RESOLUTION 2014-25

BOARD REPORT NO. 494-13/14

**AMENDMENT TO THE FACILITIES SERVICES DIVISION STRATEGIC EXECUTION
PLAN TO CANCEL PROJECTS**

WHEREAS, 335 unfunded projects and 19 active projects are currently included in the Facilities Services Division Strategic Execution Plan (SEP); and

WHEREAS, the Board of Education approved the establishment of the School Upgrade Program in January 2014 to support the creation of future projects; the School Upgrade Program was developed with new information about the condition of the District's facilities from the completed capital needs assessment and master planning effort as well as the ongoing facilities condition assessment while also taking into account the District's current instructional vision; and

WHEREAS, many of the unfunded projects are no longer required because the facilities needs they were designed to address have already been met through the completion of other bond-funded projects or the unfunded projects do not meet the recently-approved goals and principles of the bond program; and

WHEREAS, any outstanding facilities requirements from unfunded projects will be addressed as part of the master planning effort and/or the facilities condition assessments, which are currently underway to determine the remaining service life of different types of school site building components, and will later be folded into the development of projects under the School Upgrade Program; and

WHEREAS, the 19 active projects are proposed for cancellation because the project scope either no longer aligns with the priorities identified by school administrators and community stakeholders, is no longer needed due to changes in school operations, or will be completed through other bond-funded projects at the school; and

WHEREAS, cancellation of unfunded projects will allow any remaining facilities needs associated with these projects to be evaluated more comprehensively as part of the School Upgrade Program and its development of funded projects in the future; and

Bond Oversight Committee

RESOLUTION 2014-25

**AMENDMENT TO THE FACILITIES SERVICES DIVISION STRATEGIC EXECUTION PLAN
TO CANCEL PROJECTS**

PAGE 2

WHEREAS, approval of the proposed action will also enable staff to produce a 2014 update to the Facilities Services Division SEP that represents the remaining funded work that will be executed as part of the bond program.

NOW, THEREFORE, BE IT RESOLVED THAT

1. The School Construction Bond Citizens' Oversight Committee recommends that the Board of Education adopt an amendment to the Facilities Services Division SEP to cancel 335 projects (Attachment A) that were previously designated by the Board of Education as unfunded projects and cancel 19 projects (Attachment B) that are currently active but for which the scope as defined is no longer needed as described in the Board Report No. 494-13/14, a copy of which is attached hereto in the form it was presented to the BOC and is incorporated herein by reference.
2. This resolution shall be transmitted to the Los Angeles Unified School District Board of Education and posted on the Bond Oversight Committee's website.
3. That a written response as required by the Charter and Memorandum of Understanding between the Oversight Committee and the Board be provided to the Oversight Committee within 30 days, reporting either on action taken or proposed to be taken in response to this resolution and each recommendation herein.

LOS ANGELES UNIFIED SCHOOL DISTRICT

Board of Education Report

Report Number:	494-13/14
Date:	June 10, 2014
Subject:	Amendment to the Facilities Services Division Strategic Execution Plan to Cancel Projects
Responsible Staff:	
Name	Mark Hovatter, Chief Facilities Executive
Office/Division	Facilities Services Division
Telephone No.	(213) 241-4811

BOARD REPORT

Action Proposed: Staff proposes that the Board of Education amend the Facilities Services Division Strategic Execution Plan (SEP) to take the following actions:

- Cancel 335 projects listed in Attachment A that were previously designated by the Board of Education as unfunded projects; and
- Cancel 19 projects listed in Attachment B that are currently active but for which the scope as defined is no longer needed.

Background: The Bond Program began in 1997 with the approval by local voters of Proposition BB and has since grown with the passage of Statewide bonds as well as additional local bond Measures K, R, Y and Q, enabling the Facilities Services Division to further its mission of providing healthy and safe learning environments that support educational achievement. As the Bond Program evolved, the Board of Education approved amendments to the Facilities Services Division SEP that reallocated bond funds to ensure the completion of program goals or to address emerging priorities. These SEP amendments, approved periodically between 2007 and 2013, resulted in the designation of select projects as unfunded until additional funding sources could be identified and allocated to those projects through future Board actions. The SEP amendments approved in 2012 and 2013 also cancelled projects that had been deemed unnecessary or cost prohibitive and facilitated the implementation of the Facilities Services Division SEP by more accurately reflecting the remaining work to be undertaken.

More recently, the Board of Education approved the establishment of the School Upgrade Program in January 2014, which will serve as the next phase of the District's Bond Program to modernize, build and repair school facilities. The Board's action approved the overarching goals and principles, funding sources, specific categories of need, and spending targets for the School Upgrade Program with a total allocation of

LOS ANGELES UNIFIED SCHOOL DISTRICT

Board of Education Report

\$7,852,970,000 to support the creation of future projects. The School Upgrade Program was developed with new information about the condition of the District's facilities from the completed capital needs assessment and master planning effort as well as the ongoing facilities condition assessment while also taking into account the District's current instructional vision.

