### Third-Fifth Grade Selected English Language & Writing Standards

#### Key Ideas and Details in Informational Text

<table>
<thead>
<tr>
<th>Grade</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Third</td>
<td>Students ask and answer questions to show that they understand what they have read, identifying the main idea of a text, describing the key details and explaining how they support the main idea. Students describe the relationship between a series of historical events, scientific ideas or concepts, or steps in technical procedures in a text, using language that pertains to time (In the afternoon... In Winter 2018... at 3:00pm), sequence (first, next, last, finally), and cause/effect (if... then...).</td>
</tr>
<tr>
<td>Fourth</td>
<td>Students refer to details and examples in a text when explaining what the text says, identifying the main idea of a text and explaining how it is supported by key details. Students give a summary of the text. Students explain events, procedures, ideas, or concepts in a historical, scientific, or technical text. In their explanation, students include what happened and why, based on specific information in the text.</td>
</tr>
<tr>
<td>Fifth</td>
<td>Students quote accurately from a text when explaining what the text says, identifying two or more main ideas of a text and explaining how they are supported by key details. Students give a summary of the text. Students explain the relationships or interactions between two or more individuals, events, ideas, or concepts in a historical, scientific, or technical text based on specific information in the text.</td>
</tr>
</tbody>
</table>

#### Writing - Text Types and Purpose

<table>
<thead>
<tr>
<th>Grade</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Third</td>
<td>Students write about their opinions and include supporting points of view from the texts they have read. When writing, students introduce the topic or text they are writing about, state an opinion, create an organizational structure that lists reasons, and provide a concluding statement. Students provide reasons that support the opinion and use linking words like, therefore, because, and since, to connect opinion and reasons.</td>
</tr>
<tr>
<td>Fourth</td>
<td>Students write about their opinions and include supporting points of view from the texts they have read. When writing, students clearly introduce the topic or text they are writing about, state an opinion, write in an organized manner, and provide a concluding statement. Students provide reasons that are supported by facts and use linking words and phrases like, for instance, in order to, in addition, to connect opinion and reasons.</td>
</tr>
<tr>
<td>Fifth</td>
<td>Students write opinion pieces on topics or texts, supporting a point of view with reasons and information. When writing, students clearly introduce the topic or text they are writing about, state an opinion, write in an organized manner, and provide a concluding statement. Students provide logically ordered reasons that are supported by facts and details. Students link opinion and reasons using words, phrases, and clauses like, consequently, or specifically.</td>
</tr>
</tbody>
</table>
### Sample Activities & Online Resource to Practice with your Child at Home

<table>
<thead>
<tr>
<th>Third</th>
<th>Fourth</th>
<th>Fifth</th>
</tr>
</thead>
<tbody>
<tr>
<td>☑ Ask students to write 5 sentences describing a sequence in the text (first, next, last, finally).</td>
<td>☑ Ask students to explain what happened in the story and why it happened, citing specific details from the text.</td>
<td>☑ Ask students to explain the relationships or interactions between two or more individuals, events, or ideas in a historical or scientific text.</td>
</tr>
<tr>
<td>☑ Ask students to read the history in a specific region on <a href="https://www.historyforkids.net/">https://www.historyforkids.net/</a></td>
<td>☑ Students write an opinion paragraph, with supporting details, answering the following prompt, “Who is the person in history that has done the most good?”</td>
<td>☑ Students write a 1-page opinion, with supporting details, answering the following prompt, “Should all students be required to attend school?”</td>
</tr>
<tr>
<td>☑ Ask students to recount the history of the region, focusing on important events and asking them to use language related to time (In the afternoon, In Winter 2018, ... at 3:00pm), and cause and effect (if...then...).</td>
<td>☑ Ask students to recount the history of the region, asking them to list important events and sequence them in the proper order.</td>
<td>☑ Ask students to recount the history of the region, identifying key events and describing the relationships or interactions between the events, using specific information in the text.</td>
</tr>
<tr>
<td>☑ Ask students to read a science article on <a href="https://www.tweentribune.com/">https://www.tweentribune.com/</a></td>
<td>☑ Ask students to draw a comic strip displaying the events in order.</td>
<td>☑ Ask students to write a play taking place during one of these events.</td>
</tr>
<tr>
<td>☑ Ask students to describe a sequence in the text (first, next, last, finally) or to develop an opinion about whether the science is helpful for people.</td>
<td>☑ Ask students to read a science article on <a href="https://www.tweentribune.com/">https://www.tweentribune.com/</a></td>
<td>☑ Ask students to read a science article on <a href="https://www.tweentribune.com/">https://www.tweentribune.com/</a></td>
</tr>
<tr>
<td></td>
<td>☑ Ask students to explain the procedures or ideas, including what happened and why, based on specific information in the text.</td>
<td>☑ Ask students to write an opinion on the benefits and harms of the topic. Have students write an opinion page, to choose a side, explaining the benefits or harms.</td>
</tr>

