Office of Data and Accountability – Household Income Form (HIF) Dashboard School Job Aid

Welcome to the new Household Income Form (HIF) Dashboard. This dashboard replaces the old MTAM Dashboard found on FOCUS. This job aid is designed to provide schools with a quick overview of the dashboard and how to navigate the different reports and export data. It focuses on the two main reports schools will use, the Summary and Student Detail reports. We will continue to add functionality to this Dashboard. As updates are released, this job aid will be updated. The version number is at the end of the file name.

Descriptions:

Reports: These are the different report options available.

Global Filters: This is where you can filter the data as needed. For schools, the filters are limited since access is school specific.

TIP: The filters stay selected as you switch reports. They are global filters.

Tables and Charts: The tables and charts will change as you select different filters.

Summary Report

Summary Report

The Summary Report displays overall school counts and information. The counts include all students enrolled at the school, the students that need to have HIF collected in the current HIF Cycle, the students with completed HIF, the students missing a HIF, and the students with an incomplete HIF. The two charts indicate the percent complete toward the goal of 100% HIF collection.

Student Detail Report

Additional filters available in this report

The Student Detail Report contains a list of all students enrolled at a school. The filters allow you to search/filter by student ID, student name, filter for all students or just students in the current HIF collection cycle, and filter for the HIF collection status.

Click the 'three dots' icon for "More Options". Select "Export data" from the dropdown menu.

Which data do you want to export?

Export your data in the format that suits your needs. If you have a lot of data, the number of rows you export might be limited depending on the file type you select. Learn more about exporting data

Select "Summarized data" from the dialog box. Your data will be exported in an Excel spreadsheet.
