with non-RCRA hazardous concentrations of soluble lead and non-hazardous concentrations of arsenic above the PSL. The excavation area is laterally undefined. The existing building prevented step-out sampling to the south and Bell Creek prevented step-out sampling to the northeast. A total of 6 sidewall confirmation samples have been proposed for the excavation boundaries to supplement existing data and ensure that impacted soil has been removed. The proposed excavation contains both non-hazardous and non-RCRA hazardous soil as defined by step-out sampling and has been separated into four separate excavations, AOC-6-1, AOC-6-2, AOC-6-3, and AOC-6-4. Proposed excavation AOC-6-1 has a volume of approximately 36 CF, and non-hazardous soil will be removed to a total depth of 2 ft bgs (1.3 CY). Proposed excavation AOC-6-2 has a volume of approximately 136 CF, and non-hazardous soil will be removed to a total depth of 3 ft bgs (5.0 CY). Proposed excavation AOC-6-3 has a volume of approximately 271 CF, and non-hazardous soil will be removed to a total depth of 2 ft bgs (10 CY). Proposed excavation AOC-6-4 has a volume of approximately 305 CF, non-RCRA hazardous soil will be removed from 0 to 2 ft bgs (7.5 CY), and non-hazardous soil will be removed from 2 to 3 ft bgs (3.7 CY).

4.1.7 **AOC-7 (Figure 3g)**: AOC-7 is located south of building AA-293. The excavation area addresses soil with non-RCRA hazardous concentrations of soluble lead. The extent of the excavation is defined to the northwest by boring SB-3-NW5 and to the southwest by boring SB-3-SW10. The limits are undefined to the north (existing building prevented further step-out sampling), to the south, and to the east. An additional 4 sidewall confirmation samples have been proposed for the northeastern, southeastern, and southern excavation boundaries to supplement existing data and ensure that impacted soil has been removed. The excavation volume is approximately 367 CF and non-RCRA hazardous waste will be removed to 2 ft bgs (14 CY).

4.1.8 **AOC-8 Figure 3h)**: AOC-8 is located east of the cafeteria and south of building J-131. The excavation area addresses soil with non-hazardous concentrations of arsenic above the PSL. The extent of the excavation is defined to the south by boring SB-20-S5. The limits of the excavation are undefined to the east (existing storage container prevented further step-out sampling), and to the north and east (utilities prevented further step-out sampling). An additional 3 sidewall confirmation samples have been proposed for the north, west, and east excavation boundaries to supplement existing data and ensure that impacted soil has been removed. The excavation volume is approximately 283 CF and non-hazardous waste will be removed to 3 ft bgs (10 CY).

4.1.9 **AOC-9 (Figure 3i)**: AOC-9 is located on the western side of the athletic track. The excavation in this area addresses soil with non-hazardous concentrations of arsenic above the PSL. The excavation boundary is defined to the west by step-out boring SB-44-W5.

The excavation boundary was not defined to the east (existing water line prevented further step-out sampling), south, and north. A total of 5 sidewall confirmation samples and one bottom sample have been proposed for the excavation boundaries to supplement existing data and ensure that impacted soil has been removed. The proposed excavation contains non-hazardous soil as defined by step-out sampling and has been separated into two separate excavations, AOC-9-1 and AOC-9-2. Proposed excavation AOC-9-1 has a volume of approximately 656 CF, and non-hazardous soil will be removed to a total depth of 3 ft bgs (24 CY). Proposed excavation AOC-9-2 has a volume of approximately 262 CF, and non-hazardous soil will be removed to a total depth of 2 ft bgs (9.7 CY).

4.1.10 **AOC-10 (Figure 3j)**: AOC-10 is located east of Bleachers #4. The excavation in this area addresses soil with non-RCRA hazardous concentrations of soluble arsenic and non-hazardous concentrations of arsenic above the PSL. The excavation area is undefined in all directions. A total of 6 sidewall confirmation samples have been proposed for the northern, southern, western, and eastern excavation boundaries and one bottom sample to supplement existing data and ensure that impacted soil has been removed. The proposed excavation contains both non-hazardous and non-RCRA hazardous soil as defined by step-out sampling and has been separated into two separate excavations, AOC-10-1 and AOC-10-2. Proposed excavation AOC-10-1 has a footprint of approximately 408 CF, and non-hazardous soil will be removed to a total depth of 2 ft bgs (15 CY). Proposed excavation AOC-10-2 has a footprint of approximately 305 CF, and non-RCRA hazardous soil will be removed to a total depth of 3 ft bgs (11 CY).

4.1.11 **AOC-11 (Figure 2k)**: AOC-11 is located west of building AA-290. The excavation in this area addresses soil with non-RCRA hazardous concentrations of soluble arsenic and non-hazardous concentrations of arsenic above the PSL. The excavation area is defined to the west by step-out boring SB-38-W10 and to the southwest by step-out boring SB-38-SW25. A total of 4 sidewall confirmation samples and have been proposed for the northern, southern, and eastern excavation boundaries to supplement existing data and ensure that impacted soil has been removed. The proposed excavation contains both non-hazardous and non-RCRA hazardous soil as defined by step-out sampling and has been separated into two separate excavations, AOC-11-1 and AOC-11-2. Proposed excavation AOC-11-1 has a volume of approximately 119 CF, and non-hazardous soil will be removed to a total depth of 3 ft bgs (4.4 CY). Proposed excavation AOC-11-2 has a volume of approximately 617 CF, non-RCRA hazardous soil will be removed from 0 to 2 ft bgs (15 CY), and non-hazardous waste will be removed from 2 to 3 ft bgs (7.6 CY).

4.1.12 **AOC-12 (Figure 3l)**: AOC-12 is located east of building AA-290. The excavation area addresses soil with non-RCRA hazardous concentrations of soluble lead. The extent of the excavation is defined to the north by boring SB-39-N10, to the east by boring SB-39-E5, and to the south by boring SB-39-S5. The limits are undefined to the west (existing building

prevented further step-out sampling). An additional 1 sidewall confirmation sample has been proposed for the western boundary to supplement existing data and ensure that impacted soil has been removed. The excavation volume is approximately 170 CF and non-RCRA hazardous waste will be removed to 2 ft bgs (6.3 CY).

The estimated excavation volumes in **Table 1** are a summary of the above-listed AOCs.

5.0 REMOVAL ACTION IMPLEMENTATION

The field procedures and methods that will be used to implement the removal action are described in this section. This section also specifies activities to be completed by the Remediation Contractor (Contractor) that will be handling the soil and the Environmental Consultant (Consultant) hired by OEHS to provide oversight and reporting services. Contractor also applies to the general contractor/design build entity responsible for completing the Project.

5.1 PUBLIC PARTICIPATION

5.1.1 SOIL REMOVAL PLAN

Like the PEA-E, two versions of this SRP are being created: a draft version and a final version. The difference between the two depends on if the public has had a chance to comment on the document as part of the California Environmental Quality Act (CEQA) approval process. The draft version is pre-public comment, and the final is post-public comment. The cover page of this document indicates which version of the document this is. The text of this section in this draft version will be revised to state the following:

- Where the draft PEA-E was posted online (likely to be https://www.lausd.org/siteassessment)
- When the public comment period occurred,
- Copies of all comments received, if any, and
- Responses to all comments in English and Spanish.

5.1.2 FIELDWORK

Prior to beginning fieldwork for the proposed removal action, the Consultant will distribute a SRP Work Notice to Canoga Park Senior High School students and staff and nearby residents and businesses (i.e., within line-of-sight). The notice will also be laminated and posted along the fence line of the project. The notice will be prepared in English and Spanish.

5.2 HEALTH AND SAFETY PLAN

At least two site-specific Health and Safety Plans (HASPs) will be prepared for the project: one by and for each involved Contractor and one by and for the Consultant. The HASPs will outline current safety standards as defined by the USEPA, the Occupational Safety and Health Administration, and the National Institute of Occupational Safety and Health. Additionally, the HASP will be prepared in accordance with guidelines set forth in Title 8 of CCR Section 5192.

Prior to the commencement of each day's activities, a tailgate health and safety meeting will be held. Everyone on-site working on activities associated with this SRP will be required to sign the appropriate HASP(s) to demonstrate that they are familiar with the HASP and that they participated in, or were briefed on, the daily tailgate meeting.

5.3 SOIL MANAGEMENT PLAN

At least thirty (30) days prior to the planned removal of any soil covered by this SRP, the Contractor shall prepare and submit for review and approval by OEHS a Soil Management Plan (SMP). OEHS has up to seven (7) days to approve, comment or reject the SMP. At a minimum, the SMP must include the following:

- Timing statements that;
  - LAUSD will be given at least three (3) business days' notice prior to any activities that require the Consultant.
  - OEHS will be given at least three (3) business days to certify profiles,
  - OEHS will be given at least three (3) business days to approve manifests,
  - Contractor understands that AOCs must remain undisturbed up to three (3) business days after the collection of the soil samples to allow for the receipt of the laboratory reports.
- Statements that;
  - This SRP was reviewed.
  - Soil within ten feet (10 ft) of the limits of any AOC will not be disturbed prior to the excavation by Contractor and subsequent closure by OEHS of that AOC.
  - The hardscape (i.e., pavement, etc.) covering any AOC will not be removed more than five (5) days before the excavation of that AOC.
  - If Contractor removes any structures (e.g., buildings) that are necessary to lay out an AOC, Contractor becomes responsible for providing the resources necessary (i.e. survey crew) to determine the limits of that AOC.
- Identify if the soil will be direct loaded, stockpiled, or placed in a container.
- SCHEDULE section that identifies when the AOCs will be removed (e.g., all at once, in phases with AOCs identified, etc.)
- Identify anticipated facility(ies) that will receive the non-hazardous soil with anticipated route(s) from the Site to that facility.
- Identify anticipated facility(ies) that will receive the hazardous soil with anticipated route(s) from the Site to that facility.
- It is possible that by the time the impacted soil is removed from the Site that the laboratory analytical results contained in the PEA-E will be more than a year old. The SMP must identify if any additional laboratory analysis is necessary to allow the facility to create a profile. Should additional analyses be necessary, the Consultant will complete the analyses identified by the Contractor. The Contractor, not the Consultant, will be responsible for

determining the correct analyses. If necessary, the Contractor's schedule must include at least 30 days for the Consultant to collect and report on the results.

- EQUIPMENT section that includes the list of equipment anticipated to be used. This section should also include the statement that the bucket used to excavate the AOCs will be smooth (i.e., no teeth)
- VARIANCE section that identifies any activities that must be performed in a manner that deviates from this SRP. This section must describe why each variation is necessary. The section must indicate the sentence "No variances requested" if that is the case.

5.4 SITE PREPARATION AND SECURITY MEASURES

Site preparation activities, prior to mobilization for the proposed soil removal action, may include Site inspections, surveying, marking excavation limits, and improvement of access gates/roads as necessary. It is assumed that any currently existing buildings and pavement overlying or adjacent to the impacted soil areas will be removed prior to excavation work.

5.4.1 DELINEATION OF EXCAVATION AREAS

The lateral and vertical extent of impacted soil was estimated based on the previous investigation activities. The estimated limits of impacted soil are shown on **Figures 3a thru 3i** for AOC-1 through AOC-12. The volume of soil removed may increase when the excavation work is conducted and will be based on the results of the confirmation soil sampling and analysis required to confirm the excavation walls and depths have reached clean (i.e., below screening levels) soil. A survey of the initial and step-out soil boring locations is provided in **Appendix A.**

5.4.2 UTILITY CLEARANCE

Prior to commencing with excavation activities, the Contractor will contact Underground Service Alert (USA) at least 72 hours in advance and request to identify the location of the utilities that enter the Site. The Consultant will clearly mark the proposed excavation areas with white paint as required by USA. USA will contact all utility owners of record within the Site vicinity and notify them of the intent to excavate. All utility owners of record will be expected to clearly mark the position of their utilities on the ground surface at they enter the Site, or mark if there is no conflict.

Contractor is responsible for the identification and protection of all underground structures. Prior to subsurface excavation work, a geophysical survey, using a magnetometer and ground penetrating radar, is recommended in proposed excavation areas to also help identify subsurface utilities and features (i.e., underground utility tunnel), or other potential structures. Necessary precautions are required to be taken prior to and during the excavation activities to ensure that subsurface utility lines and other structures are identified and marked so they are not damaged.

If available, LAUSD should provide copies of documents related to the presence of subsurface utilities and structures to the Contractor.

5.4.3 SECURITY MEASURES

The school is secured by perimeter fencing. Contractor is responsible for isolating the Project Area with temporary fencing as required by other contract documents. At a minimum, the Contractor will place barricades, such as delineators with caution tape, around the perimeters of the excavation areas at the end of each day to reduce the potential for unauthorized personnel to enter the excavations.

5.4.4 CONTAMINANT CONTROL

The Contractor will perform dust suppression by lightly spraying or misting the work areas with water. Water mist may also be used on soil placed in temporary stockpiles or in the transport trucks. After the soil is loaded into the transport trucks, the soil will be covered to prevent soil from spilling out of the truck during transport to the disposal facility. Additionally, truck tires and trailers will be cleaned as needed to remove Site soil, before leaving the Site.

If ponded precipitation occurs or water seeps into the excavations prior to confirmation soil sampling, the Contractor will either wait for the water to evaporate or pump the water from the excavation into an aboveground container (e.g., tank or drum(s)). The Consultant would then sample the water in the container for profiling purposes. OEHS would then direct the Contractor to either incorporate the water in the container into their dust control operations or dispose of the water offsite in accordance with federal, state, and local regulations.

While on the school property, all vehicles will maintain slow speeds (i.e., less than 5 miles per hour) for safety purposes and for dust control measures. Efforts will also be made to minimize the soil drop height from the excavator bucket into the transport trucks.

5.4.5 PERMITS AND PLANS

The Contractor is responsible for obtaining all permits and preparing the construction plans for the Project.

5.5 WASTE MANAGEMENT

It is anticipated that four types of wastes could be generated at the Site during implementation of the SRP including the following:

- Recyclable construction debris, including concrete rubble and rock. The recyclable construction debris will be transported to a local recycling facility via dump trucks (end dumps), unless re-use options are available on-site, or there is no local recycling facility available.

- Non-recyclable construction debris include weeds, trash, and discarded personal protective equipment (PPE), etc. The non-recyclable construction debris are not considered hazardous and will be transported and disposed at a local landfill via dump trucks.
- All lead- and arsenic-impacted non-hazardous material will be transported to a licensed and approved facility that is properly permitted to accept the waste classification (i.e., nonhazardous or non-RCRA). The facilities should be permitted as the final location for the soil (i.e., not a transfer facility) and must be pre-approved by LAUSD for disposal of the material.
- Wastewater generated during soil removal activities including but not limited to decontamination liquids will be temporarily placed inside 55-gallon Department of Transportation-approved drums. The drums will be labeled, profiled and transported off-site to an approved treatment or disposal facility.

5.6 QUALITY ASSURANCE / QUALITY CONTROL

Quality assurance/quality control (QA/QC) samples and measure to be used by the Consultant during project execution are discussed below.

Field QC samples will be collected and analyzed during project sampling to assess consistency and performance of the sampling program. Field QC samples will include field duplicates and temperature blanks.

5.6.1 FIELD DUPLICATES

A field duplicate is defined as two or more samples collected independently at the same sampling location during a single act of sampling. One field duplicate will be collected for every 10 primary project samples that are submitted to the laboratory and will be analyzed for the same analyses as the primary field sample. If fewer than 10 primary samples are collected, at least one field duplicate should still be collected and analyzed per day. Each of the field duplicates will be uniquely identified with a coded identifier, which will be in the same format as other sample identifiers.

5.6.2 TEMPERATURE BLANKS

Consultant to request that laboratory provide one temperature blank to accompany each cooler containing project samples submitted to the laboratory. Temperature measurements are essential to verify proper sample preservation for all analyses requiring sample preservation by refrigeration ($4^o \pm 2^o$ Celsius). Laboratory personnel will obtain temperature measurements from the temperature blank upon receipt of sample shipment containers, and this measurement will be recorded on the chain-of-custody form.

5.6.3 LABORATORY QC SAMPLES AND CRITERIA

Laboratory QC data are necessary to determine the precision and accuracy of the analyses, confirm matrix interferences, and demonstrate target compound contamination of sample results. QC

samples will be analyzed routinely by the analytical laboratory as part of the method QC procedures.

5.6.4 UPDATED PROFILE SAMPLING (IF NECESSARY)

Should the Contractor's SMP indicate that new profiling samples must be collected to satisfy the disposal facility(es), the Consultant shall collect the necessary samples. Should the results of this sampling indicate a change in the waste classification, the more conservative disposal will apply. For example,

- If the results indicate a non-RCRA AOC is nonhazardous, the soil will still be sent off as non-RCRA waste,
- If the results indicate a non-RCRA AOC is a RCRA hazardous waste, the soil will be sent off as RCRA waste.

5.7 FIELD DOCUMENTATION

During the impacted soil excavation activities, a field engineer or geologist under supervision of a California PE or PG working for the Consultant will document field observations. The field notes will contain pertinent observations about excavation dimensions, equipment operation, unusual conditions encountered during excavation, date and time of arrival, general Site conditions, confirmation soil sampling activities, and other field observations relating to the Site. Field documentation will also include photographs and written logs as described below.

5.7.1 FIELD LOGBOOKS

Logs will be maintained daily and will include:

- Records of all personnel and project-related visitors at the Site;
- Work conducted;
- Equipment used;
- Dust monitor readings from field monitoring;
- VOC monitoring if applicable;
- A record of all formal Site meetings such as health and safety meetings, daily tailgate meetings, and agency meetings; and
- Description of all photographs taken to document the field conditions and activities.