## Third-Fifth Grade Selected Mathematics Standards

<table>
<thead>
<tr>
<th>Number Sense</th>
<th>Third</th>
<th>Fourth</th>
<th>Fifth</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Third</strong></td>
<td>Multiply and divide up to 10 × 10 quickly and accurately, including knowing the times tables from memory</td>
<td>Use whole-number arithmetic to solve word problems, including problems with remainders and problems with measurements</td>
<td>Add and subtract fractions with unlike denominators (e.g., 21/4 – 11/3), and solve word problems of this kind</td>
</tr>
<tr>
<td></td>
<td>Solve word problems using addition, subtraction, multiplication, and division</td>
<td>Understand and apply equivalent fractions, which are fractions with different denominators but the same value</td>
<td>Multiply fractions, divide fractions in simple cases, and solve related word problems (e.g., finding the area of a rectangle with fractional side lengths, determining how many 1/3-cup servings are in 2 cups of raisins, determining the size of a share if 9 people share a 50-pound sack of rice equally or if 3 people share 1/2 pound of chocolate equally)</td>
</tr>
<tr>
<td></td>
<td>Understand fractions and relate them to the familiar system of whole numbers</td>
<td>Add, subtract, and multiply fractions in simple cases (such as 2 3/4 – 1 1/4 or 3 × 5/8), and solve related word problems</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>Understand simple decimals in terms of fractions (e.g., rewriting 0.62 as 62/100)</td>
<td></td>
</tr>
</tbody>
</table>

<table>

<th>Fourth</th>
<th>Fifth</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Third</strong></td>
<td>Measure and estimate weights and liquid volumes, and solve word problems involving these quantities</td>
<td>Measure angles and find unknown angles in a diagram</td>
<td>Understand the concept of volume and solve word problems that involve volume</td>
</tr>
<tr>
<td></td>
<td>Find areas of shapes, and relate area to multiplication (e.g., why is the number of square feet for a 9-foot by 7-foot room given by the product 9 × 7?)</td>
<td></td>
<td>Graph points in the coordinate plane (two dimensions) to solve problems</td>
</tr>
</tbody>
</table>
### Third
- Mr. DeMaio’s Times Table Memorization YouTube video playlist: [https://www.youtube.com/playlist?list=PLb7Q-gsM9eh_fdDPQmVypyp4XRu-raUbHc](https://www.youtube.com/playlist?list=PLb7Q-gsM9eh_fdDPQmVypyp4XRu-raUbHc)
- Multiplicación Memorización Canción 1-10 en español: [https://youtube.com/HOQN3kmJodg](https://youtube.com/HOQN3kmJodg)
- If you have a set of standard measuring cups for dry or liquid measurements, compare the number of ¼ cups that will fill 1 cup with the number of ⅓ cups that will fill 1 cup. Estimate how many ½ cups will fill 10 cups. How can you test if your estimation is correct? You can also use measuring spoons!

### Fourth
- Khan Academy – Arithmetic: [https://www.khanacademy.org/math/arithmetic](https://www.khanacademy.org/math/arithmetic)
- Khan Academy en Español – Arithmetic: [https://es.khanacademy.org/math/arithmetic](https://es.khanacademy.org/math/arithmetic)
- Make your own fraction-decimal pairs memory game. On index cards or small slips of paper of the same size, write down some common fractions and decimal equivalents like, ½ and 0.5, 3/10 and 0.3, 4/5 and 0.8. Flip all of the cards upside down and try to make pairs by only looking at two cards at a time before flipping them back over.
- Converting Fractions to Decimals Game: [https://www.mathplayground.com/ASB_Puppy_Chase_Decimals.html](https://www.mathplayground.com/ASB_Puppy_Chase_Decimals.html)

### Fifth
- Khan Academy – Pre-Algebra: [https://www.khanacademy.org/math/pre-algebra](https://www.khanacademy.org/math/pre-algebra)
- Khan Academy en Español – Pre-Algebra: [https://es.khanacademy.org/math/pre-algebra](https://es.khanacademy.org/math/pre-algebra)
- Multiplying and dividing fractions is very different from adding and subtracting them! On a piece of paper, make a chart that lists the different methods you would use to add, subtract, multiply and divide: 5 ½ and 3 ¼ (Reminder: with addition and subtraction, you need a common denominator but with multiplication and division you do not). Answers: Addition = 8 ¾, Subtraction = 2 ¾, Multiplication = 17 7/8, Division = 1 9/13