Many of the unfunded projects listed in Attachment A are no longer required because the facilities needs they were designed to address have already been met through the completion of other bond-funded projects or the unfunded projects do not meet the recently-approved goals and principles of the Bond Program. Any outstanding facilities requirements from these projects will be addressed as part of the master planning effort and/or the facilities condition assessments, which are currently underway to determine the remaining service life of different types of school site building components, and will later be folded into the development of projects under the School Upgrade Program.

Due to the nature of working on existing campuses, the Repair & Modernization Program adapts to changes in the operating school environment by revising projects when necessary. The active projects listed in Attachment B are proposed for cancellation because the project scope either no longer aligns with the priorities identified by school administrators and community stakeholders, is no longer needed due to changes in school operations, or will be completed through other bond-funded projects at the school.

Expected Outcomes: Staff anticipates that the Board of Education will approve the proposed action to cancel 335 unfunded projects in Attachment A and 19 active projects in Attachment B. Cancellation of these projects will allow the School Upgrade Program to comprehensively review work to be pursued at school facilities to improve student health, safety and educational quality. Approval of the proposed action will also enable staff to produce a 2014 update to the Facilities Services Division SEP that represents the remaining funded work that will be executed as part of the Bond Program.

Board Options and Consequences: If the Board approves the proposed action, staff will proceed with cancelling 335 unfunded projects and 19 active projects, thereby removing them from the Facilities Services Division SEP. Approval of this action would also enable any remaining work requirements to be combined with the School Upgrade Program's efforts to further modernize and repair school facilities. If the Board does not approve the proposed action, the 335 projects in Attachment A will remain unfunded, inactive, and

LOS ANGELES UNIFIED SCHOOL DISTRICT

Board of Education Report

displayed in the Unfunded Projects exhibit of the Facilities Services Division SEP. Before projects could be executed, accurate scopes, schedules, budgets, and additional funding sources would need to be identified and presented to the Bond Citizens' Oversight Committee and Board of Education for each project. Additionally, without Board approval of this action, the 19 active projects in Attachment B would remain in the Facilities Services Division SEP but would be placed on hold as the defined scope for these projects is not needed to fulfill the current objectives for the Bond Program.

Policy Implications: The requested action does not change current District policies.

Budget Impact: There is no impact to the General Fund as Bond Program funds are associated with the projects included in this proposed action. The budgets and commitments related to individual projects are being reviewed and analyzed in order to determine the amount of funds, if any, that can be made available to the Bond Program. Should available funding be identified, it will be returned to the Board-prioritized program associated with each cancelled project.

Issues and Analysis: The unfunded projects listed in Attachment A are organized by the four prior Board actions taken to unfund them. The first took place on October 23, 2007, when Board of Education Report No. 112-07/08 approved the New Construction Two-Semester Neighborhood School Program in order to achieve the goal of providing a two-semester neighborhood school for all students. In accordance with this action, several New Construction projects that would have further reduced overcrowding at K-12 schools, but were no longer necessary to provide neighborhood schools operating on a two-semester calendar, became unfunded projects.

In December 2011, Board of Education Report No. 086-11/12 approved the Prioritization and Funding Strategy for School Information Technology (IT) Network Infrastructure Upgrades. This second action reallocated bond funds from several Bond Program areas, including selected sustainability projects and a photovoltaic installation project belonging to the Capital Improvement Program, to fund IT network infrastructure and equipment upgrade projects at schools with limited or no access to electronic instructional initiatives.

The majority of unfunded projects were designated as such by Board of Education Report No. 201-11/12 when it was approved on April 10, 2012. This third Board action included the cancellation of more than 600 projects as well as moved 285 projects in the Repair & Modernization

LOS ANGELES UNIFIED SCHOOL DISTRICT

Board of Education Report

Program and 3 projects in Deferred Maintenance to an unfunded status as they were deemed unnecessary or cost prohibitive due to changes in scope and increased cost estimates. Please note that Deferred Maintenance projects are not part of the Bond Program, however the projects are included in this proposed action since they were previously designated as unfunded by the Board of Education.

The most recent Board action taken to unfund projects occurred in February 2013 with Board of Education Report No. 155-12/13. Much like the Board item from a year earlier, select projects in the Repair & Modernization Program were either cancelled or unfunded because the project scope no longer aligned with program priorities and/or exceeded the available funds for each project.

Attachment A lists the 335 unfunded projects that are proposed for cancellation including the prior Board actions related to their unfunded status, project numbers, school names/project names, the Board Districts and physical Educational Service Centers where projects were located, program types, and project costs. The cancellation of unfunded projects will allow any remaining facilities needs associated with these projects to be evaluated more comprehensively as part of the School Upgrade Program and its development of funded projects in the future.

Attachment B is organized by school names/project names and lists the 19 active projects that are proposed for cancellation including project numbers, the Board districts and physical Educational Service Centers where projects were located, managed programs, and project costs. The cancellation of these active projects will assist in the production of the 2014 Facilities Services Division SEP by ensuring that the annual update includes only the scope that will move forward in the Bond Program.

**Bond Oversight
Committee
Recommendations:**

This item was considered by the School Construction Bond Citizens' Oversight Committee (BOC) at its meeting of May 29, 2014. Staff has concluded that this proposed Facilities Services Division SEP amendment will facilitate implementation of the SEP, and therefore, it will not adversely affect the District's ability to successfully complete the SEP.