Additionally, the Contractor and Consultant to work cooperatively to maintain a detailed log of each truck loaded with soil at the Site, and will include truck identification and driver name, destination, excavated materials and estimated size of load, and a field copy of the shipping manifest.

5.7.2 CHAIN-OF-CUSTODY RECORDS

The Consultant shall maintain detailed chain-of-custody records for all confirmation samples.

5.7.3 PHOTOGRAPHS

The Consultant will document Site conditions and/or excavations with photographs before, during, and after excavation activities.

5.8 EXCAVATION

To mitigate the impacted soils for the protection of human health, approximately 280 CY of existing soil will be excavated and removed from the Site. The total volume of soil required to be excavated based on current screening levels may increase after the currently existing structures and pavement are removed, the impacted soil is excavated, and the confirmation sampling is completed, as discussed above in this SRP. The excavated soil will be handled, transported, and disposed of by the Contractor based on the analytical results from the PEA-E sampling activities.

Approximately 180 CY of soil will be managed as non-hazardous soil and 100 CY of soil will be managed as non-RCRA hazardous soil. It is possible that post PEA-E sampling data may result in a different waste classification of the soil to be disposed of, but based on the existing data to date, a classification change is not anticipated at this time.

If regulatory screening levels change between the date of this SRP and the time the removal activities occur, soil excavation and disposal volumes may be subject to change. The Contractor will obtain approval from the disposal facilities prior to the start of excavation activities.

5.8.1 EXCAVATION PROCEDURES

Conventional construction equipment, such as a backhoe or excavator with bladed buckets, will be used to excavate the soil. Dust and vapor suppression procedures are discussed above, and monitoring is discussed below.

For the areas where concrete/asphalt exists above the proposed removal area, the existing concrete/asphalt will be saw-cut and broken out with a pneumatic concrete breaker or equivalent. The concrete/asphalt debris will be segregated and stockpiled nearby for offsite disposal/recycling when the remaining concrete is removed during non-remedial school redevelopment activities.

Excavations are not anticipated to be deeper than 3 feet bgs; therefore, sloping and shoring should not be required. It is assumed that buildings will be removed prior to excavation and sloping/shoring will not be required unless buildings will be left in place. Once the excavations are completed at each selected location, confirmation soil sampling will be conducted. Excavations will proceed in lateral and vertical directions until the first of 1) cleanup goals are demonstrated to have been met, or 2) the Project Area boundaries are reached. LAUSD OEHS will provide written direction, email is acceptable, on the need for additional excavation or approval to backfill.

It is anticipated that the impacted excavated soil will be direct loaded into trucks for immediate transport to an appropriate offsite disposal facility, to the extent possible. Roll-off bins may also

be used. Temporary stockpiling may be necessary based on truck availability and/or other logistics. If the soil is stockpiled, the stockpiles will be placed on plastic sheeting and covered with plastic sheeting at the end of the day, and the edges of the plastic sheeting will be secured with sandbags or similar. The stockpiles will remain covered until load-out.

5.8.2 WASTE SEGREGATION OPERATIONS

The soil excavated from individual excavations within the proposed excavation footprint areas (as depicted on **Figures 3a thru 3l**) areas will be properly managed. Approximately 180 CY can be managed as non-hazardous waste and 100 CY can be managed as non-RCRA hazardous waste. The Contractor and Consultant will oversee truck loading or roll-off bin removal operations to ensure that a properly completed non-hazardous waste manifests/bills of lading accompany each truck or bin and that it is directed to the appropriate disposal facility, based on its waste classification.

If impacted soil is temporarily stockpiled onsite, the plastic covering will be marked with large letters, applied with spray paint, to indicate the source of the soil and its waste classification. Labels that indicate the waste generator, waste type, accumulation start date, and contact information will be applied to the outside of any drums or roll-off bins used to temporarily store impacted soil. Strict segregation of soil based on waste type will be maintained to avoid any mixture of non-hazardous soil and adjacent clean soil, and hazardous soil.

5.8.3 SCAQMD RULE 1466

The removal of the soil from the AOCs must be completed in accordance with SCAQMD Rule 1466. The current version of the entire Rule should be reviewed and complied with. The requirements for between 50 and 500 cubic yards must be complied with because 280 CY of impacted soil will be removed. If the soil is directly loaded into a truck bed, trailer, or bin for transport, at a minimum, the following sections apply:

- (e)(3) through (e)(9),
- (e)(13) through (e)(15), and
- Subdivisions (f), (h), and (i).

Appendix B contains the above requirements as of the publication date of this SRP.

5.8.4 DECONTAMINATION PROCEDURES

Protocols must be followed to prevent cross-contamination from the use of construction equipment and implementation of other activities as a part of the removal action. The following decontamination procedures must be used by the Contractor:

- Equipment used for excavation will be dry decontaminated prior to moving to other areas of the Site.

- Prior to exiting the Site, the transport truck drivers will be required to stop and inspect the tires and sides of their trucks for loose soil debris. Extra soil will be removed using a wire brush or broom as deemed appropriate. This cleanup/decontamination area will be setup as close to the loading area as possible to minimize spreading the impacted soil.
- Street sweeping procedures will be implemented as necessary to reduce the potential for fugitive dust and migration of contamination.

5.9 AIR AND METEOROLOGICAL MONITORING

The project area is located within the jurisdiction of the SCAQMD. Based on the projected volume of soil requiring excavation (exceeding 50 CY), airborne dust monitoring will be conducted by the Consultant using portable dust monitors to verify and document dust suppression efforts, per the SCAQMD's Rule 1466. The air monitoring should be done in compliance with the provisions of the current Rule, including particulate matter measuring 10 micrometers or less (PM10) monitoring, dust control measures, notification, signage, and recordkeeping requirements. Rule 1466 allows for alternative dust control measures and ambient dust concentration limits, provided the provisions are pre-approved by the Executive Officer. Fugitive dust control measures will be implemented at the Site to mitigate offsite dust migration onto neighboring properties through light watering of the active excavation areas throughout the removal action. Air monitoring for dust will be performed during the excavation activities in the worker's breathing zone, in the general work area, and at the perimeters of the excavation areas utilizing an upwind/downwind sampling approach.

Access to the Site will be controlled and excavation will not be conducted during times of high wind conditions (e.g., consistent wind speeds greater than 15 miles per hour and/or gusts of greater than 25 miles per hour). Onsite ambient weather conditions (wind speed and direction, temperature, and relative humidity) should be monitored by the Consultant with an onsite meteorological station.

Consultant has the authority to stop work if they feel that Contractor is failing to meet their dust suppression obligations under Rule 1466.

5.10 CONFIRMATION SAMPLING

The confirmation sampling program for the proposed removal action will consist of collecting soil confirmation samples from the bottom and sidewalls of the excavations that were not defined by step-down and step-out sampling previously conducted during the PEA-E investigation.

Confirmation soil sampling will be conducted at a minimum frequency of approximately one sample per 20 linear feet of sidewall and one per 500 square feet of excavation bottom. The sidewall samples will be collected at mid-depth of the excavation. Confirmation sample locations are depicted on **Figures 3a thru 3l.** QA/QC samples will be collected and analyzed as described in Section 5.6.

The confirmation soil samples will be collected from locations along excavation sidewalls and bottoms by scooping the soil directly into laboratory-supplied, new glass sample jars from the soil face. Dry decontamination methods (paper towels and Simple Green®, or equivalent) of sampling equipment will be completed between samples.

The soil samples will be labeled with the following information: sample identification; project number; Site name; date and time of collection; requested analysis; and sampler initials. This information plus requested analysis will be also added to the chain of custody form.

The sample identification will follow the following format: AOC No., direction, sample number in that direction. For example, the identification for the initial soil sample collected from the north wall of AOC-1 would be "AOC-1-N-1. Should this sample fail, the identification for the next confirmation sample would be "AOC-1-N-2. The identification for the initial northerly sample from the west wall of AOC-1 would be "AOC-1-NW-1".

Chain-of-custody documentation will be maintained for all samples and be delivered with the samples to the laboratory.

Confirmation soil samples collected from AOC-1 through AOC-12 will be analyzed for lead using USEPA Method 6010B and/or for arsenic using EPA Method 6020. Review the associated metal(s) as identified in Section 4 for each AOC to determine the proper metal(s) to be tested for. All samples with total metal concentrations above 50 mg/kg from non-RCRA AOCs will additionally be analyzed to determine the STLC.

The quantity of soil removed from the excavations will be reconciled by comparing the volumes excavated to the quantities reported on the waste manifests. Copies of the waste manifests, showing appropriate signatures from the receiving facility, will be included in the RACR.

The laboratory results of the confirmation soil sampling will be reviewed by the Consultant and LAUSD – OEHS and compared against the cleanup goals stated herein, which are the following:

- Lead = 80 mg/kg, STLC = 5 mg/L
- Arsenic = 12 mg/kg, STLC = 5 mg/L

Upon review of the confirmation soil sample results, step-out or step-down soil sampling and additional excavation may be requested by LAUSD – OEHS.

The Consultant shall enter all the data collected from the PEA-E into a spreadsheet. ProUCL will be used to update the 95% UCL for arsenic and lead as sample locations are removed and new samples are collected.

5.11 IMPORT SOIL SAMPLING

If soil is imported to the Site it needs to be tested and certified in accordance with LAUSD Section 01 4524 specifications – "Environmental Import/Export Materials Testing" (latest version), which includes provisions for LAUSD OEHS review and approval prior to soil import.

5.12 TRANSPORTATION PLAN FOR OFFSITE DISPOSAL

The excavated soil will be segregated and managed as explained in Section 5.8. Non-hazardous soils will be transported to an approved landfill for disposal. Non-RCRA hazardous soils will be transported to a licensed and properly permitted Class 1 disposal facility or an out-of-state facility permitted to accept such waste. If RCRA wastes are encountered, the Class 1 disposal facility that accepts the RCRA hazardous soil may require that the soil be treated prior to disposal pursuant to the land ban restrictions found at Title 40, CCR, Part 376. The final determination as to which facilities are used is subject to approval by the LAUSD OEHS prior to beginning soil removal activities.

5.13 BACKFILL AND SITE RESTORATION

Backfilling of the excavations will be conducted in accordance with the Project's geotechnical Engineer and are beyond the scope of this SRP.

5.14 VARIANCES

As conditions in the field may vary, it may become necessary to implement minor modifications to soil removal activities as presented in this SRP. Field personnel will notify the LAUSD OEHS project manager when deviations from this SRP are necessary. Modifications to the SRP will be documented in the field logbook and in the RACR.

6.0 REPORT OF COMPLETION

Following completion of the removal action, a RACR will be prepared and submitted to the LAUSD for review and approval. A RACR documenting activities conducted pursuant to this SRP will be prepared by the Environmental Consultant upon completion of the soil removals. At a minimum, the RACR will include the following:

- Summary of field activities
- Summary of laboratory results
- Conclusions and recommendations
- Signature and seal of California-licensed civil engineer or geologist responsible for the work
- Figures showing final excavation extents and soil sampling locations
- Tables summarizing confirmation sample analytical results
- Copies of manifests and weight tickets
- Copies of laboratory reports
- Photographic documentation of the work with dates and descriptions
- Copies of air monitoring records
- Copies of daily field notes
- Copies of final ProUCL outputs for arsenic and lead

7.0 COST ESTIMATE

A cost estimate for the proposed soil removal action described above was prepared to aid in evaluating the impacted-soil removal and disposal activities. A breakdown of the costs is shown in **Table 2**, and is an approximation that can be used to provide estimates for budgetary purposes. The total estimated cost is $350,000, with an upper bound of $530,000 (+50%) and a lower bound of $280,000 (-20%).

BASIS OF BEARING

THE HORIZONTAL BASIS OF BEARING FOR THIS TOPOGRAPHIC MAP IS THE CENTERLINE OF TOPANGA CANYON BOULEVARD (FORMERLY TOPANGA CANYON AVENUE) BEING "NORTH" AS SHOWN ON TRACT NO. 9267, MB. 136/98-99.

BENCHMARK

CITY OF LOS ANGELES BENCHMARK NO. 06-06688
DESCRIPTION: WIRE SPK IN N CURB VANOWEN ST; 0.4FT E OF C
CURB RETURN E OF TOPANGA CANYON BLVD
ELEVATION = 799.284' (NAVD 1988) YEAR 2000

LAUSD BENCHMARK:
CHIS "X", N ARCADE WEST SIDE OF CAFETERIA BUILDING #31'
PLUS OR MINUS E/O S AND E LINES PROD.
BLDG. # "E" ELEVATION = 796.02

ESTABLISHED BENCHMARK:
N ARCADE WEST SIDE OF CAFETERIA
ELEVATION = 798.75' IS BASED ON CITY OF LOS ANGELES BENCHMARK.

CONVERSION TO LAUSD BENCH MARK
LAUSD BM = 798.75 - 2.73 = 796.02

TOPOGRAPHIC SURVEY NOTES:

1. THIS MAP REPRESENTS A TOPOGRAPHIC SURVEY OF VISIBLE FIELD CONDITIONS AT THE TIME OF THIS SURVEY.
2. AS-BUILTS PROVIDED BY LAUSD ARE FOR REFERENCE ONLY.
3. NO ADDITIONAL SURVEY AND GPR THAT WAS RECENTLY REQUESTED IN THIS DRAWING.

'JANUARY 2007 VERSION'

APPENDIX B

SCAQMD REQUIREMENTS

(e) Requirements to Minimize Fugitive Dust Emissions

(3) An owner or operator conducting on-site earth-moving activities shall:

(A) Adequately wet to the depth of earth-moving activity and allow time for penetration; and

(B) Adequately wet at frequencies to prevent the generation of visible dust plumes.

(4) An owner or operator that is moving vehicles on, within, or off a site shall:

(A) Post signs at all entrances of the site to designate the speed limit as 15 mph;

(B) Stabilize the surface of all vehicular traffic and parking areas by applying gravel, paving, chemical stabilizers pursuant to paragraph (e)(13), or dust suppressant;

(C) Not allow any track-out outside of the property line that is 25 feet or more in cumulative length. Remove any track-out at a minimum frequency of once each day using a vacuum equipped with a filter(s) rated by the manufacturer to achieve a 99.97 percent control efficiency for 0.3 micron particles;

(D) Clean the soil from the exterior of trucks, trailers, and tires prior to the truck leaving the site, without the use of forced air; and

(E) Utilize at least one of the following measures at each vehicle egress from the site to a public road:

(i) Install a pad consisting of washed gravel (minimum-size: 1 inch), maintained in a clean condition, to a depth of at least 6 inches and extending at least 30 feet wide and at least 50 feet long;

(ii) Pave the surface extending at least 100 feet from the property line and at least 30 feet wide;

(iii) Utilize a wheel shaker/wheel spreading device consisting of raised dividers (rails, pipes, or grates) at least 24 feet long and 30 feet wide; or

(iv) Install and utilize a wheel washing system to remove soil from tires and vehicle undercarriages.

(5) An owner or operator conducting on-site earth-moving activities shall ensure that stockpiles with any soil with applicable toxic air contaminant(s) be:

(A) Segregated from non-contaminated stockpiles;

(B) Labelled with “South Coast AQMD Rule 1466 – Control of Particulate Emissions from Soils with Toxic Air Contaminant(s) Applicable Soil”;

(C) Maintained to avoid steep sides or faces that exceed the angle of repose;

(D) No more than 400 cubic yards of soil;

(E) Maintained to minimize fugitive dust emissions containing toxic air contaminants by applying chemical stabilizers pursuant to paragraph (e)(13), applying dust suppressant, or completely covering pursuant to paragraph (e)(14); and

(F) Either chemically stabilized pursuant to paragraph (e)(13) and/or completely covered pursuant to paragraph (e)(14) at all times when earthmoving activities and ambient PM10 monitoring are not occurring.

(6) An owner or operator conducting truck and trailer loading activities of soil containing applicable toxic air contaminant(s) shall:

(A) Apply dust suppressant to material prior to loading;

(B) Empty the loader bucket slowly so that no visible dust plumes are generated

(C) Minimize the drop height from the loader bucket;

(D) Maintain at least 6 inches of space between the soil and the top of the truck bed and trailer while transporting within a site; and

(E) Completely cover the truck bed and trailer prior to leaving the site.

(7) An owner or operator conducting truck and trailer unloading activities of soil containing applicable toxic air contaminant(s) shall:

(A) Apply dust suppressant to material prior to unloading; and

(B) Empty the trailer slowly so that no visible dust plumes are generated.

(8) The owner or operator shall immediately remove any spilled soil.

(9) The owner or operator shall cease on-site earth-moving activities if the wind speed is greater than 15 mph averaged over a 15-minute period or the instantaneous wind speed exceeds 25 mph.

(13) When utilizing a chemical stabilizer, an owner or operator shall:

(A) Ensure the chemical stabilizer meets any specifications, criteria, or tests required by any federal, state, or local agency or any applicable law, rule, or regulation; and

(B) Unless otherwise indicated, use a sufficient concentration of the chemical stabilizer and an application frequency sufficient to maintain a stabilized surface and no less than what is specified by the manufacturer for the period of inactivity

(14) When using a cover for stockpiles, an owner or operator shall ensure the cover:

(A) Is at least 10 mil thick plastic sheeting that overlaps a minimum of 24 inches; and

(B) Is anchored and secured so that no portion of the soil is exposed to the atmosphere.

