4. No Checkouts, Using Devices, No MDM Device. Data Updated: 1-10-2022

Sort by: Reset, Export

LAUSD IT Asset Management Job Aids | Google Data Studio

1. In section 1, you will see the following:

- Current logged in user
- Schools associated to the current logged in user (sites you have access to)
- Students without a device (students without a device at the site selected)

2. In section 2, it displays all the filters that can be applied which are:

- Filter by local district
- Filter by COS
- Filter by school name
- Filter by cost center

3. Section 3 displays the report which can be exported by clicking the 3 dots next to "export"

4. Section 4 displays the 3 reports available to assist with this task. The 3 reports are:

- **No checkouts** (student without a check out): List of students at your site with no device checked out to them in Remedy
- **Using devices** (student last used device): List of students who are using a device based on Mobile Device Management (MDM) data but is not checked out to the student in Remedy
- **No MDM device** (Student with no last known device): List of students at your site who are not connecting to a LAUSD device per MDM data