(15) An owner or operator that is conducting earth-moving activities of soil with applicable toxic air contaminant(s) at a school, joint use agreement property, adjacent athletic area, or at a site that is adjoining a school, joint use agreement property, or adjacent athletic area shall:

(A) Only conduct earth-moving activities at a school or at a site that is adjoining a school outside of the hours between 7:30 a.m. and 4:30 p.m. on days when the school is in session;

(B) Not conduct earth-moving activities at a school, joint use agreement property, adjacent athletic area, or at a site that is adjoining a school, joint use agreement property, or adjacent athletic area if there is a school sponsored activity or youth organized sports

taking place at that site; (C) Handle excavated soils with applicable toxic air contaminant(s) by:

(i) Immediately placing soil in a leak-tight container whereby any contained solids or liquids are prevented from escaping or spilling out;

(ii) Directly loading soil in truck beds, trailers, and bins for transport, applying chemical stabilizer pursuant to paragraph (e)(13) or dust suppressant, and completely covering prior to transporting; or

(iii) Stockpiling pursuant to paragraph (e)(5), in a fenced area that is not accessible to the general public, and locked when not in use; and

(iv) Within five days of its excavation, remove all soil with applicable toxic air contaminant(s) from the site.

(f) Notification Requirements

(1) The owner or operator shall electronically submit an initial notification to the Executive Officer, using a format approved by the Executive Officer, of the intent to conduct any on-site earth-moving activities.

(A) Initial notifications shall be submitted:

(i) at least 72 hours but no more than 30 days prior to conducting any earth-moving activities on any site meeting the applicability requirements of subdivision (b); or

(ii) As soon as the information becomes available but no later than 48 hours after the information becomes available that on-site earthmoving activities of soil with applicable toxic air contaminant(s) exceed 50 cubic yards.

(B) Initial notifications shall include the following requirements:

(i) Name, address, telephone number, and e-mail address of the owner or operator;

(ii) Name, telephone number, and e-mail address of the on-site dust control supervisor;

(iii) Project name and, if applicable, the project identification number from the designating agency;

(iv) Project location (address and/or coordinates);

(v) Identify whether the site is a school, joint use agreement property, adjacent athletic area, or is adjoining a school, joint use agreement property, or adjacent athletic area;

(vi) A map indicating the specific location(s) of each on-site earthmoving activity and the concentrations of the applicable toxic air contaminant(s) and location of PM10 monitors;

(vii) A description of the on-site earth-moving activities, estimated volume of soil with applicable toxic air contaminant(s), and a schedule that includes the anticipated start and completion dates of on-site earth-moving activities;

(viii) Current and/or previous type of operation(s) and use(s) at the site;

(ix) Applicable exemption(s); and

(x) Whether the notice being provided is a revised notification.

(2) Notification Updates
Initial notifications pursuant to paragraph (f)(1) shall be updated when any of the following conditions arise:

(A) Earlier Start Date
A change in the start date of on-site earth-moving activities to an earlier date shall be reported to the South Coast AQMD no later than 72 hours before any on-site earth-moving activities begin.

(B) Later Start Date
A delay in the start date of on-site earth-moving activities shall be reported to the South Coast AQMD as soon as the information becomes available, but no later than the original start date.

(C) Change in Exemption Status
Any change(s) in exemption status pursuant to subdivision (k) shall be reported to the South Coast AQMD as soon as the information becomes available, but no later than 48 hours after the information becomes available.

(D) Completion Date
The completion date of on-site earth-moving activities shall be reported to the South Coast AQMD no later than 48 hours after on-site earth-moving activities are completed.

(3) Within 72 hours of an exceedance of the PM10 emission limit specified in paragraph (d)(2), the owner or operator shall electronically submit a notification to the Executive Officer, using a format approved by the Executive Officer, of the exceedance and shall include the following information:

(A) Name, address, telephone number, and e-mail address of the owner or operator;

(B) Name, telephone number, and e-mail address of the on-site dust control supervisor;

(C) Project name and, if applicable, the project identification number from the designating agency;

(D) Project location (address and/or coordinates);

(E) PM10 monitoring results and wind direction and speed results pursuant to subdivision (d), including location of monitors, result, date and time of exceedance(s), 12 hours before first exceedance, and 12 hours after last exceedance;

(F) On-site earth-moving activities occurring at the date and time of exceedance(s); and

(G) Dust control measure(s) taken to mitigate fugitive dust

(h) Recordkeeping Requirements
The owner or operator shall maintain records for a period of not less than 3 years and shall make such records available to the Executive Officer upon request. At a minimum, records shall be maintained daily and shall include:

(1) Inspections of all stabilized or covered stockpiles containing soils with applicable toxic air contaminant(s) and all re-stabilization, cover repair, and label maintenance activities, including dates and times the specific activities were conducted;

(2) Results of wind and PM10 monitoring, including: ambient PM10 data; rolling average PM10 concentrations and calculations; wind direction and speed corresponding to the rolling average PM10 concentrations; movement of monitoring instruments corresponding to wind direction changes; instrument make and model; settings; proof of valid calibration in accordance with manufacturer's recommended schedule; configuration; calibration, correction, and correlation factors; maintenance; operator training; daily instrument performance check records and manual zero or auto-check results; weekly zero calibration records and intra-instrument precision test data and calculation results; and all instrument logs for all monitoring instruments;

(3) All instrument maintenance activities, including: zero calibration, cleaning, filter replacement, and performance checks, including dates and times of the specific procedures;

(4) Documentation of all DAS and data management system failures, including date and time of the failure, date and time of the correction, the technical issue(s) causing the failure, and activities performed to restore the failed DAS or data management system to working condition;

(5) On-site earth-moving activities conducted and the corresponding volume of soil with applicable toxic air contaminant(s);

(6) Names and business addresses of the transporting and receiving facilities, and a copy of the shipping manifest;

(7) Complaints called in, including the name of complainant and contact information, date and time, on-site earth-moving activities occurring at the date and time, complaint, and action taken to mitigate the source of the complaint; and

(8) A copy of all submitted notifications for the project.

(i) Executive Officer Designated Sites

(1) The Executive Officer may designate a site if the Executive Officer has evidence that the site contains soil with applicable toxic air contaminant(s) as defined in paragraph (c)(16), after consultation with U.S. EPA, DTSC, the State Water Resources Control Board, the Regional Water Quality Control Board, and/or local, county, or state regulatory agencies, and consideration of the following:

(A) Site history, including current and/or previous type(s) of operation(s) and use(s) at the site and regulatory history;

(B) Concentration(s) of applicable toxic air contaminant(s) in the soil;

(C) Background concentration(s) of applicable toxic air contaminant(s);

(D) Volume of soil with applicable toxic air contaminant(s);

(E) Distance to a residence, park, school, joint use agreement property, adjacent athletic area, or a site adjoining a school, joint use agreement property, or adjacent athletic area;

(F) Meteorological data;

(G) Health risk information or other data provided by the owner or operator, if available; and

(H) Ambient monitoring data and other applicable data, if available.

(2) Prior to making a determination, the Executive Officer will notify the owner or operator in writing that the site may be subject to this rule.

(A) In the event the owner or operator exercises this opportunity to demonstrate that this rule does not apply, the owner or operator shall submit information to the Executive Officer within 14 days of the notification substantiating why the site should be excluded from this rule.

(B) Upon final determination, the Executive Officer will notify the owner or operator in writing if the site is subject to this rule.

(3) During the determination period, the owner or operator shall comply with the provisions of this rule or cease all on-site earth-moving activities until a determination is made.

RE: PHASE __II__ REVIEW AND APPROVAL FOR ASBESTOS __X__ and/or LEAD __NA__

The Facilities Environmental Technical Unit (FETU) has reviewed and approved your Phase __II__ document(s) for the project listed below.

School: Canoga Park High School School Code # 3932

Project: Major Modernization Project

Colin No. 10372109 Maximo Work Order No. 35126255

Date of Report: 03/01/23

If you have any questions regarding this approval, please call the FETU at (213) 745-1450.

Sincerely,

Digitally signed by Michael Quilino

I. BOILER VAULT BUILDING (001COH / 24183) – To be Demolish

A. Remove and dispose of as friable and hazardous asbestos waste, the following material(s):

1. Asbestos-containing 9”x9” Green Floor Tile (**ACM**) with associated Black Mastic (**ACM**) on concrete substrate, approximately 700 square feet from Plant Manager’s Office area.

    a) Mastic shall be remove from the concrete substrate with chemical solvent using mechanical means.

2. Asbestos-containing 4” Pipe Insulation (**ACM**), approximately 30 linear feet located in the Crawl Space.

3. Asbestos-containing construction exterior stucco ceiling (**ACCM**), approximately 300 square feet located at the exterior of the building and Telephone Equipment Closet.

4. Asbestos-containing construction Drywall Wall (**ACCM**) with asbestos containing Tape & Mud (**ACM**), approximately 50 square feet located in the Telephone Equipment Closet.

5. Assumed asbestos-containing Fire Doors (**Assumed ACM**), approximately 9 doors, located throughout the building.

B. The work area involved is shown in the attached Figure 2.

II. CAFETERIA BUILDING & LUNCH PAVILION (006CAM / 22637) – To be Demolish

A. Remove and dispose of as friable and hazardous asbestos waste, the following material(s):

1. Asbestos-containing 9”x9” Lt. Brown w/ Yellow & Brown Floor Tile (**ACM**) with associated Black Mastic (**ACM**) on concrete substrate, approximately 300 square feet located at Cafeteria Office, Kitchen Locker Room, and Kitchen Ticket Booth (Cash Room).

2. Asbestos-containing 9”x9” Brown w/ Tan & Orange Floor Tile (**ACM**) with associated Black Mastic (**Non-ACM**) on concrete substrate, approximately 860 square feet located at Wellness Center and Athletic Office.

3. Asbestos-containing 9”x9” Burgundy / Green / Tan (Multi-Color) Floor Tile (**ACM**) with associated Black Mastic (**Non-ACM**) on concrete substrate, approximately 800 square feet located at Storage Room (West of Student Dining Area).

4. Asbestos-containing 9”x9” Tan w/ Yellow & Brown Streaks Floor Tile (**ACM**) with associated Black Mastic (**Non-ACM**) on concrete substrate, approximately 900 square feet located at Student Store.

    a) Mastic shall be remove from the concrete substrate with chemical solvent using mechanical means.

5. Asbestos-containing construction Joint Compound (**ACM**) on Drywall Wall (Non-ACM), approximately 150 square feet located in the Dining and Service Area by Double Doors.

6. Asbestos-containing Thermal System Insulation & Debris (**ACM**), approximately 300 linear feet of pipe insulation with 50 square feet of debris located in the Crawl Space.

   a) An approved South Coast Air Quality Management District (SCAQMD) Procedure 5 work plan will be required for the removal of the presence of asbestos-containing TSI Debris **(ACM**), where alternative combination of techniques and/or engineering controls are going to be used.

7. Assumed asbestos-containing Fire Doors, approximately 35 doors (**Assumed ACM**), located throughout the building.

B. Remove and dispose of as non-friable and non-hazardous asbestos waste, the following material(s):

1. Asbestos-containing Conduit Block Mastic (**ACM**), approximately 30 square feet, located on the Roof – Area A.

2. Asbestos-containing "Transite" Pipe (**ACM**), approximately 12 linear feet located on the Roof – Area A.

3. Asbestos-containing Conduit Wall Mastic (**ACM**), approximately 60 square feet, located on the Roof – Area B.

4. Asbestos-containing Metal Roof Flashing (**ACM**), approximately 80 square feet, located on the Roof – Areas E & F.

5. Assumed asbestos-containing chalkboard / bulletin board mastic (**Assumed ACM**), approximately 400 square feet located throughout the building.

C. The work area involved is shown in the attached Figure 3 & 4.

III. CLASSROOM BUILDING #5 (007DAL / 23422) – To be Demolish

A. Remove and dispose of as friable and hazardous asbestos waste, the following material(s):

1. Asbestos-containing construction Joint Compound (**ACCM**) on Drywall Ceiling (**Non-ACM**), approximately 1,650 square feet located in Room 4 and Storage Rooms #1 & #2 above the 12"x12" Straight Holes Ceiling Tiles.

2. Assumed asbestos-containing Fire Doors (**Assumed ACM**), approximately 4 doors, located throughout the building.

B. Remove and dispose of as non-friable and non-hazardous asbestos waste, the following material(s):

1. Asbestos-containing Window Putty (**ACM**), approximately 120 square feet located on the Exterior Windows.

2. Assumed asbestos-containing Chalkboard / Bulletin Board Mastic (**Assumed ACM**), approximately 300 square feet located in Room 4.

C. The work area involved is shown in the attached Figure 5.

IV. SHOP BULDING #1 (008CAF / 24628) – To be Demolish

A. Remove and dispose of as friable and hazardous asbestos waste, the following material(s):

1. Asbestos-containing Black Mastic (**ACM**) associated with 12”x12” Brown Marble & Lt. Brown (Mix) Floor Tile (**Non-ACM**) along with **Patch** 12”x12” Red Floor Tile (Non-ACM) on concrete substrate, approximately 322 square feet located at Instructional (Classroom) Area.

   a) Mastic shall be remove from the concrete substrate with chemical solvent using mechanical means.

2. Asbestos-containing Joint Compound (**ACM**) on Drywall Ceiling (**Non-ACM**), approximately 322 square feet located in the Instrumental (Classroom) Area above the 12”x12” Ceiling Tiles.

3. Asbestos-containing construction Dash Coat Material (**ACCM**), approximately 3,300 square feet located on the Exterior Walls of the Building.

4. Asbestos-containing construction Joint Compound (**ACCM**) on Unfinished Drywall Ceiling (**Non-ACM**), approximately 300 square feet located in the Attic Space above the Instrumental (Classroom) Area.

5. Assumed asbestos-containing Fire Doors (**Assumed ACM**), approximately 5 doors and 1 rolling door, located throughout the building.

B. Remove and dispose of as non-friable and non-hazardous asbestos waste, the following material(s):

1. Asbestos-containing Window Putty (**ACM**), approximately 140 square feet, located on the Windows of the Building.

2. Assumed Asbestos-containing Cement “Transite” Window Transoms (**Assumed ACM**), approximately 70 square feet located on the Window of the Building.

3. Assumed asbestos-containing whiteboard / bulletin board mastic (**Assumed ACM**), approximately 20 square feet located throughout the building.

4. Assumed asbestos-containing Mirror Mastic (**Assumed ACM**), approximately 100 square feet located in Shop Area (Weight Room).

C. The work area involved is shown in the attached Figure 6.

V. TEXTBOOK STORAGE BUILDING / PARENT CENTER (026DAM) – To be Demolish

A. Remove and dispose of as friable and hazardous asbestos waste, the following material(s):

1. Asbestos-containing Black Mastic (**ACM**) associated with 12"x12" Lt. Brown w/ Brown & White Floor Tile (**Non-ACM**) on concrete substrate, approximately 870 square feet located at Room 8.

   a) Mastic shall be remove from the concrete substrate with chemical solvent using mechanical means.

2. Asbestos-containing Joint Compound (**ACM**) on Drywall Ceiling (**Non-ACM**), approximately 870 square feet located in Room 8 above the 12"x12" Ceiling Tiles.

3. Assumed asbestos-containing Fire Doors, approximately 2 doors, located throughout the building.

B. Remove and dispose of as non-friable and non-hazardous asbestos waste, the following material(s):

1. Asbestos-containing Ceiling Tile Mastic (**ACM**) associated with 12"x12" Straight Holes Ceiling Tiles (**Non-ACM**), approximately 870 square feet, located in Room 8.

2. Assumed asbestos-containing Chalkboard Board Mastic (**Assumed ACM**), approximately 150 square feet located in Room 8.

C. The work area involved is shown in the attached Figure 7.

VI. SANITARY RELOCATABLE (J0120L) – To be Demolish

A. Remove and dispose of a friable and hazardous asbestos waste, the following material(s):

1. Asbestos-containing Brown Stone Pebble Floor Sheeting (**ACM**) – Top Layer; with Yellow Adhesive (Non-ACM) on Wood Underlayment (Non-ACM) – 2nd Layer; Resilient Sheet Flooring (Non-ACM) w/ asbestos-containing Black Mastic (**ACM**) – 3rd Layer; Flooring (Non-ACM) w/ Black Mastic (Non-ACM) on Wood Subfloor (Non-ACM) – 4th Layer, approximately 450 square feet, located at the Boy's & Girl's Restroom.

2. Asbestos-containing Yellow Mastic w/ Leveling Compound (**ACM**) on Wood Underlayment (Non-ACM) – 2nd Layer underneath the Patch Tan Stone Pebble Floor Sheeting (Non-ACM) – Top Layer; and asbestos-containing Black Mastic w/ Black Vapor Barrier (**ACM**) on Wood Subfloor (Non-ACM) – 4th Layer; under Resilient Sheet Flooring (Non-ACM) – 3rd Layer, approximately 40 square feet, located at Girl's Restroom.

a) The flooring and ancillary materials shall be removed to the wood floor joists.

2. Asbestos-containing Joint Compound (**ACM**) associated with Drywall Ceiling (Non-ACM), approximately 50 square feet, located in the Hopper Room.

3. Asbestos-containing Joint Compound (**ACM**) associated with Drywall Walls (Non-ACM), approximately 150 square feet, located in the Hopper Room.

4. Asbestos-containing 4" Pipe Insulation (**ACM**), approximately 40 linear feet, located at the Crawl Space of the Building.

5. Assumed asbestos-containing Fire Doors (**Assumed ACM**), approximately 4 doors, located throughout the building.

B. The work area involved is shown in the attached Figure 8.

VI. SANITARY RELOCATABLE (J0131M) – To be Demolish

A. Remove and dispose of a friable and hazardous asbestos waste, the following material(s):

1. Asbestos-containing Black Mastic (**ACM**) on Wood Subfloor (Non-ACM) – 2nd Layer underneath Red Sheet Flooring (**Non-ACM**) – Top Layer; with **Patch** 12"x12" Gray Floor Tile (**Non-ACM**), approximately 475 square feet, located at the Athletic Office .

2. Asbestos-containing Black Mastic w/ Black Vapor Barrier (**ACM**) on Wood Subfloor (Non-ACM) – 4th Layer; underneath Ceramic Floor Tile w/ Grout & Mortar (Non-ACM) – Top Layer; Leveling Compound (Non-ACM) on Wood Underlayment (Non-ACM) – 2nd Layer; Resilient Sheet Flooring (Non-ACM) – 3rd Layer, approximately 450 square feet, located at Boy's & Girl's Restroom.

a) The flooring and ancillary materials shall be removed to the wood floor joists.

3. Assumed asbestos-containing Fire Doors (**Assumed ACM**), approximately doors, located throughout the building.

B. The work area involved is shown in the attached Figure 9.

VII. SANITARY RELOCATABLE (J0219M) – To be Demolish

A. Remove and dispose of a friable and hazardous asbestos waste, the following material(s):

1. Asbestos-containing Black Mastic **(ACM)** on Wood Subfloor (Non-ACM) – 2nd Layer; underneath Red Sheet Flooring (**Non-ACM**) – Top Layer, approximately 300 square feet, located at the Hopper Room, Office, and Office Restroom.

2. Asbestos-containing Yellow Blue with Black Mastic (**ACM**) on Wood Underlayment (Non-ACM) – 2nd Layer underneath the **Patch** 12"x12" Brown Marble Floor Tile (Non-ACM) – Top Layer; approximately 50 square feet, located at Office.

    a) The flooring and ancillary materials shall be removed to the wood floor joists.

2. Asbestos-containing Joint Compound (**ACM**) associated with Drywall Ceiling (Non-ACM), approximately 50 square feet, located in the Hopper Room.

3. Asbestos-containing Joint Compound (**ACM**) associated with Drywall Walls (Non-ACM), approximately 150 square feet, located in the Hopper Room.

4. Assumed asbestos-containing Fire Doors (**Assumed ACM**), approximately 4 doors, located throughout the building.

B. The work area involved is shown in the attached Figure 10.

VIII. 2/3 UNIT RELOCATABLE (X0290L) – To be Demolish

A. Remove and dispose of a friable and hazardous asbestos waste, the following material(s):

1. Asbestos-containing Floor Tile – 12"x12" Dark Brown **(ACM) – 3rd Layer**; with Black Mastic (Non-ACM) on Wood Underlayment (Non-ACM) – 4th Layer; underneath 12"x12" Brown Floor Tile (Non-ACM) – Top Layer; w/ Black Mastic (Non-ACM) on Wood Underlayment (Non-ACM) – 2nd Layer; Resilient Sheet Flooring (Non-ACM) – 5th Layer; w/ Vapor Barrier / Black Mastic (Non-ACM) on Wood Subfloor (Non-ACM) – 6th Layer, approximately 1,800 square feet, located at the Room 9 & 10.

    a) The flooring and ancillary materials shall be removed to the wood floor joists.

2. Asbestos-containing containing Dash Coat Material on Pre-Cast Concrete Stairs (**ACCM**), approximately 75 square feet, located at Room 10 – N/W Exterior Stairs.

3. Asbestos-containing Drywall Ceiling (**ACM**) with associated Joint Compound (**ACM**), approximately 900 square feet, located in Room 9 above the 12"x12" Straight Holes Ceiling Tiles.

4. Assumed asbestos-containing Fire Doors (**Assumed ACM**), approximately 4 doors, located throughout the building.

B. Remove and dispose of as non-friable and non-hazardous waste, the following material(s):

1. Asbestos-containing ceiling tile mastic (**ACM**) associated with 12"x12" Straight Holes Ceiling Tiles (**Non-ACM**), approximately 900 square feet, located in Room 9.

2. Assumed asbestos-containing Whiteboards / Bulletin Boards Mastic (Assumed ACM), approximately 300 square feet, located in Rooms 9 & 10.

C. The work area involved is shown in the attached Figure 11.

IX. 2/3 UNIT RELOCATABLE (X0324L) – To be Demolish

A. Remove and dispose of a friable and hazardous asbestos waste, the following material(s):

1. Asbestos-containing Joint Compound (**ACM**) with associated Drywall Ceiling (**Non-ACM**), approximately 1,800 square feet, located in Rooms 11 & 12 above the 12”x12” Straight Holes Ceiling Tiles.

4. Assumed asbestos-containing Fire Doors (**Assumed ACM**), approximately 4 doors, located throughout the building.

B. Remove and dispose of as non-friable and non-hazardous waste, the following material(s):

1. Assumed asbestos-containing Whiteboards / Bulletin Boards Mastic (**Assumed ACM**), approximately 300 square feet, located in Rooms 11 & 12.

C. The work area involved is shown in the attached Figure 12.

X. 2/3 UNIT RELOCATABLE (X0396L) – To be Demolish

A. Remove and dispose of a friable and hazardous asbestos waste, the following material(s):

1. Asbestos-containing Felt Paper w/ Black Mastic **(ACM) on Wood Subfloor (Non-ACM) – 4th Layer**; underneath 12”x12” Brown w/ Brown & White Floor Tile (Non-ACM) – Top Layer; w/ Black Mastic (Non-ACM) & Leveling Compound (Non-ACM) on Wood Underlayment (Non-ACM) – 2nd Layer; Resilient Sheet Flooring (Non-ACM) – 3rd Layer, approximately 1,800 square feet, located at the Rooms 6 & 7.

a) The flooring and ancillary materials shall be removed to the wood floor joists.

2. Asbestos-containing Joint Compound (**ACM**) associated with Drywall Ceiling (**Non-ACM**), approximately 1,800 square feet, located in Rooms 6 & 7 above the 12”x12” Straight Holes Ceiling Tiles.

3. Assumed asbestos-containing Fire Doors (**Assumed ACM**), approximately 4 doors, located throughout the building.

B. Remove and dispose of as non-friable and non-hazardous waste, the following material(s):

1. Asbestos-containing ceiling tile mastic (**ACM**) associated with 12”x12” Straight Holes Ceiling Tiles (ACM), approximately 1,800 square feet, located in Rooms 6 & 7.

2. Asbestos-containing Cement "Transite" Transom (ACM), approximately 6 square feet, located at Room 6 – Door Transom.

3. Assumed asbestos-containing Whiteboards / Bulletin Boards Mastic (Assumed ACM), approximately 300 square feet, located in Rooms 6 & 7.

C. The work area involved is shown in the attached Figure 13.

X. GROUNDS / ASPHALT (8571-G)

A. ACCM Asphalt – Area #6 (West of Portable Buildings A0797W & A0978W) and Area #8 (Between & Around Portables A795W & A0797W)

1. Remove and dispose of as non-friable and non-hazardous asbestos waste the following materials:

a) Large sections or large segments of asbestos-containing construction material (ACCM) asphalt paving, approximately 5,980 square feet. Remove all asphalt layers down to aggregate base or native soil if no aggregate is present.

2. Remove and dispose of as friable and hazardous asbestos waste the following materials:

a) Asbestos-containing construction material (ACCM) asphalt paving "debris", approximately 500 square feet. After removal of all larger sections or segments of asphalt, the remaining associated debris and loose soil shall be cleaned up using hand tools, wet methods, and/or HEPA vacuum and shall be disposed as friable hazardous asbestos waste.

3. The Abatement Contractor shall remove the asphalt paving sections or segments utilizing heavy equipment (bobcat, backhoe, etc.), manual tools, and wet methods.

4. When saw cutting is performed continuous use of HEPA vacuuming and wet methods shall be utilized. The waste shall be disposed as friable hazardous asbestos waste.

5. Visual Clearance by a District Representative and/or a Certified Asbestos Consultant shall be performed upon completion of the work.

B. ACCM Asphalt – Patch #10 (Southwest of Sanitary Building – J0121L); Areas #12 & #13 (East of Visitor's Bleachers)

1. Remove and dispose of as non-friable and non-hazardous asbestos waste the following materials:

a) Large sections or large segments of asbestos-containing construction material (ACCM) asphalt paving, approximately 10,580 square feet. Remove all asphalt layers down to aggregate base or native soil if no aggregate is present.

2. Remove and dispose of as friable and hazardous asbestos waste the following materials:

   a) Asbestos-containing construction material (ACCM) asphalt paving "debris", approximately 1,500 square feet. After removal of all larger sections or segments of asphalt, the remaining associated debris and loose soil shall be cleaned up using hand tools, wet methods, and/or HEPA vacuum and shall be disposed as friable hazardous asbestos waste.

3. The Abatement Contractor shall remove the asphalt paving sections or segments utilizing heavy equipment (bobcat, backhoe, etc.), manual tools, and wet methods.

4. When saw cutting is performed continuous use of HEPA vacuuming and wet methods shall be utilized. The waste shall be disposed as friable hazardous asbestos waste.

5. Visual Clearance by a District Representative and/or a Certified Asbestos Consultant shall be performed upon completion of the work.

C. ACCM Asphalt – Area #15 (South Side of Relocatable Building X0290L)

1. Remove and dispose of as non-friable and non-hazardous asbestos waste the following materials:

   a) Large sections or large segments of asbestos-containing construction material (ACCM) asphalt paving, approximately 980 square feet. Remove all asphalt layers down to aggregate base or native soil if no aggregate is present.

2. Remove and dispose of as friable and hazardous asbestos waste the following materials:

   a) Asbestos-containing construction material (ACCM) asphalt paving "debris", approximately 100 square feet. After removal of all larger sections or segments of asphalt, the remaining associated debris and loose soil shall be cleaned up using hand tools, wet methods, and/or HEPA vacuum and shall be disposed as friable hazardous asbestos waste.

3. The Abatement Contractor shall remove the asphalt paving sections or segments utilizing heavy equipment (bobcat, backhoe, etc.), manual tools, and wet methods.

4. When saw cutting is performed continuous use of HEPA vacuuming and wet methods shall be utilized. The waste shall be disposed as friable hazardous asbestos waste.

5. Visual Clearance by a District Representative and/or a Certified Asbestos Consultant shall be performed upon completion of the work.

D. ACCM Asphalt – Area #18 (West of Sanitary Relocatable J0219L)

1. Remove and dispose of as non-friable and non-hazardous asbestos waste the following materials:

a) Large sections or large segments of asbestos-containing construction material (ACCM) asphalt paving, approximately 5,000 square feet. Remove all asphalt layers down to aggregate base or native soil if no aggregate is present.

2. Remove and dispose of as friable and hazardous asbestos waste the following materials:

a) Asbestos-containing construction material (ACCM) asphalt paving "debris", approximately 500 square feet. After removal of all larger sections or segments of asphalt, the remaining associated debris and loose soil shall be cleaned up using hand tools, wet methods, and/or HEPA vacuum and shall be disposed as friable hazardous asbestos waste.

3. The Abatement Contractor shall remove the asphalt paving sections or segments utilizing heavy equipment (bobcat, backhoe, etc.), manual tools, and wet methods.

4. When saw cutting is performed continuous use of HEPA vacuuming and wet methods shall be utilized. The waste shall be disposed as friable hazardous asbestos waste.

5. Visual Clearance by a District Representative and/or a Certified Asbestos Consultant shall be performed upon completion of the work.

E. ACCM Asphalt – Area #21 (N/W of Shop Building #1)

1. Remove and dispose of as non-friable and non-hazardous asbestos waste the following materials:

a) Large sections or large segments of asbestos-containing construction material (ACCM) asphalt paving, approximately 4,500 square feet. Remove all asphalt layers down to aggregate base or native soil if no aggregate is present.

2. Remove and dispose of as friable and hazardous asbestos waste the following materials:

a) Asbestos-containing construction material (ACCM) asphalt paving "debris", approximately 500 square feet. After removal of all larger sections or segments of asphalt, the remaining associated debris and loose soil shall be cleaned up using hand tools, wet methods, and/or HEPA vacuum and shall be disposed as friable hazardous asbestos waste.

3. The Abatement Contractor shall remove the asphalt paving sections or segments utilizing heavy equipment (bobcat, backhoe, etc.), manual tools, and wet methods.

4. When saw cutting is performed continuous use of HEPA vacuuming and wet methods shall be utilized. The waste shall be disposed as friable hazardous asbestos waste.

5. Visual Clearance by a District Representative and/or a Certified Asbestos Consultant shall be performed upon completion of the work.

F. Grounds / Asphalt Areas (8571-G)

1. Remove and dispose of as non-hazardous asbestos waste the following material:

a) Assumed asbestos-containing cement "Transite" pipe (**Assumed ACM**) which could be buried in the soil after asphalt removal, approximately 1,000 square feet.

b) If damaged assumed asbestos-containing cement "Transite" pipe is discovered, an approved South Coast Air Quality Management District (SCAQMD) Procedure 5 work plan will be required where alternative combination of techniques and/or engineering controls are going to be used.

G. The work areas involved is shown in the attached Figure 14.

XI. PEELING AND LOOSE PAINT

A. The buildings and grounds involved with this project were built as follows:

Boiler Building (001COH / 24183)
Cafeteria Building / Lunch Pavilion (006CAM / 22637)
Classroom Building #5 (007DAL / 23422)
Shop Building #1 (008CAF / 24628)
Storage Unit #1 (014DOP / 36483)
Text Book Storage / Parent Center (026DAM)
Bleachers #1 (019GOM / 20284)
Bleachers #2 (018GOM / 20644)
Bleachers #3 (020GOM / 20643)
Bleachers #4 (021GOM / 20656)
Ticket Booth (2446)
Standard Classroom Relocatable A-795 (A0795W)
Standard Classroom Relocatable A-796 (A0796W)
Standard Classroom Relocatable A-797 (A0797W)
Standard Classroom Relocatable A-798 (A0798W)
Sanitary Relocatable J-120 (J0120L)
Sanitary Relocatable J-131 (J0131M)
Sanitary Relocatable J-219 (J0219M)
2/3 Unit Relocatable AA-290 (X0290L)
2/3 Unit Relocatable AA-293 (X0293L)
2/3 Unit Relocatable AA-324 (X0324L)
2/3 Unit Relocatable AA-396 (X0396L)
Grounds (3932-G) – Asphalt Paving

B. Renovation, repair or painting work performed on buildings regardless of the date of construction shall require special handling and environmental monitoring when coated surfaces including, but not limited to, painted, varnished, and glazed surfaces are impacted. All coated surfaces are assumed to be lead-based. All work shall be performed in compliance with Facilities Standard Specification,

Section 02 8333, "Lead Abatement and Lead Related Construction Work." XRF testing methodology is not acceptable in determining negative for lead content for Cal/OSHA compliance purposes, except for notification requirements. XRF may be used in determining lead-based paint for compliance with the U.S.E.P.A. Renovator, Repair, and Painting Rule. Disturbance of coated surfaces by contractors will be monitored by qualified District staff or Environmental Consultant sufficient to ensure that proper training and work procedures, cleanup, and waste handling are employed.

C. Loose or flaky paint that will be disturbed during the work of this project or in close proximity of the work area shall be stabilized by removing the loose or flaky paint and leaving only paint in stable condition.

D. It should be noted that any coated surfaces and building materials not listed above are to be considered to be lead-based and asbestos-containing respectively. Should the project require the disturbance of these surfaces and building materials, the FETU shall be notified.

E. All varnished and/or painted wood baseboards located in the impacted building shall be waste characterized prior to remove from site.

XII. All work involving asbestos-containing materials shall be performed in accordance with the attached specifications "Section 02 8213 – Asbestos Abatement and Asbestos Related Disturbance" as prepared by the Los Angeles Unified School District.

XIII. All work involving lead-based and/or lead-containing materials shall be performed in accordance with the attached specifications "Section 02 8333– Lead Abatement and Lead Related Construction Work" as prepared by the Los Angeles Unified School District.

XIV. All work involving asbestos-containing floor tiles and associated mastic materials shall be performed in accordance with the attached specifications "Section 02 8216 – Asbestos Abatement of Non-Friable Floor Tiles" as prepared by the Los Angeles Unified School District.

All work involving asbestos-containing roofing materials shall be performed in accordance with the attached specifications "Section 02 8219 – Asbestos Abatement of Non-Friable Roofing Material" as prepared by the Los Angeles Unified School District.

XV. All work involving asbestos-containing asphalt paving materials shall be performed in accordance with the attached specifications "Section 02 8223 – Removal of Asbestos-Containing Asphalt" as prepared by the Los Angeles Unified School District.

Only contractors on the LAUSD Approved list of Asbestos Abatement Contractors are qualified to perform asbestos abatement on District projects.

I. GENERAL

A. The following special conditions shall take precedence over the standard specifications. The drawings included with these specifications show the plot and floor plans of the work areas.

B. Abatement contractor shall be responsible for verifying all dimensions / quantities prior to bid. Any amounts listed on these specifications are only estimated and are not to be considered final measurements / quantities.

C. Abatement contractor shall provide a secured and separate storage for all materials, equipment, and waste.

D. Abatement contractor shall physically secure all entrances and opening to work areas until final clearance is received, as approved by the District representative.

E. Maintain regulated area security during abatement work. Regulated areas and ancillary equipment accessible to non-authorized personnel shall be protected from unauthorized aces by constructing at a minimum barrier with ceiling of 3/8 inch CDX plywood supported by 2 by 4 studs, 16 inches on center. Height shall be as required to safely access the regulated area. An access door shall be provided with hasp and padlock sufficient to prevent unauthorized entry and a key shall be provided to the District representative. Required barrier within an occupied building shall be furnished with sheeting as required by state and local fire protection regulations.

F. In addition to the project specification submittal requirements, the Abatement contractor shall submit for review and approval an asbestos abatement work plan. The asbestos work plan shall detail the means and methods that will be used for controlling and containing fiber release during the removal/disturbance of asbestos containing material in accordance with the project specifications. The plan shall include, but not be limited to, a drawing that adequately depicts the location of asbestos control areas, change areas, emergency exit routes and exits, and any special features (e.g. critical barriers, pony walls, air filtration units, makeup air, air filtration unit exhaust, decontamination units, load out/bag out units, etc.).

G. The Abatement Contractor and/or lead-trained General or Sub-Contractors shall also submit a Lead Related Disturbance Work Plan. The Lead Work Plan shall detail the means and methods that will be used for controlling and containing lead dust released during removal / disturbance of assumed lead containing building components in accordance with project specifications. The plan shall include, but no limited to, a drawing that adequately depicts the locations of lead control areas, emergency exit routes, make-up air, air filtration unit exhaust, decontamination units, and load-out / bag-out units, etc.

H. The abatement contractor shall not proceed with the disturbance of ACM/ACCM until the asbestos work plan and written work schedule have been approved by a District representative in writing.

I. Abatement contractor shall post the proper warning signs and labels in both English and Spanish at entrances to work area(s).

J. It is anticipated the Contractor shall perform work after school hours during the school is in session unless approved by the District.

K. Noise from the work process shall not interfere with the normal and scheduled day or evening school activities. Work schedule will be determined with the involvement of the school staff at the job start meeting.

L. Contractor must be in full compliance with all city ordinances at all times throughout the duration of the project. At the commencement of the project, all Contract Documents, Project Manual and Specifications shall be on site and remain until the completion of the project.

M. All furniture and equipment in the work area involved will be removed by District personnel prior to the start of abatement work, to be scheduled by the OAR.

N. Asbestos Contractor awarded the project shall notify SCAQMD (South Coast Air Quality Management District) ten working days prior to the start of abatement.

II. SITE SPECIFIC CONDITIONS FOR ACM/ACCM REMOVAL

A. Load out and transportation of waste or materials shall not be performed when students are present.

B. The abatement contractor shall demarcate the work area to warn unauthorized persons from entering the workspace(s).

C. All surfaces throughout the work area(s) shall be thoroughly pre-cleaned.

D. All cabinets (wall, sick, countertops, etc.) throughout the work area(s) shall be remove prior to start of the abatement work.

E. Contractor shall clean and cover with an airtight seal all porous, dropped, or perforated ceiling systems, including any vents, air circulating units, and registers (where the air handling system is turned off), in the work area, with 6-mil polyethylene sheeting, sealed around all edges.

F. Where applicable, Abatement Contractor shall install a hard barrier security system around the three (3) stage decontamination unit at each abatement work area for this project and prior to commencing work. The hard barrier security system shall not interfere with closing of any doors. The door(s) shall be locked when the work site is unattended such as during breaks and lunch and at the end of the workday.

G. Abatement Contractor shall install transparent viewing ports, which allow outside observation of all stripping and removal of ACM/ACCM.

H. All electrical and mechanical equipment, including but not limited to, gauges, valves, etc., throughout the work areas involved shall not be encapsulated or a lockdown applied. These items shall be decontaminated, left in place, and protected during the duration of the contract.

I. Dustpans, squeegees, shovels, etc. shall be non-metallic. Use of wire brushes and brooms are specifically prohibited.

J. Flooring Mastic on Concrete Substrate:

A. In addition to the above requirements, the removal of the flooring, if applicable, shall be performed under a Class I regulated work area in compliance with District Specifications 02 8213, "Asbestos Abatement and Asbestos Related Disturbance" as follows:

i. The barriers used for the construction of the isolated work area shall be equipped with transparent viewing ports which allow outside observation of all stripping and removal of ACM.
ii. The security of the work area shall be maintained at all times by constructing a hard barrier with a plywood ceiling. For more details, see District Specification 02 8213.
iii. Mastic shall be removed by using a District approved chemical solvent to remove floor mastic (Sentinel 747 Mastic Remover [Fresh Scent]) in conjunction with a SCAQMD-permitted mechanical buffer. The buffer must be registered with SCAQMD. Mastic around the edges of the room and non-removable objects must be removed manually or with a SCAQMD-permitted grinder. Once the mastic removal is complete, the contractor shall wash the floor thoroughly with 805 Envirowash Final Surface Cleaner and wipe down the floor. A visual inspection, prior to the application of the lockdown with white color additive, must be conducted to ensure no residual (three dimensional) mastic remains.
iv. The abatement contractor shall use LAUSD approved Foster Lockdown 32-60 Blue encapsulant for lockdown, after visual inspection by the Owner and/or Owner Representative.
v. Flooring materials and related waste, including mastic, polyethylene sheeting, respirator filters, absorbent rags and cleaning pads, etc., must be disposed of as friable asbestos waste.

K. Air filtration units

1. Where applicable, the abatement contractor shall install secured hard lid covers on windows used for air filtration exhaust ducting. The abatement contractor shall maintain the integrity of the hard lid covers and air filtration flex ducts at all times.

2. Where applicable, the abatement contractor shall extend the air filtration flex exhaust ducting to the roofline of the building, away from any opening and/or at least maintain a height of 10 feet.

L. Where applicable, abatement contractor can build a bag-out chamber with a minimum of two (2) interlocking decontaminated units. The bag-out chamber shall be made with 6-mil polyethylene sheeting and shall not interfere with opening and/or closing of any doors.

M. Air monitoring during the abatement process will be required for this project.

N. Clearance Air Monitoring

1. The District shall arrange for sampling of the air in the work area(s) for airborne fiber concentration.

2. When all air samples collected from each work area(s) indicate concentration of airborne fibers within the limits of 40 CFR, Part 763, Sub-part E (AHERA), a release of each work area will be provided.

3. Areas exceeding this level shall require additional cleaning and retesting until satisfactory levels are obtained in accordance with this section. Contractor shall be responsible for the cost of all subsequent clearance air monitoring and analysis resulting from the failure to receive initial clearance.

III. SITE SPECIFIC CONDITIONS FOR CRAWL SPACE

A. Crawl Space

1. All trash and debris, including but not limited to, pipe insulation, fiberglass, wood, paper products, cloth, plastic, etc., throughout the crawl space area shall be removed and disposed of as hazardous asbestos contaminated waste.

2. Abatement contractor shall remove all debris from, but not limited to, crevices, irregular surfaces, and other voids that are unique to the crawl space area.

3. Prior to start of the asbestos removal work, all electrical equipment, including but not limited to, junction boxes, cable connections, etc., shall be pre-cleaned and wrapped with one (1) layer of six (6)-mil polyethylene sheeting and seal with duct tape. This layer shall be removed after air clearance has been achieved.

4. Raw ends of unabated asbestos containing pipe insulation left inside walls or other cavities in the work areas, where applicable, shall be sealed with canvas and a high temperature bridging agent. Abatement contractor shall use a District approved material.

5. Holes, crevices, and other openings (where applicable) unique to the crawl space shall be sealed with a District approved expandable insulating foam sealant prior to commencement of abatement but after pre-cleaning.

B. Load out and transportation of waste or materials shall not be performed when students are present.

C. The abatement contractor shall demarcate the work area to warn unauthorized persons from entering the workspace(s).

D. Construction of a 3-stage decontamination unit shall be set up at the entrance to the crawl space area. The decontamination chambers shall be enclosed in a hard barrier enclosure. The hard barrier enclosure shall not interfere with closing of any doors.

E. Where applicable, any exterior work which results in a containment for abatement work, must follow the requirements as set forth in Section 02 8213 (Asbestos Abatement and Asbestos Related Disturbances), Part 1.05(E).

F. Air filtration units

1. Where applicable, the abatement contractor shall install secured hard lid enclosures around air filtration units and always maintain the integrity of the hard lid enclosures.

2. In addition to the requirements of the standard specifications, removal shall not commence until the work area is fully isolated and the stipulated negative pressure differential established. Manometer input terminal (tube) must be located away from the intake of any air filtration unit.

G. Clearance Air Monitoring

1. The District shall arrange for sampling of the air in the work area(s) for airborne fiber concentration.

2. When all air samples collected from each work area(s) indicate concentration of airborne fibers within the limits of 40 CFR, Part 763, Sub-part E (AHERA), a release of each work area will be provided.

3. Areas exceeding this level shall require additional cleaning and retesting until satisfactory levels are obtained in accordance with this section. Contractor shall be responsible for the cost of all subsequent clearance air monitoring and analysis resulting from the failure to receive initial clearance.

4. Products (i.e. encapsulant) used during this project shall be reviewed by the consultant as part of the pre-job submittals and verified that they are approved by OEHS.

IV. CLOSE-OUT DOCUMENTS

A. The contractor shall provide the District all of the following documents:

1. Filter change logs for all respirators
2. Foreman’s daily job report
3. Employee’s entry/exit logs for all containments
4. Visitor’s entry/exit logs for all containments
5. Air samples for personnel
6. Copy of any waste manifest(s)
7. All signed LAUSD Contractor-Daily Personnel Report Forms
8. Signed Code of Conduct form, from each employee working on this project
9. Signed LAUSD Asbestos Abatement Project Personnel Logs

B. Abatement contractor shall have thirty (30) working days after tear-down of the last work area containment to submit the required close out documents.

This report may not be changed, modified or include additions without the express written permission from the FETU.

Noise Report

Veneklasen Associates
Consultants in Acoustics | Noise | Vibration | AV | IT | Security

December 8, 2023

Envicom Corporation
4165 E. Thousand Oaks Blvd., Suite 290
Westlake Village, California 91362

Attention: Tim Rosenstein | Environmental Analyst / Project Manager, Environmental Services

Subject: Canoga Park High School Major Modernization; Los Angeles, California
Noise & Vibration Study; Veneklasen Project No. 8119-005

Veneklasen Associates (VA) conducted an acoustical study at Canoga Park High School, located at 6850 CA-27, Canoga Park, California 91303. The Canoga Park High School modernization project (Project) entails the demolition of several buildings, construction of several new buildings, and upgrades or repairs to many other facilities. The Project will not increase the number of students served and will not increase the activities hosted. Therefore, the noise and vibration analysis will review construction impacts only. The Project location is shown in Figure 1. A list of acoustical terms with definitions is presented in Appendix A.

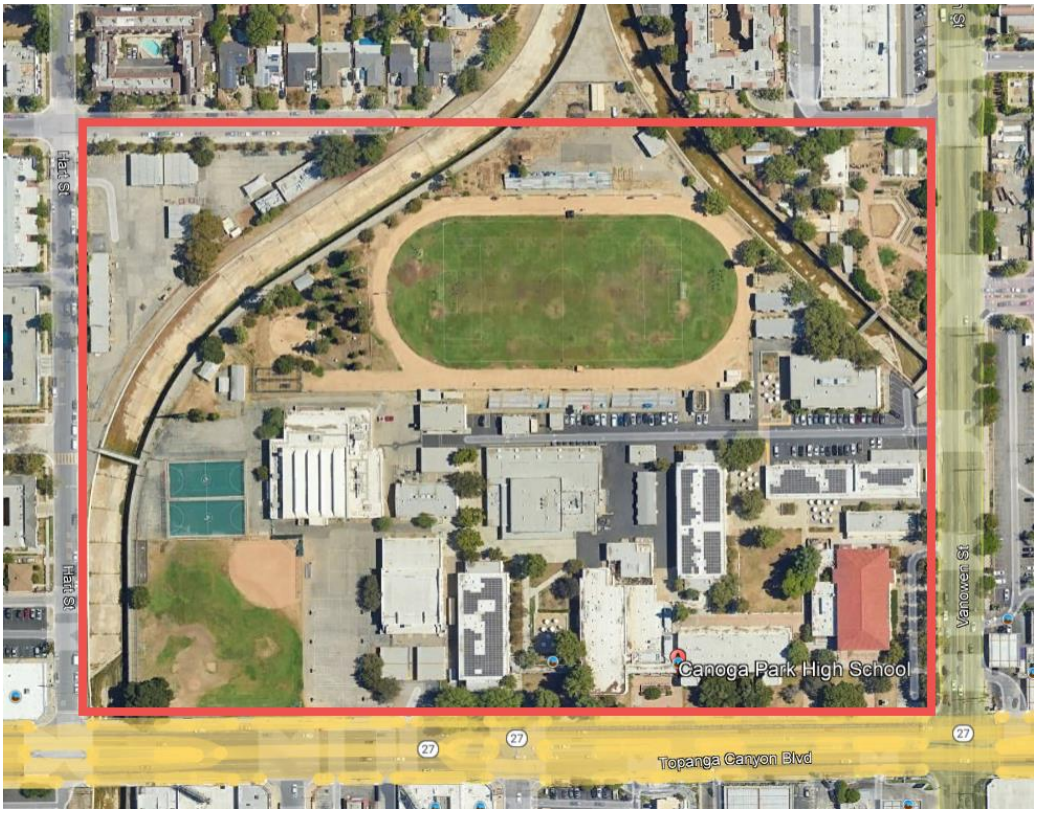

Figure 1. Arial View of Project Site

PROJECT DESCRIPTION

The Project includes the demolition of 15 buildings, including the cafeteria, weight room, 7 classrooms buildings with 12 classrooms total, two storage buildings, three restrooms, one ticket booth, for a total of 43,111 sq ft. The promenade pavement, pavement surrounding the cafeteria and other buildings will be removed. Paving in parking lot off Topanga canyon boulevard and the northern athletic area will be resurfaced and possibly removed as well. The new construction includes three new buildings in total, the largest will be the Hunter student union, which will total 50,000 sq/ft, with new cafeteria, 12 classrooms, weight room, coaches' office, special education, wellness center. The second building will be located near the southwest end of the main athletic field and contain event ticketing, home concessions, and restrooms, along with maintenance and operations spaces, and a facility manager office. The third building will be located near the southeast end of the main athletic field and contain restrooms and visitor concessions. In addition to the new construction there will be various upgrades throughout much of the campus. All buildings on campus, including those outside of the defined development zone, will receive new exterior paint. The main athletic field will be resod, and the surrounding decomposed granite track will be replaced with a synthetic surface track. New field sports competition areas (Shot Put, Long Jump, and High Jump) will be installed north of the athletic field, and the irrigation system will be replaced. In addition, the athletic field bleachers will be updated for ADA compliance and a new LED scoreboard will be installed. The promenade will be remade with new hardscaping and landscaping, and hardscaping and landscaping around the Hunter Student Union will be updated, as well as areas north and south of the main athletic field. The parking lot off Topanga Canyon Boulevard will be resurfaced as will the northern most athletic area. Site-wide upgrades to remove identified and prioritized barriers to program accessibility will also take place. Lastly, improvements to ensure compliance with the Americans with Disabilities Act (ADA), Division of the State Architect (DSA), California Environmental Quality Act (CEQA), Department of Toxic Substances Control (DTSC), or other local, state, and federal requirements. Figure 2 indicates the site location and the various construction elements.

NOISE AND VIBRATION CRITERIA

A. NOISE

The Project site is in the City of Los Angeles; therefore, the Project is subject to the requirements of the City of Los Angeles Municipal Code Chapter XI Noise Regulations (City Noise Regulations) specified in Section 112.05.

Section 112.05 of the City Noise Regulations used for this assessment states, "Between the hours of 7:00 a.m. and 10:00 p.m., in any residential zone of the City or within 500 feet thereof, no person shall operate or cause to be operated any powered equipment or powered hand tool that produces a maximum noise level exceeding the following noise limits at 50 feet therefrom:

(a) 75dB(A) for construction, industrial, and agricultural machinery including crawler-tractors, dozers, rotary drills and augers, loaders, power shovels, cranes, derricks, motor graders, paving machines, off-highway trucks, ditchers, trenchers, compactors, scrapers, wagons, pavement breakers, compressors and pneumatic or other powered equipment"

B. VIBRATION

The Federal Transit Authority (FTA) *Transit Noise and Vibration Impact Assessment* manual specifies vibration limits for construction activity. The Los Angeles County Code does not specify vibration limits. The FTA vibration limit to prevent building damage corresponding to neighboring building construction is 98 VdB for commercial buildings and 94 VdB for residential construction as indicated in Table 12-3 of the manual and displayed in the table below. The manual also specifies in Table 8-1 that for construction with frequent events, vibration levels of 75 VdB are appropriate for general use in offices and vibration levels of 72 VdB are appropriate in residential buildings to prevent vibration annoyance. We will utilize these two criteria for this analysis.

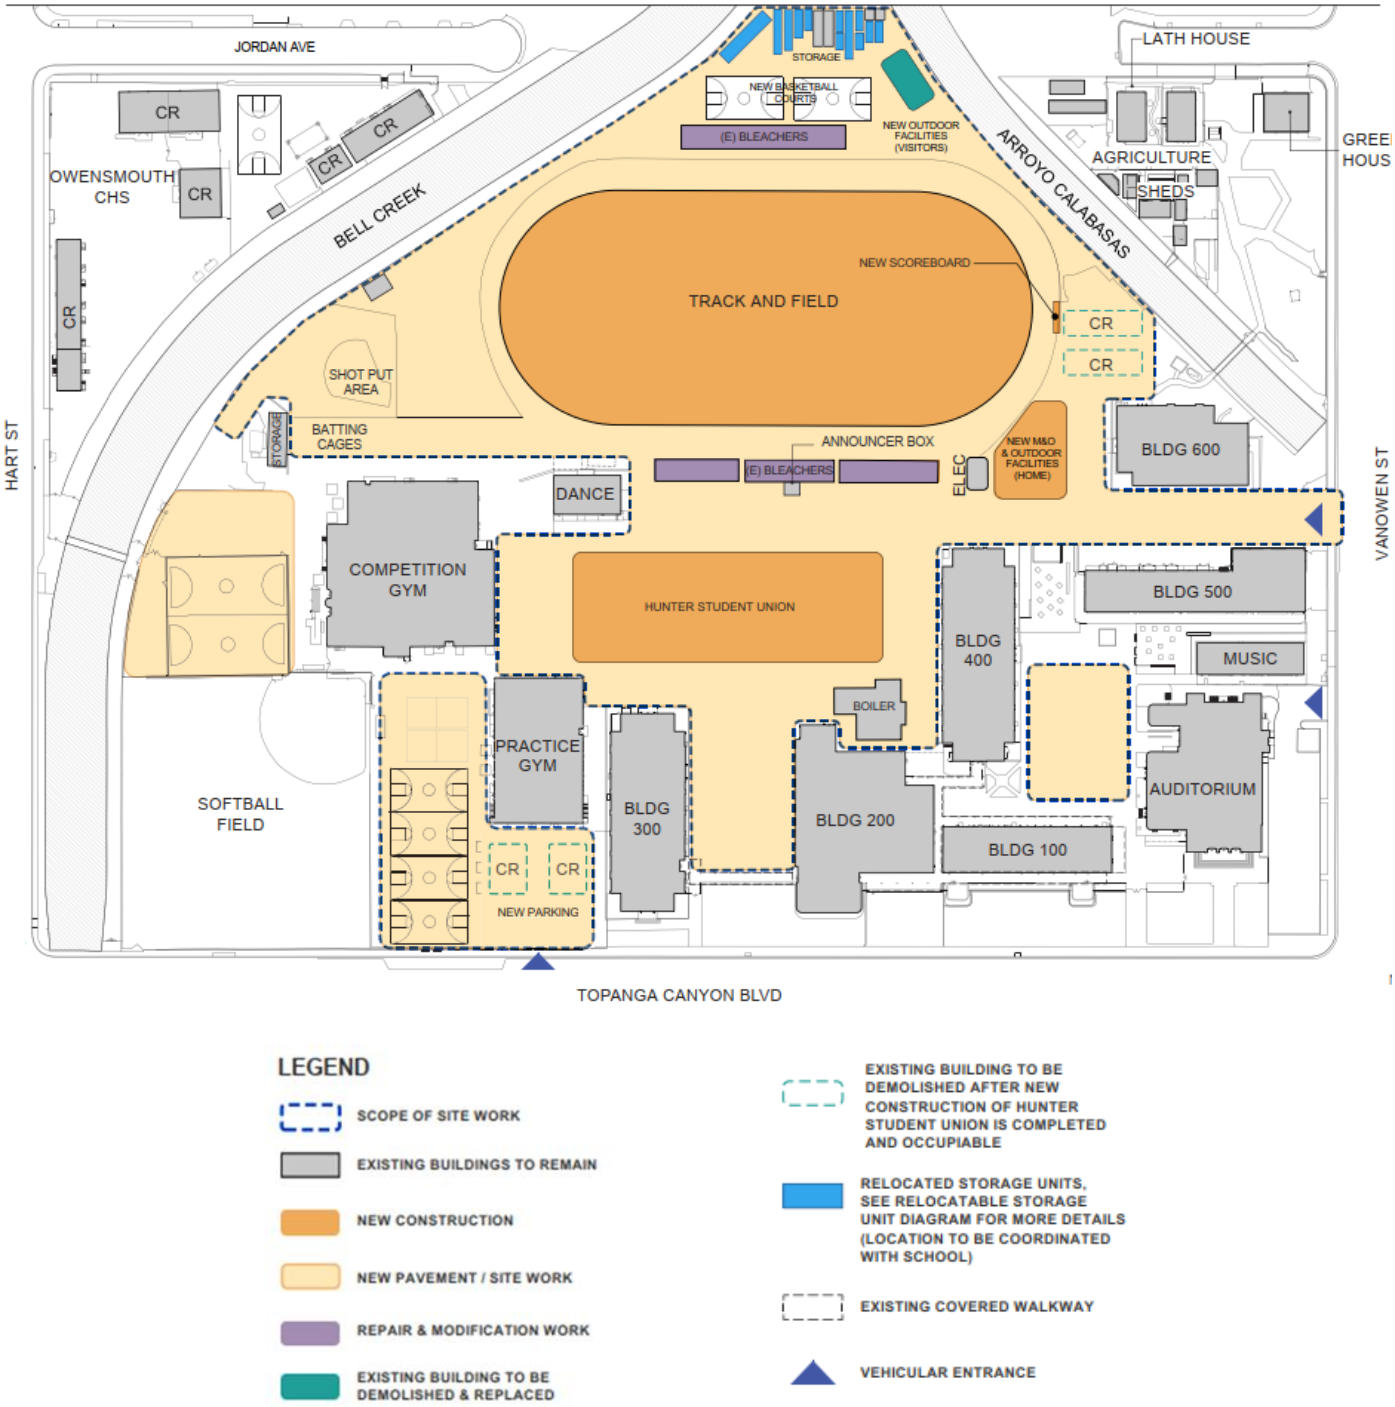

Figure 2. Location of Proposed Project Elements

Tables 2 and 3 below summarize the vibration criteria utilized for the construction.

Table 2. FTA Construction Vibration Damage Criteria (Table 12-3)

Table 12-3. Construction Vibration Damage Criteria[11]		
Building Category	**PPV (in/sec)**	**Approximate L_v†**
I. Reinforced-concrete, steel or timber (no plaster)	0.5	102
II. Engineered concrete and masonry (no plaster)	0.3	98
III. Non-engineered timber and masonry buildings	0.2	94
IV. Buildings extremely susceptible to vibration damage	0.12	90
† RMS velocity in decibels (VdB) re 1 micro-inch/second		

Table 3. FTA Indoor Ground-Borne Vibration (GBV) Impact Criteria for General Vibration Assessment (Table 8-1)

Table 8-1. Ground-Borne Vibration (GBV) and Ground-Borne Noise (GBN) Impact Criteria for General Assessment

Land Use Category	GBV Impact Levels (VdB re 1 micro-inch /sec)			GBN Impact Levels (dB re 20 micro Pascals)		
	Frequent Events[1]	Occasional Events[2]	Infrequent Events[3]	Frequent Events[1]	Occasional Events[2]	Infrequent Events[3]
Category 1: Buildings where vibration would interfere with interior operations.	65 VdB[4]	65 VdB[4]	65 VdB[4]	N/A[4]	N/A[4]	N/A[4]
Category 2: Residences and buildings where people normally sleep.	72 VdB	75 VdB	80 VdB	35 dBA	38 dBA	43 dBA
Category 3: Institutional land uses with primarily daytime use.	75 VdB	78 VdB	83 VdB	40 dBA	43 dBA	48 dBA

Notes:

1. "Frequent Events" is defined as more than 70 vibration events of the same source per day. Most rapid transit projects fall into this category.
2. "Occasional Events" is defined as between 30 and 70 vibration events of the same source per day. Most commuter trunk lines have this many operations.
3. "Infrequent Events" is defined as fewer than 30 vibration events of the same kind per day. This category includes most commuter rail branch lines.
4. This criterion limit is based on levels that are acceptable for most moderately sensitive equipment such as optical microscopes. Vibration-sensitive manufacturing or research will require detailed evaluation to define the acceptable vibration levels. Ensuring lower vibration levels in a building often requires special design of the HVAC systems and stiffened floors.
5. Vibration-sensitive equipment is generally not sensitive to ground-borne noise.

EXISTING MEASURED AMBIENT SOUND LEVEL

Acoustical measurements were conducted using Type 1/Class 1 Bruel & Kjaer 2250/2270 sound level meters on November 2, 2023, to evaluate the existing ambient sound levels in the Project vicinity. Noise measurements were taken around the perimeter of Canoga Park High School at eight locations as shown in Figure 3 below. These monitoring locations were selected to measure the ambient noise levels near the closest sensitive receptors. The measurements taken were 10-minute averages at every location titled "ML" or Monitoring Location. All the acoustical measurements were conducted with Bruel and Kjaer 2250 sound level meters which conform to ANSI S.14-2014 for Type 1 precision sound level meters. All equipment was field-calibrated before and after use. The measurements range from 49.32 dB to 73.76 dB. The closest receptor locations are shown below in the blue boxes titled "RL." These are the closest possible locations exposed to the construction noise.

The ten-minute average ambient sound levels are summarized in Table 4.

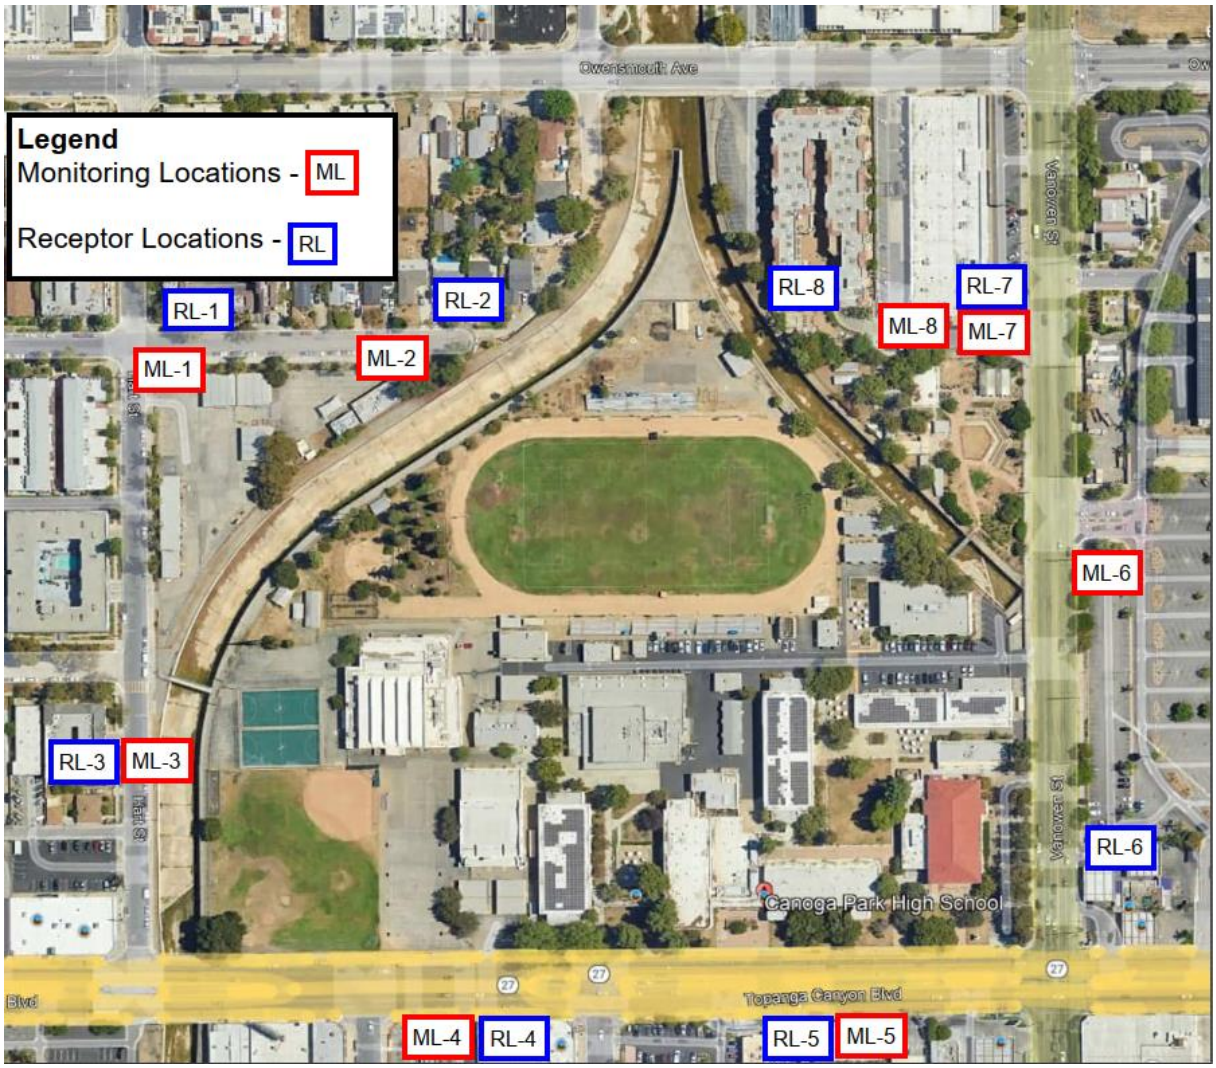

Figure 3. Measurement Locations Near Canoga Park High School

Table 4: Measured Ambient Noise Level

	Measured Ambient Noise Level (dBA L_{eq})							
10 Minute Average	Monitoring Location 1	Monitoring Location 2	Monitoring Location 3	Monitoring Location 4	Monitoring Location 5	Monitoring Location 6	Monitoring Location 7	Monitoring Location 8
12:10 - 12:20 PM	55.11							
12:25 - 12:35 PM		49.32						
12:40 - 12:50 PM			57.78					
12:55 - 1:05 PM				71.29				
1:10 - 1:20 PM					71.41			
1:50 - 2:00 PM						73.76		
2:10 - 2:20 PM							61.34	
2:20 - 2:30 PM								52.88

ACOUSTICAL ANALYSIS – CONSTRUCTION NOISE

The construction planned for the Project includes the construction equipment shown in Table 5 below.

Table 5. List of Construction Equipment

Phase	Duration	Equipment Type	(# of pieces)
Demolition	44 days	Concrete Saws	1
		Excavators	3
		Rubber Tired Dozer	2
Grading	15 days	Excavators	1
		Graders	1
		Rubber Tired Dozers	1
		Tractors/Loaders/Backhoes	3
Building Construction	263 days	Cranes	1
		Forklifts	3
		Generator Sets	1
		Welders	1
		Tractors/Loaders/Backhoes	3
Paving	109 days	Pavers	2
		Paving Equipment	2
		Rollers	2
Architectural Coating	44 days	Air Compressors	1

The analysis of the various phases of construction indicates the maximum construction noise produced at sensitive receptors occurring with all equipment operating. The predicted construction noise level at the noise assessment locations (ML) for each construction phase is indicated in Table 6; sample calculations are indicated in Appendix B.

Although the ordinance states the construction noise level limit to be 75 dB at 50 feet, the analysis of this report is considering 75 dB at the receptor given the nature of the development and that the work is confined to the interior of the site and won't take place near the property lines in most areas.

Table 6. Noise Levels at Receptors

Scenario	Daytime Noise Levels at Sensitive Receptors (dBA)							
	SR-1*	SR-2*	RL-3	RL-4	RL-5	RL-6	RL-7	SR-8*
Existing Ambient Noise Level at ML	55	49	57	71	71	73	61	52
Phase 1. Demolition	73	80	73	72	72	71	72	83
Phase 1. Demolition with Barrier		69						71
Phase 2. Grading	73	80	72	71	71	71	72	83
Phase 2. Grading with Barrier		68						71
Phase 3. Building Construction	71	78	71	69	69	69	70	81
Phase 3. Building Construction Barrier		66						69
Phase 4. Paving	65	72	64	63	63	63	64	75
Phase 4. Paving with Barrier		60						63

*Note: SR stands for Sensitive Receptor, which is residence closest to the noise source. RL stands for receptor location. ML stands for monitoring locations, which are the locations where ambient noise sources were taken.
The table shows what the sound levels would be if an 8-foot sound barrier was placed around the school construction as shown in Figure 4 in the rows that indicate "with Barrier."

Table 6 shows the predicted noise levels for each phase and shows the predicted noise levels if an 8-foot sound barrier was placed around the entire school. Since SR-2 and SR-8 are the only locations where the noise would reach above 75 dB, we propose installing an 8-foot sound barrier only on the east side of the school.
An 8-foot-high barrier around the eastern perimeter of the project site is recommended as a feasible mitigation measure to reduce the construction noise levels at the receptors. The resulting predicted mitigated construction noise levels are close to or below the measured ambient noise levels at most locations. At SR-2 and SR-8, the construction noise barrier recommendation will reduce the noise increase by a minimum of 11 dBA at those receptors and it is the only available practical mitigation method available.

While the truck hauling noise is predicted to be 78dBA as a truck passes the sensitive receptors, the truck noise will only be created for a very short period. The combined hourly average noise level created by trucks is significantly below 75dBA for each receptor. The architectural coating phase will also create very low levels of noise. The predicted construction noise level for all phases of construction will comply with the Los Angeles Municipal Code Section 112.05 regulation limiting construction noise to 75 dBA.

Figure 4. Sound Barrier

The figure above shows the sensitive receptors where the sound would reach above 75dB. The two closest locations to the construction where this occurs are SR-2 and SR-8, both of which are residential. To mitigate this noise, a proposed sound barrier 8-feet tall can reduce the sound levels at the to the approved noise levels as shown in Table 6. The sound barrier is necessary within 215 ft of any residence or within 150 ft of either Jordan Avenue or Hart Street as the work is confined to the interior of the property and won't be taking place near the property lines. The sound barrier was only necessary at the east side of the property since this where the closest sensitive receptors at SR-2 and SR-8, which were residence.

ACOUSTICAL ANALYSIS – CONSTRUCTION VIBRATION

Table 7 displays the construction equipment used for the various phases of the Project and the level of vibrations given off by each piece of equipment. The result of the analysis indicates the project will comply with the FTA building damage criteria with the planned construction equipment. Off-site Truck Hauling had the highest level of vibrations of 83.6 VdB and 0.058 in/sec, when within 30 feet of the closest receptor. The Paving

and Grading phases of the project had the second highest vibration levels. The FTA manual states the allowable limit of vibrations to prevent building damage is 94 VdB, therefore the project will not exceed the maximum level of vibrations. The annoyance criteria of 72 VdB for residential is met as the highest vibration level is 71.6 VdB.

Table 7. Vibration Assessment – Phase 2. Grading

Equipment type	PPV_{ref} at 25 ft (in/sec)	L_v at 25ft (VdB)	Distance (ft) to R8	PPV_{equip} at R8	Lv at R8
Excavators	0.089	87	**140**	0.007	64.6
Graders	0.210	94	**140**	0.016	71.6
Large Bulldozer	0.089	87	**140**	0.007	64.6
Tractors/Loaders/Backhoes x 3	0.003	58	**140**	0.000	35.6

The FTA manual states in Section 7 that it is "unusual for vibration from sources such as buses and trucks to be perceptible, even in locations close to major roads." Therefore, is it not expected for the local haul route truck vibration to be a significant impact for annoyance. The project haul trucks will travel no closer than 25 feet to local buildings. The FTA loaded truck vibration level at 25 feet is 0.076 in/sec, lower than the building damage criterion. Therefore, the local haul truck vibration will not have a significant impact for building damage.
The proposed Project consist of commercial use, resulting in vehicular traffic. On-road vehicles are unlikely to generate perceptible ground-borne vibration when traveling on smooth roadways, according to the Caltrans Transportation and Construction Vibration Guidance Manual. The Federal Transit Administration Transit Noise and Vibration Impact Assessment Manual states that most complaints about vibration from buses and trucks are due to the rattling of windows or items affixed to walls, which is usually the result of airborne noise rather than ground-borne vibration. The vibration from the project's operational traffic will not be perceptible at nearby receptors.

CONCLUSION

The report findings reveal that the construction for the Project at Canoga Park High School aligns with section 112.05 of the Los Angeles Municipal Code. To meet the noise ordinance requirements, the only necessary adjustments entail the installation of an 8-foot sound barrier on the eastern side of the school. Additionally, the report affirms that the Project is not expected to generate a substantial noise or vibration impact at this location. This assurance is crucial to ensure that any noise generated by construction or mechanical equipment will not affect sensitive receptors in the nearby vicinity.

Sincerely,
Veneklasen Associates, Inc.

APPENDIX A. DEFINITIONS OF ACOUSTICAL TERMS

Term	Definition
Sound	Relatively small fluctuations in the air above and below atmospheric pressure. These fluctuations travel through the air as waves and are perceived by the ear and brain as audible sound.
Noise	Characterized simply as unwanted sound.
Decibel (dB)	A unit describing the amplitude of sound in a logarithmic ratio to a reference value.
A-weighted Decibels (dB(A))	A filter applied to sound pressure levels in decibel to simulate the response of the human ear at the threshold of hearing. A-weighting de-emphasizes the low frequency components of a sound similar to the human ear at these levels. This metric has been closely tied to subjective reactions of annoyance to noise, and is used as a sound metric in this and in many other environmental acoustics reports. In this report, all dB(A) levels reported refer to the sound pressure level, referenced to 20µPa
Sound Pressure Level (SPL or L_p)	The amplitude of sound compared to the reference value of 20µPa. Sound Pressure Level is what we perceive as audible sound. Sound Pressure Level decreases as distance from the source to the receiver increases. All sound values discussed in this report refer to Sound Pressure Levels.
Sound Level Percentile (L_n)	Also referred to as a "statistical sound level", L_n refers to the sound level that is exceeded for nth percent of a given measurement period. For example, L_{50} refers to the sound level that is exceeded for 50% of a measurement period, i.e. 30 minutes out of an hour. These metrics can be used to evaluate sound levels that are apparent for a given period of time at a measurement location.
Maximum Sound Level (L_{max})	The maximum instantaneous sound level, regardless of duration. These sound levels fluctuate greatly over short periods of time, and are generally used to evaluate audibility of acoustical events.
Ambient Sound Level	The baseline sound level to which proposed or atypical sound levels are compared to. The "ambient" sound level is measured in the same location and during the same time of day for which sound exposure is to be analyzed for an assessment, without the source of the assessment operational. For the purposes of this study, the "ambient" sound level refers to the existing sound level at a location while an event at Middle Ranch is not occuring.

Appendix B. Sample Calculations

Note : RL-8 is the nearest sensitive receptor, which is why itw as chosen for calculations, since every other receptor location is farther away and will have lower noise levels.

PEDESTRIAN SAFETY AND VEHICLE MILES TRAVELED ANALYSIS FOR THE CANOGA PARK HIGH SCHOOL MODERNIZATION PROJECT - CITY OF LOS ANGELES

Associated Transportation Engineers (ATE) has prepared the following pedestrian safety and vehicle miles travelled analysis for the Canoga Park High School modernization Project (the" Project"), located at 6850 Topanga Canyon Boulevard in the City of Los Angeles. The analysis was prepared to assist City staff in the development review of the Project.

PROJECT DESCRIPTION

The proposed Project involves building replacement, renovation, modernization, and reconfiguration on the Canoga Park High School campus as part of the School Upgrade Program (SUP). The renovation consists of the modernization of the approximately 21.38 acres of the Canoga Park High School campus to facilitate a safe and secure campus that is better aligned with the current instructional program and meets current Division of the State Architect (DSA) educational specifications. Figure 1 illustrates the Project site plan. Inadequate buildings will be demolished and replaced by new buildings that will improve educational quality and safety for students and staff. The proposed Project also

includes essential upgrades including new exterior paint, the removal of barriers and other accessibility upgrades, and various landscape and hardscape improvements. A total of 12 classrooms will be demolished as part of the renovation project and this same number will be constructed, thus leaving the number of classrooms unchanged at 78. The maximum student enrollment of 1,800 will also remain the same.

EXISTING CONDITIONS

Street Network

The Project study area is served by a network of freeways, arterial streets, and collector streets, as illustrated in Figure 1. The following text provides a brief discussion of the primary components of the study-area street network.

Topanga Canyon Boulevard (S.R. 27), a north-south arterial roadway in the City of Los Angeles, is located adjacent to the Project site. Topanga Canyon Boulevard extends south from State Route 118 in Simi Valley to the Pacific Coast Highway in Malibu. Regional access to the Project is provided via the U.S. Highway 101 and the State Route 118/Topanga Canyon Boulevard interchanges. In the study-area the posted speed on Topanga Canyon Boulevard is 45 mph. Adjacent to Canoga Park High School the posted speed is 25 mph when children are present. Topanga Canyon Boulevard provides direct access to the Project site via a gated driveway connection.

Vanowen Street, is a 2- to 4-lane east-west arterial roadway in the vicinity of the Project. Vanowen Street extends easterly from Valley Circle Boulevard to North Buena Vista Street. In the study-area, the Posted speed on Owensmouth Avenue is 35 mph. Adjacent to Canoga Park High School the posted speed is 25 mph when children are present. Vanowen Street serves primarily residential and commercial land uses in the study-area. Within the Project study-area, Vanowen Street is signalized at Topanga Canyon Boulevard and Owensmouth Avenue. Vanowen Street is fully improved with curb, gutter, sidewalk and street lighting in the study-area. Vanowen Street

provides direct access to the Project site via driveway connections.

Owensmouth Avenue is a 2- to 4-lane north-south collector roadway in the vicinity of the Project. Owensmouth Avenue extends south from Andora Avenue terminating at Jullianna Lane. In the study-area, the posted speed on Owensmouth Avenue is 35 mph. Owensmouth Avenue serves primarily residential and commercial land uses in the study-area. Owensmouth Avenue is fully improved with curb, gutter, sidewalk and street lighting in the study-area Within the Project study-area, Owensmouth Avenue is signalized at the Vanowen Street.

Hart Street is a 2-lane east-west roadway in the vicinity of the Project site. Within the study-area Hart Street extends east from Topanga Canyon Boulevard to Canoga Avenue. Hart Street serves primarily residential and commercial land uses in the study-area. Hart Street is fully improved with curb, gutter, sidewalk and street lighting in the study-area Within the Project study-area, Hart Street is signalized at Owensmouth Avenue and STOP-Sign controlled at Topanga Canyon Boulevard.

Schoolcraft Street is a 2-lane east-west roadway in the vicinity of the Project site. In the study-area Schoolcraft Street extends east from Nila Avenue to Topanga Canyon Boulevard. Schoolcraft Street serves primarily residential and commercial land uses in the study-area. Schoolcraft Street is partially improved with curb, gutter, partial sidewalk and street lighting in the study-area. Speed humps are provided in the residential section of the street. Within the Project study-area, Schoolcraft Street is STOP-Sign controlled at Topanga Canyon Boulevard.

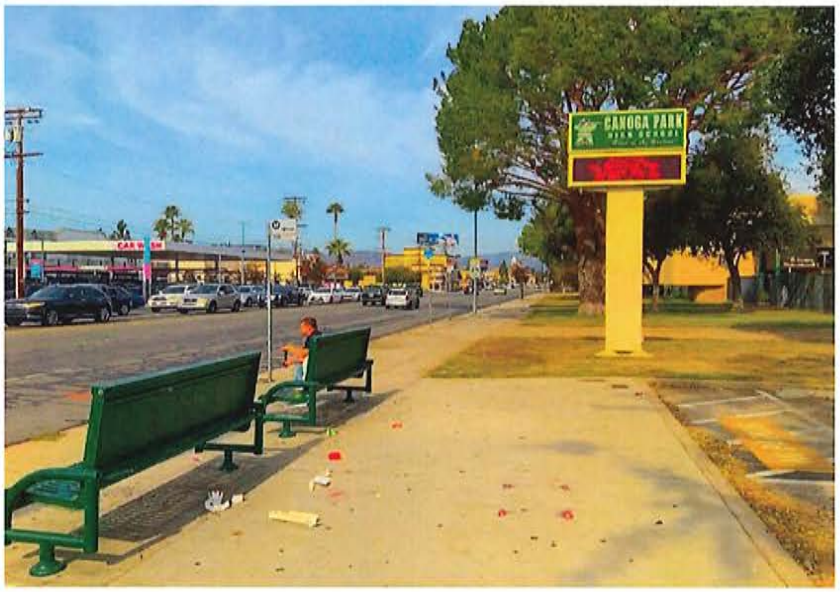
Bassett Street is a 2-lane east-west roadway in the vicinity of the Project site. Bassett Street extends east from Nila Avenue to Topanga Canyon Boulevard. Bassett Street serves primarily residential and commercial land uses in the study-area. Bassett Street is partially improved

with curb, gutter, partial sidewalk and street lighting in the study-area Within the Project study-area, Bassett Street is signalized at Topanga Canyon Boulevard.

Vassar Avenue is a 2-lane north-south roadway in the vicinity of the Project site. In the study-area Vassar Avenue extends south from Sherman Way to Hart Street. Vassar Avenue serves primarily residential and commercial land uses in the study-area. Vassar Avenue is fully improved with curb, gutter, sidewalk and street lighting in the study-area. Within the Project study-area, Vassar Avenue is STOP-Sign controlled at Hart Street.

Jordan Avenue is a 2-lane north-south roadway in the vicinity of the Project site. In the study-area Jordan Avenue extends south from Sherman Way to Hart Street. Jordan Avenue serves primarily residential and commercial land uses in the study-area. Jordan Avenue is fully improved with curb, gutter, sidewalk and street lighting in the study-area. Within the Project study-area, Jordan Avenue is STOP-Sign controlled at Hart Street.

PEDESTRIAN, BICYCLE AND TRANSIT FACILITIES



Pedestrian and Bicycle Facilities

Currently there are pedestrian facilities (sidewalks, crosswalk, etc.) located along Topanga Canyon Boulevard, Vanowen Street, Owensmouth Avenue and Hart Street in the study-area. Sidewalks are provided on Topanga Canyon Boulevard, Vanowen Street and Hart Street adjacent to the Project site. The sidewalks connect the Project to the local transit service provided in the study-area on Topanga Canyon Boulevard and Vanowen Street. The nearest signalized pedestrian crosswalk is provided at the Topanga Canyon Boulevard and Vanowen Street intersection. Striped pedestrian crosswalks, ADA ramps and pedestrian call buttons are provided on each leg of the intersection. The nearest unsignalized pedestrian crosswalk is provided at the Topanga Canyon Boulevard and Hart Street intersection. Striped pedestrian crosswalk with ramps are provided on the eastern leg of the intersection. These pedestrian facilities connect the Project to commercial areas and the local neighborhoods north, south, east and west of the Project. The Project would not have an adverse effect on the existing pedestrian facilities.

The Project site is served by the City of Los Angeles Bikeway System. The existing bicycle facilities located in the study-area consist of Class III bike lanes along Topanga Canyon Boulevard, Vanowen Street, Owensmouth Avenue, Hart Street and the Orange Line Bikeway. These bike facilities connect the Project to the local neighborhoods north, south, east and west of the Project. Bicycle parking is provided on-site for staff/faculty and students that choose to bike. The proposed Project would not have an adverse effect on the existing bicycle facilities.

Transit Facilities

Los Angeles Metro (Metro) is the local transit provider in the City of Los Angeles. The Canoga Park High School site is served by the Metro #150 Route (Chatsworth - Canoga Park - Tarzana via Topanga Canyon Boulevard - Ventura Boulevard). The Metro #150 Route operates daily providing fixed route bus service on Vanowen Street adjacent to the school site. During the peak commute hours, the Metro #150 Route operates with less than 30-minute headways. The school site is also served by the Metro #165 Route (West Hills - Burbank via Vanowen Street). The Metro #165 Route operates daily providing fixed route bus service on Vanowen Street adjacent to the Project site. During the peak commute hours, the Metro #165 Route operates with less than 30-minute headways. Existing bus stops are located on Vanowen Street less than a ¼ mile of 1the Project site, on both sides of Vanowen Street. A bus stop is provided on each corner of the Topanga Canyon Boulevard/Vanowen Street intersection. The Canoga Park High School site is also served by the City of Santa Clarita Transit Commuter Express Route #791. The #791 Commuter Express Route operates Monday through Friday providing fixed route bus service on Topanga Canyon Boulevard. An existing bus stop is located adjacent to the Project site on the corner of Topanga Canyon Boulevard and Vanowen Street. The "G" Line (Orange Line) rapid bus service interfaces with the Metro #150 bus and Santa Clarita Transit at the Canoga station less than a mile from the school campus. The "G' Line operates daily with 10 to 15-minute headways during the peak commute hours. LAUSD also provides school bus service to the campus. School bus pick-up and drop-off is provided along Topanga Canyon Boulevard at the main campus entry. The proposed Project would not have an adverse effect on the existing transit facilities.

LOS ANGELES UNIFIED SCHOOL DISTRICT (LAUSD) ENVIRONMENTAL STANDARDS

Transportation

The following table lists the transportation and traffic related standards conditions and project design features (PDF) that are included as part of each SUP-related project as appropriate.

PDF#	Topic	Trigger for Compliance	Implementation Phase	Standard Conditions and Project Design Features
Standard Conditions				
SC T-1	Analysis for traffic	If project increase student capacity and additional traffic	Prior to project approval	**OEHS CEQA Specification Manual. Appendix C, Traffic and Pedestrian Safety Requirements for New Schools**. Requirements identifies performance requirements for the selection and design of school sites to minimize potential pedestrian safety risks: • Site Selection • Bus and Passenger Loading Area • Vehicles Access • Pedestrian Routes to School Requirements also state school traffic studies shall identify measures to ensure separation between pedestrian and vehicles along potential pedestrian routes, such as sidewalks, crosswalks, bike paths, crossing guards, pedestrian, and traffic signals, stop signs, warning signs and other pedestrian access measure.
SC T-2	Vehicular access and parking	If project includes construction of parking and/or vehicular or pedestrian access.	During project design	**LAUSD School Design Guide.** Vehicular access and parking shall comply with Section 2.3, Vehcular Access and Parking of the School Design Guide, January 2014. The Design Guide contains the following regulation related to traffic: • Parking Sace Requirements • Geneal Parking Guidelines • Vehicular Access and Pedestrian Safety • Parking Structure Security
SC T-3	Analysis for traffic	If project increases student capacity and/or generates additional traffic or shifts traffic patterns	Prior to project approval	Coordinate with the local City or County jurisdiction and agree on the following: • Compliance with the jurisdiction's deign guidelines for access, parking and circulation in the vicinity of the project. • Scope of analysis and methodology for the traffic and pedestrian study, including trip generation rates, trip distribution, number and location of intersections to be studied and traffic impact thresholds. • Implementation of SRTS, traffic control and pedestrian safety devices. • Fair share contribution and/or other mitigation measures for potential traffic impacts. • Traffic and pedestrian safety impact studies shall address local traffic and congestion during morning arrival times, and before and after evening stadium events. • Traffic study will use the latest version of the Institute of Transportation (ITE) Trip Generation manual to determine trip generation rates (parent vehicles, school busses, staff/faculty vehicles and delivery vehicles based on the size of the school facility and the specific school type (e.g., Magnet, Charter, etc.), unless otherwise required by local jurisdiction. • Loading zones will be analyzed to determine the adequacy as pick-up and drop-off points. Recommendations will be developed in consultation with the local jurisdiction for curb loading bays or curb parking restrictions to accommodate loading needs and will control double parking and across-

PDF#	Topic	Trigger for Compliance	Implementation Phase	Standard Conditions and Project Design Features
				the-street loading.
SC T-4	Construction Traffic	If project requires construction equipment to use public roadways	Prior to construction	LAUSD shall require its contractors to submit a construction worksite traffic control plan to the LADOT for review prior to construction. The plan will show the location of any haul routes, hours of operation, protective devices, warning signs and access to abutting properties. LAUSD shall encourage its contactors to limit construction-related trucks o off-peak commute periods. As required by Caltrans, applicable transportation related safety measures shall be implemented during construction.
SC AQ-5	Traffic Reduction	If project includes increases in student capacity and additional traffic	During school operation	LAUSD shall encourage ride-sharing programs for students and teachers.

The Project does not result in an increase in student capacity, additional traffic or result in a change in traffic patterns. The proposed Project involves building replacement, renovation, modernization, and reconfiguration on the Canoga Park High School campus as part of the SUP. The renovation consists of the modernization of the Canoga Park High School campus to facilitate a safe and secure campus that is better aligned with the current instructional program and meets current DSA educational specifications.

Pedestrian Safety

The following table lists the pedestrian safety related standards conditions that are included as part of each SUP-related project as appropriate.

PDF#	Topic	Trigger for Compliance	Implementation Phase	Standard Conditions
Standard Conditions				
SC PED-1	OHES pedestrian safety evaluation	If project increase student capacity by more than 25% or 10 classrooms	During project design	**Caltrans SRTS program.** The LAUSD is a participant in the SRTS program administered by Caltrans and the local law enforcement and transportation agencies. OEHS provides pedestrian safety evaluation as a component of traffic studies conducted for new school projects. This pedestrian safety evaluation includes a determination of whether adequate walkways and sidewalks are provided along the perimeter of across from and adjacent to a proposed school site and along paths of identified pedestrian routes within a 0.25-mile radius of a proposes school site. The purpose of this review is to insure that pedestrians are adequately separated from vehicular traffic.
SC PED-2	Pedestrian safety analysis	If project increase student capacity by more than 25% or 10 classrooms	During project design	**Traffic and Pedestrian Safety Requirements** LAUSD has developed these performance guidelines to minimize potential pedestrian safety risks to students, faculty and staff and visitors at LAUSD schools. The performance guidelines include the requirements for student drop-off area, vehicle access and pedestrian routes to school. Appendix C states school traffic studies shall identify measures to ensure separation between pedestrians and vehicles along potential pedestrian routes, such as sidewalks, crosswalks, bike paths, crossing guards, pedestrian and traffic signals, stop signs, warming signs, and other pedestrian access measures.

PDF#	Topic	Trigger for Compliance	Implementation Phase	Standard Conditions
SC PED-3	Pedestrian safety analysis	If project increase student capacity by more than 25% or 10 classrooms	During project design	**Sidewalk Requirements for New Schools.** LAUSD shall coordinate with responsible traffic jurisdiction/agency to ensure these areas are improved prior to the opening of a school. Improvements shall include, but are not limited to • Clearly designate passenger loading area with the use of signage, painted curbs, etc. • Install new walkway and/or sidewalk segments where none exist. • Any substandard walkways/sidewalks segments shall be improved to a minimum of eight feet wide. • Provide other alternative measures that separate foot traffic from vehicular traffic, such as distance travel pathways or barricades.
SC PED-4	Pedestrian safety analysis	If project increase student capacity by more than 25% or 10 classrooms	Prior to project approval	**School Traffic Safety Reference Guide REF-4492.1** This reference Guide replaces Reference Guide 4492.0 School Traffic Safety, September 30,2008. Updated information is provided including new guidance on passenger loading zones and Safety Valey Program. Guide sets for requirements for traffic and pedestrian safety, and procedures for school principals to request assistance from OEHS, the Los Angeles Schools Police Department (LASPD) or the local police department regarding traffic and pedestrian safety. Distribution and posting of Back-to-School Safety Tips flyer is required. This guide also includes procedures for traffic surveys, parking restrictions, crosswalks, advance warning signs (school zone) school parking signage, traffic controls, crossing guard or for determination on whether vehicle enforcement is required to ensure the safety of students and staff.
SC PED-5	Safe access to school	If project includes construction of bus loading area, student drop-off/pick-up area and or parking	During project design	**School Design Guide.** The Guide states student drop-off and pick-up, bus loading area and parking areas shall be separated to allow students to enter and exit the school grounds safely.
SC T-3	Analysis for traffic	If project increases student capacity and/or generates additional traffic or shifts traffic patterns	Prior to project approval	Coordinate with the local City or County jurisdiction and agree on the following: • Compliance with the jurisdiction's design guidelines for access, parking and circulation in the vicinity of the project. • Scope of analysis and methodology for the traffic and pedestrian study, including trip generation rates, trip distribution, number and location of intersections to be studied and traffic impact thresholds. • Implementation of SRTS, traffic control and pedestrian safety devices. • Fair share contribution and/or other mitigation measures for potential traffic impacts. • Traffic and pedestrian safety impact studies shall address local traffic and congestion during morning arrival times, and before and after evening stadium events. • Traffic study will use the latest version of the Institute of Transportation (ITE) Trip Generation manual to determine trip generation rates (parent vehicles, school busses, staff/faculty vehicles and delivery vehicles based on the size of the school facility and the specific school type (e.g., Magnet, Charter, etc.), unless otherwise required by local

PDF#	Topic	Trigger for Compliance	Implementation Phase	Standard Conditions
				jurisdiction. Loading zones will be analyzed to determine the adequacy as pick-up and drop-off points. Recommendations will be developed in consultation with the local jurisdiction for curb loading bays or curb parking restrictions to accommodate loading needs and will control double parking and across-the-street loading.
SC T-4	Construction Traffic	If project requires construction equipment to use public roadways	Prior to construction	LAUSD shall require its contractors to submit a construction worksite traffic control plan to the LADOT for review prior to construction. The plan will show the location of any haul routes, hours of operation, protective devices, warning signs and access to abutting properties. LAUSD shall encourage its contactors to limit construction-related trucks o off-peak commute periods. As required by Caltrans, applicable transportation related safety measures shall be implemented during construction.

The Project does not result in an increase in student capacity, increased classrooms, additional traffic or result in a change in traffic patterns. The proposed Project involves building replacement, renovation, modernization, and reconfiguration on the Canoga Park High School campus as part of the SUP. The renovation consists of the modernization of the Canoga Park High School campus to facilitate a safe and secure campus that is better aligned with the current instructional program and meets current DSA educational specifications.

CONSTRUCTION

Project construction will occur in four phases over a period of 62 months. Phases I and II will occur concurrently over a period of 10 months. Phase III will occur over a period of 4 months. Phase IV will occur over a period of 48 months.

- **Phase I - Utility Make Ready (10-month duration):** During this phase site utilities will be prepared for future construction by eliminating utility connection to buildings that are connected through buildings hat are planed for demolition., install utilities necessary for construction of the interim housing village, and install utilities for new construction to a coordinated point within the new development zones. The goal is to consolidate underground work in public areas including service road and quads into one please so as to minimize campus disruption during major construction work.

- **Phase II - Interim Housing (10-month duration):** During this phase construction of interim housing spaces for school programs that will be displaced by the major demolition activity in Phase III. T Phase II will occur concurrently with Phase I. The goal is to remove active school programs from the development zones where demolition and new construction activity will occur.

- **Phase III - Major Demolition and Site Organization (4-month duration):** During this phase the development area of all elements planned for demolition will be cleared, establish campus circulation patterns around primary areas of constriction, establish construction site logistics, a Stormwater Pollution Prevention Plan (SWPPP) and consolidate storge containers on an area suitable for their continued use.

- **Phase IV - New Construction (48-month duration):** During this phase the construction of new school facilities will be completed so that LAUSD may take occupancy of the new spaces and move school programs into their permanent facilities. Phase IV will also include adequate fire access and major paths of circulation to all areas of the school campus.

The construction workers typically make one trip onto the job site and one trip off the job site. The vast majority of workers bring their own lunch or eat from a food truck that would come to the site, thus never leaving the site during work hours. Construction workers would travel to the site in private vehicles. If adequate parking areas are not available onsite, off-site parking would need to be obtained. Building construction would also require the delivery of construction equipment and materials to the site. Adequate staging and storage areas would need to be provided on-site to accommodate construction equipment and the delivery and storage of materials.

Construction of project-related improvements along Topanga Canyon Boulevard and Vanowen Street would have the potential to disrupt traffic flows along the corridors. Certain construction activities - such as roadway improvements, utility relocation or extensions, and drainage facility construction - could require temporary lane closures, which would in turn temporarily reduce existing street capacity. Such impacts would be short-term in duration. Potential sidewalk and lane closures could affect pedestrian and bicycle flows and therefore should be managed to minimize potential impacts. Traffic control plans would be required to mitigate these potential construction impacts. LAUSD requires its contactors to submit construction worksite traffic control plans to LADOT for review prior to construction as required by SC T-4. Elements if the traffic control plan would include, but would not necessarily be limited to, restricting construction-related trucks to off-peak commute periods, and provisions of flaggers to assist or direct traffic flows to and from the local streets. A "haul route" may be required and obtained from the Los Angeles Department of Building and Safety (LADBS). Therefore, the Project would not cause an increase in traffic that is substantial in relation to the existing traffic load and capacity of the adjacent street system.

SITE ACCESS AND CIRCULATION

As illustrated on the Project site plan, the single vehicular entrance for the interior of the campus is located on Vanowen Street which leads to a central promenade that runs north-south between the athletic field and the majority of the buildings. This is used for service vehicle access and parking for staff and students. There is a parking lot off of Vanowen Street next to Assembly Hall with its own entrance, just west of the main vehicular entrance, and another parking lot off of Topanga Canyon Boulevard south of the basketball courts. The western corner areas both have their own vehicular entrances and parking spaces. Vehicular drop-off/pick-up occurs on Vanowen Street and Topanga Canyon Boulevard near the entrance into the campus interior on Vanowen Street and near the northern parking lot on Topanga Canyon Boulevard. Bus drop-offs and pick-ups occur on Topanga Canyon Boulevard in front of the main campus entrance.

Campus pedestrian and vehicular entryways will remain the same and drop-off and pick-up points will remain unchanged. Parking will remain in the same locations though spaces will be increased along the central promenade, and potentially increased in the lot accessed from Topanga Canyon Boulevard. The improved internal circulation will be similar to the existing circulation though the central promenade will be straightened, widened, and landscaped as buildings previously within the path will be demolished. Parking spaces will be increased along the central promenade but access to service vehicles will be reduced as much as possible, and a new hardscape treatment and landscaping is intended to orient the space toward pedestrians. The primary internal circulation routes will be improved with landscaping and new hardscape treatment. Screens will also be incorporated to visually separate the athletic field bleachers from the rest of the campus, and to visually obscure the boiler room located near the center of the campus.

The Project site is developed with existing school facilities. The campus is generally bounded by Topanga Canyon Boulevard to the west, Vanowen Street to the south, Owensmouth Avenue to the east and Hart Street to the north. Pedestrian access and circulation is provided along sidewalks on all streets surrounding the campus. The two intersections on Topanga Canyon Boulevard along the campus frontage are signalized with crosswalk pavement markings across Topanga Canyon Boulevard. In addition, the Vanowen Street/Owensmouth Avenue and Hart Street/Owensmouth Avenue intersections are signalized with crosswalk pavement markings across Owensmouth Avenue. Crosswalk pavement markings are provided across Hart Street at Topanga Canyon Road and Vassar Avenue.

The proposed Project would occur on the existing Canoga Park High School campus (with no increase in enrollment). The Project would not increase traffic volumes on the adjacent roadways after construction is completed; it would not directly or indirectly alter the configuration of the exiting street system (including sidewalks, crosswalks or traffic control devices at intersections). The Project would enhance the path of travel, accessibility and other pedestrian travel throughout the campus. The Project would employ standard engineering practice such as standard driveway widths and turning radii and the provision

of adequate line of sight to avoid design elements that could result in hazards. Passenger vehicle/bus drop-off and pick-up zones would be designated in the curb-lane adjacent to the campus on Topanga Canyon Boulevard and Vanowen Street. The student drop-off and pick-up operations have been planned to minimize vehicular queuing in traffic lanes on the local street system. Conformance to LAUSD policies and local ordinance would ensure that adequate access would be maintained.

Pedestrian access to and from campus during school construction would be minimally altered and any temporary changes to pedestrian access during each phase of the construction would be completed as outlined in a worksite traffic control plan for the proposed Project (Per SC T-4). Construction vehicles accessing the campus would avoid drop-off and pick-up during the start and end of the school day. All construction related access and traffic would be coordinated with the school administrators, LAUSD's Transportation and the Office of Environmental Health and Safety and will be detailed in the worksite traffic control plan.

The proposed Project would not substantially increase vehicular and or pedestrian safety hazards for students and residents in the surrounding neighborhood. Project impacts to pedestrian safety would be less than significant.

SAFE ROUTES TO SCHOOL

There are residential neighborhoods located within walking distance of the Project site. Figure 2 illustrates the "'Safe Routes to School" map for the Canoga Park High School. The existing pedestrian, bicycle and transit facilities discussed previously connect the Canoga Pak High School campus to the adjacent residential neighborhoods. Local students would travel along Topanga Canyon Boulevard, Vanowen Street, Owensmouth Avenue, Hart Street, Bassett Street, Schoolcraft Street, Vassar Avenue and Jordan Avenue to the school campus. Traffic signals and pedestrian crosswalks are provided at the major intersections allowing school children to cross Topanga Canyon Boulevard, Vanowen Street and Owensmouth Avenue. STOP-Sign controlled pedestrian crosswalks are provided along Hart Street for school children that reside north of the school.

COLLISION HISTORY

The collision history was evaluated to determine its relative safety given the existing conditions in the field. Collison data was obtained from California Highway Patrol (CHP) for the most currently available three-year period, which is from January 1, 2021 through October 30, 2023 (see attached collision data).

There were 11 reported collisions at intersections in the study-area within the 3-year period. One of the collisions was a single-vehicle fatal collision with a pedestrian. One of the collisions was a single-vehicle head-on collision with a fixed object. The remaining collisions involved a vehicle that sideswiped another vehicle or rear-ended/backed into another

vehicle. The primary collision factors by severity were failure to yield/improper turn, r-o-w violations alcohol, unsafe speed and pedestrian violation. None of the 11 collisions involved school children. The fatal pedestrian collision occurred in October of 2022 at 8:35 PM. The majority of the other collisions occurred outside of normal school hours.

VEHICLE MILES TRAVELED ANALYSIS

The State of California, in compliance with Senate Bill 743, has developed a new set of CEQA guidelines and thresholds for transportation impacts that are based on a Vehicle Miles Traveled (VMT) metric rather than a Level of Service (LOS) metric. The State's Natural Resource Agency Updated Guidelines for the Implementation of the CEQA adopted in 2018, have designated VMT as the most appropriate measure of transportation impacts. "Vehicle miles traveled" refers to the amount and distance of automobile travel attributable to a project. Other relevant considerations may include the effects of the project on transit and non-motorized travel. For land use projects, vehicle miles traveled exceeding an applicable threshold of significance may indicate a significant impact.

Local agencies have discretion to develop and adopt their own thresholds or rely on thresholds recommended by other agencies. The City of Los Angeles has adopted VMT impact criteria, the VMT analysis prepared for the Project was developed using the adopted VMT screening criteria.

City of Los Angeles VMT Screening Criteria

Projects shall be presumed to have a less than significant transportation impact if they meet any of the following screening criteria:

Tier 1 Screening Criteria:

Project will have less residential units compared to the existing residential units and is within one-half mile of a fixed-rail station.

Tier 2 Screening Criteria:

The net increase in daily trips $<$ 250 trips.
The net increase in daily VMT ≤ 0.
The proposed project consists of only retail land uses $\leq$ 50,000 square feet total.

Project Trip Generation

Trip generation estimates were calculated for the Canoga Park High School based on the rates published in the Institute of Transportation Engineers (ITE), Trip Generation, 11th Edition

for High School (Land Use Code #525). Table 1 presents the trip generation estimates for the high school.

Table 1
Project Trip Generation

Land Use	Enrollment	ADT		AM Peak Hour		PM Peak Hour	
		Rate	Trips	Rate	Trips	Rate	Trips
Pre-Modernization: High School	1,800 Students	1.94	3,492	0.52	936 (636/300)	0.14	252 (121/131)
Post Modernization: High School	1,800 Students	1.94	3,492	0.52	936 (636/300)	0.14	252 (121/131)
Net Change:			0		0 (0/0)		0 (0/0)

The data presented in Table 1 indicate that the high school is estimated to generate 1,335 ADT, 89 AM peak hour trips and 116 PM peak hour trips. The modernization project does not result in an increase in student capacity, additional traffic or result in a change in traffic patterns. Utilizing the City of Los Angeles VMT Calculator this traffic analysis has determined that the Project generates less than 250 average daily external trips. The Project would not result in a net increase in daily VMT therefore, a VMT analysis is not required.

CITY OF LOS ANGELES VMT CALCULATOR Version 1.4

Project Screening Criteria: Is this project required to conduct a vehicle miles traveled analysis?

Project Information

Project: Canoga Park High School

Scenario: Existing

Address: 6850 N TOPANGA CANYON BLVD, 91303

Is the project replacing an existing number of residential units with a smaller number of residential units AND is located within one-half mile of a fixed-rail or fixed-guideway transit station?

● Yes ○ No

Existing Land Use

Land Use Type	Value	Unit
School | High School	1800	Students
School | High School	1800	Students

☐ Click here to add a single custom land use type (will be included in the above list)

Proposed Project Land Use

Land Use Type	Value	Unit
School | High School	1800	Students
School | High School	1800	Students

☐ Click here to add a single custom land use type (will be included in the above list)

Project Screening Summary

Existing Land Use	Proposed Project
1,670 Daily Vehicle Trips	1,670 Daily Vehicle Trips
13,990 Daily VMT	13,990 Daily VMT

Tier 1 Screening Criteria

Project will have less residential units compared to existing residential units & is within one-half mile of a fixed-rail station. ☐

Tier 2 Screening Criteria

The net increase in daily trips < 250 trips	0 Net Daily Trips
The net increase in daily VMT ≤ 0	0 Net Daily VMT
The proposed project consists of only retail land uses ≤ 50,000 square feet total.	0.000 ksf

The proposed project is not required to perform VMT analysis.
